UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

AMGEN INC.,
Petitioner,

v.

BRISTOL-MYERS SQUIBB COMPANY,
Patent Owner.

Case No. IPR2025-00603
Patent No. 11,332,529

DECLARATION OF SYLVIA D. HALL-ELLIS, PH.D.

Amgen Exhibit 1058
Amgen v. BMS

I. INTRODUCTION

1. My name is Sylvia D. Hall-Ellis. I have been retained as an expert by Wolf, Greenfield & Sacks, P.C. ("Wolf Greenfield").

2. I have written this report at the request of Wolf Greenfield to provide my expert opinion regarding the authenticity and public availability of certain journal publications and other related materials. My report sets forth my opinions in detail and provides the basis for my opinions regarding the public availability of these publications.

3. I reserve the right to supplement or amend my opinions, and bases for them, in response any additional evidence, testimony, discovery, argument, and/or other additional information that may be provided to me after the date of this report.

4. I am being compensated for my time spent working on this matter at my normal consulting rate of $400 per hour, plus reimbursement for any additional reasonable expenses. My compensation is not in any way tied to the content of this report, the substance of my opinions, or the outcome of this litigation. I have no other interests in this proceeding or with any of the parties.

5. All of the materials that I considered are discussed explicitly in this declaration.

II. QUALIFICATIONS

6. I am currently an Adjunct Professor in the School of Information at San José State University. I obtained a Master of Library Science from the University of North Texas in 1972 and a Ph.D. in Library and Information Science from the University of Pittsburgh in 1985. Over the last fifty years, I have held various positions in the field of library and information resources. I was first employed as a librarian in 1966 and have been involved in the field of library sciences since, holding numerous positions.

7. I am a member of the American Library Association (ALA) and its Association for Library Collections & Technical Services (ALCTS) Division, and I served on the Committee on Cataloging: Resource and Description (which wrote the new cataloging rules) and as the chair of the Committee for Education and Training of Catalogers and the Competencies and Education for a Career in Cataloging Interest Group. I also served as the Chair of the ALCTS Division's Task Force on Competencies and Education for a Career in Cataloging. Additionally, I have served as the Chair for the ALA Office of Diversity's Committee on Diversity, as a member of the national Board of Directors for REFORMA, as a member of the Editorial Board for the ALCTS premier cataloging journal, *Library Resources and Technical Services,* as a Co-Chair for the Library Research Round Table (LRRT) of ALA, and a member of the LRRT

Nominating Committee. Currently I serve as a member of the CORE Margaret Mann Citation Committee.

8. I have also given over one hundred presentations in the field, including several related to library cataloging systems and Machine-Readable Cataloging ("MARC") standards. My current research interests include library cataloging systems, metadata, and organization of electronic resources.

9. My full curriculum vitae is attached hereto as Attachment 1 to this report.

III. PRELIMINARIES

A. Scope of Declaration and Legal Standards

10. I am not an attorney and will not offer opinions on the law. I am, however, rendering my expert opinion on the authenticity of the documents referenced herein and when and how each of these documents was disseminated or otherwise made available to the extent that persons interested and ordinarily skilled in the subject matter or art, exercising reasonable diligence, could have located all documents discussed herein before June 3, 2015 aside from Exhibits 1034 and 1047, which such persons could have located before June 3, 2016.

11. I am informed by counsel that a printed publication qualifies as publicly accessible as of the date it was disseminated or otherwise made available such that a person interested in and ordinarily skilled in the relevant subject matter

could locate it through the exercise of ordinary diligence.

12. While I understand that the determination of public accessibility under the foregoing standard rests on a case-by-case analysis of the facts particular to an individual publication, I also understand that a printed publication is rendered "publicly accessible" if it is cataloged and indexed by a library such that a person interested in the relevant subject matter could locate it exercising reasonable diligence (*i.e.*, I understand that cataloging and indexing by a library in a manner that permits a person of ordinary skill in the relevant subject matter to locate the publication is sufficient, though there are other ways that a printed publication may qualify as publicly accessible). One manner of sufficient indexing is indexing according to subject matter category. I understand that the cataloging and indexing by a single library of a single instance of a particular printed publication is sufficient, even if the single library is in a foreign country. I understand that, even if access to a library is restricted, a printed publication that has been cataloged and indexed therein is publicly accessible so long as a presumption is raised that the portion of the public concerned with the relevant subject matter would know of the printed publication. I also understand that the cataloging and indexing of information that would guide a person interested in the relevant subject matter to the printed publication, such as the cataloging and indexing of an abstract for the printed publication, is sufficient to render the printed publication publicly

accessible.

13. I understand that routine business practices, such as general library cataloging and indexing practices, can be used to establish an approximate date on which a printed publication became publicly accessible.

B. Persons of ordinary skill in the art

14. I am told by counsel that the subject matter of this proceeding relates generally to methods of treating colorectal cancer using anti-PD-1 and anti-CTLA-4 antibodies.

15. I have been informed by counsel that a "person of ordinary skill in the art at the time of the invention" (POSITA) is a hypothetical person who is presumed to be familiar with the relevant field and its literature at the time of the inventions. This hypothetical person is also a person of ordinary creativity, capable of understanding the scientific principles applicable to the pertinent field.

16. I am told by counsel that persons of ordinary skill in this subject matter or art would have had a Ph.D. in immunology or a related field (or alternatively a M.D. with a particular focus on cancer immunotherapy) plus at least two years of experience in that field, including experience with colorectal cancer treatments; and that the levels of education, experience and knowledge can trade off against one another; and that POSITAs would also have either been (1) skilled

in pharmacokinetics or (2) able to communicate as part of a team with pharmacokinetics experts if necessary.

17. It is my opinion that such a person would have been engaged in research, learning through study and practice in the field and possibly through formal instruction the bibliographic resources relevant to his or her research. Before June 3, 2015, such a person would have had access to a vast array of long-established print resources, as well as to a rich set of online resources providing indexing information, abstracts, and full text services related to in methods of treating colorectal and other cancers, including by immunotherapy.

18. Based on my experience working in research libraries with researchers having the qualifications described above, or even lesser qualifications, it is my opinion that such researchers would have been able to locate the material discussed herein on their own or with the assistance of a research librarian with relative ease using the tools and resources described herein.

IV. LIBRARY CATALOGING PRACTICES

19. In preparing this declaration, I used authoritative databases, such as the OCLC bibliographic database, the Library of Congress Online Catalog, and the Library of Congress Subject Authorities, to confirm citation details of the various publications discussed. Unless I note otherwise below in reference to a specific serial publication, it is my expert opinion that this standard protocol was followed

for the serial publication discussed below.

20. Based on my experience working in research libraries with researchers having the qualifications described above, or even lesser qualifications, it is my opinion that such researchers would have been able to locate the material discussed herein on their own or with the assistance of a research librarian with relative ease using the tools and resources described herein.

A. INDEXING

21. A researcher may discover material relevant to his or her topic in a variety of ways. One common means of discovery is to search for relevant information in an index of periodical and other publications. Having found relevant material, the researcher will then normally obtain it online, look for it in libraries, or purchase it from the publisher, a bookstore, a document delivery service, or other provider. Sometimes, the date of a document's public accessibility will involve both indexing and library date information. However, date information for indexing entries is often unavailable. This is especially true for online indices.

22. Indexing services use a wide variety of controlled vocabularies to provide subject access and other means of discovering the content of documents. The formats in which these access terms are presented vary from service to service.

23. Online indexing services commonly provide bibliographic

information, abstracts, and full-text copies of the indexed publications, along with a list of the documents cited in the indexed publication. These services also often provide lists of publications that cite a given document. A citation of a document is evidence that the document was publicly available and in use by researchers no later than the publication date of the citing document.

24. Before the widespread development of online databases to index articles in journals, magazines, conference papers, and technical reports, libraries purchased printed volumes of indices. Graduate library school education mandated that students learn about the bibliographic control of disciplines, the prominent indexing volumes, and searching strategies required to use them effectively and efficiently. Half of the courses that I studied in library school were focused on bibliography and resources in academic disciplines.

25. Librarians consulted with information seekers to verify citations, check availability in union catalogs, printed books catalogs, the OCLC database, and make formal requests for materials (e.g., books, conference proceedings, journal articles). Requests were transmitted using Telex machines, rudimentary email systems, and the United States Postal Service. During my career, I have performed and supervised staff who handled these resource sharing tasks.

26. A major firm known for the breadth of subjects and comprehensive treatment in the preparation of index volumes, the H. W. Wilson Company offered

these reference resources since the firm was founded in 1898. The *Reader's Guide to Periodical Literature* is one of the best-known titles available from H. W. Wilson. Each volume includes a comprehensive index for 300 of the most popular and important periodicals published in the United States and Canada. Information seekers have subject access expressed in plain language terminology, author access, and cross references to find the desired results from their searches. The family of index titles included *Science & Technology Index*, *Business Periodicals*, *Applied Science & Technology Index, Humanities Index, Biological & Agricultural Index*, and *Industrial Arts Index*. These printed indices have been superseded by digital database offerings available to information seekers through Ebsco.

27. Information seekers also used printed versions of *Chemical Abstracts* and *Index Medicus* to locate articles, scientific reports, and research papers. *Chemical Abstracts* began publication in 1907 and by 2007 its databases "contained more than 27 million records of journal and patent literature."[1] In 2010, *Chemical Abstracts* discontinued the print index. Access is now available

---

[1] Chemical Abstracts Service, "CAS History," *available at* https://www.cas.org/about/cas-history (last accessed September 2, 2024); American Chemical Society, "Chemical Abstracts Service," *available at* https://www.acs.org/content/acs/en/education/whatischemistry/landmarks/cas.html (last accessed September 2, 2024).

through two electronic databases: *CAplus* and *Registry*.[2] *Index Medicus* is a bibliographic index to medical science information, started in 1879.[3] Currently, *PubMed* includes the content that had been published as *Index Medicus*.[4]

28. Established in 1836 as part of the Surgeon General of the Army's Office, the National Library of Medicine (NLM) has been instrumental in the development of access to medical books, journals, and research publications. In the 1970s, NLM introduced MEDLINE, followed by "the establishment of the National Center for Biotechnology Information in 1988, the introduction of free MEDLINE in 1997, the creation of consumer-friendly MedlinePlus in 1998, and

the introduction of ClinicalTrials.gov in 2000."[5]

29. A citation of a document by another is evidence that the document was publicly available and in use no later than the publication date of the citing document.

30. Online indexing services such as Google Scholar[6] or ScienceDirect[7] commonly provide bibliographic information, abstracts, and full-text copies of the indexed publications, along with a list of the documents cited in the indexed publication. These services also often provide lists of publications that cite a given document.

31. A researcher may discover material relevant to his or her topic in a variety of ways. A citation of a document by another is evidence that the document was publicly available and in use no later than the publication date of the citing document. One common means of discovery is to search for relevant information in an index of periodicals and other publications. Having found relevant material, the researcher will then normally obtain it online, look for it in libraries, or purchase it from a publisher, a bookstore, a document delivery service, or other

provider. Sometimes, the date of a document's public accessibility will involve both indexing and library date information. However, date information for indexing entries is often unavailable. This is especially true for online indices.

32. Indexing services use a wide variety of controlled vocabularies to provide subject access and other means of discovering the content of documents. The Library of Congress Subject Authorities includes standard forms of terms and cross references that are included in bibliographic records. Subject headings are terms that an individual seeking a document regardless of format can enter in the search bar of the online catalog. Subjects also connect an authenticated term (one included in the Library of Congress subject headings list) with related, broader, and narrower terms. The formats in which these access terms are presented vary from service to service.

33. Online indexing services commonly provide bibliographic information, abstracts, and full-text copies of the indexed publications, along with a list of the documents cited in the indexed publication. These services also often provide lists of publications that cite a given document. A citation of a document is evidence that the document was publicly available and in use by researchers no later than the publication date of the citing document. Prominent indexing services include *Scopus,* the *IEEE Xplore* database, the *ACM Digital Library, Google Scholar,* and the *Internet Archive*.

B. MARC RECORDS AND THE ONLINE LIBRARY CATALOG

34. I am fully familiar with the library cataloging standard known as the MARC standard, which is an industry-wide standard method of storing and organizing library catalog information.[8] MARC was first developed in the 1960s by the Library of Congress. A MARC-compatible library is one that has a catalog consisting of individual MARC records for each of its items. Today, MARC is the primary communications protocol for the transfer and storage of bibliographic metadata in libraries.[9]

35. Since at least the early 1970s and continuing to the present day, MARC has been the primary communications protocol for the transfer and storage

---

[8] The full text of the standard is available from the Library of Congress at http://www.loc.gov/marc/bibliographic/

[9] Almost every major library in the world is MARC-compatible. *See, e.g.*, *MARC Frequently Asked Questions (FAQ)*, Library of Congress, https://www.loc.gov/marc/faq.html (last visited September 2, 2024) ("MARC is the acronym for MAchine-Readable Cataloging. It defines a data format that emerged from a Library of Congress-led initiative that began nearly fifty years ago. It provides the mechanism by which computers exchange, use, and interpret bibliographic information, and its data elements make up the foundation of most library catalogs used today."). MARC is the ANSI/NISO Z39.2-1994 (reaffirmed 2016) standard for Information Interchange Format.

of bibliographic metadata in libraries.[10] As explained by the Library of Congress:

> You could devise your own method of organizing the bibliographic information, but you would be isolating your library, limiting its options, and creating much more work for yourself. Using the MARC standard prevents duplication of work and allows libraries to better share bibliographic resources. Choosing to use MARC enables libraries to acquire cataloging data that is predictable and reliable. If a library were to develop a "home-grown" system that did not use MARC records, it would not be taking advantage of an industry-wide standard whose primary purpose is to foster communication of information.
>
> Using the MARC standard also enables libraries to make use of commercially available library automation systems to manage library operations. Many systems are available for libraries of all sizes and are designed to work with the MARC format. Systems are maintained and improved by the vendor so that libraries can benefit from the latest advances in computer technology. The MARC standard also allows libraries to replace one system with another with the assurance that their data will still be compatible.

Why Is a MARC Record Necessary? LIBRARY OF CONGRESS. [11]

---

[10] A complete history of the development of MARC can be found in *MARC: Its History and Implications* by Henrietta D. Avram (Washington, DC: Library of Congress, 1975) and available online from the Hathi Trust (https://babel.hathitrust.org/cgi/pt?id=mdp.39015034388556;view=1up;seq=1; last visited September 2, 2024).

36. Thus, almost every major library in the world is MARC-compatible. *See, e.g.*, *MARC Frequently Asked Questions (FAQ)*, LIBRARY OF CONGRESS.[12] ("MARC is the acronym for MAchine-Readable Cataloging. It defines a data format that emerged from a Library of Congress-led initiative that began fifty years ago. It provides the mechanism by which computers exchange, use, and interpret bibliographic information, and its data elements make up the foundation of most library catalogs used today."). MARC is the ANSI/NISO Z39.2-1994 standard (reaffirmed in 2016) for Information Interchange Format. The full text of the standard is available from the Library of Congress.[13]

37. A MARC record comprises several fields, each of which contains specific data about the work. Each field is identified by a standardized, unique, three-digit code corresponding to the type of data that follow. For example, a work's title is recorded in Field 245; the primary author of the work is transcribed in Field 100; an item's International Standard Book Number ("ISBN") consisting of ten or thirteen digits is transcribed in Field 020; an item's International Standard Serial Number ("ISSN") is transcribed in Field 022; the Library of Congress classification notation is recorded in Field 050; and the publication date is recorded

---

[11] http://www.loc.gov/marc/umb/um01to06.html#part2

[12] https://www.loc.gov/marc/faq.html

[13] http://www.loc.gov/marc/bibliographic/

in Field 260 under the subfield "c." If a work is a periodical, then its publication frequency is recorded in Field 310, and the publication dates (e.g., the first and last publication) are recorded in Field 362, which is also referred to as the enumeration/chronology field.[14]

38. The library that created the record is recorded in Field 040 in subfield "a" with a unique library code. When viewing the MARC record online via Online Computer Library Center's ("OCLC") bibliographic database, hovering over this code with the mouse reveals the full name of the library. I used this method of "mousing over" the library codes in the OCLC database to identify the originating library for the MARC records discussed in this declaration. Where this "mouse over" option was not available, I consulted the Directory of OCLC Libraries to identify the institution that created the MARC record.[15]

39. MARC records also include several fields that include subject matter classification information. An overview of MARC record fields is available through the Library of Congress.[16] For example, 6XX fields are termed "Subject Access Fields."[17] Among these, for example, is the 650 field; this is the "Subject

---

[14] http://www.loc.gov/marc/bibliographic/bd3xx.html

[15] https://www.oclc.org/en/contacts/libraries.html

[16] http://www.loc.gov/marc/bibliographic/

[17] http://www.loc.gov/marc/bibliographic/bd6xx.html

Added Entry – Topical Term" field.[18] The 650 field is a "[s]ubject added entry in which the entry element is a topical term." These entries "are assigned to a bibliographic record to provide access according to generally accepted thesaurus-building rules (e.g., *Library of Congress Subject Headings* (LCSH), *Medical Subject Headings* (MeSH))." *Id.* Further, MARC records include call numbers, which themselves include a classification number. For example, the 050 field is the "Library of Congress Call Number."[19] A defined portion of the Library of Congress Call (LCC) Number is the classification number, and "source of the classification number is *Library of Congress Classification* and the *LC Classification-Additions and Changes*." Thus, included in the 050 field is a subject matter classification. Further, the 082 field is the "Dewey Decimal Call Number."[20] A defined portion of the Dewey Decimal Call (DDC) Number is the classification number, and "source of the classification number is the *Dewey Decimal Classification and Relative Index*." Thus, included in the 082 field is a subject matter classification. Each item in a library has a single classification number. A library selects a classification scheme (*e.g.*, the Library of Congress classification scheme just described or a similar scheme such as the Dewey Decimal

---

[18] http://www.loc.gov/marc/bibliographic/bd650.html

[19] http://www.loc.gov/marc/bibliographic/bd050.html

[20] http://www.loc.gov/marc/bibliographic/bd082.html

classification scheme) and uses it consistently. When the Library of Congress assigns the LCC classification number, it appears as part of the 050 field. When the Library of Congress assigns the DDC classification number, it appears as part of the 082 field. If a local library assigns the classification number, it appears in a 090 field. In either scenario, the MARC record includes a classification number that represents a subject matter classification.

C. OCLC

40. The OCLC was created "to establish, maintain and operate a computerized library network and to promote the evolution of library use, of libraries themselves, and of librarianship, and to provide processes and products for the benefit of library users and libraries, including such objectives as increasing availability of library resources to individual library patrons and reducing the rate of rise of library per-unit costs, all for the fundamental public purpose of furthering ease of access to and use of the ever-expanding body of worldwide scientific, literary and educational knowledge and information."[21] Among other services, OCLC and its members are responsible for maintaining the WorldCat database,[22]

---

[21] Third Article, Amended Articles of Incorporation of OCLC Online Computer Library Center, Incorporated (available at https://www.oclc.org/content/dam/oclc/membership/articles-of-incorporation.pdf).

[22] http://www.worldcat.org/

used by independent and institutional libraries throughout the world.

41. OCLC also provides its members online access to MARC records through its OCLC bibliographic database. When an OCLC member institution acquires a work, it creates a MARC record for this work in its computer catalog system in the ordinary course of its business. MARC records created at the Library of Congress are directly uploaded or may be tape-loaded into the OCLC database through a subscription to MARC Distribution Services daily or weekly. Once the MARC record is created by a cataloger at an OCLC member institution or is tape-loaded from a participating institution, the MARC record is then made available to any other OCLC members online, and therefore made available to the public. Accordingly, once the MARC record is created by a cataloger at an OCLC member institution or is tape-loaded from the Library of Congress or another library anywhere in the world, any publication corresponding to the MARC record has been cataloged and indexed according to its subject matter such that a person interested in that subject matter could, with reasonable diligence, locate and access the publication through any library with access to the OCLC bibliographic database or through the Library of Congress.

42. When an OCLC member institution creates a new MARC record, OCLC automatically supplies the date of creation for that record. The date of creation for the MARC record appears in the fixed field (008), characters 00

through 05. The MARC record creation date reflects the date on which, or shortly after which, the item was first acquired or cataloged. Initially, field 005 of the MARC record is automatically populated with the date the MARC record was created in year, month, day format (YYYYMMDD) (some of the newer library catalog systems also include hour, minute, second (HHMMSS)). Thereafter, the library's computer system may automatically update the date in field 005 every time the library updates the MARC record (*e.g.*, to reflect that an item has been moved to a different shelving location within the library). Field 005 is visible when viewing a MARC record via an appropriate computerized interface. The date upon which the most recent update to field 005. Thus, when an item's MARC record has been printed to hardcopy—as is the case with the exhibits to this report—the date reflected in field 008 is necessarily on or after the date the library first cataloged and indexed the underlying item.

43. Once one library has cataloged and indexed a publication by creating a MARC record for that publication, other libraries that receive the publication do not create additional MARC records—the other libraries instead rely on the original MARC record. They may update or revise the MARC record to ensure accuracy, but they do not replace or duplicate it. This practice does more than save libraries from duplicating labor. It also enhances the accuracy of MARC records. Further, it allows librarians around the world to know that a particular MARC

record is authoritative (in contrast, a hypothetical system wherein duplicative records were created would result in confusion as to which record is authoritative).

44. The date of creation of the MARC record by a cataloger at an OCLC member institution reflects when the underlying item is accessible to the public. Upwards of two-thirds to three-quarters of book sales to libraries come from a jobber or wholesaler for online and print resources. These resellers make it their business to provide books to their customers as fast as possible, often providing turnaround times of only a single day after publication. Libraries purchase a significant portion of the balance of their books directly from publishers themselves, which provide delivery on a similarly expedited schedule. In general, libraries make these purchases throughout the year as the books are published and shelve the books as soon thereafter as possible in order to make the books available to their patrons. Thus, books are generally available at libraries across the country within just a few days of publication.

