EXHIBIT LIST

Ex. No.	Description
2002	<i>Samsung Electronics Co., Ltd., et al., v. CM HK, Ltd. et al.</i> , Case No. 4:24-cv-06567 at Docket 1 (N.D. Cal. Sep. 18, 2024), Samsung Electronics Co., Ltd., and Samsung Electronics America, Inc.’s Complaint for Declaratory Judgment.
2003	<i>CM HK, Limited, v. Samsung Electronics Co., Ltd., et al.</i> , Case No. 2:24- cv-00880 at Docket 46 (E.D. Tex. June 26, 2025), Defendants Samsung Electronics Co, Ltd. And Samsung Electronics America, Inc.’s Renewed Motion to Stay Pending Resolution of Any Motion to Dismiss the NDCA Action.
2004	<i>CM HK, Limited, v. Samsung Electronics Co., Ltd., et al.</i> , Case No. 2:24- cv-00880 at Docket 47 (E.D. Tex. July 9, 2025), Plaintiff CM HK Ltd.’s Opposition to Defendants’ Motion to Dismiss, Transfer, or Stay.
2005	<i>Samsung Electronics Co., Ltd., et al., v. CM HK, Ltd.</i> , Case No. 4:24-cv- 06567 at Docket 73 (N.D. Cal. May 15, 2025), Order Granting Defendant CM HK, Ltd.'s Motion to Dismiss.
2006	<i>Samsung Electronics Co., Ltd., et al., v. CM HK, Ltd.</i> , Case No. 4:24-cv- 06567 at Docket 80 (N.D. Cal June 10, 2025), Joint Stipulation and Order to Stay All Deadlines in the Scheduling Order.
2007	<i>Samsung Electronics Co., Ltd., et al., v. CM HK, Ltd.</i> , Case No. 4:24-cv- 06567 at Docket 72 (N.D. Cal. May 13, 2025), Joint Claim Construction and Prehearing Statement.
2008	<i>CM HK, Limited, v. Samsung Electronics Co., Ltd., et al.</i> , Case No. 2:24- cv-00880 at Docket 2 (E.D. Tex. November 1, 2024), Plaintiff’s Original Complaint for Patent Infringement.
2009	<i>CM HK, Limited, v. Samsung Electronics Co., Ltd., et al.</i> , Case No. 2:24- cv-00880 at Docket 17 (E.D. Tex. Jan 28, 2025), Plaintiff’s Amended Complaint for Patent infringement.
2010	<i>CM HK, Limited, v. Samsung Electronics Co., Ltd., et al.</i> , Case No.

	2:24- cv-00880 at Docket 36 (E.D. Tex. Mar. 3, 2025), Docket Control Order.
2011	<i>CM HK, Limited, v. Samsung Electronics Co., Ltd., et al.</i> , Case No. 2:24- cv-00880, (E.D. Tex. Jan. 7, 2025), Plaintiff's P.R. 3-1 & 3-2 Disclosures
2012	<i>CM HK, Limited, v. Samsung Electronics Co., Ltd., et al.</i> , Case No. 2:24- cv-00880, (E.D. Tex. Mar. 4, 2025), Defendants Samsung Electronics Co., Ltd and Samsung Electronics America, Inc's Local Patent Rule 3-3 Disclosures.

I. INTRODUCTION

Samsung ~~obtained institution on an incomplete and misleading claim scope record~~ did more than fail to disclose its district court indefiniteness position; it repeatedly told the Board that those positions never existed. Before filing these IPRs, Samsung ~~asserted~~ served invalidity contentions, in two co-pending district court proceedings ~~that multiple claim terms were indefinite, including~~ asserting that “predicted,” “axial accelerations,” and “spatial reference frame,” which was the only term Samsung asked the Board to construe and many other terms are indefinite. (Ex. 2012 at 69–71; Ex. 2047 at ~~69–71~~ 69–71.) ~~But~~ When the Board later ordered Samsung to ~~address~~ explain whether it had taken inconsistent claim-scope positions under *Revvo* and *Tesla*, Samsung ~~did not disclose those operative indefiniteness positions.~~ instead, ~~Samsung~~ represented that it had “~~always maintained~~” a plain and ordinary meaning construction and assured the ~~Board~~ never alleged “indefiniteness and therefore” this case was “unlike *Tesla*.” (Paper 14 at ~~4~~; Paper 20 at ~~4 & n.3~~.) Paul Hastings represents Samsung in both ~~district court cases and these proceedings.~~ 1, 5.) Samsung is represented by the same counsel, Paul Hastings, in both forums. The Board expressly relied on Samsung’s misrepresentations in its institution decision.

