IBM eserver pSeries

Hardware

UNIX Clusters

Featuring the IBM eserver Cluster 1600

Learn more

- Simplifies cluster administration with a unique cluster identification number
- Includes large scale RS/6000 SP
- Targeting scientific and technical computing, high-level business computations and server consolidation
- Call for pricing

Datacenter-class and HPC servers

Includes the IBM eserver pSeries 690

Learn more

- Datacenter-class reliability and consolidation support for mission critical applications
- High perfomance computing (HPC) option provides the power to handle demanding scientific and commercial workloads
- Starting at $450,000

Announcement

Introducing IBM eserver Cluster

pSeries offerings

→ Specially priced infrastructure packaged solutions

UNIX AND OPEN SYSTEMS

IBM @server pSeries

Hardware

UNIX Clusters

Featuring the IBM @server Cluster 1600

Learn more

- Simplifies cluster administration with a unique cluster identification number
- Includes large scale RS/6000 SP
- Targeting scientific and technical computing, high-level business computations and server consolidation
- Call for pricing

Datacenter-class and HPC servers

Includes the IBM @server pSeries 690

Learn more

- Datacenter-class reliability and consolidation support for mission critical applications
- High perfomance computing (HPC) option provides the power to handle demanding scientific and commercial workloads
- Starting at **$450,000**

Enterprise servers

Includes the IBM @server pSeries 680

Learn more

- Ideal for both medium-sized and large businesses
- Excellent for mission-critical commerical or e-business applications
- Providing the highest level of Web security, systems management and Web performance
- Starting at **$220,000**

Performance midrange rack servers

Includes the IBM @server pSeries 660 family

Learn more

- Delivers outstanding power in a small footprint
- Advanced reliability, availability, and serviceability features
- NEBS Level 3 certification for telecommunications and other harsh environments
- Starting at **$20,995**

Performance rack optimized servers

Includes the IBM @server pSeries 640

Learn more

- High density rack design
- Ideal packaging and performance for ISPs and ASPs
- NEBS Level 3 certification for telecommunications and other harsh environments
- Advanced reliability, availability, and serviceability features
- Starting at **$14,495**

Performance tower servers

Includes the IBM @server pSeries Model 620 family

Learn more

- Powerful deskside servers for e-business
- Designed for optimal expansion, creating superior investment protection
- Designed for collaborative and multi-user environments demanding high availability
- Advanced reliability, availability, and serviceability features
- Starting at **$16,995**

Entry servers

Includes the IBM @server pSeries 610, the IBM RS/6000 B50, 43P and 44P

Learn more

- Flexible rack and tower options with affordable performance
- Exceptional expandability in a small footprint

Announcement

Library

If you're interested in IBM UNIX servers and workstations, their operating system, AIX, or other application software products, this Library page is just what you need.

→ **Consultant reports**
Top consultants in the industry have been researching, testing and analyzing IBM's UNIX server products and positioning.

→ **White papers and technical reports**
Here's where we get into the nitty-gritty details. You'll find these reports a resource for learning and updating your IBM @server pSeries and IBM RS/6000 knowledge. These reports will provide a useful view of IBM's developments and leading-edge technology.

→ **Exploring IBM RS/6000 computers (Maximum Press)**
Exploring IBM RS/6000 Computers tells you everything you need to know to integrate and manage RS/6000 computers in small, medium, or large sized business organizations.

Online Publications and Books

→ **Hardware documentation**
This is where you will find the Installation, User's Guides, and Service Guides as well as Installable Option Guides for the IBM @server pSeries and IBM RS/6000 server hardware systems.

→ **AIX Version 5L documentation library**
→ **AIX Version 4.3 documentation library**
AIX operating system manuals. Covers topics such as installation, commands, systems management, programming, diagnostics, and user guides.

→ **Scalable Parallel (SP) hardware and software documentation**
SP multi-processor systems hardware and software manuals. Covers topics such as planning, service, system management, file systems, and diagnostics in parallel systems environments.

