Poker

WagerWorks offers a seamlessly integrated 'best-of-breed' poker solution through a 'third party' partner. The system offers eight of the world's most popular poker games: Texas Hold'em, Omaha Hi, Omaha Hi Lo, Soko (Canadian Stud), 7-Card Stud Hi, 7-Card Stud Hi/Lo, 5-Card Draw and 2-7 Triple Draw. These game types are available in Cash, Sit and Go and Tournament formats.

There are multiple tournament types available, including: Free-roll,

cash added, guaranteed, satellites (token/cash entry and payout), poker-point entry, private tournaments and re-buys.

The poker system operates on the foremost Poker network in Europe and one of the top ten worldwide, delivering a high liquidity of players ensuring there is always adequate number of tables and tournaments. The system manages the cash table and tournament offering with the customer input. Customers collect revenue based on the rake and tournament fees contributed by their players. Customers can also offer exclusive tournaments and promotions when desired.

The multi-player poker service incorporates the customers' own branding and customisation of the lobby, tournament lobby, table screen and felt, as well as a desktop icon. The service also includes coordinating tournament schedules, monitoring poker room for collusion and chip dumping, managing basic promotion fulfilment, as well as providing customer-specific reporting.

WagerWorks is able to deal with the management of the poker room as well as all, or part of the operational and regulatory issues enabling the customer to focus on marketing strategy.

WagerWorks Solutions

Games

Increase revenue growth by optimising your games mix with premium-licensed brands. The right brands can bring great value to an operator. WagerWorks has exclusively licensed the largest library of premium gaming titles in the industry and now has access to IGT's industry leading portfolio of casino games.

The games offered by WagerWorks are the very same brands that have demonstrated continuous popularity on highly trafficked casino floors, and which have subsequently been created for use by iGaming customers. Leveraging well-known brands and developing great games is the heart and soul of everything that WagerWorks does. The content delivery technology, secure network infrastructure, player authentication and intelligent analysis tools all work best because they are noticed the least.

WagerWorks has acquired the exclusive online gambling rights to proven and popular brands based on well-known, long-standing television game shows and traditional board game formats, including Baywatch™, Monopoly, Play Your Cards Right™, The Price is Right™ and Wheel of Fortune®.

The profitability of premium licensed branded online games outperforms

non-branded games with similar game mechanics and pay models. Players feel more comfortable trying games based upon brands they recognise and have an affinity for. Licensing brands that have benefited from tens of millions of dollars of promotion and advertising over many years creates that much-needed loyalty from the consumer. Getting the consumer to recognise the game as one they immediately feel comfortable with is paramount in the ethos of game development at WagerWorks.

Creating a winning game using licensed content is not as simple as incorporating the brand on the front end of the gaming platform. The game must be the very best in terms of graphics, execution and playing experience. If the game represents a popular TV show, then the game must look like the show. If the game is based on a popular board game, it must recreate the physical playing experience of the board

game. A seamless transition from license to gaming platform creates an animated player.