Even after Patent Owner exposed Samsung's undisclosed district court positions, Samsung refused to correct the record. Instead, it accused Patent Owner of "harassment" and argued that its indefiniteness positions were "effectively moot," despite those positions remaining in its operative invalidity contentions. That explanation cannot be reconciled with Samsung's representation that "*in the co- pending litigation*, Samsung has taken the position that the term should be given its 'plain and ordinary meaning.'" (Paper 14 at 1 (emphasis added).) Rather than correct the Board's understanding, Samsung doubled down before the Director, asserting that "the Board recognized that Petitioner has consistently applied the plain and ordinary meaning for this term, including in the *pending* district court litigation in California." (Paper 20 at 2.) Samsung has never corrected the record.

~~That omission was material. The Board was entitled to decide for itself whether Samsung's district court positions were inconsistent, reconcilable, immaterial, or supposedly mooted. Samsung was not entitled to withhold those positions and then characterize them as "effectively moot" only after Patent Owner exposed the omission. Because the Board relied on Samsung's incomplete account when it instituted review (Paper 17 at 20-23),~~ Sanctions under 37 C.F.R. §§ 42.11 and 42.12 are necessary to correct the record, remedy the prejudice to

Patent Owner, and protect the integrity of the IPR process. Patent Owner respectfully requests that the Board: (1) expunge Papers 14 and 20; (2) preclude Samsung from disputing that it has taken inconsistent claim-scope positions in these proceedings and the co-pending district court litigations; (3) award Patent Owner its reasonable attorneys' fees and expenses incurred addressing Samsung's misconduct, with leave to submit fee documentation after the Board rules on the merits of this motion; and (4) terminate these proceedings ~~under *Revvo* and *Tesla*~~.

II. RELEVANT FACTS

1. Two co-pending district court actions involve the same patents-at-issue in these IPRs. *Samsung Electronics Co. Ltd. v. CM HK, Ltd.*, No. 4:24-cv-06567-JST (N.D. Cal.) and *CM HK Ltd. v. Samsung Electronics Co., Ltd.*, No. 2:24-cv-00880- JRG (E.D. Tex.). Samsung is represented by the same counsel (Paul Hastings) in ~~both district court cases and these~~ all proceedings.

2. On March 4, 2025, Samsung served invalidity contentions in the Eastern District of Texas asserting that “spatial reference frame,” “predicted,” “axial accelerations,” “resulting deviation,” and many other claim terms are indefinite under 35 U.S.C. § 112 ¶ 2. (Ex. 2012 at 69-70.)⁺

⁺ ~~Citations are to the record in IPR2025-01023. Similar papers were filed in IPR2025-01071.~~

3. On March 14, 2025, Samsung served invalidity contentions in the Northern District of California asserting the same indefiniteness arguments. (Ex. 2047 at 69- 70.)

4. ~~Samsung then reaffirmed and preserved those indefiniteness positions in its Patent Local Rule disclosures.~~ On March 28, 2025, Samsung identified “spatial reference frame,” “display reference frame,” and “deviation” as “Terms for Construction or to be Found Indefinite.” in Northern District of California Patent Local Rule disclosures. (Ex. 2048 at 1-2.)

5. On April 18, 2025, Samsung ~~again identified~~ “reserve[d] the right to assert defenses under 35 U.S.C. § 112 for indefiniteness” in the Northern District of California for “spatial reference frame,” “display reference frame,” “deviation/resulting deviation,” “resultant angles,” “predicted axial acceleration,” “measured axial acceleration,” and “first data association model” as indefinite. (Ex. 2049 at 3-8.) ~~Samsung also reserved its right to offer expert testimony that these claim terms “fail to inform, with reasonable certainty, those skilled in the art about the scope of the invention.” (Id. at 2-3.)~~

6. On May 13, 2025, Samsung presented claim constructions in the Northern District of California for “spatial reference frame,” “display reference frame,” “deviation/resulting deviation,” “resultant angles,” and “first data

association model.” (Ex. 2007 at 2-3.) No affirmative waiver concerning indefiniteness was made.