V. PUBLICATIONS

A. Document 1: Exhibit 1006 ("Zhang")

45. Exhibit 1006 is a copy of the journal article titled "Era of Universal Testing of Microsatellite Instability in Colorectal Cancer" by Xuchen Zhang and Jia Li (hereafter "Zhang"). The Zhang article was published in Volume 5, Issue 2 of the open access publication titled *World Journal of Gastrointestinal Oncology*

and was found in the National Library of Medicine (Bethesda, Maryland). The Zhang article appears beginning on page 12 of this issue dated February 15, 2013. Exhibit 1006 is a true and correct copy of the Zhang article (pages 12-19) that I downloaded from the publisher's website.[23] Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Zhang article is available through the National Library of Medicine[24] and from the publisher, Baishideng Publishing Group.[25] Exhibit 1006 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1006 is a true and correct copy in a condition that creates no suspicion about its authenticity.

46. Attached hereto as Attachment 1A is a true and correct copy of the MARC record for the open access publication titled *World Journal of Gastrointestinal Oncology* from the National Library of Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in field 935. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to

---

[23] https://www.wjgnet.com/1948-5204/full/v5/i2/12.htm

[24] https://pmc.ncbi.nlm.nih.gov/articles/PMC3613766/

[25] https://www.wjgnet.com/1948-5204/full/v5/i2/12.htm

Attachment 1A occurred on June 9, 2024, as shown in field 005 ("20240609"). I personally identified and retrieved the MARC record that is Attachment 1A.

47. Based on finding a digital copy of Exhibit 1006 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 1A, it is my opinion that the Zhang article published in the open access publication titled *World Journal of Gastrointestinal Oncology* was publicly available on February 15, 2013, as shown on the publisher's website (Exhibit 1006, page 1).

48. Attachment 1A includes an entry in field 060 ("W1"), a subject matter consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 1A also shows that Exhibit 1006 was catalogued with a descriptor term reading "Gastrointestinal Neoplasms $v periodical" (see Attachment 1B, National Library of Medicine subject heading D005770) in the 650 field.

49. As noted in the holdings information (362 field), the National Library of Medicine has received the open access publication titled *World Journal of Gastrointestinal Oncology* since 2009 and continues to receive the publication. In view of the MARC record for Exhibit 1006, the Zhang article was publicly available on February 15, 2013, because the serial title had been received, cataloged, and indexed in the National Library of Medicine and made part of its

online catalog database.

50. Attached hereto as Attachment 1C is a true and correct copy of the MARC record for the open access publication titled *World Journal of Gastrointestinal Oncology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 1C, that library code is "NSD," which means that the MARC record for this serial was cataloged as part of the National Serials Data Program at the Library of Congress. As can be seen in field 008 for this exhibit ("Date entered on file"), a cataloger at the Library of Congress created OCLC record number 320322540 on May 6, 2009, as shown in field 008 ("090506"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 1C occurred on February 3, 2023, as shown in field 005 ("20230203"). I personally identified and retrieved the MARC record that is Attachment 1C. The "BLvl" entry in Attachment 1C is "s," which indicates that the open access publication titled *World Journal of Gastrointestinal Oncology* is a serial publication. Field 310 of Attachment 1C reads "Monthly." Accordingly, the MARC record for Exhibit 1006 corresponds to the open access publication titled *World Journal of Gastrointestinal Oncology* from the time the serial title began and includes the date of the Zhang article.

51. Attachment 1C includes an entry in field 050 ("RC280 $b .D5")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), and an entry in field 060 ("W1"), a subject matter consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616"), a subject matter consistent with the Dewey Decimal classification system. Attachment 1C also shows that Exhibit 1006 was catalogued with two descriptor terms reading "Gastrointestinal system $x Cancer $v Periodicals" (see Attachment 1D, Library of Congress subject heading sh2010009172 and Attachment 1E, Library of Congress subject heading sh85099890) and "Gastrointestinal Neoplasms $v periodical" (see Attachment 1B, National Library of Medicine subject heading D005770) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 1C was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of May 6, 2009, the MARC record attached hereto as Attachment 1C was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date

through any library with access to the OCLC bibliographic database or through an individual library.

52. WorldCat indicates that the open access publication titled *World Journal of Gastrointestinal Oncology* as cataloged at the Library of Congress is currently available from 478 libraries.[26] In view of the above, this issue of the open access publication titled *World Journal of Gastrointestinal Oncology* was publicly available on February 15, 2013, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received in the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1006 was published and accessible to the public on February 15, 2013.

B. Document 2: Exhibit 1008 ("Le")

53. Exhibit 1008 is a copy of the journal article titled "PD-1 Blockade in Tumors with Mismatch-Repair Deficiency" by Dung T. Le, Jennifer N. Uram, Hao Wang, Bjarne R. Bartlett, Holly Kemberling, Aleksandra D. Eyring, Andrew D. Skora, Brandon S. Luber, Nilofer S. Azad, Dan Laheru, Barbara Biedrzycki, Ross C. Donehower, Atif Zaheer, George A. Fisher, Todd S. Crocenzi, James J. Lee, Steven M. Duffy, Richard M. Goldberg, Albert de la Chapelle, Minori Koshiji, Feriyl Bhaijee, Thomas Huebner, Ralph H. Hruban, Laura D. Wood, Nathan Cuka,

[26] https://search.worldcat.org/title/320322540

Drew M. Pardoll, Nickolas Papadopoulos, Kenneth W Kinzler, Shibin Zhou, Toby C. Cornish, Janis M. Taube, Robert A. Anders, James R. Eshleman, Bert Vogelstein, and Luis A. Diaz, Jr. (hereafter "Le"). The Le article was published in Volume 372, Number 26 of *The New England Journal of Medicine* and was found in the Library of Congress. The Le article appears beginning on page 2509 of this issue dated June 25, 2015. Exhibit 1008 is a true and correct copy of the Le article (pages 2509-2520). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Le article is available from the publisher,[27] the Massachusetts Medical Society, and through the National Library of Medicine.[28] The digital version of the Le article was publicly available on May 30, 2015, as indicated on the publisher's website and on page 2509 of Exhibit 1008. Exhibit 1008 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1008 is a true and correct copy in a condition that creates no suspicion about its authenticity.

54. Attached hereto as Attachment 2A is a true and correct copy of the MARC record for *The New England Journal of Medicine* from the Library of Congress online catalog. Library ownership is indicated by the presence of the

---

[27] https://www.nejm.org/doi/full/10.1056/NEJMoa1500596

[28] https://pubmed.ncbi.nlm.nih.gov/26028255/

library's name at the top of each page. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 2A occurred on August 22, 2024, as shown in field 005 ("20240822"). I personally identified and retrieved the MARC record that is Attachment 2A.

55. Based on finding a print copy of Exhibit 1008 in the Library of Congress and MARC record in its online library catalog attached as Attachment 2A, it is my opinion that the Le article published in *The New England Journal of Medicine* was publicly available in print on June 25, 2015, as shown by the label on the cover (Exhibit 1008, page 2). This date stamp has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked.

56. Attachment 2A includes an entry in field 050 ("R11 $b .B7")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b NE388")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("610/.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 2A

also shows that Exhibit 1008 was catalogued with two descriptor terms reading "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject heading sh2008107665) and "Surgery $v Periodicals" (see Attachment 2C, Library of Congress subject heading sh2008112392) in the 650 fields.

57. As noted in the holdings information (362 field), the Library of Congress has received *The New England Journal of Medicine* since 1928 and continues to receive the publication.[29] In view of the MARC record for Exhibit 1008, the Le article was publicly available on June 25, 2015, because the serial title had been received, cataloged, and indexed at the Library of Congress and made part of its online catalog database.

58. Attached hereto as Attachment 2D is a true and correct copy of the MARC record for *The New England Journal of Medicine* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 2D, that library code is "MUL," which means that the MARC record for this serial was cataloged as part of the Minnesota Union List of Serials at the University of Minnesota Libraries (Minneapolis, Minnesota). As can be seen in field 008 ("Date entered on

---

[29] The publication was originally titled the *Boston Medical and Surgical Journal* (February 1828-February 1928) and adopted the current title, *The New England Journal of Medicine,* in February 1928.

file"), a cataloger at the University of Minnesota Libraries created OCLC record number 1587974 on September 1, 1975 ("750901"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 2D occurred on August 20, 2024, as shown in field 005 ("20240820"). I personally identified and retrieved the MARC record that is Attachment 2D. The "BLvl" entry in Attachment 2D is "s," which indicates that *The New England Journal of Medicine* is a serial publication. Field 310 of Attachment 2D reads "Weekly." Accordingly, the MARC record for Exhibit 1008 corresponds to *The New England Journal of Medicine* from the time the serial title adopted the current title and includes the date of the Le article.

59. Attachment 2D includes an entry in 050 ("R11 $b .B7")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b NE388")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("610/.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 2D also shows that Exhibit 1008 was catalogued with two descriptor terms reading "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject

heading sh2008107665) and "Surgery $v Periodicals" (see Attachment 2C, Library of Congress subject heading sh2008112392) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 2D was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of September 1, 1975, the MARC record attached hereto as Attachment 2D was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

60. WorldCat indicates that *The New England Journal of Medicine* as cataloged at the University of Minnesota Libraries is currently available from 3,970 libraries.[30] In view of the above, this issue of *The New England Journal of Medicine* was publicly available online on May 30, 2015, and in print on June 25, 2015, because by these dates it had been cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received at the Library of Congress. For these reasons, it is my opinion that Exhibit 1008 was published and accessible to the public digitally on May 30, 2015, and in print

[30] https://search.worldcat.org/title/1587974

on June 25, 2015.

C. Document 3: Exhibit 1032 ("Le appendix")

61. Exhibit 1032 is a copy of the supplementary appendix to the journal article titled "PD-1 Blockade in Tumors with Mismatch-Repair Deficiency" by Dung T. Le, Jennifer N. Uram, Hao Wang, Bjarne R. Bartlett, Holly Kemberling, Aleksandra D. Eyring, Andrew D. Skora, Brandon S. Luber, Nilofer S. Azad, Dan Laheru, Barbara Biedrzycki, Ross C. Donehower, Atif Zaheer, George A. Fisher, Todd S. Crocenzi, James J. Lee, Steven M. Duffy, Richard M. Goldberg, Albert de la Chapelle, Minori Koshiji, Feriyl Bhaijee, Thomas Huebner, Ralph H. Hruban, Laura D. Wood, Nathan Cuka, Drew M. Pardoll, Nickolas Papadopoulos, Kenneth W Kinzler, Shibin Zhou, Toby C. Cornish, Janis M. Taube, Robert A. Anders, James R. Eshleman, Bert Vogelstein, and Luis A. Diaz, Jr. (hereafter "Le appendix"). The Le article was published in Volume 372, Number 26 of *The New England Journal of Medicine* and was found in the Library of Congress. The Le article appears beginning on page 2509 of this issue dated June 25, 2015. Exhibit 1032 is a true and correct copy of the Le article supplementary appendix (25 pages), which is identified in the "Study Design" section of EX1008 on page 2512. The supplementary appendix can be downloaded from the digital version of the Le

article on the publisher's website.[31] I downloaded the supplementary appendix from the *New England Journal of Medicine* (publisher) website, and Exhibit 1032 is a true and correct copy in a condition that creates no suspicion about its authenticity.

62. In view of the above, this issue of *The New England Journal of Medicine* was publicly available online on May 30, 2015, as indicated on the publisher's website, and had been cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received at the Library of Congress. For these reasons, it is my opinion that Exhibit 1032 was published and accessible to the public digitally on May 30, 2015.

D. Document 4: Exhibit 1040 ("Le protocol")

63. Exhibit 1040 is a copy of the protocol to the journal article titled "PD-1 Blockade in Tumors with Mismatch-Repair Deficiency" by Dung T. Le, Jennifer N. Uram, Hao Wang, Bjarne R. Bartlett, Holly Kemberling, Aleksandra D. Eyring, Andrew D. Skora, Brandon S. Luber, Nilofer S. Azad, Dan Laheru, Barbara Biedrzycki, Ross C. Donehower, Atif Zaheer, George A. Fisher, Todd S. Crocenzi, James J. Lee, Steven M. Duffy, Richard M. Goldberg, Albert de la Chapelle, Minori Koshiji, Feriyl Bhaijee, Thomas Huebner, Ralph H. Hruban, Laura D. Wood, Nathan Cuka, Drew M. Pardoll, Nickolas Papadopoulos, Kenneth W

[31] https://www.nejm.org/doi/full/10.1056/NEJMoa1500596

Kinzler, Shibin Zhou, Toby C. Cornish, Janis M. Taube, Robert A. Anders, James R. Eshleman, Bert Vogelstein, and Luis A. Diaz, Jr. (hereafter "Le protocol"). The Le article was published in Volume 372, Number 26 of *The New England Journal of Medicine* and was found in the Library of Congress. The Le article appears beginning on page 2509 of this issue dated June 25, 2015. Exhibit 1040 is a true and correct copy of the Le article protocol (226 pages), which is identified in the "Study Design" section of EX1008 on page 2512. The protocol can be downloaded from the digital version of the Le article on the publisher's website.[32] I downloaded the protocol from the *New England Journal of Medicine* (publisher) website, and Exhibit 1040 is a true and correct copy in a condition that creates no suspicion about its authenticity.

64. In view of the above, this issue of *The New England Journal of Medicine* was publicly available online on May 30, 2015, as indicated on the publisher's website, and had been cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received at the Library of Congress. For these reasons, it is my opinion that Exhibit 1040 was published and accessible to the public digitally on May 30, 2015.

E. Document 5: Exhibit 1009, ("Hammers")

65. Exhibit 1009 is a copy of a poster discussion session titled "Expanded

[32] https://www.nejm.org/doi/full/10.1056/NEJMoa1500596

Cohort Results from CheckMate 016: A Phase I Study of Nivolumab in Combination with Ipilimumab in Metastatic Renal Cell Carcinoma (mRCC)" by Hans J. Hammers, Elizabeth R. Plimack, Jeffrey R. Infante, Brian I. Rini, David F. McDermott, Marc Ernstoff, Martin Henner Voss, Padmanee Sharma, Sumanta Kumar Pal, Albiruni R. A. Razak, Christian K. Kollmannsberger, Daniel Yick Chin Heng, Jennifer L. Spratlin, Yun Shen, Paul Gagnier, and Asim Amin (hereafter "Hammers"). The Hammers poster discussion session was published in Volume 33, Issue 15S, Part 1 of 2 of the *Journal of Clinical Oncology* and was found in the National Library of Medicine (Bethesda, Maryland). The Hammers poster session discussion appears on page 251s of this issue dated May 20, 2015. Exhibit 1009 is a true and correct copy of the Hammers poster discussion session, which is identified as abstract 4516 as a part of Genitourinary (Nonprostate) Cancer presentations. Specifically, the text of the poster discussion session is complete; no pages are missing, and the text flow seamlessly; further, there are no visible alterations to the document. The Hammers poster discussion session is available from the publisher,[33] ASCO Publications of the American Society of Clinical Oncology, and the digital repository *ResearchGate*.[34] The Hammers poster

---

[33] https://ascopubs.org/doi/10.1200/jco.2015.33.15_suppl.4516

[34] https://www.researchgate.net/publication/331597464_Expanded_cohort_results_fr

discussion was publicly available on May 20, 2015, as indicated on the publisher's website. Exhibit 1009 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1009 is a true and correct copy in a condition that creates no suspicion about its authenticity.

66. Attached hereto as Attachment 5A is a true and correct copy of the MARC record for the *Journal of Clinical Oncology* from the National Library of Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in field 935. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 5A occurred on June 8, 2024, as shown in field 005 ("20240608"). I personally identified and retrieved the MARC record that is Attachment 5A.

67. Based on finding a print copy of Exhibit 1009 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 5A, it is my opinion that the Hammers posted discussion session published in the *Journal of Clinical Oncology* was publicly available on May 20, 2015, as shown on the cover (Exhibit 1009, page 1).

68. Attachment 5A includes an entry in field 060 ("W1 $b JO5894H")—as described above, a subject matter classification number consistent with the

---

om_CheckMate_016_A_phase_I_study_of_nivolumab_in_combination_with_ipilimumab_in_metastatic_renal_cell_carcinoma_mRCC

National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 5A also shows that Exhibit 1009 was catalogued with a descriptor term reading "Medical Oncology $v periodical" (see Attachment 5B, National Library of Medicine subject heading D008495) in the 650 field.

69. As noted in the holdings information (362 field), the National Library of Medicine has received the *Journal of Clinical Oncology* since 1983 and continues to receive the publication. In view of the MARC record for Exhibit 1009, the Hammers poster discussion session was publicly available on May 20, 2015, because the serial title had been received, cataloged, and indexed at the National Library of Medicine and made part of its online catalog database.

70. Attached hereto as Attachment 5C is a true and correct copy of the MARC record for the *Journal of Clinical Oncology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 5C, that library code is "NSD," which means that the MARC record for this serial was cataloged as part of the National Serials Data Program at the Library of Congress. As can be seen in field 008 ("Date entered on file"), a cataloger at the Library of Congress created OCLC record number 8320014 on April 8, 1982 ("820408"). The library continues to update and enhance this MARC record to meet current cataloging

rules. The most recent enhancement to Attachment 5C occurred on April 15, 2024, as shown in field 005 ("20240415"). I personally identified and retrieved the MARC record that is Attachment 5C. The "BLvl" entry in Attachment 5C is "s," which indicates that the *Journal of Clinical Oncology* is a serial publication. Field 310 of Attachment 5C reads "Three times a month, $b 2005-." Accordingly, the MARC record for Exhibit 1009 corresponds to the *Journal of Clinical Oncology* from the time the serial title began and includes the date of the Hammers poster session discussion.

71. Attachment 5C includes an entry in 050 ("RC254.A1 $b J68")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b JO5894H")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 5C also shows that Exhibit 1009 was catalogued with two descriptor terms reading "Oncology $v Periodicals" (see Attachment 5D, Library of Congress subject heading sh2010104402) and "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) in the 650 fields. Thus, as of its

cataloging, the publication corresponding to the MARC record attached hereto as Attachment 5C was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of April 8, 1982, the MARC record attached hereto as Attachment 5C was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

72. WorldCat indicates that the *Journal of Clinical Oncology* as cataloged at the Library of Congress is currently available from 1,030 libraries.[35] In view of the above, this issue of the *Journal of Clinical Oncology* was publicly available on May 20, 2015, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1009 was published and accessible to the public on May 20, 2015.

F. Document 6: Exhibit 1010 ("Xiao")

73. Exhibit 1010 is a copy of the journal article titled "The Microsatellite Instable Subset of Colorectal Cancer Is a Particularly Good Candidate for

[35] https://search.worldcat.org/title/8320014

Checkpoint Blockade Immunotherapy" by Yanping Xiao and Gordon J. Freeman (hereafter "Xiao"). The Xiao article was published in Volume 5, Number 1 of the journal titled *Cancer Discovery* and was found in the Library of Congress. The Xiao article appears beginning on page 16 of this issue dated January 2015. Exhibit 1010 is a true and correct copy of the Xiao article (pages 16-18). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Xiao article is also available from the publisher, the American Association for Cancer Research[36] and through the National Library of Medicine.[37] The publisher's website indicates a January 11, 2015, publication date. Exhibit 1010 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1010 is a true and correct copy in a condition that creates no suspicion about its authenticity.

74. Attached hereto as Attachment 6A is a true and correct copy of the MARC record for the journal titled *Cancer Discovery* at the Library of Congress online catalog. Library ownership is indicated by the presence of the library's name at the top of each page. The library continues to update this MARC record

---

[36] https://aacrjournals.org/cancerdiscovery/article/5/1/16/4584/The-Microsatellite-Instable-Subset-of-Colorectal

[37] https://pubmed.ncbi.nlm.nih.gov/25583798/

and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 6A occurred on June 5, 2017, as shown in field 005 ("20170605"). I personally identified and retrieved the MARC record that is Attachment 6A.

75. Based on finding a print copy of Exhibit 1010 in the Library of Congress and MARC record in its online library catalog attached as Attachment 6A, it is my opinion that the Xiao article published in the journal titled *Cancer Discovery* was publicly available on January 11, 2015, as indicated on the publisher's website.

76. Attachment 6A includes an entry in 050 ("RC261.A1 $b C3747")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CA679J")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 6A also shows that Exhibit 1010 was catalogued with two descriptor terms reading "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) and "Neoplasms" (see Attachment 6B, National Library of

Medicine subject heading D009369) in the 650 fields.

77. As noted in the holdings information (362 field), the Library of Congress has received the journal titled *Cancer Discovery* since 2011 and continues to receive the publication. In view of the MARC record for Exhibit 1010, the Xiao article was publicly available on January 11, 2015, because the serial title had been received, cataloged, and indexed at the Library of Congress and made part of its online catalog database.

78. Attached hereto as Attachment 6C is a true and correct copy of the MARC record for the journal titled *Cancer Discovery* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 6C, that library code is "DLC," which means that the MARC record for this serial was cataloged at the Library of Congress. As can be seen in field 008 ("110208") of the MARC record for this exhibit, a cataloger at the Library of Congress created OCLC record number 701084307 on February 8, 2011. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 6C occurred on March 15, 2016, as shown in field 005 ("20160315"). I personally identified and retrieved the MARC record that is Attachment 6C. The "BLvl" entry in Attachment 6C is "s," which indicates that the journal titled *Cancer Discovery* is a serial publication. Field 310 of

Attachment 6C reads "Monthly." Accordingly, the MARC record for Exhibit 1010 corresponds to the journal titled *Cancer Discovery* from the time the serial title began and includes the date of the Xiao article.

79. Attachment 6C includes an entry in 050 ("RC261.A1 $b C3747")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CA679J")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 6C also shows that Exhibit 1010 was catalogued with two descriptor terms reading "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) and "Neoplasms" (see Attachment 6B, National Library of Medicine subject heading D009369) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 6C was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of February 8, 2011, the MARC record attached hereto as Attachment 6C was accessible through any library with

access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

80. WorldCat indicates that the journal titled *Cancer Discovery* as cataloged at the Library of Congress is currently available from 299 libraries.[38] In view of the above, this issue of the journal titled *Cancer Discovery* was publicly available on January 11, 2015, because by that date it had been received, cataloged, and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received in the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1010 was published and accessible to the public on January 11, 2015.

