

EXHIBIT C – Infringement Claim Chart for U.S. Patent No. 11,192,568

The infringement claim chart below is meant to illustrate how the Accused Products (as identified in the cover document) include each and every limitation of claims 1 and 7-9 of U.S. Patent No. 11,192,568 (the “’568 Patent”). Each and every limitation of these claims of the ’568 Patent are literally present in the Accused Products. Baby Jogger does, however, reserve the right to contend that any claim limitation of the ’568 Patent found to be not literally present in the Accused Products is present under the doctrine of equivalents because each of the components of the Accused Products performs substantially the same function in substantially the same way to achieve substantially the same result as the limitations of the asserted claims of the ’568 Patent, and any alleged difference is insubstantial. Baby Jogger reserves the right to supplement and/or amend these claim charts or to assert new theories of infringement in light of the Court’s claim construction, based on any non-infringement positions asserted, and/or based on any discovery.

The infringement claim chart below cites representative examples of documents, videos, and visual representations to demonstrate how the Accused Products contain each and every limitation of claims 1 and 7-9 of the ’568 Patent. Baby Jogger reserves the right to rely on additional information to support its allegations of infringement, including, but not limited to, materials yet to be produced by UPPAbaby. Baby Jogger further notes that several of the images below have been annotated.

Baby Jogger reserves the right to rely on the entirety of the materials cited in this chart to demonstrate infringement of the Accused Products. Citations presented for one claim limitation are expressly incorporated by reference into all other limitations for that claim as well as all limitations of the claim(s) on which that claim depends.

U.S. Patent No. 11,192,568

[11pre] A stroller, comprising:

Regardless of whether the preamble of claim 1 is considered a limitation, which Baby Jogger does not concede, the Accused Products are strollers. For example, the images below show a stroller.

<https://uppababy.com/accessories/strollers-accessories/rumbleseat-v2-plus/jake/>

[1b] a first upper tube support frame;	The Accused Products stroller frame has a first upper tube support frame and a second upper tube support frame. For example, the image below shows the first and second upper tube support frames.  https://uppababy.com/strollers/full-size/vista-v2/greyson/
[1c] a second upper tube support frame;	See analysis for claim element [1b].
[1d] a first front wheel support frame rotatably adjusted to be substantially parallel with respect to the first upper tube supported frame when the stroller frame is unfolded from a folded configuration;	The Accused Products stroller frame has a first front wheel support frame rotatably adjusted to be substantially parallel with respect to the first upper tube support frame when the stroller frame is unfolded from a folded configuration. The first front wheel support frame is located on the same side of the stroller frame as the first upper tube support frame. For example, the image below shows the stroller frame rotatably adjusted in an unfolded configuration such that the front wheel support frame is substantially parallel with respect to the first upper tube support frame. In the image below the first front wheel support frame and first upper tube support frame would be located on the opposite side of the stroller.

[1e] a second front wheel support frame rotatably adjusted to be substantially parallel with respect to the second upper tube support frame when the stroller frame is unfolded from a folded configuration;	The Accused Products stroller frame has a second front wheel support frame rotatably adjusted to be substantially parallel with respect to the second upper tube support frame when the stroller frame is unfolded from a folded configuration. The second front wheel support frame is located on the same side of the stroller frame as the second upper tube support frame. For example, the image below shows the stroller frame rotatably adjusted in an unfolded configuration such that the front wheel support frame is substantially parallel with respect to the first upper tube support frame. In the image below the second front wheel support frame and second upper tube support frame would be located on the annotated side of the stroller.  https://uppababy.com/accessories/strollers-accessories/rumbleseat-v2-plus/jake/

[1g] a second back wheel support frame rotated with respect to the second upper tube support frame;	See analysis of claim element [1f].
[1h] a plurality of wheels comprising at least one front wheel and a plurality of back wheels;	The Accused Products comprise a plurality of wheels comprising at least one front wheel and a plurality of back wheels. For example, the images below show a stroller having two front wheels and two back wheels.  https://uppababy.com/accessories/strollers-accessories/vista-lower-adapter/

	 https://uppababy.com/accessories/strollers-accessories/rumbleseat-v2-plus/jake/
[11] a first seat coupled along the first upper tube support frame and the second upper tube support frame at a first vertical position of the stroller frame;	The Accused Products comprise a first seat coupled along the first upper tube support frame and the second upper tube support frame at a first vertical position of the stroller frame. For example, the images below show a first seat coupled to the first and second upper tube support frames at a first vertical position.

