District's Numerical Standings	These values indicate where an individual district court stands in relation to other district courts in the circuit and in the nation. All "caseload" statistics are ranked in descending order (highest value/largest caseload receives a rank of 1 - e.g., civil filings per judgeship) and all other statistics are ranked in ascending order (lowest value/fastest termination rate or smallest backlog is ranked first - e.g., median time). In some categories fewer than 94 courts are ranked because information was not available for all districts.
