

Disclaimer

The U.S. government does not review or approve the safety and science of all studies listed on this website. The study sponsor or investigator submits information about their study to ClinicalTrials.gov and is responsible for the safety, science, and accuracy of any study they list.

- ClinicalTrials.gov is a **website** and **online database** of clinical research studies and their results. The National Library of Medicine (NLM) maintains the website. A broad range of public and private organizations around the world sponsor (oversee) and fund (pay the costs) studies listed in the ClinicalTrials.gov database. U.S. government agencies do not oversee or fund all the studies listed on ClinicalTrials.gov.
- Study sponsors or investigators provide the study information on ClinicalTrials.gov. The study sponsor or investigator is responsible for ensuring that their studies follow all applicable laws and regulations and for submitting complete, accurate, and up-to-date information about their study. NLM staff only reviews study information for apparent errors, deficiencies, or inconsistencies.
- Choosing to join a study is an important personal decision. Before you join a study, learn about the possible risks and benefits and discuss all options with your health care professional. To learn more about taking part in clinical research studies, read [Learn About Studies](https://clinicaltrials.gov/study-basics/learn-about-studies) (<https://clinicaltrials.gov/study-basics/learn-about-studies>), which includes questions to ask the study staff before deciding to join.
- For more information about using the information on ClinicalTrials.gov, please also see [Terms and Conditions](https://clinicaltrials.gov/about-site/terms-conditions) (<https://clinicaltrials.gov/about-site/terms-conditions>).
- See also the [Web Policies and Notices](https://www.nih.gov/web-policies-notice) (<https://www.nih.gov/web-policies-notice>) for the NIH web site.
