Reg.: Omni Continuum

Dear Mr. Lewry,

Following your 4 April 2022 letter, I can inform that we have carefully reviewed the offered 15 patents and still find that the patents do not cover any of the products offered for sale by us.

As described in our previous letter, we could still have some commercial interest in the offered patents to strengthen our general IPR position even more with respect to supercontinuum sources.

However, we were not aware of the fact that Omni Continuum has developed and produced supercontinuum sources to the extent described in the attachment to your afore-mentioned letter. And as you are again offering to sell the entire Omni Continuum company, we could be interested in further considering this option and not only the patent portfolio. Could you please provide us with more information about the business and activities of Omni Continuum, e.g. in the form of an Information Memorandum, allowing us to better understand what an acquisition of Omni Continuum would entail for us?

Kind regards,

Morten Halskov
VP, General Counsel