→ **General Parallel File System (GPFS) for AIX documentation**
IBM General Parallel File System for AIX (GPFS) is a standards-based, parallel file system that delivers high performance, high availability and high scalability, while preserving the application interfaces used in standard file systems. GPFS allows access to files within an RS/6000 SP (SP) system, or from up to 8 SSA-connected AIX workstations in an HACMP cluster, from any GPFS node in the system and can be exploited by parallel jobs running on multiple SP nodes as well as by serial applications that are scheduled to nodes based on processor availability.

→ **High Availability Cluster Multi-Processing (HACMP) for AIX documentation**
HACMP for AIX documentation. Covers topics such as installation, administration, planning, troubleshooting, and programming locking and client applications. Includes links to High Availability Geographic Cluster of AIX and Geographic Remote Mirror for AIX publications.

Other IBM libraries and publications

→ **IBM Redbooks**
A catalog of all IBM "how to" books covering IBM products.

Special announcement
New IBM @server Products & Technologies

IBM Publications Center
→ The IBM Publications Center site offers customized search functions to help you find the publications you need.

Related Web Sites
→ These links provide useful information and resources for IBM UNIX servers RS/6000, AIX and other related products.

Additional information
→ UNIX server case studies
→ IBM @server environmentally conscious products

Ex.1113 / IPR2025-00913 / Page 5 of 16
Intel Corporation v. Advanced Cluster Systems, Inc.

→ **IBM technical journals**
Featuring IBM Systems Journal and IBM Journal of Research and Development.

→ **IBM @server Solutions Connection**
A searchable catalog of world-wide third-party (non-IBM) applications, tools and services for IBM platforms. The catalog covers a wide range of solutions for specific technologies and industries.

→ **e-business EDGE magazine**
IBM developer's magazine about IBM issues and successes.

Support services

→ **Software technical mailing lists**
Subscribe to email notifications on product fixes, security alerts, and service announcements.

→ **Software support handbook**
This guide provides an overview of the various support services that are available for assistance with the AIX operating system or software. The guide explains the available services, how they work, and includes contact phone numbers.

