PRO

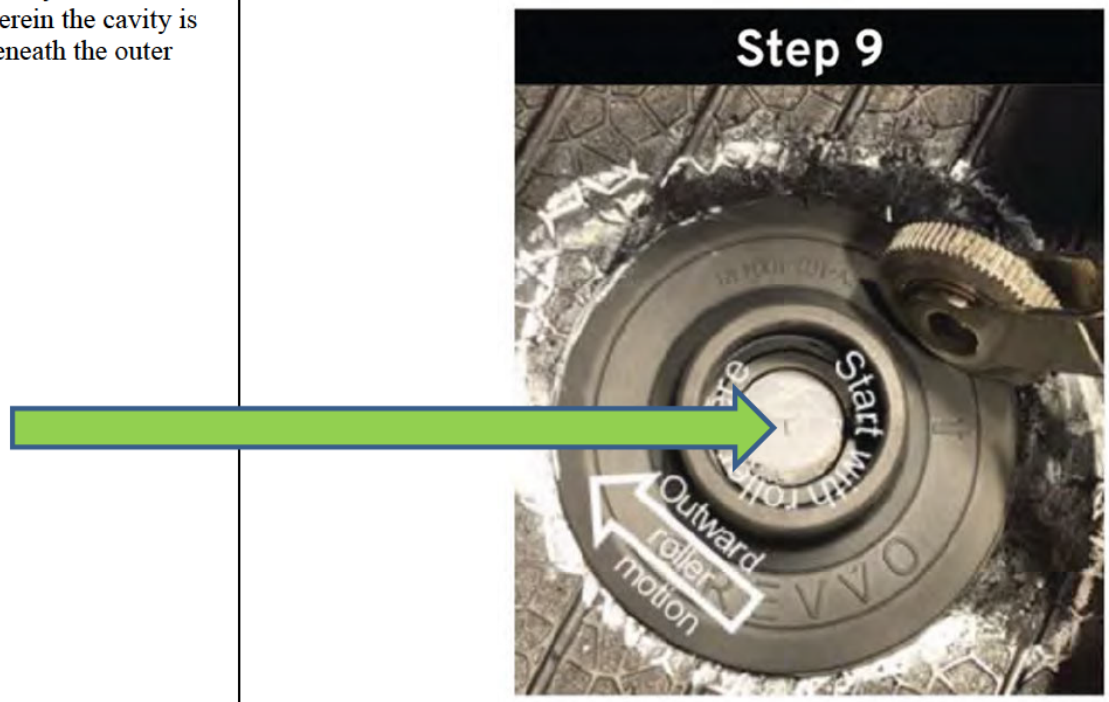

Revvo Pro Tire Mounted Sensor is the most sophisticated tire sensor available in the market for all tire sizes and applications. Revvos patented sensor works on any tire to capture data from every revolution of the tire. Tire data for pressure, temperature, tread, load, alignment, road surface, wheel security, position, and more are sent to Revvo in vehicle gateways or vehicle telematics via BLE. Sensors are automatically detected and registered to vehicles, no need for additional hardware or apps to setup!