G. Document 7: Exhibit 1011 ("Larkin")

81. Exhibit 1011 is a copy of the journal article titled "Combined Nivolumab and Ipilimumab or Monotherapy in Untreated Melanoma" by James Larkin, Vanna Chiarion-Sileni, Rene Gonzalez, Jean Jacques Grob, C. Lance Cowey, Christopher D. Lao, Dirk Schadendorf, Reinhard Dummer, Michael Smylie, Piotr Rutkowski, Pier F. Ferrucci, Andrew Hill, John Wagstaff, Matteo S. Carlino, John B. Haanen, Michele Maio, Ivan Marquez-Rodas, Grant A. McArthur,

[38] https://search.worldcat.org/title/701084307

Paolo A. Ascierto, Georgina V. Long, Margaret K. Callahan, Michael A. Postow, Kenneth Grossmann, Mario Sznol, Brigitte Dreno, Lars Bastholt, Arvin Yang, Linda M. Rollin, Christine Horak, F. Stephen Hodi, and Jedd D. Wolchok (hereafter "Larkin"). The Larkin article was published in Volume 373, Number 1 of *The New England Journal of Medicine* and was found in the Library of Congress. The Larkin article appears beginning on page 23 of this issue dated July 2, 2015. Exhibit 1011 is a true and correct copy of the Larkin article (pages 23-34). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Larkin article is available from the publisher,[39] the Massachusetts Medical Society, and through the National Library of Medicine.[40] The digital version of the Larkin article was publicly available online on May 31, 2015 as indicated on the publisher's website and on page 23 of Exhibit 1011. The article was also available in print on July 2, 2015, as indicated on the publisher's website and Exhibit 1011. Exhibit 1011 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1011 is a true and correct copy in a condition that creates

[39] https://www.nejm.org/doi/10.1056/NEJMoa1504030?url_ver=Z39.88-2003&rfr_id=ori:rid:crossref.org&rfr_dat=cr_pub%20%200www.ncbi.nlm.nih.gov

[40] https://pubmed.ncbi.nlm.nih.gov/26027431/

no suspicion about its authenticity.

82. Attached hereto as Attachment 7A is a true and correct copy of the MARC record for *The New England Journal of Medicine* from the Library of Congress online catalog. Library ownership is indicated by the presence of the library's name at the top of each page. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 7A occurred on August 22, 2024, as shown in field 005 ("20240822"). I personally identified and retrieved the MARC record that is Attachment 7A.

83. Based on finding a print copy of Exhibit 1011 in the Library of Congress and MARC record in its online library catalog attached as Attachment 7A, it is my opinion that the Larkin article published in *The New England Journal of Medicine* was publicly available in print on July 2, 2015, as shown by the label on the cover (Exhibit 1011, page 2). This date stamp has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked.

84. Attachment 7A includes an entry in field 050 ("R11 $b .B7")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b NE388")—as described above, a subject

matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("610/.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 7A also shows that Exhibit 1011 was catalogued with two descriptor terms reading "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject heading sh2008107665) and "Surgery $v Periodicals" (see Attachment 2C, Library of Congress subject heading sh2008112392) in the 650 fields.

85. As noted in the holdings information (362 field), the Library of Congress has received *The New England Journal of Medicine* since 1928 and continues to receive the publication.[41] In view of the MARC record for Exhibit 1011, the Larkin article was publicly available on July 2, 2015, because the serial title had been received, cataloged, and indexed at the Library of Congress and made part of its online catalog database.

86. Attached hereto as Attachment 7B is a true and correct copy of the MARC record for *The New England Journal of Medicine* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is

---

[41] The publication was originally titled the *Boston Medical and Surgical Journal* (February 1828-February 1928) and adopted the current title, *The New England Journal of Medicine,* in February 1928.

recorded in field 040 with a unique library code. For Attachment 7B, that library code is "MUL," which means that the MARC record for this serial was cataloged as part of the Minnesota Union List of Serials at the University of Minnesota Libraries (Minneapolis, Minnesota). As can be seen in field 008 ("Date entered on file"), a cataloger at the University of Minnesota Libraries created OCLC record number 1587974 on September 1, 1975 ("750901"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 7B occurred on August 20, 2024, as shown in field 005 ("20240820"). I personally identified and retrieved the MARC record that is Attachment 7B. The "BLvl" entry in Attachment 7B is "s," which indicates that *The New England Journal of Medicine* is a serial publication. Field 310 of Attachment 7B reads "Weekly." Accordingly, the MARC record for Exhibit 1011 corresponds to *The New England Journal of Medicine* from the time the serial title adopted the current title and includes the date of the Larkin article.

87. Attachment 7B includes an entry in 050 ("R11 $b .B7")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b NE388")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and

an entry in field 082 ("610/.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 7B also shows that Exhibit 1011 was catalogued with two descriptor terms reading "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject heading sh2008107665) and "Surgery $v Periodicals" (see Attachment 2C, Library of Congress subject heading sh2008112392) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 7B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of September 1, 1975, the MARC record attached hereto as Attachment 7B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

88. WorldCat indicates that *The New England Journal of Medicine* as cataloged at the University of Minnesota Libraries is currently available from 3,970 libraries.[42] In view of the above, this issue of *The New England Journal of Medicine* was publicly available on July 2, 2015, because by that date it had been

[42] https://search.worldcat.org/title/1587974

cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received at the Library of Congress. For these reasons, it is my opinion that Exhibit 1011 was published and accessible to the public online on May 31, 2015 and in print on July 2, 2015.

H. Document 8: Exhibit 1012 ("Curran")

89. Exhibit 1012 is a copy of the journal article titled "PD-1 and CTLA-4 combination blockade expands infiltrating T cells and reduces regulatory T and myeloid cells within B16 melanoma tumors" by Michael A. Curran, Welby Montalvo, Hideo Yagita, and James P. Allison (hereafter "Curran"). The Curran article was published in Volume 107, Number 9 of the *Proceedings of the National Academy of Sciences of the United States of America* and was found in the National Library of Medicine (Bethesda, Maryland). The Curran article appears beginning on page 4275 of this issue dated March 2, 2010. Exhibit 1012 is a true and correct copy of the Curran article (pages 4275-4280). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Curran article is also available from the publisher, the National Academy of Sciences,[43] through the National Library of Medicine,[44] and

National Academy of Sciences of the United States of America was publicly available online on February 16, 2010, as indicated on the publisher's website and in print on March 23, 2010, shown by the label on the cover. This date stamp has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked. Attachment 8A also shows that Exhibit 1012 was catalogued with a descriptor term reading "Science $v periodical" (see Attachment 8B, National Library of Medicine subject heading D01258) in the 650 field.

92. As noted in the holdings information (362 field), the National Library of Medicine has received the *Proceedings of the National Academy of Sciences of the United States of America* since 1915 and continues to receive the publication. In view of the MARC record for Exhibit 1012, the Curran article was publicly available online on February 16, 2010, and in print on March 23, 2010, because the serial title had been received, cataloged, and indexed at the National Library of Medicine and made part of its online catalog database.

93. Attached hereto as Attachment 8C is a true and correct copy of the MARC record for the *Proceedings of the National Academy of Sciences of the United States of America* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 8C, that library code is "MULS," which

means that the MARC record for this serial was cataloged as part of the Minnesota Union List of Serials at the University of Minnesota Libraries (Minneapolis, Minnesota). As can be seen in field 008 ("Date entered on file") of the MARC record for this exhibit, a cataloger at the University of Minnesota Libraries created OCLC record number 1607201 on September 7, 1975 ("750907"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 8C occurred on June 15, 2023, as shown in field 005 ("20230615"). I personally identified and retrieved the MARC record that is Attachment 8C. The "BLvl" entry in Attachment 8C is "s," which indicates that the *Proceedings of the National Academy of Sciences of the United States of America* is a serial publication. Field 310 of Attachment 8C reads "Weekly, $b 2004-." Accordingly, the MARC record for Exhibit 1012 corresponds to the *Proceedings of the National Academy of Sciences of the United States of America* from the time the serial title began and includes the date of the Curran article.

94. Attachment 8C includes an entry in field 060 ("W1 $b PR586A"), a subject matter consistent with the National Library of Medicine classification system and an entry in field 082 ("505")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 8C further includes a descriptor term reading "Science $v Periodicals"

(see Attachment 8D, Library of Congress subject heading sh85118580) in the 650 field. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 8C was indexed according to its subject matter by virtue of at least three independently sufficient classifications: the field 060 entry, the field 082 entry, and the field 650 entry. As of September 7, 1975, the MARC record attached hereto as Attachment 8C was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

95. WorldCat indicates that the *Proceedings of the National Academy of Sciences of the United States of America* as cataloged at the University of Minnesota Libraries is currently available from 1,968 libraries.[47] In view of the above, this issue of the *Proceedings of the National Academy of Sciences of the United States of America* was publicly available online on February 16, 2010, and in print on March 23, 2010, because by these dates it had been cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1012 was published and accessible to

[47] https://search.worldcat.org/title/1607201

the public online on February 16, 2010, and in print on March 23, 2010.

I. Document 9: Exhibit 1013 ("Wolchok")

96. Exhibit 1013 is a copy of the journal article titled "Nivolumab Plus Ipilimumab in Advanced Melanoma" by Jedd D. Wolchok, Harriet Kluger, Margaret K. Callahan, Michael A. Postow, Naiyer A. Rizvi, Alexander M. Lesokhin, Neil H. Segal, Charlotte E. Ariyan, Ruth-Ann Gordon, Kathleen Reed, Matthew M. Burke, Anne Caldwell, Stephanie A. Kronenberg, Blessing U. Agunwamba, Xiaoling Zhang, Israel Lowy, Hector David Inzunza, William Feely, Christine E. Horak, Quan Hong, Alan J. Korman, Jon M. Wigginton, Ashok Gupta, and Mario Sznol (hereafter "Wolchok"). The Wolchok article was published in Volume 369, Number 2 of *The New England Journal of Medicine* and was found in the Library of Congress. The Wolchok article appears beginning on page 122 of this issue dated July 11, 2013. Exhibit 1013 is a true and correct copy of the Wolchok article (pages 122-133). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Wolchok article is available from the publisher,[48] the Massachusetts Medical Society, and through the National Library of Medicine.[49] The digital version of the

[48] https://www.nejm.org/doi/full/10.1056/NEJMoa1302369

[49] https://pubmed.ncbi.nlm.nih.gov/23724867/

Wolchok article was publicly available on June 2, 2013, as indicated on the publisher's website. Exhibit 1013 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1013 is a true and correct copy in a condition that creates no suspicion about its authenticity.

97. Attached hereto as Attachment 9A is a true and correct copy of the MARC record for *The New England Journal of Medicine* from the Library of Congress online catalog. Library ownership is indicated by the presence of the library's name at the top of each page. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 9A occurred on August 22, 2024, as shown in field 005 ("20240822"). I personally identified and retrieved the MARC record that is Attachment 9A.

98. Based on finding a print copy of Exhibit 1013 in the Library of Congress and MARC record in its online library catalog attached as Attachment 9A, it is my opinion that the Wolchok article published in *The New England Journal of Medicine* was publicly available in print on July 11, 2013, as shown by the label on the cover (Exhibit 1013, page 2). This date stamp has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked.

99. Attachment 9A includes an entry in field 050 ("R11 $b .B7")—as

described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b NE388")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("610/.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 9A also shows that Exhibit 1013 was catalogued with two descriptor terms reading "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject heading sh2008107665) and "Surgery $v Periodicals" (see Attachment 2C, Library of Congress subject heading sh2008112392) in the 650 fields.

100. As noted in the holdings information (362 field), the Library of Congress has received *The New England Journal of Medicine* since 1928 and continues to receive the publication.[50] In view of the MARC record for Exhibit 1013, the Wolchok article was publicly available on July 11, 2013, because the serial title had been received, cataloged, and indexed at the Library of Congress and made part of its online catalog database.

---

[50] The publication was originally titled the *Boston Medical and Surgical Journal* (February 1828-February 1928) and adopted the current title, *The New England Journal of Medicine,* in February 1928.

101. Attached hereto as Attachment 9B is a true and correct copy of the MARC record for *The New England Journal of Medicine* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 9B, that library code is "MUL," which means that the MARC record for this serial was cataloged as part of the Minnesota Union List of Serials at the University of Minnesota Libraries (Minneapolis, Minnesota). As can be seen in field 008 ("Date entered on file"), a cataloger at the University of Minnesota Libraries created OCLC record number 1587974 on September 1, 1975 ("750901"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 9B occurred on August 20, 2024, as shown in field 005 ("20240820"). I personally identified and retrieved the MARC record that is Attachment 9B. The "BLvl" entry in Attachment 9B is "s," which indicates that *The New England Journal of Medicine* is a serial publication. Field 310 of Attachment 9B reads "Weekly." Accordingly, the MARC record for Exhibit 1013 corresponds to *The New England Journal of Medicine* from the time the serial title adopted the current title and includes the date of the Wolchok article.

102. Attachment 9B includes an entry in 050 ("R11 $b .B7")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification

system), an entry in field 060 ("W1 $b NE388")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("610/.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 9B also shows that Exhibit 1013 was catalogued with two descriptor terms reading "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject heading sh2008107665) and "Surgery $v Periodicals" (see Attachment 2C, Library of Congress subject heading sh2008112392) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 9B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of September 1, 1975, the MARC record attached hereto as Attachment 9B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

103. WorldCat indicates that *The New England Journal of Medicine* as cataloged at the University of Minnesota Libraries is currently available from

3,970 libraries.[51] In view of the above, this issue of *The New England Journal of Medicine* was publicly available on July 11, 2013, because by that date it had been cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received at the Library of Congress. For these reasons, it is my opinion that Exhibit 1013 was published and accessible to the public on July 11, 2013.

J. Document 10: Exhibit 1014 ("Llosa")

104. Exhibit 1014 is a copy of the journal article titled "The Vigorous Immune Microenvironment of Microsatellite Instable Colon Cancer Is Balanced by Multiple Counter-Inhibitory Checkpoints" by Nicolas J. Llosa, Michael Cruise, Ada Tam, Elizabeth C. Wicks, Elizabeth M. Hechenbleikner, Janis M. Taube, Richard L. Blosser, Hongni Fan, Hao Wang, Brandon S. Luber, Ming Zhang, Nickolas Papadopoulos, Kenneth W. Kinzler, Bert Vogelstein, Cynthia L. Sears, Robert A. Anders, Drew M. Pardoll and Franck Housseau (hereafter "Llosa"). The Llosa article was published in Volume 5, Number 1 of the journal titled *Cancer Discovery* and was found in the Library of Congress. The Llosa article appears beginning on page 43 of this issue dated January 2015. Exhibit 1014 is a true and correct copy of the Llosa article (pages 43-51). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow

[51] https://search.worldcat.org/title/1587974

seamlessly from one page to the next; further, there are no visible alterations to the document. The Llosa article is also available from the publisher, the American Association for Cancer Research[52] and through the National Library of Medicine.[53] The publisher's website indicates a January 11, 2015, publication date. Exhibit 1014 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1014 is a true and correct copy in a condition that creates no suspicion about its authenticity.

105. Attached hereto as Attachment 10A is a true and correct copy of the MARC record for the journal titled *Cancer Discovery* at the Library of Congress online catalog. Library ownership is indicated by the presence of the library's name at the top of each page. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 10A occurred on June 5, 2017, as shown in field 005 ("20170605"). I personally identified and retrieved the MARC record that is Attachment 10A.

106. Based on finding a print copy of Exhibit 1014 in the Library of Congress and MARC record in its online library catalog attached as Attachment

---

[52] https://aacrjournals.org/cancerdiscovery/article/5/1/43/4777/The-Vigorous-Immune-Microenvironment-of

[53] https://pubmed.ncbi.nlm.nih.gov/25358689/

10A, it is my opinion that the Llosa article published in the journal titled *Cancer Discovery* was publicly available on January 11, 2015, as indicated on the publisher's website.

107. Attachment 10A includes an entry in 050 ("RC261.A1 $b C3747")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CA679J")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 10A also shows that Exhibit 1014 was catalogued with two descriptor terms reading "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) and "Neoplasms" (see Attachment 6B, National Library of Medicine subject heading D009369) in the 650 fields.

108. As noted in the holdings information (362 field), the Library of Congress has received the journal titled *Cancer Discovery* since 2011 and continues to receive the publication. In view of the MARC record for Exhibit 1014, the Llosa article was publicly available on January 11, 2015, because the serial title had been received, cataloged, and indexed at the Library of Congress

and made part of its online catalog database.

109. Attached hereto as Attachment 10B is a true and correct copy of the MARC record for the journal titled *Cancer Discovery* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 10B, that library code is "DLC," which means that the MARC record for this serial was cataloged at the Library of Congress. As can be seen in field 008 ("030710") of the MARC record for this exhibit, a cataloger at the Library of Congress created OCLC record number 701084307 on February 8, 2011. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 10B occurred on March 15, 2016, as shown in field 005 ("20160315"). I personally identified and retrieved the MARC record that is Attachment 10B. The "BLvl" entry in Attachment 10B is "s," which indicates that the journal titled *Cancer Discovery* is a serial publication. Field 310 of Attachment 10B reads "Monthly." Accordingly, the MARC record for Exhibit 1014 corresponds to the journal titled *Cancer Discovery* from the time the serial title began and includes the date of the Llosa article.

110. Attachment 10B includes an entry in 050 ("RC261.A1 $b C3747")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal

classification system), an entry in field 060 ("W1 $b CA679J")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 10B also shows that Exhibit 1014 was catalogued with two descriptor terms reading "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) and "Neoplasms" (see Attachment 6B, National Library of Medicine subject heading D009369) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 10B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of February 8, 2011, the MARC record attached hereto as Attachment 10B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

111. WorldCat indicates that the journal titled *Cancer Discovery* as

cataloged at the Library of Congress is currently available from 299 libraries.[54] In view of the above, this issue of the journal titled *Cancer Discovery* was publicly available on January 11, 2015, because by that date it had been received, cataloged, and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received in the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1014 was published and accessible to the public on January 11, 2015.

K. Document 11: Exhibit 1020 ("Raedler")

112. Exhibit 1020 is a copy of the journal article titled "Opdivo (Nivolumab): Second PD-1 Inhibitor Receives FDA Approval for Unresectable or Metastatic Melanoma" by Lisa A. Raedler (hereafter "Raedler"). The Raedler article was published in Volume 8, Special Feature of the journal titled *American Health & Drug Benefits* and was found in the Library of Congress. The Raedler article appears beginning on page 180 of this Special Features issue dated March 2015. Exhibit 1020 is a true and correct copy of the Raedler article (pages 180-183). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Raedler article is available

[54] https://search.worldcat.org/title/701084307

through the National Library of Medicine.[55] Exhibit 1020 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1020 is a true and correct copy in a condition that creates no suspicion about its authenticity.

113. Attached hereto as Attachment 11A is a true and correct copy of the MARC record for the journal titled *American Health & Drug Benefits* from the Library of Congress online catalog. Library ownership is indicated by the presence of the library's name at the top of each page. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 11A occurred on December 17, 2023, as shown in field 005 ("20231217"). I personally identified and retrieved the MARC record that is Attachment 11A.

114. Based on finding a print copy of Exhibit 1020 in the Library of Congress and MARC record in its online library catalog attached as Attachment 11A, it is my opinion that the Raedler article published in the journal titled *American Health & Drug Benefits* was publicly available by March 31, 2015.

115. Attachment 11A includes an entry in field 050 ("HG9391.5.U6 $b M46")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal

[55] https://pubmed.ncbi.nlm.nih.gov/26629287/

classification system), an entry in field 060 ("W1 $b AM512HD"), a subject matter consistent with the National Library of Medicine classification system—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("615"), a subject matter consistent with the Dewey Decimal classification system. Attachment 11A also shows that Exhibit 1020 was catalogued with a descriptor term reading "Pharmaceutical services insurance $v Periodicals" (see Attachment 11B, Library of Congress subject heading sh2008104733 and Attachment 11C, Library of Congress subject heading sh85099890) in the 650 field.

116. As noted in the holdings information (362 field), the Library of Congress has received the journal titled *American Health & Drug Benefits* since 2008 and continues to receive the publication. In view of the MARC record for Exhibit 1020, the Raedler article was publicly available by March 31, 2015, because the serial title had been received, cataloged, and indexed at the Library of Congress and made part of its online catalog database.[56]

---

[56] The *American Health & Drug Benefits* was published nine times a year in 2015 (see Attachment 11A, first field 321) and, therefore, new issues were available approximately 40 days. Based on the frequency of publication, the date on the cover of the issue, and my years of experience working with serials, it is my

117. Attached hereto as Attachment 11D is a true and correct copy of the MARC record for the journal titled *American Health & Drug Benefits* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 11D, that library code is "DLC," which means that the MARC record for this serial was cataloged at the Library of Congress. As can be seen in field 008 ("Date entered on file") of the MARC record for this exhibit, a cataloger at the Library of Congress created OCLC record number 226390842 on April 30, 2008 ("080430"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 11D occurred on December 13, 2023, as shown in field 005 ("20231213"). I personally identified and retrieved the MARC record that is Attachment 11D. The "BLvl" entry in Attachment 11D is "s," which indicates that the journal titled *American Health & Drug Benefits* is a serial publication. Field 310 of Attachment 11D reads "Quarterly, $b 2021-." Accordingly, the MARC record for Exhibit 1020 corresponds to the journal titled *American Health & Drug Benefits* from the time the serial began publication and includes the date of the Raedler article.

---

opinion that issues would be published by the end of the month. Therefore, a public availability date of March 31, 2015, is reasonable.

118. Attachment 11D includes an entry in field 050 ("HG9391.5.U6 $b M46")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b AM512HD"), a subject matter consistent with the National Library of Medicine classification system—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("615"), a subject matter consistent with the Dewey Decimal classification system. Attachment 11D also shows that Exhibit 1020 was catalogued with a descriptor term reading "Pharmaceutical services insurance $v Periodicals" (see Attachment 11B, Library of Congress subject heading sh2008104733 and Attachment 11C, Library of Congress subject heading sh85099890) in the 650 field. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 11D was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entry. As of April 30, 2008, the MARC record attached hereto as Attachment 11D was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was

publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

119. WorldCat indicates that the journal titled *American Health & Drug Benefits* as cataloged at the Library of Congress is currently available from 13 libraries.[57] In view of the above, this issue of the journal titled *American Health & Drug Benefits* was publicly available by March 31, 2015, because by that date it had been cataloged, indexed, and received at the Library of Congress and made part of the OCLC bibliographic database. For these reasons, it is my opinion that Exhibit 1020 was published and accessible to the public by March 31, 2015.

