

Claim Limitation Comparison
U.S. Patent No. 11,228,123, claim 1 to U.S. Provisional Application No. 62/780,504 claims 1, 5

EX1014 USP 11,228,123 Claim 1	EX1015 No. 62/780,504 application-claim 1	EX1015 No. 62/780,504 application-claim 5
1. A paddle card comprising:	1. A paddle card comprising:	5. The paddle card of claim 1, wherein: the paddle card further comprises
a surface comprising:	a surface comprising	
a plurality of pads on the surface; and	a plurality of pads on the surface; and	
a plurality of openings in the surface; and		a plurality of openings in the surface; and
at least one conductive structure electrically and physically connected to pads of the plurality of pads, wherein:	at least one conductive structure electrically and physically connected to pads of the plurality of pads, wherein:	
the at least one conductive structure comprises: a plurality of tabs, each tab extending upward from the surface; and	the at least one conductive structure comprises a plurality of tabs, each tab extending upward from the surface; and	
a plurality of protrusions that extend into corresponding openings in the plurality of openings; and		the at least one conductive structure further comprises a plurality of protrusions that extend into corresponding openings in the plurality of openings.
each tab of the plurality of tabs is configured for electrical contact with an exposed shield of an associated cable.	each tab of the plurality of tabs is configured for electrical contact with an exposed shield of an associated cable.
