

NARASIMHA REDDY
Dept. of Electrical and Computer Engineering
Texas A & M University
333J Wisenbaker, College Station, TX 77843-3259
<https://cesg.tamu.edu/faculty/narasimha-reddy/>
<https://scholar.google.com/citations?user=en&user=NbHZDW4AAAAJ>

Educational Record:

University of Illinois (Urbana) : Ph.D. in Electrical and Computer Engineering. Aug. 1990

University of Illinois (Urbana) : M.S. in Electrical and Computer Engineering. May 1987

Indian Institute of Technology (Kharagpur, India) : Bachelor of Technology (Honors) in Electronics and Electrical Communication Engineering. May 1985

Thesis Topic:

Ph.D Thesis : Issues in IO architectures for high-performance/ multiprocessor systems

M.S. Thesis : Algorithm based Fault Detection Techniques for Specific Applications

B.Tech Thesis (Project) : Studies on Residue Number System for Signal Processing

Honors and Awards:

Cited for one of the most influential papers of first ACM Multimedia Conference

College of Engineering Excellence Award for Service, Texas A & M University, 2022

Catedra de Excelencia, University of Carlos III, Madrid, Spain, Aug. 2009-Feb.2010

Distinguished Achievement Award for teaching (College level), AFS, TAMU, 2005

Ford Fellow, College of Engg., TAMU 2004, TEES Fellow, College of Engg., TAMU, 2001, Neely Faculty Fellow, College of Engg., TAMU, 1999

Outstanding Professor Award, Dept. of ECE, TAMU, 2003-04, 2014-15

Outstanding Professor Award, IEEE Student branch, TAMU, 1997-1998

NSF Career Award (1996-2000)

IBM Plateau Invention Achievement Award

IBM Graduate Fellowship (1988-90)

Presidential Silver Medal, Indian Institute of Technology, Kharagpur, India (May 86)

Research Interests:

Storage Systems, Cybersecurity, Computer Networks and Computer Architecture

Work Experience:

Truchard Foundation Chair Professor in ECE, Texas A&M Univ., Sept. 2023-Present.

Associate Dean for Research, College of Engineering, Texas A&M Univ., Apr. 2016 -Aug. 2021

Associate Agency Director for Strategic Initiatives and Centers, TEES, Aug. 2016 - Aug. 2021

Assistant Agency Director for National and Global Initiatives, TEES, June 2014 - Apr. 2016

J.W. Runyon Professor, Dept. of ECE., Texas A&M University, Oct. 2008-Aug. 2023

Professor, Dept. of Elec. and Compu. Engg, Texas A & M University, Sep. 2004 -Sep. 2008
Associate Professor, Dept. of Elec. Engg, Texas A & M University, Aug. 1995 - Aug. 2004
Research Staff Member, IBM Almaden Research Center: Aug. 1990 - Aug. 1995

Professional Activities:

- **Fellow** of the IEEE Computer Society, member of ACM SIGARCH
- Associate Editor, IEEE/ACM Transactions on Networking, 2014-2016
- Member, Advisory Board of Center for Hyper Scale Micro Data Center, South Korea
- External Evaluator, Faculty Promotion Committee, University of Jordan, 2012
- Program Committee Member, INFLOW Workshop, 2016
- Program Committee Member, NVM Workshop, 2011, 2015, 2016
- Program Committee Member, IEEE ANTS Conf., 2014
- Program Committee Member, Parallel Data Storage Workshop, 2012-2014
- Member, Information Technology Research Academy Strategy Formulation, India, Oct. 2011
- Review Chair, Los Alamos National Lab Research Information Institute program, Apr. 2011
- Program Committee Member, USENIX HotStorage Conf., 2010-2012
- External Evaluator, Faculty Search Committee, ICS-FORTH, Crete, Greece, 2009
- Program Co-chair, IEEE Broadnets 2008
- Area Lead, IEEE Infocom 2008
- Program Committee Member, USENIX FAST Conf. 2009
- Panels Co-Chair, COMSWARE 2008
- Program Committee Member, ICDCS 2008, 2013
- Program Committee Member, IEEE ICNP 2008
- Program Committee Member, COMSNETS 2009-2013, 2015
- Program Committee Member, COMSWARE 2007-2008
- Program Committee Member, Int. Workshop Visualization for Computer Security, 2006
- Program Committee Member, CoNEXT Conference, 2006, 2007, 2009
- Program Committee Member, Int. Workshop on QOS, 2006-2011
- Program Committee Member, IEEE Infocom, 2005-2015
- External Reviewer, Faculty promotion Committee, KAIST, Korea, 2003
- Technical Consultant, EMC Corp., 2001-2003