L. Document 12: Exhibit 1021 ("Lipson 2011")

120. Exhibit 1021 is a copy of the journal article titled "Ipilimumab: An Anti-CTLA-4 Antibody for Metastatic Melanoma" by Evan J. Lipson and Charles G. Drake (hereafter "Lipson 2011"). The Lipson 2011 article was published in Volume 17, Number 22 of the journal *Clinical Cancer Research* and was found in the National Library of Medicine (Bethesda, Maryland). The Lipson 2011 article appears beginning on page 6958 of this issue dated November 15, 2011. Exhibit 1021 is a true and correct copy of the Lipson 2011 article (pages 6958-6962). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there

[57] https://search.worldcat.org/title/226390842

are no visible alterations to the document. The Lipson 2011 article is also available through the National Library of Medicine.[58] Exhibit 1021 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1021 is a true and correct copy in a condition that creates no suspicion about its authenticity.

121. Attached hereto as Attachment 12A is a true and correct copy of the MARC record for the journal *Clinical Cancer Research* at the National Library of Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in the first field 935. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 12A occurred on August 13, 2024, as shown in field 005 ("20240813"). I personally identified and retrieved the MARC record that is Attachment 12A.

122. Based on finding a print copy of Exhibit 1021 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 12A, it is my opinion that the Lipson 2011 article published in the journal *Clinical Cancer Research* was publicly available on January 4, 2012, as indicated by the label on the cover. This date stamp has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received,

[58] https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3575079/

verified, and checked. Attachment 12A also shows that Exhibit 1021 was catalogued with a descriptor term reading "Neoplasms $v periodical" (see Attachment 6B, National Library of Medicine subject heading D009369) in the 650 field.

123. As noted in the holdings information (362 field), the National Library of Medicine has received the journal *Clinical Cancer Research* since 1995 and continues to receive the publication. In view of the MARC record for Exhibit 1021, the Lipson 2011 article was publicly available on January 4, 2012, because the serial title had been received, cataloged, and indexed at the National Library of Medicine and made part of its online catalog database.

124. Attached hereto as Attachment 12B is a true and correct copy of the MARC record for the journal *Clinical Cancer Research* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 12B, that library code is "NSD," which means that the MARC record for this serial was cataloged as part of the National Serials Data Program at the Library of Congress. As can be seen in field 008 ("Date entered on file") of the MARC record for this exhibit, a cataloger at the Library of Congress created OCLC record number 30960261 on August 17, 1994 ("940817"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to

Attachment 12B occurred on April 20, 2021, as shown in field 005 ("20210420"). I personally identified and retrieved the MARC record that is Attachment 12B. The "BLvl" entry in Attachment 12B is "s," which indicates that the journal *Clinical Cancer Research* is a serial publication. Field 310 of Attachment 12B reads "Semimonthly, $b Aug. 15, 2003-." Accordingly, the MARC record for Exhibit 1021 corresponds to the journal *Clinical Cancer Research* from the time the serial title began and includes the date of the Lipson 2011 article.

125. Attachment 12B includes an entry in field 050 ("RC267 $b .C575"), a subject matter consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CL672"), a subject matter consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 12B further includes two descriptor terms reading "Cancer $x Research $v Periodicals" (see Attachment 12C, Library of Congress subject heading sh2009118254) and "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 12B was indexed according to its subject matter by virtue of at least

four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of August 17, 1994, the MARC record attached hereto as Attachment 12B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

126. WorldCat indicates that the journal *Clinical Cancer Research* as cataloged at the Library of Congress is currently available from 860 libraries.[59] In view of the above, this issue of the journal *Clinical Cancer Research* was publicly available on January 4, 2012, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1021 was published and accessible to the public on January 4, 2012.

M. Document 13: Exhibit 1024 ("Pawlik")

127. Exhibit 1024 is a copy of the journal article titled "Colorectal Carcinogenesis: MSI-H versus MSI-L" by Timothy M. Pawlik, Chandrajit P. Raut, and Miguel A. Rodriguez-Bigas (hereafter "Pawlik"). The Pawlik article was

[59] https://search.worldcat.org/title/30960261

published in Volume 20, Numbers 4 and 5 of the journal *Disease Markers* and was found in the National Library of Medicine (Bethesda, Maryland). The Pawlik article appears beginning on page 199 of this issue dated 2004. Exhibit 1024 is a true and correct copy of the Pawlik article (pages 199-206). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Pawlik article is also available from the publisher,[60] Wiley, through the National Library of Medicine[61] and the digital repository *ResearchGate*.[62] Exhibit 1024 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1024 is a true and correct copy in a condition that creates no suspicion about its authenticity.

128. Attached hereto as Attachment 13A is a true and correct copy of the MARC record for the journal *Disease Markers* at the National Library of Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in field 935. The library continues to update and enhance this

[60] https://onlinelibrary.wiley.com/doi/10.1155/2004/368680

[61] https://pubmed.ncbi.nlm.nih.gov/15528785/

[62] https://www.researchgate.net/publication/8191546_Colorectal_carcinogenesis_MSI-H_versus_MSI-L

MARC record to meet current cataloging rules. The most recent enhancement to Attachment 13A occurred on October 16, 2024, as shown in field 005 ("20241016"). I personally identified and retrieved the MARC record that is Attachment 13A.

129. Based on finding a print copy of Exhibit 1024 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 13A, it is my opinion that the Pawlik article published in the journal *Disease Markers* was publicly available on October 29, 2004, as indicated on the PubMed Central website at the National Library of Medicine.[63] Attachment 13A also shows that Exhibit 1024 was catalogued with two descriptor terms reading "Disease Susceptibility" (see Attachment 13B, National Library of Medicine subject heading D004198) and "Pathology" (see Attachment 13C, National Library of Medicine subject heading D010336) in the 650 fields.

130. As noted in the holdings information (362 field), the National Library of Medicine has received the journal *Disease Markers* since March 1983 and continues to receive the publication. In view of the MARC record for Exhibit 1024, the Pawlik article was publicly available on October 29, 2004, because the serial title had been received, cataloged, and indexed at the National Library of Medicine and made part of its online catalog database.

---

[63] https://pmc.ncbi.nlm.nih.gov/articles/PMC3839332/

131. Attached hereto as Attachment 13D is a true and correct copy of the MARC record for the journal *Disease Markers* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 13D, that library code is "NSD," which means that the MARC record for this serial was cataloged as part of the National Serials Data Program at the Library of Congress. As can be seen in field 008 ("Date entered on file") of the MARC record for this exhibit, a cataloger at the Library of Congress created OCLC record number 7684066 on August 20, 1981 ("810820"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 13D occurred on January 13, 2024, as shown in field 005 ("20240113"). I personally identified and retrieved the MARC record that is Attachment 13D. The "BLvl" entry in Attachment 13D is "s," which indicates that the journal *Disease Markers* is a serial publication. Field 310 of Attachment 13D reads "12 times a year, $b 2008-." Accordingly, the MARC record for Exhibit 1024 corresponds to the journal *Disease Markers* from the time the serial title adopted the current title and includes the date of the Pawlik article.

132. Attachment 13D includes an entry in field 050 ("RB1 $b .D57"), a subject matter consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060

("W1 $b DI749"), a subject matter consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 13D further includes five descriptor terms reading "Pathology $v Periodicals" (see Attachment 13E, Library of Congress subject heading sh2010105255), "Biochemical markers $v Periodicals" (see Attachment 13F, Library of Congress subject heading sh85014122 and Attachment 11C, Library of Congress subject heading sh85099890), "Disease susceptibility" (see Attachment 13G, Library of Congress subject heading sh85037625), "Symptoms $v Periodicals" (see Attachment 13H, Library of Congress subject heading sh85131555 and Attachment 11C, Library of Congress subject heading sh85099890), and "Diagnosis $v Periodicals" (see Attachment 13I, Library of Congress subject heading sh85037489 and Attachment 11C, Library of Congress subject heading sh85099890) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 13D was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of August 20, 1981, the MARC record attached hereto as Attachment 13D was accessible through any library with access to the

OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

133. WorldCat indicates that the journal *Disease Markers* as cataloged at the Library of Congress is currently available from 1,363 libraries.[64] In view of the above, this issue of the journal *Disease Markers* was publicly available on October 29, 2004, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1024 was published and accessible to the public on October 29, 2004.

N. Document 15: Exhibit 1026 ("Lindor")

134. Exhibit 1026 is a copy of a journal article titled "Immunohistochemistry versus Microsatellite Instability Testing in Phenotyping Colorectal Tumors" by Noralane M. Lindor, Lawrence J. Burgart, Olga Leontovich, Richard M. Goldberg, Julie M. Cunningham, Daniel J. Sargent, Catherine Walsh-Vockley, Gloria M Petersen, Michael D. Walsh, Barbara A. Leggett, Joanne P. Young, Melissa A. Barker, Jeremy R. Jass, John Hopper, Steve Gallinger, Bharati Bapat, Mark Redston, and Stephen N. Thibodeau (hereafter

[64] https://search.worldcat.org/title/7684066

"Lindor"). The Lindor journal article was published in Volume 20, Number 4 of the *Journal of Clinical Oncology* and was found in the Weston Library at the University of Wisconsin – Madison. The Lindor journal article appears beginning on page 1043 of this issue dated February 15, 2002. Exhibit 1026 is a true and correct copy of the Lindor journal article. Specifically, the text of the journal article is complete; no pages are missing, and the text flow seamlessly; further, there are no visible alterations to the document. The Lindor journal article is available from the publisher,[65] ASCO Publications of the American Society of Clinical Oncology, through the National Library of Medicine,[66] and the digital repository *ResearchGate*.[67] The Lindor journal article was publicly available on February 22, 2002, as shown by the stamp on the label affixed to the front cover (Exhibit 1026, page 1). This date stamp has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked. indicated on the publisher's website. Exhibit 1026 was found within the custody of a library – a place where an authentic copy of this

---

[65] https://ascopubs.org/doi/10.1200/JCO.2002.20.4.1043?url_ver=Z39.88-2003&rfr_id=ori:rid:crossref.org&rfr_dat=cr_pub%20%200pubmed

[66] https://pubmed.ncbi.nlm.nih.gov/11844828/

[67] https://www.researchgate.net/publication/11516088_Immunohistochemistry_Versus_Microsatellite_Instability_Testing_in_Phenotyping_Colorectal_Tumors

journal would likely be. Exhibit 1026 is a true and correct copy in a condition that creates no suspicion about its authenticity.

135. Attached hereto as Attachment 15A is a true and correct copy of the MARC record for the *Journal of Clinical Oncology* from the Weston Library at the University of Wisconsin – Madison online catalog. Library ownership is indicated by the presence of the library's code ("uwmadisondb") in the fourth field 035. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 15A occurred on April 9, 2015, as shown in field 005 ("20150409"). I personally identified and retrieved the MARC record that is Attachment 15A.

136. Based on finding a print copy of Exhibit 1026 in the Weston Library at the University of Wisconsin – Madison and MARC record in its online library catalog attached as Attachment 15A, it is my opinion that the Lindor journal article published in the *Journal of Clinical Oncology* was publicly available on February 22, 2002, as shown by the label on the cover (Exhibit 1026, page 1).

137. Attachment 15A includes an entry in field 060 ("W1 $b JO585")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system) and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal

classification system. Attachment 15A also shows that Exhibit 1026 was catalogued with a descriptor term reading "Medical Oncology $v periodical" (see Attachment 5B, National Library of Medicine subject heading D008495) in the 650 field.

138. As noted in the holdings information (362 field), the Weston Library at the University of Wisconsin – Madison has received the *Journal of Clinical Oncology* since 1983 and continues to receive the publication. In view of the MARC record for Exhibit 1026, the Lindor journal article was publicly available on February 22, 2002, because the serial title had been received, cataloged, and indexed at the Weston Library at the University of Wisconsin – Madison and made part of its online catalog database.

139. Attached hereto as Attachment 15B is a true and correct copy of the MARC record for the *Journal of Clinical Oncology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 15B, that library code is "NSD," which means that the MARC record for this serial was cataloged as part of the National Serials Data Program at the Library of Congress. As can be seen in field 008 ("Date entered on file"), a cataloger at the Library of Congress created OCLC record number 8320014 on April 8, 1982 ("820408"). The library continues to update and enhance this MARC record to meet current cataloging

rules. The most recent enhancement to Attachment 15B occurred on April 15, 2024, as shown in field 005 ("20240415"). I personally identified and retrieved the MARC record that is Attachment 15B. The "BLvl" entry in Attachment 15B is "s," which indicates that the *Journal of Clinical Oncology* is a serial publication. Field 310 of Attachment 15B reads "Three times a month, $b 2005-." Accordingly, the MARC record for Exhibit 1026 corresponds to the *Journal of Clinical Oncology* from the time the serial title began and includes the date of the Lindor journal article.

140. Attachment 15B includes an entry in 050 ("RC254.A1 $b J68")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b JO5894H")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 15B also shows that Exhibit 1026 was catalogued with two descriptor terms reading "Oncology $v Periodicals" (see Attachment 5D, Library of Congress subject heading sh2010104402) and "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) in the 650 fields. Thus, as of its

cataloging, the publication corresponding to the MARC record attached hereto as Attachment 15B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of April 8, 1982, the MARC record attached hereto as Attachment 15B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

141. WorldCat indicates that the *Journal of Clinical Oncology* as cataloged at the Library of Congress is currently available from 1,030 libraries.[68] In view of the above, this issue of the *Journal of Clinical Oncology* was publicly available on February 22, 2002, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1026 was published and accessible to the public on February 22, 2002.

O. Document 16: Exhibit 1027 ("Boland")

142. Exhibit 1027 is a copy of the journal article titled "A National Cancer Institute Workshop on Microsatellite Instability for Cancer Detection and Familial

[68] https://search.worldcat.org/title/8320014

Predisposition: Development of International Criteria for the Determination of Microsatellite Instability in Colorectal Cancer" by C. Richard Boland, Stephen N. Thibodeau, Stanley R. Hamilton, David Sidransky, James R. Eshleman, Randall W. Burt, Stephen J. Meltzer, Miguel A. Rodriguez-Bigas, Ricardo Fodde, G. Nadia Ranzani, and Sudhir Srivastava (hereafter "Boland"). The Boland article was published in Volume 58, Number 22 of the journal titled *Cancer Research* and was found in the Library of Congress. The Boland article appears beginning on page 5248 of issue dated November 15, 1998. Exhibit 1027 is a true and correct copy of the Boland article (pages 5248-5257). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Boland article is available through the National Library of Medicine.[69] Exhibit 1027 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1027 is a true and correct copy in a condition that creates no suspicion about its authenticity.

143. Attached hereto as Attachment 16A is a true and correct copy of the MARC record for the journal titled *Cancer Research* from the Library of Congress online catalog. Library ownership is indicated by the presence of the library's name at the top of each page. The library continues to update and enhance this

[69] https://pubmed.ncbi.nlm.nih.gov/9823339/

MARC record to meet current cataloging rules. The most recent enhancement to Attachment 16A occurred on March 17, 2024, as shown in field 005 ("20240317"). I personally identified and retrieved the MARC record that is Attachment 16A.

144. Based on finding a print copy of Exhibit 1027 in the Library of Congress and MARC record in its online library catalog attached as Attachment 16A, it is my opinion that the Boland article published in the journal titled *Cancer Research* was publicly available on January 5, 1999, as shown by the stamp on page 3 (Exhibit 1027). This date stamp on the label has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked.

145. Attachment 16A includes an entry in field 050 ("RC261 $b.A274")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CA688"), a subject matter consistent with the National Library of Medicine classification system—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616.99405"), a subject matter consistent with the Dewey Decimal classification system. Attachment 16A also shows that Exhibit 1027 was catalogued with a descriptor term reading

"Cancer $x Research $v Periodicals" (see Attachment 12C, Library of Congress subject heading sh2009118254) in the 650 field.

146. As noted in the holdings information (362 field), the Library of Congress has received the journal titled *Cancer Research* since 1941 and continues to receive the publication. In view of the MARC record for Exhibit 1027, the Boland article was publicly available on January 5, 1999, because the serial title had been received, cataloged, and indexed at the Library of Congress and made part of its online catalog database.

147. Attached hereto as Attachment 16B is a true and correct copy of the MARC record for the journal titled *Cancer Research* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 16B, that library code is "MUL," which means that the MARC record for this serial was cataloged as part of the Minnesota Union List of Serials at the University of Minnesota Libraries (Minneapolis, Minnesota). As can be seen in field 008 ("Date entered on file") of the MARC record for this exhibit, a cataloger at the University of Minnesota Libraries created OCLC record number 1553285 on August 17, 1975 ("750817"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 16B occurred on March 15, 2024, as shown in field 005 ("20240315"). I personally

identified and retrieved the MARC record that is Attachment 16B. The "BLvl" entry in Attachment 16B is "s," which indicates that the journal titled *Cancer Research* is a serial publication. Field 310 of Attachment 16B reads "Semimonthly, $b <Jan. 1, 1987->." Accordingly, the MARC record for Exhibit 1027 corresponds to the journal titled *Cancer Research* from the time the serial began publication and includes the date of the Boland article.

148. Attachment 16B includes an entry in field 050 ("RC261 $b.A274")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CA688"), a subject matter consistent with the National Library of Medicine classification system—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616.99405"), a subject matter consistent with the Dewey Decimal classification system. Attachment 16A also shows that Exhibit 1027 was catalogued with a descriptor term reading "Cancer $x Research $v Periodicals" (see Attachment 12C, Library of Congress subject heading sh2009118254) in the 650 field. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 16B was indexed according to its subject matter by virtue of at least four independently

sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entry. As of August 17, 1975, the MARC record attached hereto as Attachment 16B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

149. WorldCat indicates that the journal titled *Cancer Research* as cataloged at the University of Minnesota Libraries is currently available from 1,000 libraries.[70] In view of the above, this issue of the journal titled *Cancer Research* was publicly available on January 5, 1999, because by that date it had been cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received at the Library of Congress. For these reasons, it is my opinion that Exhibit 1027 was published and accessible to the public on January 5, 1999.

P. Document 17: Exhibit 1028 ("Smyrk")

150. Exhibit 1028 is a copy of the journal article titled "Tumor-Infiltrating Lymphocytes Are a Marker for Microsatellite Instability in Colorectal Carcinoma" by Thomas C. Smyrk, Patrice Watson, Karen Kaul, and Henry T. Lynch (hereafter

[70] https://search.worldcat.org/title/1553285

"Smyrk"). The Smyrk article was published in Volume 91, Number 12 of the journal titled *Cancer* and was found in the Library of Congress. The Smyrk article appears beginning on page 2417 of the issue dated June 15, 2001. Exhibit 1028 is a true and correct copy of the Smyrk article (pages 2417-2422). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Smyrk article is available from the publisher,[71] Wiley, and through the National Library of Medicine.[72] Exhibit 1028 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1028 is a true and correct copy in a condition that creates no suspicion about its authenticity.

151. Attached hereto as Attachment 17A is a true and correct copy of the MARC record for the journal titled *Cancer* from the Library of Congress online catalog. Library ownership is indicated by the presence of the library's name at the top of each page. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 17A occurred on January 1, 2021, as shown in field 005 ("20210101"). I personally

---

[71] https://acsjournals.onlinelibrary.wiley.com/doi/pdf/10.1002/1097-0142(20010615)91:12%3C2417::AID-CNCR1276%3E3.0.CO;2-U

[72] https://pubmed.ncbi.nlm.nih.gov/11413533/

identified and retrieved the MARC record that is Attachment 17A.

152. Based on finding a print copy of Exhibit 1028 in the Library of Congress and MARC record in its online library catalog attached as Attachment 17A, it is my opinion that the Smyrk article published in the journal titled *Cancer Research* was publicly available by June 30, 2001.[73]

153. Attachment 17A includes an entry in field 050 ("RC261 $b.A22")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CA671K"), a subject matter consistent with the National Library of Medicine classification system—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616.99405"), a subject matter consistent with the Dewey Decimal classification system. Attachment 17A also shows that Exhibit 1028 was catalogued with two descriptor terms reading "Cancer $v

---

[73] The journal *Cancer* was published semimonthly and, therefore, new issues were available approximately 15 days. Based on the frequency of publication (see Attachment 17A, field 310) and my years of experience working with serials, it is my opinion that issues would be published by the end of the month. Therefore, a public availability date of June 30, 2001, is reasonable.

Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) and "Cancer $x Cytopathology $v Periodicals" (see Attachment 17B, Library of Congress subject heading sh88005585 and Attachment 11C, Library of Congress subject heading sh85099890) in the 650 fields.

154. As noted in the holdings information (362 field), the Library of Congress has received the journal titled *Cancer* since 1948 and continues to receive the publication. In view of the MARC record for Exhibit 1028, the Smyrk article was publicly available by June 30, 2001, because the serial title had been received, cataloged, and indexed at the Library of Congress and made part of its online catalog database.

155. Attached hereto as Attachment 17C is a true and correct copy of the MARC record for the journal titled *Cancer* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 17C, that library code is "MUL," which means that the MARC record for this serial was cataloged as part of the Minnesota Union List of Serials at the University of Minnesota Libraries (Minneapolis, Minnesota). As can be seen in field 008 ("Date entered on file") of the MARC record for this exhibit, a cataloger at the University of Minnesota Libraries created OCLC record number 1553275 on August 17, 1975 ("750817"). The library continues to update and enhance this MARC record to meet current

cataloging rules. The most recent enhancement to Attachment 17C occurred on December 30, 2020, as shown in field 005 ("20201230"). I personally identified and retrieved the MARC record that is Attachment 17C. The "BLvl" entry in Attachment 17C is "s," which indicates that the journal titled *Cancer* is a serial publication. Field 310 of Attachment 17C reads "Semimonthly, with an extra issue in Feb., Apr., June, Aug., Oct., Dec., $b 1997-." Accordingly, the MARC record for Exhibit 1028 corresponds to the journal titled *Cancer* from the time the serial began publication and includes the date of the Smyrk article.

