

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

UIPATH, INC.,

Petitioner,

v.

RULE 14 LLC.,

Patent Owner.

Case No. IPR2025-00623
U.S. Patent No. 10,108,679

DECLARATION OF DESIREE L. WOLF

I, Desiree L. Wolf, make the following Declaration pursuant to 28 U.S.C. § 1746:

1. I am a paralegal with the law firm of Volpe Koenig, attorneys for Petitioner in this matter.

2. On December 31, 2024, I accessed the website page at the following URL link:

<https://ieeexplore.ieee.org/document/331726>

3. Attached as Exhibit A is a true and correct copy of a screen capture I created on December 31, 2024 of the website page for the URL link listed in Paragraph 2.

4. On December 31, 2024, I accessed the website page at the following URL link:

<https://ieeexplore.ieee.org/xpl/conhome/997/proceeding>

5. Attached as Exhibit B is a true and correct copy of a screen capture I created on December 31, 2024 of the website page for the URL link listed in Paragraph 4.

6. On December 31, 2024, I accessed the website page at the following URL link:

<https://ieeexplore.ieee.org/xpl/conhome/997/proceeding?isnumber=7843&sortType=vol-only-seq&pageNumber=2>

7. Attached as Exhibit C is a true and correct copy of a screen capture I created on December 31, 2024 of the website page for the URL link listed in Paragraph 6.

8. On December 31, 2024, I accessed the website at the following URL link:

<https://isbnsearch.org/>

9. Attached as Exhibit D is a true and correct copy of a screen capture I created on December 31, 2024 of the website page for the URL link listed in Paragraph 8.

10. At the website located at the URL listed in Paragraph 8, there was a search window and search button as shown in Exhibit D. I entered ISBN No. “0-8186-6400-2” into the search window and clicked the search button. Upon clicking search, a website page appeared at the following URL link:

<https://isbnsearch.org/isbn/0818664002>

11. Attached as Exhibit E is a true and correct copy of a screen capture I created on December 31, 2024 of the website page for the URL link listed in Paragraph 10.

12. On December 31, 2024, I accessed the website at the following URL link:

https://worldwide.espacenet.com/?locale=EN_ep

13. Attached as Exhibit F is a true and correct copy of a screen capture I created on December 31, 2024 of the website page for the URL link listed in Paragraph 12.

14. In the search window, shown in Exhibit F, I entered “XP002085758” and slicked the search button. Upon clicking search, the website page at the following URL link appeared:

https://worldwide.espacenet.com/searchResults?ST=singleline&locale=en_EP&submitted=true&DB=&query=XP002085758

15. Attached as Exhibit G is a true and correct copy of a screen capture I created on December 31, 2024 of the website page for the URL link listed in Paragraph 14.

16. At the website page for the URL link listed in Paragraph 14, I clicked the hyperlink for the search result “1. Precision and recall of GLOSS estimators for database discovery.” Upon clicking the hyperlink for the search result, the website page at the following URL appeared:

https://worldwide.espacenet.com/nplReferenceDetails/biblio?CC=XP&NR=002085758&KC=&FT=E&DB=&locale=en_EP&ND=1&II=0

17. Attached as Exhibit H is a true and correct copy of a screen capture I created on December 31, 2024 of the website page for the URL link listed in Paragraph 16.

18. To create Exhibits A-H, I used the Chrome web browser and the screen capture program "Awesome Screenshot."

19. I hereby declare under penalty of perjury under the laws of the United States that all statements made herein of my knowledge are true, and that all statements made on information and belief are believed to be true. I understand willful false statements and the like are punishable by fine or imprisonment, or both, under § 1001 of Title 18 of the United States Code.

Abstract:
Online information vendors and the Internet together offer thousands of text databases from which a user may choose for a given information need. This paper presents a framework for and analyses a solution to this problem, which we call the text-database discovery problem. Our solution is to build a service that can suggest potentially good databases to search. A user's query goes through two steps: first, the query is presented to the GIOSS server (Glossary-Of-Servers Server) to select a set of promising databases to search. Secondly, the query is actually evaluated in the chosen databases. GIOSS gives a hint of what databases might be useful for the user's query, based on word-frequency information for each database. This information indicates how many documents in each database actually contain a keyword, for each field designator. To evaluate the set of databases that GIOSS returns for a given query, we present a framework based on the precision and recall metrics of information retrieval theory. We define metrics for the text-database discovery problem. We further extend our framework by offering different definitions for a "relevant database". We have performed experiments using query traces from the FOLIO library information retrieval system, involving six databases available through FOLIO. The results obtained for different variants of GIOSS are very promising. Even though GIOSS keeps a small amount of information about the contents of the available databases, this information proved to be sufficient to produce very useful hints on where to search.< >

Espacenet: free access to over 150 million patent documents
Smart search:

New Espacenet is here
Why not move to the [new interface](#) and get started right away?
Key features:

- Enjoy a seamless search experience and an application that adapts to the size/format of your devices
- Search in all data, including full text, per default
- See your search query at all times and refine it whenever you want
- Browse the entire result list with abstract snippets and/or drawings
- Navigate the result list and document details at the same time
- Build your query intuitively using Advanced search
- Filter your results according to predefined categories and run statistical analyses

Need some time to get familiar with new Espacenet? We will keep classic Espacenet running for a little while longer so that the transition is smooth.

CPC International
The CPC International project (CPCI) was launched on 24/25 August 2019.