67. Despite those district-court positions, Samsung told the Board in its ~~petitions~~ Petition that, other than “spatial reference frame,” no claim construction was required because the challenged claims were unpatentable “under any reasonable construction.” (Paper 1 at 22.) Samsung ~~nevertheless expressly~~ also reserved its right to pursue indefiniteness and other claim-scope arguments in district court. (*Id.* at 22 n.76.)

78. After the Director’s decisions in *Revvo* and *Tesla*, the Board *sua sponte* ordered Samsung to explain why it had taken “different positions regarding the construction of ‘predicted axial accelerations’” based on Patent Owner’s arguments in its preliminary response. (Paper 13 at 2-3.) The Board explained, “Although the Board’s trial rules ‘do not necessarily prohibit petitioners from taking inconsistent claim construction positions before the Board and a district court,’ when a petitioner takes alternative positions before the Board and a district court, the petitioner should, at a minimum, explain why alternative positions are warranted.” (Paper 13 at 2 (quoting *Revvo Techs., Inc. v. Cerebrum Sensor Techs., Inc.*, IPR2025-00632, Paper 20 at 3–4 (Dir. Nov. 3, 2025).)

89. Samsung did not disclose its indefiniteness positions in response to the Board’s order. Instead, Samsung represented that it “had never alleged that the term ‘predicted axial accelerations’ is indefinite” and that “Patent Owner’s contrary assertion is *yet another* blatant misstatement regarding the record.” (Paper 14 at 1.) Samsung also represented that this case was “unlike *Tesla*, ~~where the petitioner asserted the disputed claim term to be indefinite in district court litigation but argued before the Board that the term should be given its plain and ordinary meaning~~ because “Samsung did not argue indefiniteness for the claim limitation at the issue in the district court.” (Paper 14 at 45; Paper 20 at 4 & n.3.)

910. The Board relied on Samsung’s characterization of the record when it concluded that it was “not persuaded that Petitioner previously asserted that ‘predicted axial accelerations,’ by itself, is indefinite” and found that Samsung had “sufficient reason” for adopting its current positions. (Paper 17 at 20-23.)

~~10~~11. After Patent Owner brought Samsung’s undisclosed district-court indefiniteness ~~positions~~position regarding “predicted axial acceleration” to the Board’s attention, Samsung argued that it had “effectively withdrawn” those indefiniteness contentions before filing the IPRs and therefore had *no obligation to disclose them to the Board*. (Ex. 2050 at 3-4.)

~~44~~12. Samsung has never identified any amended invalidity contentions, withdrawn Patent Local Rule disclosure, stipulation, court order, or filing in either district court withdrawing or superseding the indefiniteness positions identified above.

III. LEGAL STANDARDS.

All parties and practitioners before the Board owe a duty of candor and good faith to the Office. 37 C.F.R. § 42.11(a). That duty applies throughout the entirety of a proceeding and requires disclosure of material information inconsistent with a position advanced, even absent a specific Board request. See Duties of Disclosure and Reasonable Inquiry During Examination, Reexamination, and Reissue, and for Proceedings Before the Patent Trial and Appeal Board, 87 Fed. Reg. 45,764, 45,765 (July 29, 2022); *Intas Pharms. Ltd. v. Atossa Theras. Inc.*, PGR2025-00043, Paper 33 at 9 (PTAB Jan. 16, 2026) (“[A] petitioner should keep in mind that it has a duty of candor in relation to relevant information that is inconsistent with a position advanced by the petitioner during the proceeding.”). The obligation rests with petitioner: “[p]atent [o]wner should not have been the first party to inform the Board as to Petitioner’s different claim construction positions in the two forums.” *American Airlines and Southwest*

Airlines v. Intellectual Ventures I LLC, IPR2025-01055, Paper 11 at 13 (PTAB Nov. 21, 2025).

~~All parties and practitioners before the Board owe a duty of candor and good faith to the Office. 37 C.F.R. § 42.11(a).~~ The Board may impose sanctions for, among other things, “[m]isrepresentation of a fact,” “[a]dvancing a misleading argument,” “[a]buse of process,” or “[a]ny other improper use of the proceeding.” 37 C.F.R. § 42.12(a). Available sanctions include expunging papers, precluding a party from contesting an issue, awarding compensatory expenses and attorney fees, and dismissal. 37 C.F.R. § 42.12(b).