156. Attachment 17C includes an entry in field 050 ("RC261 $b .A22")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CA671K"), a subject matter consistent with the National Library of Medicine classification system—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616.99405"), a subject matter consistent with the Dewey Decimal classification system. Attachment 17C also shows that Exhibit 1028 was catalogued with two descriptor terms reading "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) and "Cancer $x Cytopathology $v Periodicals" (see Attachment

17B, Library of Congress subject heading sh88005585 and Attachment 11C, Library of Congress subject heading sh85099890) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 17C was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of August 17, 1975, the MARC record attached hereto as Attachment 17C was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

157. WorldCat indicates that the journal titled *Cancer* as cataloged at the University of Minnesota Libraries is currently available from 1,534 libraries.[74] In view of the above, this issue of the journal titled *Cancer* was publicly available by June 30, 2001, because by that date it had been cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received at the Library of Congress. For these reasons, it is my opinion that Exhibit 1028 was published and accessible to the public by June 30, 2001.

---

[74] https://search.worldcat.org/title/1553275

Q. Document 18: Exhibit 1029 ("Mathijssen")

158. Exhibit 1029 is a copy of the journal article titled "Flat-Fixed Dosing Versus Body Surface Area–Based Dosing of Anticancer Drugs in Adults: Does it Make a Difference?" by Ron H. J. Mathijssen, Floris A. de Jong, Walter J. Loos, Jessica M. van der Bol, Jaap Verweij, and Alex Sparreboom (hereafter "Mathijssen"). The Mathijssen article was published in Volume 12, Number 8 of the journal titled *The Oncologist* and was found in the Mirand Library at the Roswell Park Comprehensive Cancer Center (Buffalo, New York). The Mathijssen article appears beginning on page 913 of issue dated August 2007. Exhibit 1029 is a true and correct copy of the Mathijssen article (pages 913-923). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Mathijssen article is available from the publisher,[75] Oxford Academic, through the National Library of Medicine,[76] and in the digital repositories *ResearchGate*[77] and *Semantic Scholar*.[78] Exhibit 1029

[75] https://academic.oup.com/oncolo/article/12/8/913/6397149

[76] https://pubmed.ncbi.nlm.nih.gov/17766650/

[77] https://www.researchgate.net/publication/6073176_Flat-Fixed_Dosing_Versus_Body_Surface_Area-Based_Dosing_of_Anticancer_Drugs_in_Adults_Does_It_Make_a_Difference

was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1029 is a true and correct copy in a condition that creates no suspicion about its authenticity.

159. Attached hereto as Attachment 18A is a true and correct copy of the metadata record for the journal titled *The Oncologist* from the Mirand Library at the Roswell Park Comprehensive Cancer Center online catalog. Library ownership is indicated by the presence of the library's name at the top of each page. I personally identified and retrieved the metadata record that is Attachment 18A.

160. Based on finding a print copy of Exhibit 1029 in the Mirand Library at the Roswell Park Comprehensive Cancer Center and metadata record in its online library catalog attached as Attachment 18A, it is my opinion that the Mathijssen article published in the journal titled *The Oncologist* was publicly available on August 28, 2007, as shown by the label on the cover (Exhibit 1029, page 1). This date stamp on the label has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked.

161. Attached hereto as Attachment 18D is a true and correct copy of the MARC record for the journal titled *The Oncologist* obtained from the OCLC

---

[78] https://www.semanticscholar.org/paper/Flat-fixed-dosing-versus-body-surface-area-based-of-Mathijssen-Jong/f2a8f4c06cd8e4c7e2175b4d41c2ec98b14dcec8

bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 18D, that library code is "AZU," which means that the MARC record for this serial was cataloged at the University of Arizona Libraries (Tucson, Arizona). As can be seen in field 008 ("Date entered on file") of the MARC record for this exhibit, a cataloger at the University of Arizona Libraries created OCLC record number 137348097 on July 25, 1995 ("950725"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 18D occurred on September 21, 2023, as shown in field 005 ("20230921"). I personally identified and retrieved the MARC record that is Attachment 18D. The "BLvl" entry in Attachment 18D is "s," which indicates that the journal titled *The Oncologist* is a serial publication. Field 310 of Attachment 18D reads "Bimonthly." Accordingly, the MARC record for Exhibit 1029 corresponds to the journal titled *The Oncologist* from the time the serial began publication and includes the date of the Mathijssen article.

162. As noted in the holdings information (362 field), the Mirand Library at the Roswell Park Comprehensive Cancer Center has received the journal titled *The Oncologist* since 1996 and continues to receive the publication. In view of the metadata record for Exhibit 1029, the Mathijssen article was publicly available on August 28, 2007, because the serial title had been received, cataloged, and indexed

in the Mirand Library at the Roswell Park Comprehensive Cancer Center and made part of its online catalog database.

163. Attachment 18D includes an entry in field 050 ("RC254.A1 $b O65")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b ON105AM"), a subject matter consistent with the National Library of Medicine classification system—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616"), a subject matter consistent with the Dewey Decimal classification system. Attachment 18D also shows that Exhibit 1029 was catalogued with three descriptor terms reading "Oncology $v Periodicals" (see Attachment 18B, Library of Congress subject heading sh2010104402), "Tumors $v Periodicals" (see Attachment 18C, Library of Congress subject heading sh85138553 and Attachment 11C, Library of Congress subject heading sh85099890), and "Neoplasms $v periodical" (see Attachment 6B, National Library of Medicine subject heading D009369) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 18D was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field

060 entry, the field 082 entry, and the field 650 entries. As of July 25, 1995, the MARC record attached hereto as Attachment 18D was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

164. WorldCat indicates that the journal titled *The Oncologist* as cataloged at the University of Arizona Libraries is currently available from 435 libraries.[79] In view of the above, this issue of the journal titled *The Oncologist* was publicly available on August 28, 2007, because by that date it had been cataloged and indexed at the University of Arizona Libraries, made part of the OCLC bibliographic database, and received in the Mirand Library at the Roswell Park Comprehensive Cancer Center. For these reasons, it is my opinion that Exhibit 1029 was published and accessible to the public on August 28, 2007.

R. Document 19: Exhibit 1030 ("Wang")

165. Exhibit 1030 is a copy of the journal article titled "Fixed Dosing Versus Body Size–Based Dosing of Monoclonal Antibodies in Adult Clinical Trials" by Diane D. Wang, Shuzhong Zhang, Hong Zhao, Angela Y. Men, and Kourosh Parivar (hereafter "Wang"). The Wang article was published in Volume

[79] https://search.worldcat.org/title/137348097

49, Issue 9 of *Journal of Clinical Pharmacology* and was found in the Ferris State University Library (Big Rapids, Michigan). The Wang article appears beginning on page 1012 of this issue dated September 2009. Exhibit 1030 is a true and correct copy of the Wang article (pages 1012-1024). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Wang article is available from the publisher,[80] Wiley, through the National Library of Medicine,[81] and in the digital repository *ResearchGate*.[82] The digital version of the Wang article was publicly available on March 7, 2013, as indicated on the publisher's website. Exhibit 1030 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1030 is a true and correct copy in a condition that creates no suspicion about its authenticity.

166. Attached hereto as Attachment 19A is a true and correct copy of the MARC record for *Journal of Clinical Pharmacology* from the Ferris State University Library online catalog. Library ownership is indicated by the presence

---

[80] https://accp1.onlinelibrary.wiley.com/doi/10.1177/0091270009337512

[81] https://pubmed.ncbi.nlm.nih.gov/19620385/

[82] https://www.researchgate.net/publication/26684067_Fixed_Dosing_Versus_Body_Size-Based_Dosing_of_Monoclonal_Antibodies_in_Adult_Clinical_Trials

of the library's code ("EZFL") in field 049. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 19A occurred on March 24, 2003, as shown in field 005 ("20030324"). I personally identified and retrieved the MARC record that is Attachment 19A.

167. Based on finding a print copy of Exhibit 1030 in the Ferris State University Library and MARC record in its online library catalog attached as Attachment 19A, it is my opinion that the Wang article published in *Journal of Clinical Pharmacology* was publicly available on or shortly after March 7, 2013, as shown on the publisher's website.

168. Attachment 19A includes an entry in field 090 ("RS79.A1 $b J68")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b JO5899")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 092 ("615")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 19A also shows that Exhibit 1030 was catalogued with a descriptor term reading "Pharmacology $v Periodicals" (see Attachment 19B, Library of

Congress subject heading sh2008109178) in the 650 field.

169. As noted in the holdings information (362 field), the Ferris State University Library has received *Journal of Clinical Pharmacology* since 1973 and continues to receive the publication.[83] In view of the MARC record for Exhibit 1030, the Wang article was publicly available on or shortly after March 7, 2013, because the serial title had been received, cataloged, and indexed in the Ferris State University Library and made part of its online catalog database.

170. Attached hereto as Attachment 19C is a true and correct copy of the MARC record for *Journal of Clinical Pharmacology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 19C, that library code is "AGL," which means that the MARC record for this serial was cataloged at the National Agricultural Library (Beltsville, Maryland). As can be seen in field 008 ("Date entered on file"), a cataloger at the National Agricultural Library created OCLC record number 1580982 on August 29, 1975 ("750829"). The library continues to update and enhance this MARC record to meet current

---

[83] The publication was originally titled *The Journal of Clinical Pharmacology and the Journal of New Drugs* (1967-1970), changed the title to the *Journal of Clinical Pharmacology and New Drugs* (1971-1972) and adopted the current title, *Journal of Clinical Pharmacology,* in 1973.

cataloging rules. The most recent enhancement to Attachment 19C occurred on August 10, 2022, as shown in field 005 ("20220810"). I personally identified and retrieved the MARC record that is Attachment 19C. The "BLvl" entry in Attachment 19C is "s," which indicates that the *Journal of Clinical Pharmacology* is a serial publication. Field 310 of Attachment 19C reads "Monthly $b <Jan. 1988->." Accordingly, the MARC record for Exhibit 1030 corresponds to the *Journal of Clinical Pharmacology* from the time the serial title adopted the current title and includes the date of the Wang article.

171. Attachment 19C includes an entry in 050 ("RM300.A2 $b J6")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b JO5899")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("615")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 19C also shows that Exhibit 1030 was catalogued with a descriptor term reading "Pharmacology $v Periodicals" (see Attachment 19B, Library of Congress subject heading sh2008109178) in the 650 field. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 19C was

indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entry. As of August 29, 1975, the MARC record attached hereto as Attachment 19C was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

172. WorldCat indicates that the *Journal of Clinical Pharmacology* as cataloged at the National Agricultural Library is currently available from 1,438 libraries.[84] In view of the above, this issue of the *Journal of Clinical Pharmacology* was publicly available on or shortly after March 7, 2013, because by that date it had been cataloged and indexed at the National Agricultural Library, made part of the OCLC bibliographic database, and received in the Ferris State University Library. For these reasons, it is my opinion that Exhibit 1030 was published and accessible to the public on March 7, 2013.

S. Document 20: Exhibit 1034 ("van Eeghen")

173. Exhibit 1034 is a copy of the journal article titled "Impact of Age and Comorbidity on Survival in Colorectal Cancer" by Elmer E. van Eeghen, Sandra

[84] https://search.worldcat.org/title/1580982

D. Bakker, Aart van Bochove, and Ruud J. L. F. Loffeld (hereafter "van Eeghen"). The van Eeghen article was published in Volume 6, Number 6 of *Journal of Gastrointestinal Oncology* and was found in the National Library of Medicine (Bethesda, Maryland). The van Eeghen article appears beginning on page 605 of this issue dated December 1, 2015. Exhibit 1034 is a true and correct copy of the van Eeghen article (pages 605-612). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The van Eeghen article is available from the publisher[85] and through the National Library of Medicine.[86] The digital version of the van Eeghen article was publicly available on December 1, 2015, as indicated on the publisher's website. Exhibit 1034 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1034 is a true and correct copy in a condition that creates no suspicion about its authenticity.

174. Attached hereto as Attachment 20A is a true and correct copy of the MARC record for *Journal of Gastrointestinal Oncology* from the National Library of Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in field 935. The library continues to update this MARC

---

[85] https://jgo.amegroups.org/article/view/5200/5365

[86] https://pubmed.ncbi.nlm.nih.gov/26697191/

record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 20A occurred on October 16, 2024, as shown in field 005 ("20241016"). I personally identified and retrieved the MARC record that is Attachment 20A.

175. Based on finding a print copy of Exhibit 1034 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 20A, it is my opinion that the van Eeghen article published in the *Journal of Gastrointestinal Oncology* was publicly available on or shortly after December 1, 2015.

176. Attachment 20A includes an entry in field 060 ("W1 $b JO663LE")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 20A also shows that Exhibit 1034 was catalogued with a descriptor term reading "Gastrointestinal Neoplasms $v periodical" (see Attachment 20B, National Library of Medicine subject heading D005770) in the 650 field.

177. As noted in the holdings information (362 field), the National Library of Medicine has received the *Journal of Gastrointestinal Oncology* since September 2010 and continues to receive the publication. In view of the MARC record for Exhibit 1034, the van Eeghen article was publicly available on or shortly

after December 1, 2015, because the serial title had been received, cataloged, and indexed in the National Library of Medicine and made part of its online catalog database.

178. Attached hereto as Attachment 20C is a true and correct copy of the MARC record for the *Journal of Gastrointestinal Oncology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 20C, that library code is "NLM," which means that the MARC record for this serial was cataloged at the National Library of Medicine. As can be seen in field 008 ("Date entered on file"), a cataloger at the National Library of Medicine created OCLC record number 774973031 on April 1, 2011 ("110401"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 20C occurred on April 4, 2023, as shown in field 005 ("20230404"). I personally identified and retrieved the MARC record that is Attachment 20C. The "BLvl" entry in Attachment 20C is "s," which indicates that the *Journal of Gastrointestinal Oncology* is a serial publication. Field 310 of Attachment 20C reads "Bimonthly $b 2014-." Accordingly, the MARC record for Exhibit 1034 corresponds to the *Journal of Gastrointestinal Oncology* from the time the serial title began publication and includes the date of the van Eeghen article.

179. Attachment 20C includes an entry in 050 ("QP151")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system) and an entry in field 060 ("W1 $b JO663LE")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 20C also shows that Exhibit 1034 was catalogued with two descriptor terms reading "Gastrointestinal Neoplasms $v periodical" (see Attachment 20B, National Library of Medicine subject heading D005770) and "Gastrointestinal system $x Cancer $v Periodicals" (see Attachment 20D, Library of Congress subject heading sh2010009172 and Attachment 11C, Library of Congress subject heading sh85099890) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 20C was indexed according to its subject matter by virtue of at least three independently sufficient classifications: the field 050 entry, the field 060 entry, and the field 650 entries. As of April 1, 2011, the MARC record attached hereto as Attachment 20C was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic

database or through an individual library.

180. WorldCat indicates that the *Journal of Gastrointestinal Oncology* as cataloged at the National Library of Medicine is currently available from 420 libraries.[87] In view of the above, this issue of the *Journal of Gastrointestinal Oncology* was publicly available on or shortly after December 1, 2015, because by that date it had been cataloged, indexed, and received at the National Library of Medicine and made part of the OCLC bibliographic database. For these reasons, it is my opinion that Exhibit 1034 was published and accessible to the public on December 1, 2015.

T. Document 21: Exhibit 1041 ("Feng")

181. Exhibit 1041 is a copy of the journal article titled "Model-Based Clinical Pharmacology Profiling of Ipilimumab in Patients with Advanced Melanoma" by Yan Feng, Eric Masson, David Dai, Susan M. Parker, David Berman, and Amit Roy (hereafter "Feng"). The Feng article was published in Volume 78, Number 1 of open access *British Journal of Clinical Pharmacology* and was found in the National Library of Medicine (Bethesda, Maryland). The Feng article appears beginning on page 106 of this issue dated July 2014. Exhibit 1041 is a true and correct copy of the Feng article. Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow

[87] https://search.worldcat.org/title/774973031

seamlessly from one page to the next; further, there are no visible alterations to the document. The Feng article is available from the publisher,[88] through the National Library of Medicine,[89] and in the digital repository *ResearchGate*.[90] The digital version of the Feng article was publicly available on January 17, 2014, as indicated on the publisher's website. Exhibit 1041 was found within the custody of a library – a place where an authentic copy of this open access journal would likely be. Exhibit 1041 is a true and correct copy in a condition that creates no suspicion about its authenticity.

182. Attached hereto as Attachment 21A is a true and correct copy of the MARC record for open access *British Journal of Clinical Pharmacology* from the National Library of Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in the first field 935. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 21A occurred on November 5, 2024, as shown in field 005 ("20241105"). I personally identified and retrieved the MARC record that is Attachment 21A.

---

[88] https://bpspubs.onlinelibrary.wiley.com/doi/10.1111/bcp.12323

[89] https://pubmed.ncbi.nlm.nih.gov/24433434/

[90] https://www.researchgate.net/publication/259768600_Model-based_clinical_pharmacology_profiling_of_ipilimumab_in_patients_with_advanced_melanoma

183. Based on finding a print copy of Exhibit 1041 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 21A, it is my opinion that the Feng article published in the open access *British Journal of Clinical Pharmacology* was publicly available on or shortly after January 17, 2014.

184. Attachment 21A includes an entry in field 060 ("W1 $b BR519RI")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 21A also shows that Exhibit 1041 was catalogued with two descriptor terms reading "Pharmaceutical Preparations $v periodical" (see Attachment 21B, National Library of Medicine subject heading D004364) and "Pharmacology $v periodical" (see Attachment 21C, National Library of Medicine subject heading D010600) in the 650 fields.

185. As noted in the holdings information (362 field), the National Library of Medicine has received the open access *British Journal of Clinical Pharmacology* since February 1974 and continues to receive the publication. In view of the MARC record for Exhibit 1041, the Feng article was publicly available on or shortly after January 17, 2014, because the serial title had been received, cataloged, and indexed in the National Library of Medicine and made part of its online catalog database.

186. Attached hereto as Attachment 21D is a true and correct copy of the MARC record for the open access *British Journal of Clinical Pharmacology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 21D, that library code is "MYG," which means that the MARC record for this serial was cataloged at the Massachusetts Institute of Technology Libraries (Cambridge, Massachusetts). As can be seen in field 008 ("Date entered on file"), a cataloger at the Massachusetts Institute of Technology Libraries created OCLC record number 45425630 on November 27, 2000 ("001127"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 21D occurred on April 28, 2023, as shown in field 005 ("20230428"). I personally identified and retrieved the MARC record that is Attachment 21D. The "BLvl" entry in Attachment 21D is "s," which indicates that the open access *British Journal of Clinical Pharmacology* is a serial publication. Accordingly, the MARC record for Exhibit 1041 corresponds to the open access *British Journal of Clinical Pharmacology* from the time the serial title began publication and includes the date of the Feng article.

187. Attachment 21D includes an entry in 050 ("RM301.28")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification

system) and an entry in field 082 ("615")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 21D also shows that Exhibit 1041 was catalogued with three descriptor terms reading "Clinical pharmacology $v Periodicals" (see Attachment 21E, Library of Congress subject heading sh90000174 and Attachment 11C, Library of Congress subject heading sh85099890), "Pharmacology $v Periodicals" (see Attachment 21F, Library of Congress subject heading sh2008109178), and "Drugs $v Periodicals" (see Attachment 21G, Library of Congress subject heading sh2008102458) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 21D was indexed according to its subject matter by virtue of at least three independently sufficient classifications: the field 050 entry, the field 082 entry, and the field 650 entries. As of November 27, 2000, the MARC record attached hereto as Attachment 21D was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

188. WorldCat indicates that the open access *British Journal of Clinical*

Pharmacology as cataloged at the Massachusetts Institute of Technology Libraries is currently available from 1,226 libraries.[91] In view of the above, this issue of the open access *British Journal of Clinical Pharmacology* was publicly available on or shortly after January 17, 2014, because by that date it had been cataloged and indexed at the Massachusetts Institute of Technology Libraries, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1041 was published and accessible to the public on or shortly after January 17, 2014.

U. Document 22: Exhibit 1037 ("Lipson 2013")

189. Exhibit 1037 is a copy of the journal article titled "Durable Cancer Regression Off-Treatment and Effective Reinduction Therapy with an Anti-PD-1 Antibody" by Evan J. Lipson, William H. Sharfman, Charles G. Drake, Ira Wollner, Janis M. Taube, Robert A. Anders, Haiying Xu, Sheng Yao, Alice Pons, Lieping Chen, Drew M. Pardoll, Julie R. Brahmer, and Suzanne L. Topalian (hereafter "Lipson 2013"). The Lipson 2013 article was published in Volume 19, Number 2 of the journal *Clinical Cancer Research* and was found in the National Library of Medicine (Bethesda, Maryland). The Lipson 2013 article appears beginning on page 462 of this issue dated January 15, 2013. Exhibit 1037 is a true and correct copy of the Lipson 2013 article (pages 462-468). Specifically, the text

[91] https://search.worldcat.org/title/45425630

of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Lipson 2013 article is also available through the National Library of Medicine.[92] Exhibit 1037 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1037 is a true and correct copy in a condition that creates no suspicion about its authenticity.

190. Attached hereto as Attachment 22A is a true and correct copy of the MARC record for the journal *Clinical Cancer Research* at the National Library of Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in the first field 935. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 22A occurred on August 13, 2024, as shown in field 005 ("20240813"). I personally identified and retrieved the MARC record that is Attachment 22A.

191. Based on finding a print copy of Exhibit 1037 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 16A, it is my opinion that the Lipson 2013 article published in the journal *Clinical Cancer Research* was publicly available on January 29, 2013, as indicated by the

[92] https://pubmed.ncbi.nlm.nih.gov/23169436/

label on the cover. This date stamp has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked. Attachment 22A also shows that Exhibit 1037 was catalogued with a descriptor term reading "Neoplasms $v periodical" (see Attachment 6B, National Library of Medicine subject heading D009369) in the 650 field.

192. As noted in the holdings information (362 field), the National Library of Medicine has received the journal *Clinical Cancer Research* since 1995 and continues to receive the publication. In view of the MARC record for Exhibit 1037, the Lipson 2013 article was publicly available on January 29, 2013, because the serial title had been received, cataloged, and indexed at the National Library of Medicine and made part of its online catalog database.

