Abstract: Comments on TGax D2.0

Revision	Date	Description
0	2017-11-04	Initial export from DB
1	2017-11-08	Part of No Vote corrected. Mostly assigned to initial categorizes.
2	2017-11-09	Addition comment classification and assignment. Around 147 technical remain uncategorized.
3	2017-11-15	Additional assignments. Resolutions drafted and adopted at the November 2017 session
4	2018-01-02	Some editorial resolutions drafted. Some reassignments.
5	2018-01-15	Some reassignments. Created Editorials in D2.1 tab.
6	2018-02-08	Following D2.2 editing
7	2018-02-15	Updates following D2.2 editing review
8	2018-04-11	Following D2.3 editing
9	2018-04-18	With an additional 270 editorials resolved (comment group = "Editorials in D2.3")
10	2018-04-19	With some corrections and reassignments.
11	2018-05-23	All comments have resolutions.
12	2018-05-25	Updated after editing D3.0
13	2018-06-01	Updated after D3.0 review

CID	Commenter	Draft	Clause Number(C)	Submission	Comment	Proposed Change	Resolution	Comment Group
11730	Geonjung Ko	2	27.5.3.3	11-18/0367r1	When the AP announced the BSS Color Change, for STAs that failed to receive a Beacon frame at the BSS color change TBTT, the value of the BSS Color subfield of the most recently received HE Operation element is the previous BSS color, not the new BSS color. This may cause different HE-SIG-A signals between STAs solicited by the Trigger frame.	If the Trigger frame was received in a non-HE PPDU, then the BSS_COLOR shall be set to the active BSS color.	REVISED (MU: 2018-03-13 06:41:38Z) Agree with the comment. Revised text to indicate that the responding STA shall use the active color as defined in 27.11.4 TGax editor, please make changes as shown in doc 11-18/0367r1	Approved Edits in D2.3
11731	Geonjung Ko	2	27.5.3.3	11-17/1849r2	There is no BSS_COLOR setting rule when the Trigger frame is in a non-HE PPDU and the STA is an unassociated STA.	Use the active BSS color, use an HE PPDU when soliciting unassociated STAs, or define the BSS Color field in the Trigger frame format	REVISED (MU: 2018-01-23 08:12:30Z) TGax editor, please make changes as shown in doc 11-17/1849r2 that are marked with CID 11731	Approved Edits in D2.2