IV. SAMSUNG AND ITS COUNSEL SHOULD BE SANCTIONED

A motion for sanctions requires the Board to consider: (1) whether the challenged conduct warrants sanctions; (2) whether the moving party suffered harm; and (3) whether the requested sanctions are proportional to that harm. *One World Techs., Inc. v. Chevron (HK) Ltd.*, IPR2020-00884, Paper 35 at 9 (PTAB Apr. 22, 2021). All three requirements are met here so sanctions are appropriate.

A. Samsung Failed to Disclose Material Indefiniteness Positions Responsive to the Board’s *Revvo/Tesla* Inquiry

Samsung and its counsel violated their duties of candor and good faith to the Office under Rule 42.11(a) and engaged in sanctionable misconduct under Rule 42.12(a) by failing to disclose material indefiniteness positions that Samsung

was simultaneously maintaining in two co-pending district court proceedings, and by making representations to the Board that were materially ~~incomplete~~inaccurate and misleading in light of ~~those undisclosed positions~~its operative district court invalidity contentions.

~~Between March and April 2025,~~Shortly before filing these IPRs, Samsung served invalidity contentions and Patent Local Rule disclosures in ~~the~~ co-pending Eastern District of Texas and Northern District of California actions. ~~Samsung is,~~where it is also represented by ~~the same law firm,~~ Paul Hastings, ~~in both the district court cases and these IPRs. These contentions expressly assert. In those disclosures, Samsung expressly asserted~~ that “predicted,” “axial accelerations,” “spatial reference frame,” ~~“display reference frame,” “resulting deviation,” “resultant angles,” “predicted axial acceleration,” and “measured axial acceleration”~~” and many other claim terms are indefinite under 35 U.S.C. § 112.

(Ex. 2012 at 69–71; Ex. 2047 at 69–71; Ex. 2048 at 1–2; Ex. 2049 at 2–8.) Samsung has ~~never~~not withdrawn, or amended, ~~or superseded those~~ its invalidity contentions; they remain Samsung’s operative invalidity and claim construction positions in both district courts.

Samsung then filed ~~its Petitions in these IPRs without giving the Board that claim scope record. And even though Samsung had already asserted and~~

~~preserved those indefiniteness positions in district court, it~~ these IPRs and told the Board that, other than “spatial reference frame,” no claim construction was required and that the challenged claims were unpatentable “under any reasonable construction.” (Paper 1 at 22.) Samsung also reserved its right to pursue indefiniteness ~~and other claim scope arguments~~ in district court. (*Id.* at 22 n.1.) ~~The Petition therefore presented an incomplete claim scope record from the outset.~~ 6 (“Petitioner is not ... waiving any arguments concerning claim scope or grounds that can only be raised in district court.”).) The Petitions do not disclose Samsung’s district court indefiniteness positions.

~~The omission became unmistakable~~ After the Director issued the *Revvo* and *Tesla*. ~~Following those~~ decisions, the Board *sua sponte* ordered Samsung to explain why it had taken “different positions regarding the construction of ‘predicted axial accelerations.’” (Paper 13 at 2–3.) ~~As~~ Samsung ~~acknowledged,~~ ~~the Board’s purpose~~ knew the Board was trying to determine whether Samsung it had “taken materially inconsistent positions” that would require “denial of institution under *Revvo*.” (Paper 20 at 3.) ~~That order put Samsung’s district court claim scope positions squarely at issue. Samsung was required to disclose those positions and explain them. It did not.~~

~~Instead, Samsung read the Board's Order narrowly and represented that it "has always maintained that the term 'predicted axial accelerations' should be given its ordinary meaning" and that this case was "unlike *Tesla*, where the petitioner asserted the disputed claim term to be indefinite in district court litigation but argued before the Board that the term should be given its plain and ordinary meaning." (Paper 14 at 4; Paper 20 at 4 & n.3.) Those representations were materially incomplete because Samsung did not disclose its operative district court indefiniteness positions.~~