193. Attached hereto as Attachment 22B is a true and correct copy of the MARC record for the journal *Clinical Cancer Research* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 22B, that library code is "NSD," which means that the MARC record for this serial was cataloged as part of the National Serials Data Program at the Library of Congress. As can be seen in field 008 ("Date entered on file") of the MARC record for this exhibit, a cataloger at the Library of Congress created OCLC record number 30960261 on

August 17, 1994 ("940817"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 22B occurred on April 20, 2021, as shown in field 005 ("20210420"). I personally identified and retrieved the MARC record that is Attachment 22B. The "BLvl" entry in Attachment 22B is "s," which indicates that the journal *Clinical Cancer Research* is a serial publication. Field 310 of Attachment 22B reads "Semimonthly, $b Aug. 15, 2003-." Accordingly, the MARC record for Exhibit 1037 corresponds to the journal *Clinical Cancer Research* from the time the serial title began and includes the date of the Lipson 2013 article.

194. Attachment 22B includes an entry in field 050 ("RC267 $b .C575"), a subject matter consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CL672"), a subject matter consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 22B further includes two descriptor terms reading "Cancer $x Research $v Periodicals" (see Attachment 12C, Library of Congress subject heading sh2009118254) and "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) in the 650 fields. Thus, as of its

cataloging, the publication corresponding to the MARC record attached hereto as Attachment 22B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of August 17, 1994, the MARC record attached hereto as Attachment 22B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

195. WorldCat indicates that the journal *Clinical Cancer Research* as cataloged at the Library of Congress is currently available from 860 libraries.[93] In view of the above, this issue of the journal *Clinical Cancer Research* was publicly available on January 29, 2013, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1037 was published and accessible to the public on January 29, 2013.

V. Document 23: Exhibit 1038 ("Pernot")

196. Exhibit 1038 is a copy of the journal article titled "Colorectal Cancer

[93] https://search.worldcat.org/title/30960261

and Immunity: What We Know and Perspectives" by Simon Pernot, Magali Terme, Thibault Voron, Orianne Colussi, Elie Marcheteau, Eric Tartour, and Julien Taieb (hereafter "Pernot"). The Pernot article was published in Volume 20, Issue 14 of the open access publication titled *World Journal of Gastroenterology* and was found in the National Library of Medicine (Bethesda, Maryland). The Pernot article appears beginning on page 3738 of this issue dated April 14, 2014. Exhibit 1038 is a true and correct copy of the Pernot article (pages 3738-3750) that I obtained from the National Library of Medicine. Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the document. The Pernot article is available through the National Library of Medicine[94] and from the publisher, Baishideng Publishing Group.[95] Exhibit 1038 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1038 is a true and correct copy in a condition that creates no suspicion about its authenticity.

197. Attached hereto as Attachment 23A is a true and correct copy of the MARC record for the open access publication titled *World Journal of Gastrointerology* from the National Library of Medicine online catalog. Library

---

[94] https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3983433/

[95] https://www.wjgnet.com/1007-9327/abstract/v20/i14/3738.htm

ownership is indicated by the presence of the library's code ("DNLM") in field 935. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 23A occurred on June 8, 2024, as shown in field 005 ("20240608"). I personally identified and retrieved the MARC record that is Attachment 23A.

198. Based on finding a digital copy of Exhibit 1038 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 23A, it is my opinion that the Pernot article published in the open access publication titled *World Journal of Gastroenterology* was publicly available on April 14, 2014, as shown on the publisher's website (Exhibit 1038, page 1).

199. Attachment 23A includes an entry in field 060 ("W1 $b CH758NJ"), a subject matter consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 23A also shows that Exhibit 1038 was catalogued with a descriptor term reading "Gastrointestinal Diseases $v periodical" (see Attachment 23B, National Library of Medicine subject heading D005767) in the 650 field.

200. As noted in the holdings information (362 field), the National Library of Medicine has received the open access publication titled *World Journal of Gastroenterology* since 1998 and continues to receive the publication. In view of the MARC record for Exhibit 1038, the Pernot article was publicly available on

April 14, 2014, because the serial title had been received, cataloged, and indexed in the National Library of Medicine and made part of its online catalog database.

201. Attached hereto as Attachment 23C is a true and correct copy of the MARC record for the open access publication titled *World Journal of Gastroenterology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 23C, that library code is "NLM," which means that the MARC record for this serial was cataloged at the National Library of Medicine. As can be seen in field 008 for this exhibit ("Date entered on file"), a cataloger at the National Library of Medicine created OCLC record number 41888177 on December 22, 1998, as shown in field 008 ("981222"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 23C occurred on February 14, 2023, as shown in field 005 ("20230214"). I personally identified and retrieved the MARC record that is Attachment 23C. The "BLvl" entry in Attachment 23C is "s," which indicates that the open access publication titled *World Journal of Gastroenterology* is a serial publication. Field 310 of Attachment 23C reads "Weekly, $b <2006-." Accordingly, the MARC record for Exhibit 1038 corresponds to the open access publication titled *World Journal of Gastroenterology* from the time the serial title adopted the current title and includes the date of the Pernot article.

202. Attachment 23C includes an entry in field 060 ("W1 $b CH758NJ"), a subject matter consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 23C also shows that Exhibit 1038 was catalogued with two descriptor terms reading "Gastroenterology $v Periodicals" (see Attachment 23D, Library of Congress subject heading sh2009125694) and "Digestive organs $x Diseases $v Periodicals" (see Attachment 23E, Library of Congress subject heading sh85037956 and Attachment 11C, Library of Congress subject heading sh85099890) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 23C was indexed according to its subject matter by virtue of at least two independently sufficient classifications: the field 060 entry and the field 650 entries. As of December 22, 1998, the MARC record attached hereto as Attachment 23C was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

203. WorldCat indicates that the open access publication titled *World Journal of Gastroenterology* as cataloged at the University of Minnesota Libraries

is currently available from 566 libraries.[96] In view of the above, this issue of the open access publication titled *World Journal of Gastroenterology* was publicly available on April 14, 2014, because by that date it been cataloged, indexed, and received at the National Library of Medicine and made part of the OCLC bibliographic database. For these reasons, it is my opinion that Exhibit 1038 was published and accessible to the public on April 14, 2014.

W. Document 24: Exhibit 1039 ("De La Chapelle")

204. Exhibit 1039 is a copy of a journal article titled "Clinical Relevance of Microsatellite Instability in Colorectal Cancer" by Albert de la Chapelle and Heather Hampel (hereafter "De La Chapelle"). The De La Chapelle journal article was published in Volume 28, Number 20 of the *Journal of Clinical Oncology* and was found in the Ebling Health Sciences Library at the University of Wisconsin – Madison. The De La Chapelle journal article appears beginning on page 3380 of this issue dated July 10, 2010. Exhibit 1039 is a true and correct copy of the De La Chapelle journal article. Specifically, the text of the journal article is complete; no pages are missing, and the text flow seamlessly; further, there are no visible alterations to the document. The De La Chapelle journal article is available from the publisher,[97] ASCO Publications of the American Society of Clinical Oncology,

---

[96] https://search.worldcat.org/title/53217066

[97] https://ascopubs.org/doi/abs/10.1200/JCO.2009.27.0652

and through the National Library of Medicine.[98] The De La Chapelle journal article was publicly available on July 28, 2010, as shown by the stamp on the label affixed to the front cover (Exhibit 1039, page 1). This date stamp has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked. Exhibit 1039 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1039 is a true and correct copy in a condition that creates no suspicion about its authenticity.

205. Attached hereto as Attachment 24A is a true and correct copy of the MARC record for the *Journal of Clinical Oncology* from the Ebling Health Sciences Library at the University of Wisconsin – Madison online catalog. Library ownership is indicated by the presence of the library's code ("uwmadisondb") in the fourth field 035. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 24A occurred on April 9, 2015, as shown in field 005 ("20150409"). I personally identified and retrieved the MARC record that is Attachment 24A.

206. Based on finding a print copy of Exhibit 1039 in the Ebling Health Sciences Library at the University of Wisconsin – Madison and MARC record in its online library catalog attached as Attachment 24A, it is my opinion that the De

[98] https://pmc.ncbi.nlm.nih.gov/articles/PMC2903331/

La Chapelle journal article published in the *Journal of Clinical Oncology* was publicly available on July 28, 2010, as shown by the label on the cover (Exhibit 1039, page 1).

207. Attachment 24A includes an entry in field 060 ("W1 $b JO585")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system) and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 24A also shows that Exhibit 1039 was catalogued with a descriptor term reading "Medical Oncology $v periodical" (see Attachment 5B, National Library of Medicine subject heading D008495) in the 650 field.

208. As noted in the holdings information (362 field), the Ebling Health Sciences Library at the University of Wisconsin – Madison has received the *Journal of Clinical Oncology* since 1983 and continues to receive the publication. In view of the MARC record for Exhibit 1039, the De La Chapelle journal article was publicly available on July 28, 2010, because the serial title had been received, cataloged, and indexed at the Ebling Health Sciences Library at the University of Wisconsin – Madison and made part of its online catalog database.

209. Attached hereto as Attachment 24B is a true and correct copy of the

MARC record for the *Journal of Clinical Oncology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 24B, that library code is "NSD," which means that the MARC record for this serial was cataloged as part of the National Serials Data Program at the Library of Congress. As can be seen in field 008 ("Date entered on file"), a cataloger at the Library of Congress created OCLC record number 8320014 on April 8, 1982 ("820408"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 24B occurred on April 15, 2024, as shown in field 005 ("20240415"). I personally identified and retrieved the MARC record that is Attachment 24B. The "BLvl" entry in Attachment 24B is "s," which indicates that the *Journal of Clinical Oncology* is a serial publication. Field 310 of Attachment 24B reads "Three times a month, $b 2005-." Accordingly, the MARC record for Exhibit 1039 corresponds to the *Journal of Clinical Oncology* from the time the serial title began and includes the date of the De La Chapelle journal article.

210. Attachment 24B includes an entry in 050 ("RC254.A1 $b J68")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b JO5894H")—as described above, a subject

matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 24B also shows that Exhibit 1039 was catalogued with two descriptor terms reading "Oncology $v Periodicals" (see Attachment 5D, Library of Congress subject heading sh2010104402) and "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 24B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of April 8, 1982, the MARC record attached hereto as Attachment 24B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

211. WorldCat indicates that the *Journal of Clinical Oncology* as cataloged

at the Library of Congress is currently available from 1,030 libraries.[99] In view of the above, this issue of the *Journal of Clinical Oncology* was publicly available on July 28, 2010, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1039 was published and accessible to the public on July 28, 2010.

X. Document 25: Exhibit 1047 ("Kroemer")

212. Exhibit 1047 is a copy of a journal article titled "Colorectal Cancer: The First Neoplasia Found to be under Immunosurveillance and the Last One to Respond to Immunotherapy?" by Guido Kroemer, Lorenzo Galluzzi, Laurence Zitvogel, and Wolf Hervé Fridman (hereafter "Kroemer"). The Kroemer journal article was published in Volume 4, Issue 7 of the journal *OncoImmunology* and was found in the National Library of Medicine (Bethesda, Maryland). The Kroemer journal article appears beginning on page e1058597-1 of this issue dated July 2015. Exhibit 1047 is a true and correct copy of the Kroemer journal article. Specifically, the text of the journal article is complete; no pages are missing, and the text flow seamlessly; further, there are no visible alterations to the document. The Kroemer journal article is available from the publisher,[100] Taylor

---

[99] https://search.worldcat.org/title/8320014

[100] https://www.tandfonline.com/doi/full/10.1080/2162402X.2015.1058597

& Francis, through the National Library of Medicine,[101] and the digital repository *ResearchGate*.[102] The Kroemer journal article was publicly available on June 17, 2015, as shown on the publisher's website. Exhibit 1047 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1047 is a true and correct copy in a condition that creates no suspicion about its authenticity.

213. Attached hereto as Attachment 25A is a true and correct copy of the MARC record for the journal *OncoImmunology* from the National Library of Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in the field 935. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 25A occurred on October 16, 2024, as shown in field 005 ("20241016"). I personally identified and retrieved the MARC record that is Attachment 25A.

214. Based on finding a print copy of Exhibit 1047 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment

---

[101] https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4485723/

[102] https://www.researchgate.net/publication/279213717_Colorectal_cancer_The_first_neoplasia_found_to_be_under_immunosurveillance_and_the_last_one_to_respond_to_immunotherapy

25A, it is my opinion that the Kroemer journal article published in the journal *OncoImmunology* was publicly available on June 17, 2015, as shown on the publisher's website.

215. Attachment 25A includes an entry in field 060 ("W1 $b ON102I")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 25A also shows that Exhibit 1047 was catalogued with two descriptor terms reading "Neoplasms $x therapy" (see Attachment 6B, National Library of Medicine subject heading D009369) and "Immunotherapy $v periodical" (see Attachment 25B, National Library of Medicine subject heading D007167) in the 650 fields.

216. As noted in the holdings information (362 field), the National Library of Medicine has received the journal *OncoImmunology* since 2012 and continues to receive the publication. In view of the MARC record for Exhibit 1047, the Kroemer journal article was publicly available on June 17, 2015, because the serial title had been received, cataloged, and indexed at the National Library of Medicine and made part of its online catalog database.

217. Attached hereto as Attachment 25C is a true and correct copy of the MARC record for the journal *OncoImmunology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is

recorded in field 040 with a unique library code. For Attachment 25C, that library code is "DLC," which means that the MARC record for this serial was cataloged at the Library of Congress. As can be seen in field 008 ("Date entered on file"), a cataloger at the Library of Congress created OCLC record number 741514515 on July 18, 2011 ("110718"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 25C occurred on August 29, 2019, as shown in field 005 ("20190829"). I personally identified and retrieved the MARC record that is Attachment 25C. The "BLvl" entry in Attachment 25C is "s," which indicates that the journal *OncoImmunology* is a serial publication. Field 310 of Attachment 25C reads "Bimonthly." Accordingly, the MARC record for Exhibit 1047 corresponds to the journal *OncoImmunology* from the time the serial title began and includes the date of the Kroemer journal article.

218. Attachment 25C includes an entry in 050 ("QR188.6 $b .O53")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b ON102I")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616.9")—as described above, a subject matter classification

number consistent with the Dewey Decimal classification system. Attachment 25C also shows that Exhibit 1047 was catalogued with three descriptor terms reading "Tumors $x Immunological aspects $v Periodicals" (see Attachment 25D, Library of Congress subject heading sh85138558 and Attachment 11C, Library of Congress subject heading sh85099890), "Neoplasms $x therapy" (see Attachment 6B, National Library of Medicine subject heading D009369), and "Immunotherapy $v periodical" (see Attachment 25B, National Library of Medicine subject heading D007167) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 25C was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of July 18, 2011, the MARC record attached hereto as Attachment 25C was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

219. WorldCat indicates that the journal *OncoImmunology* as cataloged at

the Library of Congress is currently available from 594 libraries.[103] In view of the above, this issue of the journal *OncoImmunology* was publicly available on June 17, 2015, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1047 was published and accessible to the public on June 17, 2015.

Y. Document 26: Exhibit 1048 ("Mansh")

220. Exhibit 1048 is a copy of a journal article titled "Ipilimumab and Cancer Immunotherapy: A New Hope for Advanced Stage Melanoma" by Matthew Mansh (hereafter "Mansh"). The Mansh journal article was published in Volume 84, Number 4 of the *Yale Journal of Biology and Medicine* and was found in the National Library of Medicine (Bethesda, Maryland). The Mansh journal article appears beginning on page 381 of this issue dated December 2011. Exhibit 1048 is a true and correct copy of the Mansh journal article. Specifically, the text of the journal article is complete; no pages are missing, and the text flow seamlessly; further, there are no visible alterations to the document. The Mansh journal article is available through the National Library of Medicine.[104] The Mansh journal article was publicly available on or shortly after December 1, 2011. Exhibit

---

[103] https://search.worldcat.org/title/741514515

[104] https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3238313/

1048 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1048 is a true and correct copy in a condition that creates no suspicion about its authenticity.

221. Attached hereto as Attachment 26A is a true and correct copy of the MARC record for the *Yale Journal of Biology and Medicine* from the National Library of Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in the field 935. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 26A occurred on October 16, 2024, as shown in field 005 ("20241016"). I personally identified and retrieved the MARC record that is Attachment 26A.

222. Based on finding a print copy of Exhibit 1048 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 26A, it is my opinion that the Mansh journal article published in the *Yale Journal of Biology and Medicine* was publicly available on or shortly after December 1, 2011.

223. Attachment 26A includes an entry in field 060 ("W1 $b YA454")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 26A also shows that Exhibit 1048 was

catalogued with two descriptor terms reading "Medicine $v periodical" (see Attachment 14B, National Library of Medicine subject heading D008511) and "Biology $v periodical" (see Attachment 26B, National Library of Medicine subject heading D001695) in the 650 fields.

224. As noted in the holdings information (362 field), the National Library of Medicine has received the *Yale Journal of Biology and Medicine* since October 1928 and continues to receive the publication. In view of the MARC record for Exhibit 1048, the Mansh journal article was publicly available on or shortly after December 1, 2011, because the serial title had been received, cataloged, and indexed at the National Library of Medicine and made part of its online catalog database.

225. Attached hereto as Attachment 26C is a true and correct copy of the MARC record for the *Yale Journal of Biology and Medicine* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 26C, that library code is "OCLC," which means that the MARC record for this serial was cataloged at the OCLC Corporate Library (Dublin, Ohio). As can be seen in field 008 ("Date entered on file"), a cataloger at the OCLC Corporate Library created OCLC record number 655920297 on August 12, 2010 ("100812"). The library continues to update and enhance this MARC record to meet current

cataloging rules. The most recent enhancement to Attachment 26C occurred on July 2, 2022, as shown in field 005 ("20220702"). I personally identified and retrieved the MARC record that is Attachment 26C. The "BLvl" entry in Attachment 26C is "s," which indicates that the *Yale Journal of Biology and Medicine* is a serial publication. Field 310 of Attachment 26C reads "Bimonthly." Accordingly, the MARC record for Exhibit 1048 corresponds to the *Yale Journal of Biology and Medicine* from the time the serial title began and includes the date of the Mansh journal article.

226. Attachment 26C includes an entry in 050 ("R11 $b .Y25")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b YA454")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("610.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 26C also shows that Exhibit 1048 was catalogued with five descriptor terms reading "Biology $v Periodicals" (see Attachment 26D, Library of Congress subject heading sh2007101986), "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject heading sh2008107665), "Biology" (see Attachment 26E,

Library of Congress subject heading sh85014203), "Medicine $v periodical" (see Attachment 14B, National Library of Medicine subject heading D008511), and "Biology $v periodical" (see Attachment 26B, National Library of Medicine subject heading D001695) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 26C was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of August 12, 2010, the MARC record attached hereto as Attachment 26C was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

227. WorldCat indicates that the *Yale Journal of Biology and Medicine* as cataloged at the OCLC Corporate Library is currently available from 959 libraries.[105] In view of the above, this issue of the *Yale Journal of Biology and Medicine* was publicly available on or shortly after December 1, 2011, because by that date it had been cataloged and indexed at the OCLC Corporate Library, made part of the OCLC bibliographic database, and received at the National Library of

[105] https://search.worldcat.org/title/655920297

Medicine. For these reasons, it is my opinion that Exhibit 1048 was published and accessible to the public on or shortly after December 1, 2011.

Z. Document 27: Exhibit 1049 ("Topalian")

228. Exhibit 1049 is a copy of the journal article titled "Safety, Activity, and Immune Correlates of Anti–PD-1 Antibody in Cancer" by Suzanne L. Topalian, F. Stephen Hodi, Julie R. Brahmer, Scott N. Gettinger, David C. Smith, David F. McDermott, John D. Powderly, Richard D. Carvajal, Jeffrey A. Sosman, Michael B. Atkins, Philip D. Leming, David R. Spigel, Scott J. Antonia, Leora Horn, Charles G. Drake, Drew M. Pardoll, Lieping Chen, William H. Sharfman, Robert A. Anders, Janis M. Taube, Tracee L. McMiller, Haiying Xu, Alan J. Korman, Maria Jure-Kunkel, Shruti Agrawal, Daniel McDonald, Georgia D. Kollia, Ashok Gupta, Jon M. Wigginton, and Mario Sznol (hereafter "Topalian"). The Topalian article was published in Volume 366, Number 26 of *The New England Journal of Medicine* and was found in the Ebling Health Sciences Library at the University of Wisconsin – Madison. The Topalian article appears beginning on page 2443 of this issue dated June 2, 2012. Exhibit 1049 is a true and correct copy of the Topalian article (pages 2443-2454). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the

document. The Topalian article is available from the publisher, [106] the Massachusetts Medical Society, through the National Library of Medicine,[107] and in the digital repositories *ResearchGate*[108] and *Semantic Scholar*.[109] The digital version of the Topalian article was publicly available on June 2, 2012, and updated on June 28, 2012, as indicated on the publisher's website. Exhibit 1049 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1049 is a true and correct copy in a condition that creates no suspicion about its authenticity.

229. Attached hereto as Attachment 27A is a true and correct copy of the MARC record for *The New England Journal of Medicine* from the Ebling Health Sciences Library at the University of Wisconsin – Madison online catalog. Library ownership is indicated by the presence of the library's code ("GZM") in field 049. The library continues to update this MARC record and enhanced the MARC record

---

[106] https://www.nejm.org/doi/full/10.1056/NEJMoa1200690

[109] https://www.semanticscholar.org/paper/Safety%2C-activity%2C-and-immune-correlates-of-antibody-Topalian-Hodi/ada133745281f73cc7b8e4043b55844d1ea95de5

to meet current cataloging rules. The most recent enhancement to Attachment 27A occurred on March 27, 2018, as shown in field 005 ("20180327"). I personally identified and retrieved the MARC record that is Attachment 27A.

230. Based on finding a print copy of Exhibit 1049 in the Ebling Health Sciences Library at the University of Wisconsin – Madison and MARC record in its online library catalog attached as Attachment 27A, it is my opinion that the Topalian article published in *The New England Journal of Medicine* was publicly available in print on or shortly after June 25, 2012, as shown on the label on the cover (Exhibit 1049, page 1). This date stamp has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked.