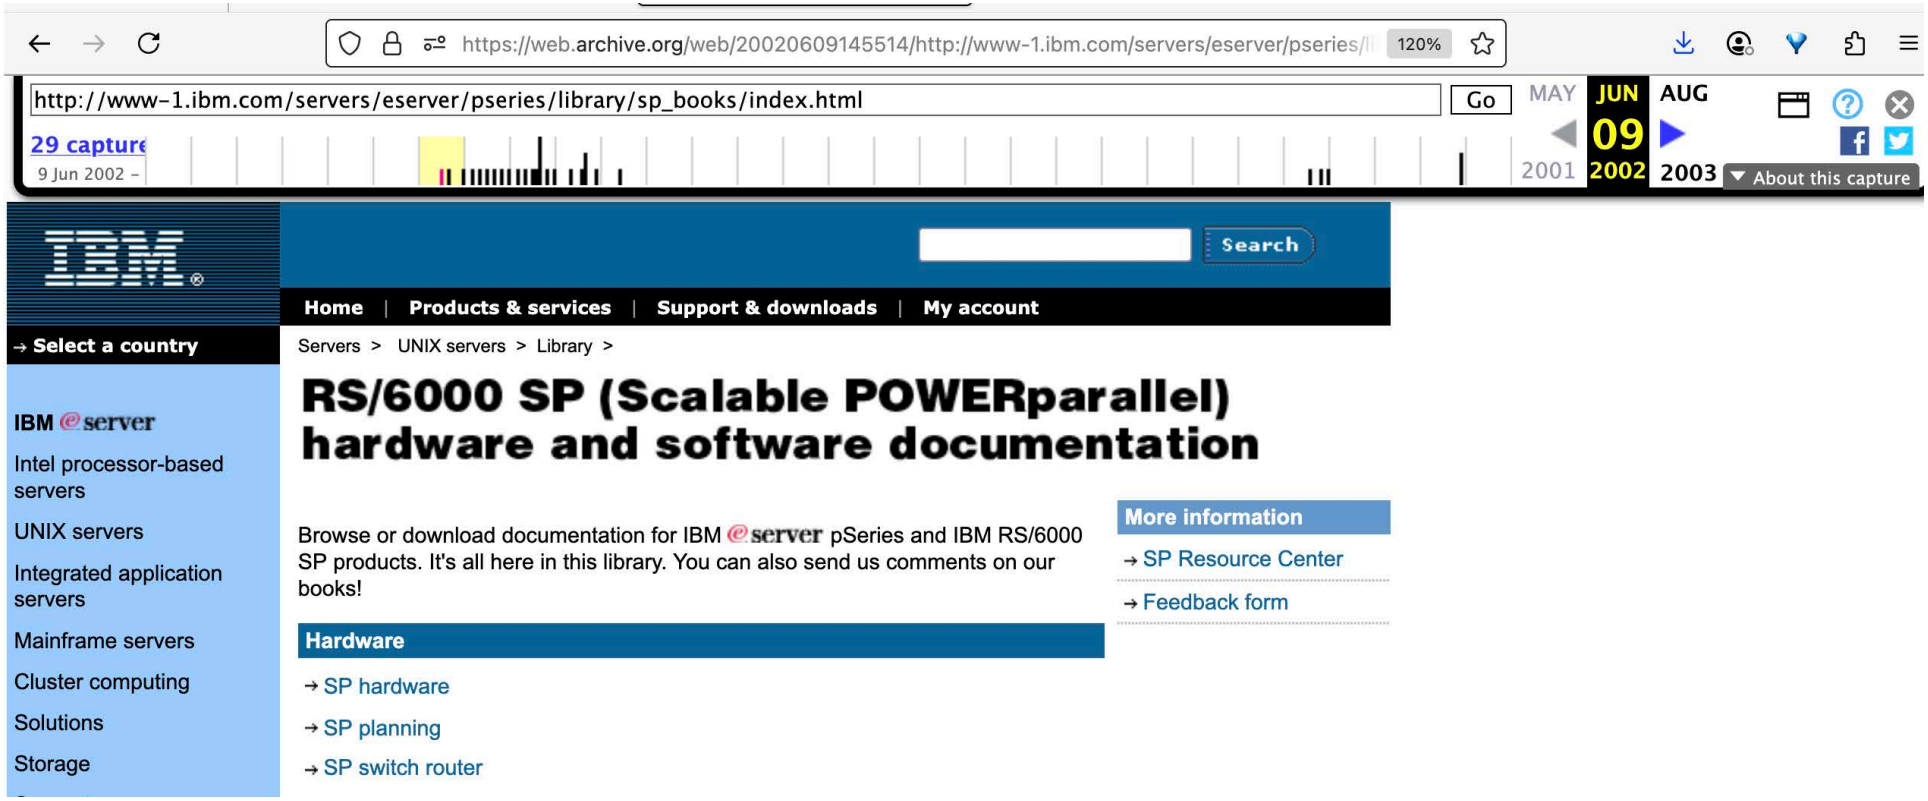

→ **Technical support**
The support home page for IBM @server pSeries and IBM RS/6000 server hardware, and AIX. Contains links to tips & hints, problem reports, downloads for fixes/tools/microcode, newsletters, submit a technical problem, report a product bug, contact a technical support center or learn about available service offerings.

→ **Education**

- → **Course Roadmaps**
  Charts outlining the sequence of courses in this curriculum.
- → **Course Advisor**
  This tool advises you on the courses to take based on the skills you need.
- → **Professional Certification**
  Advice on which courses to take to prepare you for specific tests.