Nevertheless, Samsung affirmatively told the Board that it "has never alleged that the term 'predicted axial accelerations' is indefinite." (Paper 14 at 1.) Samsung also represented that "Patent Owner's contrary assertion is yet another blatant misstatement regarding the record." (*Id.*) Samsung told the Board that its "position on the term 'predicted axial accelerations' in the co-pending litigation in the Northern District of California is consistent with its position in the instant IPR." (*Id.*) And "unlike the petitioner in [*Tesla*], Samsung did not argue indefiniteness for the claim limitation at issue in the district court." (*Id.* at 5; see also Paper 20 at 4 n.3.) But those statements cannot be reconciled with Samsung's invalidity contentions. Samsung's invalidity contentions separately assert that "predicted" and "axial accelerations" are indefinite. (Ex. 2012 at 69–70, Ex. 2047

at 69–70.) Samsung cannot truthfully tell the Board it “never alleged” the term was indefinite when its operative invalidity contentions allege that “predicted” and “axial accelerations” are indefinite.

~~Samsung never disclosed or attempted to reconcile those positions.~~
Samsung’s argument for the plain and ordinary meaning in this IPR is incompatible with its indefiniteness defense. By asking the Board to apply plain and ordinary meaning for “predicted axial accelerations,” Samsung represented that the scope of this term was ascertainable by one of ordinary skill in the art. (Paper 1 at 22–25.) But indefiniteness only applies when a claim term is indefinite if it fails to “provide objective boundaries for those of skill in the art.” *Interval Licensing LLC v. AOL, Inc.*, 766 F.3d 1364, 1371 (Fed. Cir. 2014). By asking Samsung also asked the Board to apply plain and ordinary meaning to those terms and proposing adopt a specific construction for “spatial reference frame” Samsung represented that those terms possessed a sufficiently definite meaning to inform a skilled artisan of their scope. (Paper 1 at 22–24) That is the opposite of indefiniteness, while simultaneously asserting that the term is indefinite in its district court invalidity contentions. (Compare Paper 1 at 22–25; with Ex. 2012 at 69–71; and Ex. 2047 at 69–71.)

~~Most strikingly, Samsung asserted that “spatial reference frame” was indefinite in district court while simultaneously asking the Board to adopt a specific construction of that very term.~~

Further, Samsung repeatedly invoked “plain and ordinary meaning” without ever explaining what it contends “predicted axial accelerations” means. Patent Owner specifically challenged Samsung in its Preliminary Response to identify the term’s plain and ordinary meaning, noting that “the ‘plain and ordinary meaning’ is inadequate ‘when reliance on a term’s ordinary meaning does not resolve the parties’ dispute.’” (Paper 8 at 20; Paper 17 at 14 (“Patent Owner ... criticizes Petitioner for failing to construe ‘predicted axial accelerations’...”).) Patent Owner further argued that Bassompierre’s gravity-only prediction does not disclose “predicted axial accelerations” that “encompass three types of acceleration” as Petitioner’s proposed construction requires. (Paper 18 at 10.) In response, Samsung acknowledged that “it is true that ‘axial accelerations’ can be one of three types of acceleration,” but argued only that Bassompierre need not disclose all three types. (Paper 20 at 7.) Samsung has never articulated what it contends the plain and ordinary meaning of “predicted axial accelerations” is, despite repeated opportunities to do so. That omission is difficult to reconcile with

Samsung's simultaneous assertion in district court that the constituent claim language is indefinite.

~~This is precisely why the duty of candor required disclosure of Samsung's indefiniteness.~~ The duty of candor required Samsung to disclose its inconsistent district court claim-scope positions. ~~In *Parus Holdings*,~~ The Board has explained that “if the party is or becomes aware of incorrect or inconsistent positions, the party must make the PTAB panel aware of the incorrect or inconsistent positions and must submit the inconsistent information.” *Google LLC v. Parus Holdings, Inc.*, IPR2022-00805, Paper 36 at ~~4–54–5~~ 5 (PTAB Nov. 6, 2023). ~~Once Samsung chose to argue that no *Tesla* like inconsistency existed, it had an affirmative obligation to disclose the district court positions that directly bore on that representation.~~