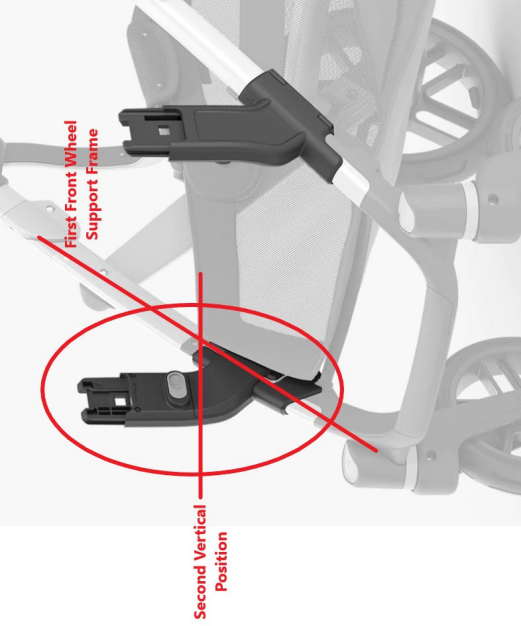

<https://uppababy.com/accessories/strollers-accessories/vista-lower-adapter/>

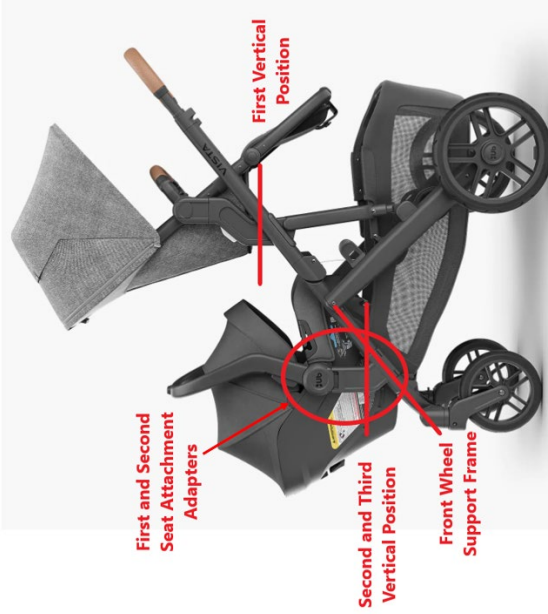

<https://uppababy.com/accessories/strollers-accessories/rumbleseat-v2-plus/jake/>

[1j] a first seat attachment adapter coupled to the first front wheel support frame at a second vertical position of the stroller frame that is below the first vertical position; below the first vertical position;

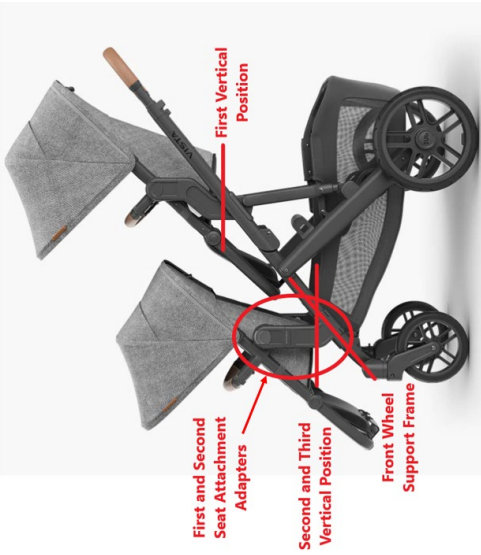

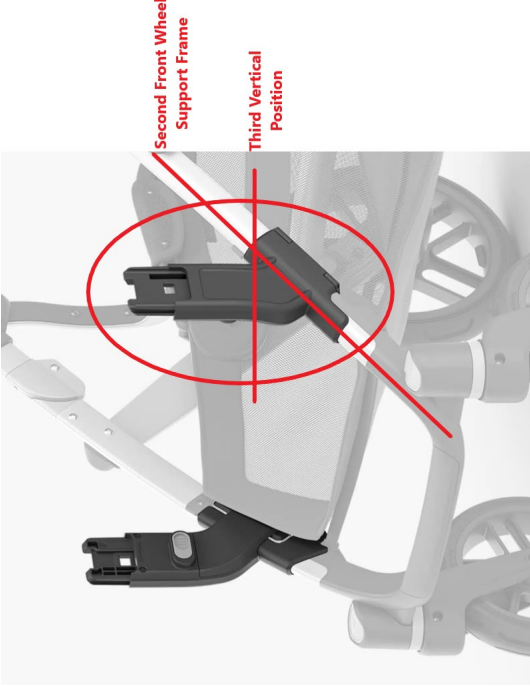

The Accused Products comprise a first seat attachment adapter coupled to the first front wheel support frame at a second vertical position of the stroller frame that is below the first vertical position. For example, the images below show a first seat attachment adapter coupled to the first front wheel support frame at a second vertical position. The second vertical position is below the first vertical position.