- Educational Content Expert on Computer Networking, Jones International University
- Member, Technical Advisory Board, Netgeo Inc., Mountain View
- Technical Adviser, TBD Networks
- Proposal Reviewer, Netherlands NSF
- Program Committee member, ACM Multimedia Conference, 2002
- Program Committee member, MCW-2001, Multimedia on Clusters of Workstations, 2001
- Program Committee member, IEEE Int. Conf. on Multimedia Comp. and Systems, 1999
- Panel Chair, IEEE Conf. High Performance Computer Architecture, 1999
- Program Committee member, High Performance Computing, 1999
- Program Committee member, Int. Conf. on Parallel Processing, 1998
- Tutorial Chair, IEEE Conf. on Multimedia Computing Systems, 1998
- Panel Chair, Int. Conf. on Parallel Processing, 1995
- Program Committee member, Int. Conf. on Parallel Processing, 1995
- Program track coordinator, Hawaii Int. Conf. on Systems and Sciences, 1994

Patents:

- N. Annapareddy, C-C Chou, C. Tirumalasetty, P. Gratz and A. Abouelwafa, "Faster Page Handling in Computer Systems", US Patent Number 11474952B2, received Oct. 18 2022.
- N. Annapareddy, J. Brady, D. Finney, M. Hartung, M. Ko, J. Menon, and D. Nowlen, Conflict resolution in multi-node communication network, U.S. Patent number: 6,101,194, received Aug. 8, 2000.
- N. Annapareddy, J. Brady, D. Finney, R. Freitas, M. Ko, and M. Rayfield, Method and System for message status reporting in a multi-node communication network, U.S. Patent number: 5,717,862, received Feb. 10, 1998.
- N. Annapareddy, D. Finney, M. Jenkins, L. Kessler, A. Lang, S. Liang, D. Mora, D. Plomgren, P. Urbisci and A. Walls, Interconnection network for a multi-nodal data processing system which exhibits incremental scalability, US Patent number: 5,602,044, received Feb. 11, 1997.
- N. Annapareddy, J. Brady and D. Finney, Adaptive and Dynamic message routing system for multinode wormhole networks, US Patent number: 5,602,839, Received Feb. 11, 1997.
- N. Annapareddy, J. Brady, D. Finney, R. Freitas, M. Hartung, M. Ko, N. Mendelson, J. Menon, D. Nowlen and S-Y Tzou, System and method using chained structured queues for ordering of message delivery between connected nodes wherein unsuccessful message portion is skipped and retried, US Patent number: 5,577,211, Received Nov. 19, 1996.

Presentations:

- Invited Talk at Reliable and Resilient Digital Manufacturing Workshop, NYU, April 2024
- Invited Talk at NYU on Manufacturing Security, April 2023
- Invited Talk at ENSAM, Aix-en-Provence, France on Digital Manufacturing Security, Jan 2023
- Several talks on A& M Engineering Research Program at many Government Agencies and Labs 2015-21.
- Tutorial on Network Security at Int. Conference on Information Security, Hyderabad, India, Dec. 2014
- Invited talk at IEEE Communications Soccity, Hyderabad, India, August 2014
- Invited talk at University of Texas at San Antonio, Nov. 2013
- Presentation at Flash Summit, Aug. 2013
- Invited talk at Georgia Tech., May 2013