Likewise, the Board has explained that sanctionable misconduct “begins with ~~Longhorn Vaccines confirms the same rule.~~ the intentional failure ... to serve or inform the Board ~~explained~~ of relevant information that is inconsistent with a position advanced” in the proceeding, and that “[a] party should not take a position that is contrary to any fact known to the party, without disclosing that fact,” ~~because doing so “violates the duty of candor and good faith to the Office.”~~ *Spectrum Solutions LLC v. Longhorn Vaccines & Diagnostics, LLC*,

IPR2021-00847, Paper 107 at 13, 49 (PTAB May 3, 2023). ~~The Board further held that sanctionable misconduct “begins with the intentional failure ... to serve or inform the Board of relevant information that is inconsistent with a position advanced” in the proceeding. *Id.* at 49. And that duty extends through the entire proceeding. See *Duties of Disclosure and Reasonable Inquiry During Examination, Reexamination, and Reissue, and for Proceedings Before the Patent Trial and Appeal Board*, 87 Fed. Reg. 45,764, 45,765 (July 29, 2022).~~

Samsung’s subsequent conduct demonstrates that the omissions were not inadvertent. After Patent Owner identified Samsung’s undisclosed district court indefiniteness positions, Samsung did not supplement the record or acknowledge any omission. Instead, it asserted that the positions were “effectively moot” and accused Patent Owner of “harassment.” (Ex. 2050 at 3–4.) Then, when the Board asked during the July 2, 2026 authorization conference call how Samsung’s representations could be reconciled with its district court indefiniteness contentions, Samsung again declined to acknowledge any inconsistency or supplement the record despite being given a direct opportunity to do so by the Board.

~~That is what occurred here. Samsung knew it had asserted indefiniteness positions in district court. Samsung knew the Board had asked about potentially~~

~~inconsistent claim constructions. Samsung nevertheless withheld the majority inconsistent positions while assuring the Board that it had “always maintained” the plain and ordinary meaning of one term so this case was “unlike Tesla.”~~

~~Samsung’s argument that its indefiniteness positions were “effectively moot” before the IPRs were filed (Ex. 2050 at 3–4) does not cure the misconduct. First, the positions are not moot. They remain Samsung’s operative invalidity and claim construction positions in both district courts. Samsung has never amended, withdrawn, or filed any notice of mootness in either court. Nor can mootness be inferred from claim construction proceedings: the Northern District of California’s Patent Local Rules do not require disclosure of indefiniteness in the Joint Claim Construction Statement, Patent L.R. 4-3, and the failure to “seek construction of a term during claim construction does not constitute waiver of an indefiniteness argument.” *Apple, Inc. v. Samsung Elecs. Co.*, 932 F. Supp. 2d 1076, 1079 (N.D. Cal. 2013). Second, even if Samsung subjectively believed the contentions had been mooted, the duty of candor required Samsung to disclose its inconsistent district court positions and let the Board decide whether they implicated *Revvo* and *Tesla*.~~

Accordingly, Samsung ~~is responsible for three related~~ violated its duty of candor ~~failures. First, in~~ the Petition ~~itself asked the Board to apply plain meaning~~

~~to every claim term except “spatial reference frame” without disclosing that Samsung was simultaneously asserting that many of those terms are indefinite. *Second*, when the Board ordered Samsung to explain its inconsistent claim scope positions, Samsung still did not disclose its indefiniteness contentions. *Third*, Samsung went further and made affirmative representations that it had “always maintained” a plain and ordinary meaning position and that this case was “unlike *Tesla*” that were materially incomplete and misleading in light of its undisclosed indefiniteness positions. Each failure violates the duty of candor and warrants sanctions under Rule 42.12(a).~~ Paper 14, and Paper 20, with its misconduct escalating from omission to affirmative misrepresentation to refusal to correct the record after the inconsistency was brought to its attention.

B. Samsung’s Misconduct Materially Prejudiced Patent Owner

~~Samsung’s misconduct was not harmless. Its omissions and misrepresentations deprived the Board and the Director of material information directly relevant to the institution decision.~~

~~The omitted information concerned the precise issue identified by the Board~~ Samsung’s misconduct was not harmless. The Board ~~issued its Order because it~~ was concerned that Samsung may have taken “different positions regarding the construction of ‘predicted axial accelerations.’” (Paper 13 at 2–3.)

