

Get Involved

This is your formal invitation to consider joining 3GPP, via one of the Partners.

Delegates from over 850 companies participate in our Technical Specification Groups and their dependant Working Groups. Physical meetings can be attended by as many as a thousand experts, all working towards agreement on solutions that will allow future systems and user equipment to work together.

The 3GPP groups are making key decisions on which solution is adopted at any given time. The progress of a company contribution can be delayed and even jeopardised if the work is not properly represented as consensus is sought within the group.

Is it time you were in the room?

[Cookie policy](#)

Introducing How we work

Get the inside track on how to get started in the groups. Whether you are in 'Standards watch' mode or more active, we have a variety of resources here & in our [Delegate's Corner](#).

Tip: The vast majority of 3GPP meetings are F2F, but some do allow virtual participation, in listen mode. If you cannot attend, have a chat about that with the group's secretary (3GPP Group / Officials).

[More on 'How'](#)

Introducing Join a Group

Delegates come to 3GPP via their company's membership of one of the seven 3GPP Organizational Partners. The 'Join a Group' page provides some quick-start ideas for finding the right group.

Tip: One feature may span several groups. Use the Work Plan as well as the Group structure when deciding where to attend.

How to join a group...

Introducing A Global Partnership

See the graphic below, for the number of countries and companies taking part.

Joining one of the 3GPP Organizational Partners (OPs) is just the start. The WG and Plenary meetings are held across the Asian, European and North American continents, with some meetings making guest appearances in other important geographies.

Tip: Consider the need to travel and the international aspects of the job from the outset.

How Global?