- Keynote talk at Int. Conf. on Information Technology: New Generations, Las Vegas, April 2013
- Invited talk at COMSNETS Conf., Bangalore, India, Jan. 2013
- Invited talk at Int. Conf. on Networking and Communications, Maui, Feb. 2012
- Invited talk at NVRAMOS 2011, Jeju island, South Korea, Nov. 2011
- Invited talks at Korea University, Ajou University, Samsung and ADD, Korea, Nov. 2011
- Keynote talk at IEEE Int. Symp. on Computers and Communications, Italy, June 2010
- Catedra Series talk at University of Carlos III, Dec. 2009, Madrid, Spain
- Invited talk at Thomson Research, Paris, France, October 2009
- Invited talk at Telefonica Research, Barcelona, Spain, September 2009
- Distinguished Seminar Series, IBM Austin Research Lab, May 1 2008
- Invited talk at University of Illinois, November 2006
- Invited talk at Cisco, January 2005
- Invited talk at University of Birmingham, UK, June 2004
- Invited talk at Cisco Systems, San Jose, June 2002
- Invited talk at Juniper Networks, Mountain View, June 2002
- Invited talk at Univ. of California at Riverside, June 2002
- Invited talk at Nortel Networks, Santa Clara, June 2000
- Invited talk at Juniper Networks, Mountain View, June 2000
- Talk at Internet Engineering Task Force, Washington D.C., Oct. 1999
- Invited talk at EMC Corp., Boston, Aug. 1999
- Tutorial on “Scheduling for Multimedia Applications”, presented at IEEE Int. Conf. on Multimedia Computing and Systems, June 1999
- Tutorial on High-Performance I/O at IEEE/ACM Int. Conf on Computer Architecture, Atlanta, May 1999
- Invited talk at AT & T Research Center, Florham Park, March 1999
- Invited talk at Bell Labs Research Center, Murray Hill, March 1999
- Invited talk at EMC Corp., Boston, Nov. 1997

- Equipment grant, Tandem Corporation, March 1997.
- Software donation, Microsoft Corporation, April 1997.

Teaching:

Redesigned the course ECEN 449 “Microprocessor Systems Design”, Fall 2007.

Developed a new course ELEN 627 “Multimedia Systems and Networks”.

Developed a freshman undergraduate course ENGR111 “Introduction to Electrical and Computer Engineering”.

Developing a new graduate course on “Network systems security”. Taught in Spring 2004, 2006.

Courses Taught: Undergraduate Introduction to Electrical and Computer Engineering, Undergraduate Computer Architecture, Graduate Network Systems security, Graduate Computer Architecture, Graduate Computer Networks, Graduate Multimedia Storage and Delivery, Graduate Parallel Computer Systems, Graduate I/O and Memory Systems.

Student Advising:

- Aayush Gautam, Ph.D. candidate, Aug. 2024-present, Storage Systems.
- Caleb Norton, Ph.D. candidate, Aug. 2023-present, Storage Systems
- Susav Shrestha, Ph.D. candidate, Aug 2021-present, Systems support for Machine Learning.
- Chandrahas Tirumalasetty, Ph.D. candidate, Aug 2019-present, Memory Systems.
- Rishabh Singla, Ph.D. , Aug 2024, “Improving IoT security in critical infrastructure”..