Rather than provide a complete account of its district-court positions on every term at issue in the IPRs, Samsung withheld its active indefiniteness theories and wrongly represented that it had “always maintained” a plain-and-ordinary-meaning for “predicted axial accelerations” and that this case was “unlike *Tesla*.” (Paper 14 at 45; Paper 20 at 4 &n.3.)

The Board ~~subsequently~~then expressly relied on Samsung’s characterization of the record. ~~In instituting review, the Board found, finding that Samsung does not propose a construction for “predicted axial accelerations” and contends it should have its plain and ordinary meaning (Paper 17 at 15), and~~ that it was “not persuaded that Petitioner previously asserted that ‘predicted axial accelerations,’ by itself, is indefinite.” ~~and~~(Id. at 20.) The Board concluded that ~~Samsung had~~because the district court in the CyWee case had found “axial accelerations” definite, Samsung would have “sufficient reason” to ~~advance its current position.~~ (Paper 17 at 20–23.) ~~Likewise, the Director denied review without the benefit of Samsung’s undisclosed district-court positions. Had Samsung complied with its duty of candor, the Board and Director may have denied institution based on Revvo and Tesla.~~argue plain and ordinary meaning “even if it had previously argued that the term was indefinite.” (Id. at 21–22.) Neither of the co-pending district court proceedings has issued any finding on the definiteness of “axial

accelerations,” and Samsung’s invalidity contentions asserting indefiniteness remain operative in both. The Board’s findings were based on Samsung’s incomplete and misleading account.

Samsung’s ~~misconduct~~ also conduct prejudiced Patent Owner ~~in two ways.~~
~~First, Patent Owner was therefore forced to litigate~~ because institution ~~and~~
~~Director Review~~ was made and maintained without ~~the benefit of~~ a complete and
accurate record. ~~Second, Samsung has wrongly accused Patent Owner of making~~
~~misstatements about Samsung’s lack of candor regarding its indefiniteness~~
~~arguments. (Paper 14 at 1 (“Patent Owner’s contrary assertion is yet another~~
~~blatant misstatement regarding the record.”); Paper 20 at 4 (“To manufacture an~~
~~inconsistency, Patent Owner misstates Petitioner’s position.”); Ex. 2050~~
~~(“Continued litigation of the [indefiniteness issue] ... frustrates the purposes of~~
~~IPRs ... and frankly, constitutes harassment.”).),~~ causing Patent Owner to incur
post-institution costs and fees based on Samsung’s sanctionable violations of its
duties of candor.

~~Finally~~ Importantly, Samsung’s conduct also harms the integrity of the
Office’s adjudicatory process. The Director recently characterized as a “Misuse of
AIA

Review” situations where parties take inconsistent positions on overlapping issues before district courts and the PTAB “under a ‘wait and see’ approach . . . to gain a litigation advantage.” *Magnolia Medical Techs., Inc. v. Kurin, Inc.*, IPR2026-00097, Paper 17 at 4 (Director May 14, 2026) (precedential). That is what Samsung did here, maintaining indefiniteness in the district courts while urging plain meaning before the Board, ~~exactly the “wait and see” approach Magnolia condemned.~~ But Samsung went even further by concealing its indefiniteness assertions from the Board.

~~The prejudice is not speculative. The omitted information concerned the precise issue identified by the Board, was withheld in response to a Board Order seeking clarification and was material to the Board’s institution analysis.~~
Sanctions under Rule 42.12 are therefore warranted.

C. The Sanctions Requested are Appropriate and Proportional.

Rule 42.12 authorizes the Board to impose sanctions sufficient to remedy misconduct, compensate a harmed party, and protect the integrity of Board proceedings. The sanctions requested here are narrowly tailored to address the specific prejudice caused by Samsung’s violations of its duty of candor.

First, the Board should expunge Papers 14 and 20. 37 C.F.R. § 42.12(b)(1). Those papers were submitted in direct response to the Board’s request for

clarification regarding Samsung's inconsistent claim-scope positions. Rather than provide a complete and accurate account of its positions, Samsung omitted its operative indefiniteness contentions and affirmatively represented that it had "always maintained" that "predicted axial accelerations" should be given its ordinary meaning. Because those submissions contain material omissions and misleading representations, they should not remain part of the record.