231. Attachment 27A includes an entry in field 050 ("R11 $b .B7")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b NE388")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("610/.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 27A also shows that Exhibit 1049 was catalogued with two descriptor terms

reading "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject heading sh2008107665) and "Surgery $v Periodicals" (see Attachment 2C, Library of Congress subject heading sh2008112392) in the 650 fields.

232. As noted in the holdings information (362 field), the Ebling Health Sciences Library at the University of Wisconsin – Madison has received *The New England Journal of Medicine* since 1928 and continues to receive the publication.[110] In view of the MARC record for Exhibit 1049, the Topalian article was publicly available on or shortly after June 25, 2012, because the serial title had been received, cataloged, and indexed in the Ebling Health Sciences Library at the University of Wisconsin – Madison and made part of its online catalog database.

233. Attached hereto as Attachment 27B is a true and correct copy of the MARC record for *The New England Journal of Medicine* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 27B, that library code is "MUL," which means that the MARC record for this serial was cataloged as part of the Minnesota Union List of Serials at the University of Minnesota Libraries (Minneapolis, Minnesota). As can be seen in field 008 ("Date entered on

---

[110] The publication was originally titled the *Boston Medical and Surgical Journal* (February 1828-February 1928) and adopted the current title, *The New England Journal of Medicine,* in February 1928.

file"), a cataloger at the University of Minnesota Libraries created OCLC record number 1587974 on September 1, 1975 ("750901"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 27B occurred on August 20, 2024, as shown in field 005 ("20240820"). I personally identified and retrieved the MARC record that is Attachment 27B. The "BLvl" entry in Attachment 27B is "s," which indicates that *The New England Journal of Medicine* is a serial publication. Field 310 of Attachment 27B reads "Weekly." Accordingly, the MARC record for Exhibit 1049 corresponds to *The New England Journal of Medicine* from the time the serial title adopted the current title and includes the date of the Topalian article.

234. Attachment 27B includes an entry in 050 ("R11 $b .B7")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b NE388")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("610/.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 27B also shows that Exhibit 1049 was catalogued with two descriptor terms reading "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject

heading sh2008107665) and "Surgery $v Periodicals" (see Attachment 2C, Library of Congress subject heading sh2008112392) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 27B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of September 1, 1975, the MARC record attached hereto as Attachment 27B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

235. WorldCat indicates that *The New England Journal of Medicine* as cataloged at the University of Minnesota Libraries is currently available from 3,970 libraries.[111] In view of the above, this issue of *The New England Journal of Medicine* was publicly available on or shortly after June 25, 2012, because by that date it had been cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received at the Ebling Health Sciences Library at the University of Wisconsin – Madison. For these reasons, it is my opinion that Exhibit 1049 was published and accessible to the public on June

[111] https://search.worldcat.org/title/1587974

25, 2012.

AA. Document 28: Exhibit 1050 ("Brahmer")

236. Exhibit 1050 is a copy of the journal article titled "Phase I Study of Single-Agent Anti-Programmed Death-1 (MDX-1106) in Refractory Solid Tumors: Safety, Clinical Activity, Pharmacodynamics, and Immunologic Correlates" by Julie R. Brahmer, Charles G. Drake, Ira Wollner, John D. Powderly, Joel Picus, William H. Sharfman, Elizabeth Stankevich, Alice Pons, Theresa M. Salay, Tracee L. McMiller, Marta M. Gilson, Changyu Wang, Mark Selby, Janis M. Taube, Robert Anders, Lieping Chen, Alan J. Korman, Drew M. Pardoll, Israel Lowy, and Suzanne L. Topalian (hereafter "Brahmer"). The Brahmer journal article was published in Volume 28, Number 19 of the *Journal of Clinical Oncology* and was found in the Ebling Health Sciences Library at the University of Wisconsin – Madison. The Brahmer journal article appears beginning on page 3167 of this issue dated July 1, 2010. Exhibit 1050 is a true and correct copy of the Brahmer journal article (pages 3167-3175). Specifically, the text of the oral abstract is complete; no pages are missing, and the text on each page appears to flow seamlessly; further, there are no visible alterations to the document. The Brahmer journal article is available from the publisher,[112] through the National

[112] https://ascopubs.org/doi/10.1200/JCO.2009.26.7609

Library of Medicine,[113] and in the digital repository *ResearchGate.*[114] Exhibit 1050 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1050 is a true and correct copy in a condition that creates no suspicion about its authenticity.

237. Attached hereto as Attachment 28A is a true and correct copy of the MARC record for the *Journal of Clinical Oncology* from the Ebling Health Sciences Library at the University of Wisconsin – Madison online catalog. Library ownership is indicated by the presence of the library's code ("uwmadisondb") in the fourth field 035. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 28A occurred on April 9, 2015, as shown in field 005 ("20150409"). I personally identified and retrieved the MARC record that is Attachment 28A.

238. Based on finding a print copy of Exhibit 1050 in the Ebling Health Sciences Library at the University of Wisconsin – Madison and MARC record in

---

[113] https://pubmed.ncbi.nlm.nih.gov/20516446/

[114] https://www.researchgate.net/publication/367766444_Phase_I_Study_of_Single-Agent_Anti-Programmed_Death-1_MDX-1106_in_Refractory_Solid_Tumors_Safety_Clinical_Activity_Pharmacodynamics_and_Immunologic_Correlates

its online library catalog attached as Attachment 28A, it is my opinion that the Brahmer journal article published in the *Journal of Clinical Oncology* was publicly available on July 7, 2010, as indicated by the stamp on the cover (Exhibit 1050, page 1). This date stamp has the general appearance of date stamps that libraries have long affixed to periodicals to show when an issue was received, verified, and checked.

239. Attachment 28A includes an entry in field 060 ("W1 $b JO5895")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system) and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 28A also shows that Exhibit 1050 was catalogued with a descriptor term reading "Medical Oncology $v periodical" (see Attachment 5B, National Library of Medicine subject heading D008495) in the 650 field.

240. As noted in the holdings information (362 field), the Ebling Health Sciences Library at the University of Wisconsin – Madison has received the *Journal of Clinical Oncology* since January 1983 and continues to receive the publication. In view of the MARC record for Exhibit 1050, the Brahmer journal article was publicly available on July 7, 2010, because the serial title had been

received, cataloged, and indexed in the Ebling Health Sciences Library at the University of Wisconsin – Madison and made part of its online catalog database.

241. Attached hereto as Attachment 28B is a true and correct copy of the MARC record for the *Journal of Clinical Oncology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 28B, that library code is "NSD," which means that the MARC record for this serial was cataloged as part of the National Serials Data Program at the Library of Congress. As can be seen in field 008 ("Date entered on file"), a cataloger at the Library of Congress created OCLC record number 8320014 on April 8, 1982 ("820408"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 28B occurred on April 15, 2024, as shown in field 005 ("20240415"). I personally identified and retrieved the MARC record that is Attachment 28B. The "BLvl" entry in Attachment 28B is "s," which indicates that the *Journal of Clinical Oncology* is a serial publication. Field 310 of Attachment 28B reads "Three times a month $b 2005-." Accordingly, the MARC record for Exhibit 1050 corresponds to the *Journal of Clinical Oncology* from the time the serial began publication and includes the date of the Brahmer journal article.

242. Attachment 28B includes an entry in 050 ("RC254.A1 $b J68")—as

described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b JO5894H")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 28B also shows that Exhibit 1050 was catalogued with three descriptor terms reading "Oncology $v Periodicals" (see Attachment 5D, Library of Congress subject heading sh2010104402), "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056), and "Medical Oncology" (see Attachment 5B, National Library of Medicine subject heading D008495) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 28B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of April 8, 1982, the MARC record attached hereto as Attachment 28B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date

through any library with access to the OCLC bibliographic database or through an individual library.

243. WorldCat indicates that the *Journal of Clinical Oncology* as cataloged at the Library of Congress is currently available from 1,030 libraries.[115] In view of the above, this issue of the *Journal of Clinical Oncology* was publicly available on July 7, 2010, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received in the Ebling Health Sciences Library at the University of Wisconsin -- Madison. For these reasons, it is my opinion that Exhibit 1050 was published and accessible to the public on July 7, 2010.

BB. Document 29: Exhibit 1052 ("Antonia")

244. Exhibit 1052 is a copy of a journal abstract titled "Phase I/II Study of Nivolumab With or Without Ipilimumab for Treatment of Recurrent Small Cell Lung Cancer (SCLC): CA209-032" by Scott Joseph Antonia, Johanna C. Bendell, Matthew Hiram Taylor, Emiliano Calvo, Dirk Jaeger, Filippo G. De Braud, Patrick Alexander Ott, M. Catherine Pietanza, Leora Horn, Dung T. Le, Michael Morse, Jose A. Lopez-Martin, Paolo Antonio Ascierto, Olaf Christensen, Joseph Grosso, Jason S. Simon, Chen-Sheng Lin, and Joseph Paul Eder (hereafter "Antonia"). The Antonia journal abstract was published in Volume 33, Issue 15S, Part 1 of 2 of

[115] https://search.worldcat.org/title/8320014

the *Journal of Clinical Oncology* and was found in the National Library of Medicine (Bethesda, Maryland). The Antonia journal article appears on page 155 of this issue dated May 20, 2015. Exhibit 1052 is a true and correct copy of the Antonia abstract, which is identified as abstract 7503 as a part of Lung Cancer—Non-Small Cell Local-Regional/Small Cell/Other Thoracic Cancers presentations. Specifically, the text of the abstract is complete; no pages are missing, and the text flow seamlessly; further, there are no visible alterations to the document. The Antonia abstract is available from the publisher,[116] ASCO Publications of the American Society of Clinical Oncology, and the digital repository *ResearchGate*.[117] The Antonia abstract was publicly available on May 20, 2015, as indicated on the publisher's website. Exhibit 1052 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1052 is a true and correct copy in a condition that creates no suspicion about its authenticity.

245. Attached hereto as Attachment 29A is a true and correct copy of the MARC record for the *Journal of Clinical Oncology* from the National Library of

---

[116] https://ascopubs.org/doi/10.1200/jco.2015.33.15_suppl.7503

[117] https://www.researchgate.net/publication/332531402_Phase_III_study_of_nivolumab_with_or_without_ipilimumab_for_treatment_of_recurrent_small_cell_lung_cancer_SCLC_CA209-032

Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in field 935. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 29A occurred on June 8, 2024, as shown in field 005 ("20240608"). I personally identified and retrieved the MARC record that is Attachment 29A.

246. Based on finding a print copy of Exhibit 1052 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 29A, it is my opinion that the Antonia abstract published in the *Journal of Clinical Oncology* was publicly available on May 20, 2015, as shown on the cover (Exhibit 1052, page 1).

247. Attachment 29A includes an entry in field 060 ("W1 $b JO5894H")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 29A also shows that Exhibit 1052 was catalogued with a descriptor term reading "Medical Oncology $v periodical" (see Attachment 5B, National Library of Medicine subject heading D008495) in the 650 field.

248. As noted in the holdings information (362 field), the National Library of Medicine has received the *Journal of Clinical Oncology* since 1983 and continues to receive the publication. In view of the MARC record for Exhibit

1052, the Antonia abstract was publicly available on May 20, 2015, because the serial title had been received, cataloged, and indexed at the National Library of Medicine and made part of its online catalog database.

249. Attached hereto as Attachment 29B is a true and correct copy of the MARC record for the *Journal of Clinical Oncology* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 29B, that library code is "NSD," which means that the MARC record for this serial was cataloged as part of the National Serials Data Program at the Library of Congress. As can be seen in field 008 ("Date entered on file"), a cataloger at the Library of Congress created OCLC record number 8320014 on April 8, 1982 ("820408"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 29B occurred on April 15, 2024, as shown in field 005 ("20240415"). I personally identified and retrieved the MARC record that is Attachment 29B. The "BLvl" entry in Attachment 29B is "s," which indicates that the *Journal of Clinical Oncology* is a serial publication. Field 310 of Attachment 29B reads "Three times a month, $b 2005-." Accordingly, the MARC record for Exhibit 1052 corresponds to the *Journal of Clinical Oncology* from the time the serial title began and includes the date of the Antonia journal article.

250. Attachment 29B includes an entry in field 050 ("RC254.A1 $b J68")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b JO5894H")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 29B also shows that Exhibit 1052 was catalogued with two descriptor terms reading "Oncology $v Periodicals" (see Attachment 5D, Library of Congress subject heading sh2010104402) and "Cancer $v Periodicals" (see Attachment 5E, Library of Congress subject heading sh2008100056) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 29B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of April 8, 1982, the MARC record attached hereto as Attachment 29B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library

with access to the OCLC bibliographic database or through an individual library.

251. WorldCat indicates that the *Journal of Clinical Oncology* as cataloged at the Library of Congress is currently available from 1,030 libraries.[118] In view of the above, this issue of the *Journal of Clinical Oncology* was publicly available on May 20, 2015, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1052 was published and accessible to the public on May 20, 2015.

CC. Document 30: Exhibit 1053 ("Duraiswamy")

252. Exhibit 1053 is a copy of the journal article titled "Dual blockade of PD-1 and CTLA-4 Combined With Tumor Vaccine Effectively Restores T cell Rejection Function in Tumors" by Jaikumar Duraiswamy, Karen M. Kaluza, Gordon J. Freeman, and George Coukos (hereafter "Duraiswamy"). The Duraiswamy article was published in Volume 73, Number 12 of the journal titled *Cancer Research* and was found in the Library of Congress. The Duraiswamy article appears beginning on page 3591 of issue dated June 15, 2013. Exhibit 1053 is a true and correct copy of the Duraiswamy article (pages 3591-3603). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there

[118] https://search.worldcat.org/title/8320014

are no visible alterations to the document. The Duraiswamy article is available from the publisher,[119] through the National Library of Medicine,[120] and the digital repository *ResearchGate*.[121] Exhibit 1053 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1053 is a true and correct copy in a condition that creates no suspicion about its authenticity.

253. Attached hereto as Attachment 30A is a true and correct copy of the MARC record for the journal titled *Cancer Research* from the Library of Congress online catalog. Library ownership is indicated by the presence of the library's name at the top of each page. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 30A occurred on March 17, 2024, as shown in field 005 ("20240317"). I personally identified and retrieved the MARC record that is Attachment 30A.

254. Based on finding a print copy of Exhibit 1053 in the Library of Congress and MARC record in its online library catalog attached as Attachment

---

[119] https://aacrjournals.org/cancerres/article/73/12/3591/584152/Dual-Blockade-of-PD-1-and-CTLA-4-Combined-with

[120] https://pubmed.ncbi.nlm.nih.gov/23633484/

[121] https://www.researchgate.net/publication/236600112_Dual_Blockade_of_PD-1_and_CTLA-4_Combined_with_Tumor_Vaccine_Effectively_Restores_T-Cell_Rejection_Function_in_Tumors-Response

30A, it is my opinion that the Duraiswamy article published in the journal titled *Cancer Research* was publicly available on June 13, 2013, as indicated on the publisher's website.

255. Attachment 30A includes an entry in field 050 ("RC261 $b.A274")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CA688"), a subject matter consistent with the National Library of Medicine classification system—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616.99405"), a subject matter consistent with the Dewey Decimal classification system. Attachment 30A also shows that Exhibit 1053 was catalogued with a descriptor term reading "Cancer $x Research $v Periodicals" (see Attachment 12C, Library of Congress subject heading sh2009118254) in the 650 field.

256. As noted in the holdings information (362 field), the Library of Congress has received the journal titled *Cancer Research* since 1941 and continues to receive the publication. In view of the MARC record for Exhibit 1053, the Duraiswamy article was publicly available on June 13, 2013, because the serial title had been received, cataloged, and indexed at the Library of Congress and

made part of its online catalog database.

257. Attached hereto as Attachment 30B is a true and correct copy of the MARC record for the journal titled *Cancer Research* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 30B, that library code is "MUL," which means that the MARC record for this serial was cataloged as part of the Minnesota Union List of Serials at the University of Minnesota Libraries (Minneapolis, Minnesota). As can be seen in field 008 ("Date entered on file") of the MARC record for this exhibit, a cataloger at the University of Minnesota Libraries created OCLC record number 1553285 on August 17, 1975 ("750817"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 30B occurred on March 15, 2024, as shown in field 005 ("20240315"). I personally identified and retrieved the MARC record that is Attachment 30B. The "BLvl" entry in Attachment 30B is "s," which indicates that the journal titled *Cancer Research* is a serial publication. Field 310 of Attachment 30B reads "Semimonthly, $b <Jan. 1, 1987->." Accordingly, the MARC record for Exhibit 1053 corresponds to the journal titled *Cancer Research* from the time the serial began publication and includes the date of the Duraiswamy article.

258. Attachment 30B includes an entry in field 050 ("RC261 $b.A274")—

as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CA688"), a subject matter consistent with the National Library of Medicine classification system—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("616.99405"), a subject matter consistent with the Dewey Decimal classification system. Attachment 30B also shows that Exhibit 1053 was catalogued with a descriptor term reading "Cancer $x Research $v Periodicals" (see Attachment 12C, Library of Congress subject heading sh2009118254) in the 650 field. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 30B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entry. As of August 17, 1975, the MARC record attached hereto as Attachment 30B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

259. WorldCat indicates that the journal titled *Cancer Research* as cataloged at the University of Minnesota Libraries is currently available from 1,000 libraries.[122] In view of the above, this issue of the journal titled *Cancer Research* was publicly available on June 13, 2013, because by that date it had been cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received at the Library of Congress. For these reasons, it is my opinion that Exhibit 1053 was published and accessible to the public on June 13, 2013.

DD. Document 31: Exhibit 1054 ("Callahan")

260. Exhibit 1054 is a copy of an open access journal article titled "At the Bedside: CTLA-4- and PD-1-Blocking Antibodies in Cancer Immunotherapy" by Margaret K. Callahan and Jedd D. Wolchok (hereafter "Callahan"). The Callahan journal article was published in Volume 94, Issue 1 of the open access *Journal of Leukocyte Biology* and was found in the National Library of Medicine (Bethesda, Maryland). The Callahan journal article appears on beginning page 41 of this issue dated July 2013. Exhibit 1054 is a true and correct copy of the Callahan journal article (pages 41-53). Specifically, the text of the journal article is complete; no pages are missing, and the text flow seamlessly; further, there are no visible alterations to the document. The Callahan journal article is available from the

[122] https://search.worldcat.org/title/1553285

publisher,[123] Society of Leukocyte Biology, through the National Library of Medicine,[124] and the JLB digital repository.[125] The Callahan journal article was publicly available on May 10, 2013, as indicated on the JLB website. Exhibit 1054 was found within the custody of a library – a place where an authentic copy of this open access journal would likely be. Exhibit 1054 is a true and correct copy in a condition that creates no suspicion about its authenticity.

261. Attached hereto as Attachment 31A is a true and correct copy of the MARC record for the open access *Journal of Leukocyte Biology* from the National Library of Medicine online catalog. Library ownership is indicated by the presence of the library's code ("DNLM") in the first field 935. The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 31A occurred on June 8, 2024, as shown in field 005 ("20240608"). I personally identified and retrieved the MARC record that is Attachment 31A.

262. Based on finding a print copy of Exhibit 1054 in the National Library of Medicine and MARC record in its online library catalog attached as Attachment 31A, it is my opinion that the Callahan journal article published in the open access

[123] https://academic.oup.com/jleukbio/article-abstract/94/1/41/6959318

[124] https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4051187/

[125] https://jlb.onlinelibrary.wiley.com/doi/epdf/10.1189/jlb.1212631

Journal of Leukocyte Biology was publicly available on May 10, 2013, as shown on the JLB website.

263. Attachment 31A includes an entry in field 060 ("W1 $b JO745H")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system). Attachment 31A also shows that Exhibit 1054 was catalogued with a descriptor term reading "Leukocytes $v periodical" (see Attachment 31B, National Library of Medicine subject heading D007962) in the 650 field.

264. As noted in the holdings information (362 field), the National Library of Medicine has received the open access *Journal of Leukocyte Biology* since 1984 and continues to receive the publication.[126] In view of the MARC record for Exhibit 1054, the Callahan article was publicly available on May 10, 2013, because the serial title had been received, cataloged, and indexed at the National Library of Medicine and made part of its online catalog database.

265. Attached hereto as Attachment 31C is a true and correct copy of the MARC record for the open access *Journal of Leukocyte Biology* obtained from the

---

[126] The publication was originally titled the *Journal of the Reticuloendothelial Society* (1964-1983) and adopted the current title *Journal of Leukocyte Biology* in 1984.

OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 31C, that library code is "NSD," which means that the MARC record for this serial was cataloged as part of the National Serials Data Program at the Library of Congress. As can be seen in field 008 ("Date entered on file"), a cataloger at the Library of Congress created OCLC record number 1018822 on December 5, 1983 ("831205"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 31C occurred on April 11, 2023, as shown in field 005 ("20230411"). I personally identified and retrieved the MARC record that is Attachment 31C. The "BLvl" entry in Attachment 31C is "s," which indicates that the open access *Journal of Leukocyte Biology* is a serial publication. Field 310 of Attachment 31C reads "Monthly." Accordingly, the MARC record for Exhibit 1054 corresponds to the open access *Journal of Leukocyte Biology* from the time the serial title adopted the current title and includes the date of the Callahan journal article.

266. Attachment 31C includes an entry in field 050 ("QP185 $b .R47")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b JO745H")—as described above, a subject matter classification number consistent with the National Library

of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("599/.01/13")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 31C also shows that Exhibit 1054 was catalogued with three descriptor terms reading "Leucocytes $v Periodicals" (see Attachment 31D, Library of Congress subject heading sh85076269 and Attachment 11C, Library of Congress subject heading sh85099890), "Reticulo-endothelial system $v Periodicals $v Periodicals" (see Attachment 31E, Library of Congress subject heading sh85113316 and Attachment 11C, Library of Congress subject heading sh85099890), and "Leucocytes" (see Attachment 31D, Library of Congress subject heading sh8507629) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 31C was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entries. As of December 5, 1983, the MARC record attached hereto as Attachment 31C was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

267. WorldCat indicates that the open access *Journal of Leukocyte Biology* as cataloged at the Library of Congress is currently available from 663 libraries.[127] In view of the above, this issue of the open access *Journal of Leukocyte Biology* was publicly available on May 10, 2013, because by that date it had been cataloged and indexed at the Library of Congress, made part of the OCLC bibliographic database, and received at the National Library of Medicine. For these reasons, it is my opinion that Exhibit 1054 was published and accessible to the public on May 10, 2013.

