Parts/Attachments: text/plain (1270 bytes) , text/html (12 kB) , R2-19xxxxx RRC running CR for NR IIoT.docx (212 kB)

Dear all,

This is to kick off the following email discussion:

* [107bis#41][IIOT] Running CR 38331 (Ericsson)

Intended outcome: CR submitted to next meeting, Capture agreements incl 107bis, include the whole WI

Deadline: Next Meeting

The previously endorsed version is marked with "Ericsson", while the new changes are marked with "RAN2#107bis". Note that

1. As agreed in the RAN2#107 meeting under the eURLLC WI discussion, this running CR captures the UL intra-UE prioritization, DL SPS and enhanced UL CG transmission (which is under the eURLLC WI).

2. This running CR also captures the RRC parameter list for IIoT WI and UL CG transmission part in eURLLC WI in the following two tdoc (see the incoming LS R1-1911745)

R1-1911729<http://www.3gpp.org/ftp/tsg_ran/WG1_RL1/TSGR1_98b/Docs/R1-1911729.zip> Summary of RRC parameters for NR eURLLC

APPLE 1013

R1-1911748<http://www.3gpp.org/ftp/tsg_ran/WG1_RL1/TSGR1_98b/Docs/R1-1911748.zip> Parameter list for IIOT

Please check the capture status in the annex and let me us know if any agreement is missing or not correctly captured. Given the submission deadline, please kindly provide your comment until Nov 6th .