Second, the Board should preclude Samsung from disputing that it has taken inconsistent claim-scope positions between these IPRs and the co-pending district court proceedings. 37 C.F.R. § 42.12(b)(3). ~~The existence of those inconsistent positions is established by Samsung's own invalidity contentions, Patent Local Rule disclosures, and subsequent admissions regarding its purported "effective withdrawal" of its indefiniteness arguments.~~ Having failed to candidly disclose those positions when specifically ordered to explain them, Samsung should not be permitted to ~~continue contesting~~ contest a fact established by ~~the~~ its own documentary record.

Third, the Board should award Patent Owner its reasonable attorneys' fees and expenses incurred addressing Samsung's misconduct and incurred after the Board's institution decision. 37 C.F.R. § 42.12(b)(6). ~~Samsung's omissions forced Patent Owner to repeatedly brief the inconsistency issue before the Board,~~

~~including in its Preliminary Response, Director Review proceedings, subsequent correspondence with the Board, and the present motion. Those costs were directly caused by Samsung's misconduct and would not have been incurred had Samsung complied with its duty of candor.~~ Patent Owner respectfully requests leave to submit evidence documenting the amount of its attorneys' fees and expenses after the Board rules on the merits of this motion if Samsung and Patent Owner cannot agree on an amount.

Fourth, the Board should terminate these proceedings or, at minimum, vacate the Institution Decision and reconsider institution on a complete record. 37 C.F.R. § 42.12(b)(8). Samsung ~~did what~~ engaged in the exact conduct that *Revvo* and *Tesla* ~~prohibit: it asserted indefiniteness in district court while presenting materially different claim scope~~ require petitioners to disclose and explain. Instead of doing that, Samsung concealed its inconsistent positions ~~to~~ from the Board, ~~including plain meaning for most terms and a proposed construction for "spatial reference frame."~~ Samsung then went further by assuring the Board that this case was "unlike Tesla" without disclosing its district court indefiniteness positions ~~that made the comparison material.~~ and Director. Accordingly, termination is appropriate ~~under *Revvo* and *Tesla*~~ proportional. At a minimum, the Board should

reconsider institution pursuant to *Revvo* and *Tesla* based on an accurate and complete record.

~~These sanctions are proportional to the misconduct. Patent Owner seeks relief targeted at Samsung's failure to disclose material information while responding to a Board Order specifically directed at identifying inconsistent claim scope positions, and at Samsung's affirmative representations that were materially incomplete and misleading in light of those undisclosed positions. Sanctions are required to remedy the prejudice suffered by Patent Owner, restore the integrity of the institution process, and ensure compliance with the duty of candor owed to the Office.~~

V. CONCLUSION

Samsung did not merely maintain inconsistent positions across forums; it denied having done so by telling the Board it had “never alleged” indefiniteness, had “always maintained” plain and ordinary meaning, and as a result this case was “unlike *Tesla*.”

But those representations cannot be reconciled with Samsung's operative district- court invalidity contentions, which assert that “predicted,” “axial accelerations,” “spatial reference frame,” and many other terms are indefinite. Samsung has never corrected the record. Instead, when confronted during the

authorization conference call, it offered no explanation consistent with its prior filings.

Samsung ~~wasshould not be~~ permitted to ~~assert indefiniteness positions in district court. Samsung was not permitted to withhold those positions from the Board, especially after the Board specifically requested an explanation regarding a potentially inconsistent claim-scope position under *Revvo* and *Tesla*. Paul Hastings represents Samsung in both district court cases and these proceedings. Yet Samsung told the Board that this case was “unlike *Tesla*” because “Samsung did not argue for indefiniteness for the claim limitation at issue in the district court.” (Paper 14 at 5.) That representation was materially incomplete and misleading~~ benefit from its affirmative misrepresentations. Sanctions under 37 C.F.R. §§ 42.11 and 42.12 are necessary to correct the record, remedy the prejudice to Patent Owner, and protect the integrity of the IPR process.

Accordingly, Patent Owner respectfully requests that the Board: (1) expunge Papers 14 and 20; (2) preclude Samsung from disputing that it has taken inconsistent claim-scope positions in these proceedings and the co-pending district court litigations; (3) award reasonable attorneys’ fees with leave for Patent Owner to submit fee documentation after the Board rules on the merits of this motion; and (4) terminate these proceedings ~~under *Revvo* and *Tesla*~~.