EE. Document 32: Exhibit 1055 ("Bai")

268. Exhibit 1055 is a copy of a journal article titled "A Guide to Rational Dosing of Monoclonal Antibodies" by Shuang Bai, Karin Jorga, Yan Xin, Denise Jin, Yanan Zheng, Lisa A. Damico-Beyer, Manish Gupta, Meina Tang, David E. Allison, Dan Lu, Yi Zhang, Amita Joshi, and Mark J. Dresser (hereafter "Bai"). The Bai journal article was published in Volume 51, Number 2 of the journal *Clinical Pharmacokinetics* and was found in the Children's Hospital of Michigan Library (Detroit, Michigan).[128] The Bai journal article appears on beginning page 119 of this issue dated February 2012. Exhibit 1055 is a true and correct copy of the Bai journal article (pages 119-135). Specifically, the text of the journal article

---

[127] https://search.worldcat.org/title/48106832

[128] The Children's Hospital of Michigan Library is no longer operational.

is complete; no pages are missing, and the text flow seamlessly; further, there are no visible alterations to the document. The Bai journal article is available from the publisher,[129] SpringerLink, through the National Library of Medicine,[130] and the digital repository *Semantic Scholar*.[131] The Bai journal article was publicly available on October 18, 2012, as indicated on the publisher's website. Exhibit 1055 was found within the custody of a library – a place where an authentic copy of this open access journal would likely be. Exhibit 1055 is a true and correct copy in a condition that creates no suspicion about its authenticity.

269. Based on finding a print copy of Exhibit 1055 in the Children's Hospital of Michigan Library, it is my opinion that the Bai journal article published in the journal *Clinical Pharmacokinetics* was publicly available on October 18, 2012, as shown on the SpringerLink website.

270. Attached hereto as Attachment 32A is a true and correct copy of the MARC record for the journal *Clinical Pharmacokinetics* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is

---

[129] https://link.springer.com/article/10.2165/11596370-000000000-00000

[130] https://pubmed.ncbi.nlm.nih.gov/22257150/

[131] https://www.semanticscholar.org/paper/A-Guide-to-Rational-Dosing-of-Monoclonal-Antibodies-Bai-Jorga/46349badbb874d88fc41280956e93c743086dad5

recorded in field 040 with a unique library code. For Attachment 32A, that library code is "PIT," which means that the MARC record for this serial was cataloged at the University of Pittsburgh Libraries (Pittsburgh, Pennsylvania). As can be seen in field 008 ("Date entered on file"), a cataloger at the University of Pittsburgh Libraries created OCLC record number 2280673 on June 25, 1976 ("760625"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 32A occurred on November 6, 2021, as shown in field 005 ("20211106"). I personally identified and retrieved the MARC record that is Attachment 32A. The "BLvl" entry in Attachment 32A is "s," which indicates that the journal *Clinical Pharmacokinetics* is a serial publication. Field 310 of Attachment 32A reads "Monthly, $b 2005-" Accordingly, the MARC record for Exhibit 1055 corresponds to the journal *Clinical Pharmacokinetics* from the time the serial title began publication and includes the date of the Bai journal article.

271. Attachment 32A includes an entry in field 050 ("RM1 $b .C58")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b CL764")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and

an entry in field 082 ("615")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 32A also shows that Exhibit 1055 was catalogued with a descriptor term reading "Pharmacology $v Periodicals" (see Attachment 19B, Library of Congress subject heading sh2008109178) in the 650 field. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 32A was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060 entry, the field 082 entry, and the field 650 entry. As of June 25, 1976, the MARC record attached hereto as Attachment 32A was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

272. WorldCat indicates that the journal *Clinical Pharmacokinetics* as cataloged at the University of Pittsburgh Libraries is currently available from 1,387 libraries.[132] In view of the above, this issue of the journal *Clinical Pharmacokinetics* was publicly available on October 18, 2012, because by that date it had been cataloged and indexed at the University of Pittsburgh Libraries,

[132] https://search.worldcat.org/title/2280673

made part of the OCLC bibliographic database, and received at the Children's Hospital of Michigan Library. For these reasons, it is my opinion that Exhibit 1055 was published and accessible to the public on October 18, 2012.

FF. Document 33: Exhibit 1031 ("Postow")

273. Exhibit 1031 is a copy of the journal article titled "Nivolumab and Ipilimumab versus Ipilimumab in Untreated Melanoma" by Michael A. Postow, Jason Chesney, Anna C. Pavlick, Caroline Robert, Kenneth Grossmann, David McDermott, Gerald P. Linette, Nicolas Meyer, Jeffrey K. Giguere, Sanjiv S. Agarwala, Montaser Shaheen, Marc S. Ernstoff, David Minor, April K. Salama, Matthew Taylor, Patrick A. Ott, Linda M. Rollin, Christine Horak, Paul Gagnier, Jedd D. Wolchok, and F. Stephen Hodi (hereafter "Postow"). The Postow article was published in Volume 372, Number 21 of *The New England Journal of Medicine* and was found in the Health Sciences Library at the University of Washington (Seattle, Washington). The Postow article appears beginning on page 2006 of this issue dated May 21, 2015. Exhibit 1031 is a true and correct copy of the Postow article (pages 2006-2017). Specifically, the text of the article is complete; no pages are missing, and the text on each page appears to flow seamlessly from one page to the next; further, there are no visible alterations to the

document. The Postow article is available from the publisher,[133] the Massachusetts Medical Society, through the National Library of Medicine,[134] and in the digital repository *Semantic Scholar*.[135] The digital version of the Postow article was publicly available on April 20, 2015, as indicated on the publisher's website and on page 2006 of Exhibit 1031. Exhibit 1031 was found within the custody of a library – a place where an authentic copy of this journal would likely be. Exhibit 1031 is a true and correct copy in a condition that creates no suspicion about its authenticity.

274. Attached hereto as Attachment 33A is a true and correct copy of the MARC record for *The New England Journal of Medicine* from the Health Sciences Library at the University of Washington online catalog. Library ownership is indicated by the presence of the library's code ("MAIN") in field 049. The library continues to update this MARC record and enhanced the MARC record to meet current cataloging rules. The most recent enhancement to Attachment 33A occurred on September 16, 2024, as shown in field 005 ("20240916"). I personally identified and retrieved the MARC record that is Attachment 33A.

---

[133] https://www.nejm.org/doi/full/10.1056/NEJMoa1414428

[134] https://pubmed.ncbi.nlm.nih.gov/25891304/

[135] https://www.semanticscholar.org/paper/Nivolumab-and-ipilimumab-versus-ipilimumab-in-Postow-Chesney/b1e3c72cd1e4c7d3fc7e6fe5f680f1c4db862d92

275. Based on finding a print copy of Exhibit 1031 in the Health Sciences Library at the University of Washington and MARC record in its online library catalog attached as Attachment 33A, it is my opinion that the Postow article published in *The New England Journal of Medicine* was publicly available in print on or shortly after April 20, 2015, as shown on the publisher's website.

276. Attachment 33A includes an entry in field 050 ("R11 $b .B7")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b NE388")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("610/.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 33A also shows that Exhibit 1031 was catalogued with two descriptor terms reading "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject heading sh2008107665) and "Surgery $v Periodicals" (see Attachment 2C, Library of Congress subject heading sh2008112392) in the 650 fields.

277. As noted in the holdings information (362 field), the Health Sciences Library at the University of Washington has received *The New England Journal of*

Medicine since 1928 and continues to receive the publication.[136] In view of the MARC record for Exhibit 1031, the Postow article was publicly available on or shortly after April 20, 2015, because the serial title had been received, cataloged, and indexed in the Health Sciences Library at the University of Washington and made part of its online catalog database.

278. Attached hereto as Attachment 33B is a true and correct copy of the MARC record for *The New England Journal of Medicine* obtained from the OCLC bibliographic database. As previously noted, the library that created the record is recorded in field 040 with a unique library code. For Attachment 33B, that library code is "MUL," which means that the MARC record for this serial was cataloged as part of the Minnesota Union List of Serials at the University of Minnesota Libraries (Minneapolis, Minnesota). As can be seen in field 008 ("Date entered on file"), a cataloger at the University of Minnesota Libraries created OCLC record number 1587974 on September 1, 1975 ("750901"). The library continues to update and enhance this MARC record to meet current cataloging rules. The most recent enhancement to Attachment 33B occurred on August 20, 2024, as shown in field 005 ("20240820"). I personally identified and retrieved the MARC record

---

[136] The publication was originally titled the *Boston Medical and Surgical Journal* (February 1828-February 1928) and adopted the current title, *The New England Journal of Medicine,* in February 1928.

that is Attachment 33B. The "BLvl" entry in Attachment 33B is "s," which indicates that *The New England Journal of Medicine* is a serial publication. Field 310 of Attachment 33B reads "Weekly." Accordingly, the MARC record for Exhibit 1031 corresponds to *The New England Journal of Medicine* from the time the serial title adopted the current title and includes the date of the Postow article.

279. Attachment 33B includes an entry in 050 ("R11 $b .B7")—as described above, a subject matter classification number consistent with the Library of Congress classification system (analogous to the Dewey Decimal classification system), an entry in field 060 ("W1 $b NE388")—as described above, a subject matter classification number consistent with the National Library of Medicine classification system (analogous to the Dewey Decimal classification system), and an entry in field 082 ("610/.5")—as described above, a subject matter classification number consistent with the Dewey Decimal classification system. Attachment 33B also shows that Exhibit 1031 was catalogued with two descriptor terms reading "Medicine $v Periodicals" (see Attachment 2B, Library of Congress subject heading sh2008107665) and "Surgery $v Periodicals" (see Attachment 2C, Library of Congress subject heading sh2008112392) in the 650 fields. Thus, as of its cataloging, the publication corresponding to the MARC record attached hereto as Attachment 33B was indexed according to its subject matter by virtue of at least four independently sufficient classifications: the field 050 entry, the field 060

entry, the field 082 entry, and the field 650 entries. As of September 1, 1975, the MARC record attached hereto as Attachment 33B was accessible through any library with access to the OCLC bibliographic database or the online catalog at a library that subscribed to the serial, which means that the corresponding publication was publicly available on or before that same date through any library with access to the OCLC bibliographic database or through an individual library.

280. WorldCat indicates that *The New England Journal of Medicine* as cataloged at the University of Minnesota Libraries is currently available from 3,970 libraries.[137] In view of the above, this issue of *The New England Journal of Medicine* was publicly available on or shortly after April 20, 2015, because by that date it had been cataloged and indexed at the University of Minnesota Libraries, made part of the OCLC bibliographic database, and received in the Health Sciences Library at the University of Washington. For these reasons, it is my opinion that Exhibit 1031 was published and accessible to the public on April 20, 2015.

VI. SUMMARY OF OPINIONS

281. In view of the foregoing, it is my opinion that the publications described above were publicly available on or about the corresponding date listed in the table below:

Gastrointestinal Neoplasms MeSH Descriptor Data 2024

MeSH Heading
Gastrointestinal Neoplasms
Tree Number(s)
C04.588.274.476
C06.301.371
C06.405.249
Unique ID
D005770
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D005770
Annotation
general or unspecified; prefer specifics; coordinate with histological type of neoplasm
Scope Note
Tumors or cancer of the GASTROINTESTINAL TRACT, from the MOUTH to the ANAL CANAL.
Entry Version
GASTROINTESTINAL NEOPL
Entry Term(s)
Cancer of Gastrointestinal Tract
Cancer of the Gastrointestinal Tract
Gastrointestinal Cancer
Neoplasms, Gastrointestinal
NLM Classification #
WI 149
Date Established
1966/01/01
Date of Entry
1999/01/01
Revision Date
2005/07/01

Medical Oncology MeSH Descriptor Data 2024

Details | Qualifiers | MeSH Tree Structures | Concepts

MeSH Heading
Medical Oncology
Tree Number(s)
H02.403.429.515
Unique ID
D008495
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D008495
Annotation
use for the specialty only RADIATION ONCOLOGY is also available
Scope Note
A subspecialty of internal medicine concerned with the study of neoplasms.
Entry Version
MED ONCOL
Entry Term(s)
Clinical Oncology
Oncology, Medical
NLM Classification #
QZ 21
Previous Indexing
Internal Medicine (1966-1978)
Specialties, Medical (1968-1978)

Neoplasms MeSH Descriptor Data 2024

Details | Qualifiers | MeSH Tree Structures | Concepts

MeSH Heading
Neoplasms
Tree Number(s)
C04
Unique ID
D009369
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D009369
Annotation
general; prefer specifics; familial: consider also NEOPLASTIC SYNDROMES, HEREDITARY; metastatic cancer of unknown origin: index NEOPLASM METASTASIS
Scope Note
New abnormal growth of tissue. Malignant neoplasms show a greater degree of anaplasia and have the properties of invasion and metastasis, compared to benign neoplasms.
Entry Version
NEOPL
Entry Term(s)
Benign Neoplasm
Benign Neoplasms
Cancer
Malignancy
Malignant Neoplasm
Malignant Neoplasms
Neoplasia
Neoplasm
Neoplasms, Benign
Tumor
Tumors
Consider Also
consider also terms at CANCER, CARCINO-, ONCO-, and TUMOR
Public MeSH Note
/diagnosis was NEOPLASM DIAGNOSIS 1964-65; /etiology was NEOPLASM ETIOLOGY 1964-65; /immunology was NEOPLASM IMMUNOLOGY 1964-65; /radiotherapy was NEOPLASM RADIOTHERAPY 1964-65; /therapy was NEOPLASM THERAPY 1964-65; NEOPLASM STATISTICS was heading 1964-65; CARCINOGENESIS was heading 1977
History Note
/diagnosis was NEOPLASM DIAGNOSIS 1964-65; /etiology was NEOPLASM ETIOLOGY 1964-65; /immunology was NEOPLASM IMMUNOLOGY 1964-65; /radiotherapy was NEOPLASM RADIOTHERAPY 1964-65; /therapy was NEOPLASM THERAPY 1964-65; NEOPLASM STATISTICS was heading 1964-65; CARCINOGENESIS was heading 1977
Entry Combination
secondary:Neoplasm Metastasis
Date Established

1966/01/01

Disease Susceptibility MeSH Descriptor Data 2024

Details | Qualifiers | MeSH Tree Structures | Concepts

MeSH Heading
Disease Susceptibility
Tree Number(s)
C23.550.291.687
G07.100.250
Unique ID
D004198
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D004198
Annotation
IM GEN only
Scope Note
A constitution or condition of the body which makes the tissues react in special ways to certain extrinsic stimuli and thus tends to make the individual more than usually susceptible to certain diseases.
Entry Version
DIS SUSCEPTIBILITY
Entry Term(s)
Diathesis
Susceptibility, Disease
NLM Classification #
QZ 50
Public MeSH Note
81; was DIATHESIS 1963-80
Online Note
use DISEASE SUSCEPTIBILITY to search DIATHESIS 1966-80
History Note
81; was DIATHESIS 1963-80
Entry Combination
genetics:Genetic Predisposition to Disease
Date Established
1981/01/01
Date of Entry
1999/01/01
Revision Date
2008/07/08

Attachment 13C

Pathology MeSH Descriptor Data 2024

MeSH Heading
Pathology
Tree Number(s)
H02.403.650
Unique ID
D010336
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D010336
Annotation
use for the specialty only; use /pathol with organs & diseases
Scope Note
A specialty concerned with the nature and cause of disease as expressed by changes in cellular or tissue structure and function caused by the disease process.
Entry Version
PATHOL
Date Established
1966/01/01
Date of Entry
1999/01/01
Revision Date
2009/07/06

Medicine MeSH Descriptor Data 2024

Details | Qualifiers | MeSH Tree Structures | Concepts

MeSH Heading
Medicine
Tree Number(s)
H02.403
Unique ID
D008511
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D008511
Annotation
medicine only as a field, profession or discipline: differentiate from DELIVERY OF HEALTH CARE where the patient is emphasized; very general; it is divided broadly into experimental medicine (= BIOMEDICAL RESEARCH) & CLINICAL MEDICINE, a specialty devoted to the diagnosis & management of human patients; / legislation & jurisprudence = LEGISLATION, MEDICAL or JURISPRUDENCE or FORENSIC MEDICINE; LEGAL MEDICINE see FORENSIC MEDICINE is also available
Scope Note
The art and science of studying, performing research on, preventing, diagnosing, and treating disease, as well as the maintenance of health.
Entry Term(s)
Insurance Medicine
Medical Specialities
Medical Specialties
Medical Specialty
Specialities, Medical
Specialties, Medical
Specialty, Medical
See Also
Economics, Medical
Education, Medical
History of Medicine
Insurance, Health
Legislation, Medical
Public MeSH Note
1963; for SPECIALTIES, MEDICAL see SPECIALTIES, MEDICAL 1968-2009
History Note
1963
Entry Combination
economics:Economics, Medical
education:Education, Medical
ethics:Ethics, Medical
history:History of Medicine
legislation & jurisprudence:Legislation, Medical

Date Established
1963/01/01
Date of Entry
1999/01/01
Revision Date
2021/07/06

Gastrointestinal Neoplasms MeSH Descriptor Data 2024

MeSH Heading
Gastrointestinal Neoplasms
Tree Number(s)
C04.588.274.476
C06.301.371
C06.405.249
Unique ID
D005770
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D005770
Annotation
general or unspecified; prefer specifics; coordinate with histological type of neoplasm
Scope Note
Tumors or cancer of the GASTROINTESTINAL TRACT, from the MOUTH to the ANAL CANAL.
Entry Version
GASTROINTESTINAL NEOPL
Entry Term(s)
Cancer of Gastrointestinal Tract
Cancer of the Gastrointestinal Tract
Gastrointestinal Cancer
Neoplasms, Gastrointestinal
NLM Classification #
WI 149
Date Established
1966/01/01
Date of Entry
1999/01/01
Revision Date
2005/07/01

Gastrointestinal Diseases MeSH Descriptor Data 2024

MeSH Heading
Gastrointestinal Diseases
Tree Number(s)
C06.405
Unique ID
D005767
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D005767
Annotation
general: prefer specifics; inflammatory disease = GASTROENTERITIS
Scope Note
Diseases in any segment of the GASTROINTESTINAL TRACT from ESOPHAGUS to RECTUM.
Entry Version
GASTROINTESTINAL DIS
Entry Term(s)
Cholera Infantum
Functional Gastrointestinal Disorders
Gastrointestinal Disorders
Gastrointestinal Disorders, Functional
Public MeSH Note
1965
History Note
1965
Date Established
1965/01/01
Date of Entry
1999/01/01
Revision Date
2019/06/17

Immunotherapy MeSH Descriptor Data 2024

MeSH Heading
Immunotherapy
Tree Number(s)
E02.095.465.425
Unique ID
D007167
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D007167
Annotation
coordinate with disease /ther
Scope Note
Manipulation of the host's immune system in treatment of disease. It includes both active and passive immunization as well as immunosuppressive therapy to prevent graft rejection.
Entry Version
IMMUNOTHER
Previous Indexing
specific disease/therapy (1966-1972)
Public MeSH Note
73; VACCINE THERAPY was heading 1963-82
Online Note
use IMMUNOTHERAPY to search VACCINE THERAPY 1966-72
History Note
73; VACCINE THERAPY was heading 1963-82
Date Established
1973/01/01
Date of Entry
1999/01/01
Revision Date
2009/07/06

Biology MeSH Descriptor Data 2024

Details | Qualifiers | MeSH Tree Structures | Concepts

MeSH Heading
Biology
Tree Number(s)
H01.158.273
Unique ID
D001695
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D001695
Annotation
the discipline (education, history, etc) only; use BIOLOGICAL PHENOMENA or specifics treed under it for biological characteristics and processes of organisms and of the biosphere; note broader heading BIOLOGICAL SCIENCE DISCIPLINES is also available
Scope Note
One of the BIOLOGICAL SCIENCE DISCIPLINES concerned with the origin, structure, development, growth, function, genetics, and reproduction of animals, plants, and microorganisms.
Entry Version
BIOL
Date Established
1966/01/01
Date of Entry
1999/01/01
Revision Date
2008/11/26

362 1 Began with vol. 1 in Jan. 1941.
500 Imprint varies: Chicago, Ill. : University of Chicago Press, 1941- ; Baltimore, Md. : Cancer Research, Inc., <Jan. 1, 1987->; Philadelphia, PA : American Association for Cancer Research, <Nov. 1, 1994->
510 2 Chemical abstracts **$x** 0009-2258
525 From 1958-1967, some issues accompanied by separately paged supplement numbered pt. 2, with title Cancer chemotherapy screening data.
530 Also issued in online version.
550 Issued 1941-Jan. 1946 by International Cancer Research Foundation; Feb. 1946-1948 by the William H. Donner Foundation.
555 Vols. 1 (1941)-10 (1950). 1 v.; Vols. 11 (1951)-25 (1965). 1 v.; Vols. 26 (1966)-30 (1970). 1 v.
588 Description based on: Vol. 40, no. 3 (Mar. 1980); title from cover.
588 Latest issue consulted: Vol. 54, no. 21 (Nov. 1, 1994).

Leukocytes MeSH Descriptor Data 2024

Details | Qualifiers | MeSH Tree Structures | Concepts

MeSH Heading
Leukocytes
Tree Number(s)
A11.118.637
A15.145.229.637
A15.382.490
Unique ID
D007962
RDF Unique Identifier
http://id.nlm.nih.gov/mesh/D007962
Annotation
decrease in no. of leukocytes: consider LEUKOPENIA; increase in number of leukocytes: consider LEUKOCYTOSIS; CELL MIGRATION ASSAYS, LEUKOCYTE is available
Scope Note
White blood cells. These include granular leukocytes (BASOPHILS; EOSINOPHILS; and NEUTROPHILS) as well as non-granular leukocytes (LYMPHOCYTES and MONOCYTES).
Entry Term(s)
Blood Cells, White
Blood Corpuscles, White
White Blood Cells
White Blood Corpuscles
See Also
Phagocytosis
Entry Combination
transplantation:Leukocyte Transfusion
Date Established
1966/01/01
Date of Entry
1999/01/01
Revision Date
2007/07/09
