Advancing Technology
for Humanity

IEEE History

IEEE is the world's largest technical professional organization. Our story touches every facet of engineering and technology.

IEEE's roots reach back to the 19th century. Scientists and engineers had harnessed electrical power; connected the world via transatlantic telegraph; and built ringing telephones and lights with switches. Electricity was gaining global influence. In the spring of 1884, a group of industry professionals met in New York, USA. They agreed on a goal: They would use their knowledge and influence to benefit humanity.

1884: A Technical Society Formed

The American Institute of Electrical Engineers (AIEE) met in October in Philadelphia. Western Union's president, Norvin Green, was the Institute's first president, representing the telegraph industry. Charter member Thomas Alva Edison, of the lighting industry, was also a president.
