

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

INTEL CORPORATION,
ADVANCED MICRO DEVICES,
Petitioners,

v.

ADVANCED CLUSTER SYSTEMS, INC.,
Patent Owner

IPR2025-00914
Patent No. 12,021,679

**PATENT OWNER'S REPLY IN SUPPORT OF REQUEST FOR
DISCRETIONARY DENIAL¹**

¹ Authorized on September 2, 2025. Ex. 3101.

PATENT OWNER'S EXHIBIT LIST

<u>Exhibit</u>	<u>Description</u>
2001	DocketNavigator Statistics for Motion Success for Stay Pending IPR (Post-Institution) for Judge Albright
2002	J. Albright Standing Order Governing Proceedings (OGP) 4.4 – Patent Cases (Jan 23, 2024)
2003	DocketNavigator Statistics for Time-to-Milestones for Judge Albright
2004	<i>Advanced Cluster Systems, Inc. v. Intel Corporation</i> , Amended Scheduling Order (D.I. 54)
2005	<i>Advanced Cluster Systems, Inc. v. Advanced Micro Devices, Inc.</i> , Scheduling Order (D.I. 36)
2006	Judge Albright Clerk emails
2007	<i>Allani v. Apple Inc.</i> , No. 6:24-cv-304-ADA (W.D. Tex. May 6, 2025) (D.I. 30)
2008	<i>Intellectual Ventures I LLC v. TCL Elects. Holdings Ltd.</i> , No. 6:23-cv-309-ADA (W.D. Tex. Sept. 10, 2024) (D.I. 44)
2009	<i>Acquis, LLC v. Hon Hai Precision Indus Co. Ltd.</i> , No. 6:23-cv-264-ADA (W.D. Tex. May 31, 2024) (D.I. 46)
2010	<i>ParkerVision, Inc. v. MediaTek Inc. et al.</i> , No. 6:22-cv-01163-ADA (W.D. Tex. April 29, 2024)
2011	<i>TOT Power Control, S.L. v. AT&T, Inc. et al.</i> , No. 6:21-cv-00107-ADA (W.D. Tex. June 6, 2025)
2012	<i>AlmondNet, Inc. v. Amazon.com, Inc., et al.</i> , No. 6:21-cv-00898-ADA (W.D. Tex. June 19, 2025)
2013	Intel Corporation's Amended Invalidity Contention Cover Pleading (Apr. 25, 2025)
2014	[EXHIBIT NOT USED]

PO Reply in Support of Discretionary Denial

- 2026 *Yeti Coolers, LLC v. Waterbear Global, LLC*, Case No. 1:24-cv-
(New) 1251-ADA (D.I. 35, 35-1), Unopposed Motion to Extend
Scheduling Order Deadlines and Proposed Order
- 2027 Intel Corporation’s Third Amended Preliminary Invalidity And
(New) Subject-Matter Eligibility Contentions (Aug. 28, 2025)

Patent Owner submits this reply brief in support of its request for discretionary denial (Paper 7, “DD Req.”).

I. First Office Action Allowance Does Not Demonstrate Material Error

Petitioners incorrectly rely on *Shenzen*, in which a single reference taught all of the limitations of the challenged claims, for a general principle that issuing a first action allowance is material error *per se*. (Paper 9, “DD Opp.,” at 8-9) (citing *Shenzen Chic Elecs. Co., Ltd. v. Pilot, Inc.*, IPR2023-00810, Paper 12, 21 (PTAB July 16, 2025)). No such *per se* rule exists and those facts do not apply here. Petitioners further allege the Examiner erred because Petitioners would have applied the Menon and Trefethen references differently, DD Opp. at 9-11, but that does not constitute material error. See *Advanced Bionics, LLC v. MED-EL Elektromedizinische Geräte GmbH*, IPR2019-01469, Paper 6 at 9 (PTAB Feb. 13, 2020) (“If reasonable minds can disagree regarding the purported treatment of the art . . . it cannot be said that the Office erred in a manner material to patentability.”). Petitioners’ arguments are pure speculation and legally deficient.

II. § 325(d) Applies Because RS6000 And POEref Are Cumulative And Petitioners Have Failed To Show Material Error

It is undisputed that Menon and Trefethen were before the Examiner. DD Req. at 34. Petitioners allege that RS6000 discloses four, eight, twelve or sixteen 375 MHz 630FP 64-bit processors. DD Opp. at 13. Menon, however, already discloses that its system includes multiple processor nodes. Ex. 1005 at 5, 13; Pet. at 29 (“Menon

describes running ‘MultiMATLAB’ on ‘the IBM SP2’ with ‘32 processors’ (plurality of nodes).”) Petitioners have failed to show that the number or type of processors disclosed in RS6000 is material. *Becton, Dickinson & Co. v. B. Braun Melsungen AG*, IPR2017-01586, Paper 8 at 9 (PTAB Dec. 15, 2017) (Petitioner’s burden in IPRs “never shifts to the Patent Owner.”).

Petitioners also argue that RS6000 discloses “internal or external” “disk drives or memory cards,” DD Opp. at 13, but fail to show that this is material because the claims do not require disk drives or memory cards. Claim 4 only recites “a non-transitory computer-readable medium” (Pet. 58 (element [4.0])), and this is already disclosed by Menon. “Menon describes MATLAB as being in an ‘address space.’” Pet. at 32, citing Ex. 1005, Fig. 2, 5. Petitioners’ expert confirms this. Ex. 1003, ¶ 101 (“The MATLAB address space includes MATLAB, MEX routines which ‘are executables originally written in C or Fortran that may be run directly from MATLAB’”) citing Ex. 1005, 3-5.

