SANE 2000

2nd International SANE Conference

May 22 - 25, 2000 MECC, Maastricht, The Netherlands

Authors of the refereed papers were obliged to submit a paper, contrary to the invited speakers. This implicates that not all papers will be published on this web page.

All Postscript files are compressed using `gzip`

- [Future Directions of Sendmail \(*Postscript*\)](#), by Eric Allman
- [How to Ring a Swan. Adding tamper resistant authentication to Linux IPsec \(*Postscript*\)](#), by Bastiaan Bakker
- [Evaluation of cfengine's immunity model of system maintenance \(*Postscript*\)](#), by Mark Burgess
- [Crypto Blunders \(*Postscript*\)](#), by Steve Burnett
- [A rule based interface to the kernel for selective packet relaying \(*Postscript*\)](#), by K N Gopinath
- [Usenet news system \(*Postscript*\)](#) and [HTML](#), by Joe Greco
- [Jails: Confining the omnipotent root \(*PDF*\)](#), by Poul-Henning Kamp
- [An experimental tool for visual data mining \(*Postscript*\)](#), by Willem G. Knoop
- [Bastille Linux \(*Postscript*\)](#), by Jon Lasser
- [The NFS Version 4 Protocol \(*PDF*\)](#), by Brian Pawlowski
- [Modern File Systems and Storage \(*PDF*\)](#), by Rodney Ramdas
- [Real Stateful TCP Packet Filtering in Ipfiler \(*Postscript*\)](#), by Guido van Rooij
- [Architectures for Secure Multicast Communication \(*Postscript*\)](#), by Ruediger Weis
- [Deploying \(and Developing\) Free Software for Network Administration \(*PDF*\)](#), by Alexios Zavras

Tutorial notes will not be published here, unless the author specifically gives his/her permission.

- [Black Hats Session II \(PDF\)](#), by Walter Belgers & Hans van de Looy
- [Implementing Secure TCP/IP Networks with IPSEC & Linux FreeS/WAN Simple security for complex networks\(HTML\)](#), by Hugh Daniel