- Mian Qin, Ph.D., Aug 2016-Aug 2021, “Accelerating Storage Applications with Emerging Key Value Storage Devices”, next at VmWare.
- Chih-Chieh Chou, Ph.D., Aug 2014-Jan. 2020, “Optimizing Emerging Memory Systems for Performance”, next at Amazon.
- Zhiyuan Zheng, Ph.D., Aug. 2013 -Dec. 2017, “Protecting Cyber-Physical Systems With Special Emphasis On Building Automation Networks”, next at Pinterest.
- Jaemin Jung, Postdoc, Oct. 2016-18, Storage systems, next at Samsung Research.
- Allen Webb, Ph.D. candidate, Jan. 2013-17, “Addressing Insider Threats From Smart Devices”, next at Google.
- Viacheslav Fedorov, Ph.D., 2010 - 2016, “Memory Management for emerging memory technologies”, later at NXP.
- Jongmin Gim, Postdoc, 2013-2015, Storage Systems Software, Later at Samsung Research Labs, California.
- Sangwhan Moon, Ph.D., 2010 - 2015, “Reliability of SSD Storage Systems”, later at Riverbed Technology.
- Sheng Qui, Ph.D. 2013 “Integration of nonvolatile memory into storage hierarchy”, later at Samsung Research Labs.
- Yong Oh Lee, Ph.D., May 2012, “Improving efficiency and effectiveness of multipath routing in computer networks”, later at Samsung.
- Jagadeesh Dyaberi, Ph.D., Aug. 2011, “Networking and Storage support for on-demand video delivery”, Purdue University, External thesis committee member.
- Sandeep Yadav, Ph.D., 2012, “Scalable techniques for anomaly detection”, Dec. 2012, later at Dumballa.
- Xiaojin Wu, Ph.D., Flash and Disk Hybrid storage systems, Aug. 2011, later at Marvell Semiconductor.
- John Garrison, Ph.D. , “Umbrella File System: Managing heterogeneous storage devices File systems”, Aug. 2009, later at DOD Labs, Tuscaloosa, Alabama.
- Sukwoo Kang, Ph.D., “Flexible space allocation and management in networked storage systems”, May 2007, later at IBM Almaden Research Center.
- Sumitha Bhandarkar, Ph.D., “Congestion control algorithms for TCP in emerging networks”, Aug. 2006, later at Motorola.
- Yong Liu, Ph.D., “Dynamic Routing protocols in multihomed networks”, Dec. 2006, later at EMC Corp.
- Seong Soo Kim, Ph.D., “Real-time analysis of aggregate network traffic”, May 2005, later at Samsung, Seoul, Korea.
- Zhili Zhao, Ph.D., May 2004, “Estimation and control of nonresponsive traffic”, later at Intel.

- Xiaonan Ma, Ph.D., Aug. 2003, “Augmenting functionality at storage systems”, later at IBM Almaden Research Center, San Jose.
- Ravi Wijayarathne, Ph.D., Dec. 2000, “PRISM: A file server architecture for providing integrated services”, later at Quantum, San Jose.
- Ikjun Yeom, Ph.D., Dec. 2000, “Bandwidth assurance in differentiated services networks”, later a faculty member at KAIST, South Korea.
- Naga Sai Gouthami Bejjanki, M.S. Candidate 2023-24, “Fabric Attached Memory”.
- Adithya Kannan, M.S. Candidate, 2023-25, “Prefetching across pages”.
- Daksh Vasistha, M.S., 2015-17, “ Detecting Anomalies in Controller Area Network for Automobiles”, next at Facebook
- Ayush Ruia, M.S., 2015, “Virtualization of nonvolatile memory”, later at Microsoft.
- Bolun Huang, M.S. 2014, “Sentiment based classification of tweeters and university programs”, later at Microsoft.
- Shyam Sambasivan, M.S. “Enhancements to SQLite library to improve performance on mobile platforms”, Aug. 2013, later at Cisco.
- Ankit Singh, M.S., “Multipath Probabilistic Early Response TCP”, Aug. 2012, later at Amazon.
- Cindy Cao, M.S., “SCMFS Performance Enhancement and Implementation on Mobile Platform”, Aug. 2012, later at Microsoft.
- Amit Anand, M.S., “Proactive spammer detection on Twitter”, Aug. 2012, later at Amazon.
- Bin Qian, M.S.. Aug. 2011, “Evaluation of Probabilistic Early Response TCP (PERT) for video streaming and extension with ACK coalescing”, later at Amazon Data Services.
- Ashwath Reddy, M.S., Aug. 2010, Detecting networks employing algorithmically generated names, later at Microsoft.
- Prajjwal Devakota, M.S. Aug. 2010, Performance of Quantized Congestion Notification in TCP Incast in Data Centers, later at Bloomberg.
- Chaitanya Tadi, M.S., May 2009, IP Prefix Hijack Prevention Service, later at Intel.
- Marcus Dunn, M.S., May 2009, A new I/O scheduler for Solid State Devices, later at Cisco.
- Kiran Kotla, M.S., “Adapting the delay-based protocol PERT to heterogeneous environments”, Aug. 2008, later at Cisco.
- Camelia Al-Najjar, M.S., August 2005, thesis on “An approach for improving performance of aggregate voice over IP traffic”, pursuing Ph.D. at Case Western University.
- Saurabh Jain, M.S., May 2005, thesis on “LTCP-RC: RTT compensation technique to scale highspeed protocols to high RTT links”, later at Cisco.