Petitioners argue that RS6000 discloses “Ethernet,” “Token Ring,” “ATM,” “Wide Area Network (WAN)” and thus alleges RS6000 is not cumulative of Menon. DD Opp. at 13. However, Menon discloses a communication subsystem of “a network of workstations connected by TCP/IP.” Ex. 1005 at 5. Petitioners’ expert further testified that “**Menon** explains that MultiMATLAB is intended to run on ‘any network’ of workstations supporting Matlab” and that “[a] POSITA would have

PO Reply in Support of Discretionary Denial

known that each of a LAN, WAN, intranet, wireless network, or the Internet communicate using TCP/IP[].” Ex. 1003, ¶ 178 (emphasis added). Thus, Petitioners’ expert confirms the asserted new disclosure is already found in Menon.

Petitioners’ POEref argument likewise fails because it is also cumulative of Menon. Petitioners allege that POEref discloses a command to start a cluster initialization process for the computer cluster. DD Opp. at 14. But the petition states that “Menon discloses that ‘all MATLAB processes are started via POE, IBM’s Parallel Operating Environment.’ Ex. 1005, 6. Then ‘[o]n non-interactive processes, a separate top-level MEX Routine is immediately run upon initialization of the system. This MEX Routine runs in a loop in which it waits for MATLAB commands to arrive from the interactive process.’ Ex. 1005, 4.” Pet. at 64; Ex. 1005, 6. Hence, Petitioners failed to show that POEref is not cumulative of Menon.

With respect to the second part of the *Advanced Bionics* framework, Petitioners’ arguments on *Becton*, *Dickinson* factors (e) and (f) fail. As to factor (e), Petitioners have not identified how the Examiner erred in its evaluation of the asserted prior art. Petitioners argue that the combination of references in their petition was not before the Examiner. DD Opp. at 16. This is insufficient to satisfy the *Advanced Bionics* analysis. *Ecto World, LLC v. RAI Strategic Holdings, Inc.*, IPR2024-01280, Paper 13 at 6 (PTAB May 19, 2025); *Sony Interactive Ent. LLC v. Terminal Reality, Inc.*, IPR2020-00711, Paper 15 at 12 (PTAB Oct. 13, 2020).

PO Reply in Support of Discretionary Denial

To the extent that Petitioners argue that Menon and Trefethen were buried in an IDS and did not provide guidance to the Examiner to support a *Becton, Dickinson* factor (f) argument, Petitioners ignore that the '679 Patent was examined by the same Examiner that examined U.S. Pat. No. 11,570,034 and reviewed NVIDIA's invalidity contentions applying Menon and Trefethen to claims from U.S. Pat. No. 10,333,768 that was cited in a 19-reference IDS there and considered again here. Ex. 2022 (cite 17); Ex. 2023; Ex. 1002 at 237 (cite 541). The Examiner understood and considered the references. Petitioners failed to show that § 325(d) does not apply.

III. The Economic and Security Interest Arguments Are Unavailing

Petitioners cite many documents to say that their chips are used by the government and in data centers, and that those users would be harmed by an injunction. DD Opp. at 17-23. Petitioners do not explain, however, how a PTAB review of the '679 Patent implicates such economic and security interests. Similar arguments untailored to particular products have been rejected in connection with Patent Owner's related U.S. Patent No. 10,333,768. *Advanced Micro Devices v. Advanced Cluster Systems*, IPR2025-00862, Paper 14 at 3 (PTAB Sept. 3, 2025).

IV. Petitioners' *Fintiv* Factor 2 Analysis Is Speculative

Petitioners fail to show the Parallel Litigation trial will occur in July 2027. DD Opp. at 24-26. Petitioners rely upon median time-to-trial statistics for the entire district (Ex. 1021 at 37), not specifically for Judge Albright. Petitioners have not

shown that since Chief Judge Moses' reassignment order that any of Judge Albright's prior cases—like the Parallel Litigation—have changed as a result of the order. In the Parallel Litigation, Judge Albright recently issued preliminary claim constructions (Aug. 16) and held a *Markman* hearing consistent with the existing schedule and indicated his rulings (Aug. 18). Ex. 2024. Finally, Petitioners fail to show that the Parallel Litigation will move because other trials are scheduled for the same day or week prior to the Parallel Litigation (DD Opp. at 26) because cases will often be resolved prior to the trial dates. Indeed, *VirtaMove v. Microsoft* (1:25-cv-794) (identified in Petitioners' Ex. 1067) has already been dismissed. *See* Ex. 2025. And, in *Yeti Coolers v. Waterbear Global* (1:24-cv-1251) the parties are seeking to extend the schedule and trial into March 2027 in part to explore settlement. *Compare* Ex. 2026 at 2,8 *with* Ex. 1070 at 3.

V. Petitioners' Misrepresent The *Fintiv* Factor 3 Activities

Contrary to Petitioners' argument, both the district court and parties have invested substantial time in the Parallel Litigation. *See* Paper 7 at 8-9. Judge Albright has appointed a technical advisor, held a *Markman* hearing, and stated his rulings. Petitioner Intel has also served extensive third supplemental invalidity contentions (Ex. 2027) and the parties have begun extensive accelerated fact discovery. By the time of institution, the parties will have also invested significant time involving the same art for the related '768 Patent. IPR2025-00862, Paper 14 (denying institution).

PO Reply in Support of Discretionary Denial
