Tire Cord Fabric Products

Industrial Textile

Vision

The Teijin Group is developing midstream business by accelerating sales to Asia's expanding automotive industry, aiming to strengthen its local supply of automotive rubber materials, such as Tire Cord Fabric, to customers in ASEAN and East Asia.

Mission and product

TEIJIN FRONTIER (THAILAND) CO., LTD. combines Teijin's and Ayaha's advanced processing technologies and Teijin Frontier's converting capabilities, to produce high quality Rayon, Aramid and Hybrid tire cords for high-performance tires that will help meet the expanding demand for premium driving in the Asian region. We also produce Polyester and Nylon tire cords for general tires.

Quality Policy

- In order to achieve world-class quality, we continuously improve our quality management practices by ingenious actions, We then enhance customers satisfaction by responding promptly to their demands.
- 1. Unerringly grasp the quality requirements of the customer, in order to deliver the world's highest level of quality.
 - 2. Implement and continuously improve our quality management practices in order to adapt to changes and continue to develop as a company.
 - 3. Observe all applicable laws and demonstrate the utmost respect for the rights of customers and other parties.
 - 4. Make a united effort to establish our quality policy and verify that we achieve the policy we state.