- Sridhar Vellanki, M.S., Feb. 2003, thesis on “Improving service availability through alternate routing”, later at Microsoft.
- Sadry, Nauzad, M.S., Dec. 2002, thesis on “Evaluation of Delayed Congestion Response protocols for tolerating channel errors in wireless networks”, later at Netezza.
- Achanta, Phani, M.S., Dec. 2002, thesis on “Design and Evaluation of Partial State Routers”, later at IBM.
- Smitha, M.S. student, May 2001, thesis on “An active queue management scheme to contain high bandwidth flows at a congested router”, later at Intel India.
- Sumitha Bhandarkar, M.S., August 2001, thesis on “Delayed Congestion Response Protocols”, Ph.D. at TAMU.
- Aman Garg, M.S., August 2001, thesis on “Mitigating Denial of Service using QOS regulation”, later at Tipping Point Technologies, Austin.
- Sai Gopalakrishnan, M.S., May 2000, later at Cisco, thesis on “TRIO: Active resource management in differentiated services networks”.
- Qian Ren, M.S., May 2000, later at Lucent, thesis on “MPEG-aware disk storage system”.
- Marcus Grande, M.S., Dec. 1999, later at IBM, thesis on “Multiported Storage Devices”.
- Adnan Khaleel, M.S., Aug. 1999, later at Motorola, thesis on “Request and data distribution on a clustered server”.
- Deying Tong, M.S., May 1999, later at Cisco, thesis on “Partial state based approaches to QOS enhancement”.
- Sumit Gupta, M.S., Aug. 1998, later at Sun Labs, thesis on “IPRP: A client-oriented IP redirection mechanism and its applications”.
- Ashwin Madhwaraj, M.S., May 1998, later at Cisco, thesis on “Adaptive video transport over networks”.
- Gang Ma, M.S., May 1998, later at EMC Corp., thesis on “Evaluation of storage systems based on network attached storage”.
- Mike Nichols, M.S., May 1998, later at UT Law School, thesis on “Personal informal retrieval agent”.
- Ikjun Yeom, M.S., May 1998, later a faculty member at KAIST, Korea, thesis on “ENDE: An End-to-end Network Delay Emulator”.

Service:

- Member of several committees in the ECE department, 2023-24.
- Chair, MKO Process Safety Center Director Search Committee, 2020
- Member, University IT Research Committee, 2018
- Chair, Turbo Lab Director Search Committee, 2017

- Chair, College Cybersecurity Search Committee, 2016-23
- Member, University Chief Communications Officer Hiring Committee, 2015-16
- Member, University level Assoc. Former Students Awards Committee, 2016
- Member, TAMUQ FASC Committee, 2013
- Chair, Department Growth Committee, 2013
- Chair, College Taskforce on National Security, 2013
- Member, College Research Strategy Subcommittee, 2012
- Member, Computer Science and Engineering Head Search Committee, 2010-11, 2013-14
- Member College Awards Committee 2006-2008. 2010-2012
- Member, Computer Engineering Curriculum Committee, 2003-2012. Led the restructuring of Undergraduate curriculum in Computer Engineering
- Member, Department Tenure & Promotion Committee, 2004-2006, 2010-2012
- Member, Electrical and Computer Engineering Department Head Search Committee, 2004
- Member, Department Advisory committee 2003-2004
- Chair and Member, department Awards committee 2004-2006
- Member, Department Awards committee, 1997-2003, 2008-2009
- Member, Department Distinguished Speakers committee, 1996-1999, 2006-2008
- Chair and Member, Department Distinguished Speakers committee, 2010-present
- Member, Department undergraduate studies committee, 1997-2000
- Member, Department web site design committee, 2000-2004
- Group leader, Computer Engineering, 2005-2014

Administrative Experience:

Group Leader, Computer Engineering, 2005-2014:

- Led evaluation, development and rearchitecting the Computer Engineering program, a joint program across two departments of Electrical and Computer Engineering and Computer Science Engineering.
- Led the hiring of about 10 Computer Engineering faculty.
- Led the development of ENGR 111 Freshman Introduction of Electrical and Computer Engineering, primarily to improve retention in Electrical and Computer Engineering programs. Increased retention rates from 45% to about 80%.
- Led the development of several other courses ECEN 449 Microprocessor Systems Design, ECEN 627 Multimedia Systems and Networks, ECEN689 Computer Networks Security.

- Rebuilt several existing courses including ECEN 350 Computer Architecture and ECEN 676 Advanced Computer Architecture, ECEN 602 Computer Networks.
- Contributed to the national ranking of both undergraduate and graduate Computer Engineering programs to top 20 programs in the country.

TEES Assistant Agency Director for National and Global Initiatives, 2014- 2016:

- Developed and Established a TEES office in Yukatan, Mexico.
- Nurtured relationships in Brazil, France and India. The France relationship resulted in a collaborative center with ENSAM.
- Established relationships with Kuwait Oil Company that led to a discussion on a \$15 million research contract, which ultimately could not be closed for contractual difficulties.
- Developed a strategy to engage with National Labs and Federal Agencies.

Associate Dean for Research, College of Engineering and TEES Associate Agency Director for Centers and Strategic Initiatives, 2016-2021:

- Established strategic focus on several emerging areas of research including Autonomy, Synthetic Biology, Soft Matter, Cyber Security and Quantum Computing.
- Developed a strategy for supporting large multi-PI proposals and increased large proposal funding from 5-6 per year to about 25 per year.
- Increased TEES Research funding from about \$110 million/year to \$210 million/year from 2016-20.
- Increased Federal funding percentage from 38% to 68% of total TEES funding.
- Nurtured relationships with Army Research Lab (ARL) and facilitated the establishment of ARL-south relationship with A & M. Direct impact: ARL Cooperative Agreements in Synthetic Biology, Electric Power, Materials and Manufacturing, Autonomy and Cybersecurity with about 15 ARL people stationed at Texas A& M.
- Supported establishment of \$65 million ARL/Army Futures Command (AFC) Cooperative agreement on Hypersonics, Autonomous vehicles and Networks.
- Contributed to \$26 million Distributed Autonomy related project funded by Army Research Lab.
- Nurtured and furthered collaborations with Air Force Research Lab, resulting in the establishment of AFRL fellowships at A & M. Direct Impact: AFRL \$4 million Minority Leaders Scholarships in Material Discovery and several projects with sensors, human performance and information directorates.
- Established relationships with Army Engineering and Research Development Center (ERDC). Resulted in \$3 million contract. Exploring further options for joint projects.
- Establishing close collaborative ties with DOE/DOD National Labs. Resulted in Master Research Agreements and joint projects with several labs including Idaho National Lab(INL), Lawrence Livermore National Lab(LLNL), Pacific Northwest National Lab (PNNL) and others.

- Contributed to successful \$40 million proposal for "Offshore Energy Safety Center 2.0" proposal to Department of Interior and Department of Energy.
- Started and organized "TEES Tech. Talk" series to facilitate hosting Labs and Agency researchers and program managers.
- Organized National Labs Day to facilitate interactions of graduate students with National Labs.
- Championed "Remote Ph.D. program for national labs".
- Established "Research Impact Awards" to facilitate a discussion and recognition of impactful research within the College.
- Established External Awards Support office to promote faculty for external professional awards.
- Supported young faculty applications to NSF, DOD/DOE/DARPA CAREER and Young Investigator awards. Increased NSF CAREER awards from 2/year to 8/year.
- Established NSA Masters Program.
- Expanded a weekly "Research Opportunities" bulletin to cover broader research opportunities.
- Interacted with the Research Deans of other colleges and supported inter-college collaborations.
- Established procedures and metrics for evaluating centers within college and reorganized centers after a thorough review of the existing centers. Managed about 30 Centers and Institutes.
- Established support to help graduate student applications for NSF and NDSEG Fellowships.

¹Reddy's Students.
