Foreign Priority Information:

This section allows for the applicant to claim priority to a foreign application. Providing this information in the application data sheet constitutes the claim for priority as required by 35 U.S.C. 119(b) and 37 CFR 1.55(d). When priority is claimed to a foreign application that is eligible for retrieval under the priority document exchange program (PDX) the information will be used by the Office to automatically attempt retrieval pursuant to 37 CFR 1.55(h)(1) and (2). Under the PDX program, applicant bears the ultimate responsibility for ensuring that a copy of the foreign application is received by the Office from the participating foreign intellectual property office, or a certified copy of the foreign priority application is filed, within the time period specified in 37 CFR 1.55(g)(1).

Authorization to Permit Access:

☐ Authorization to Permit Access to the Instant Application by the Participating Offices

If checked, the undersigned hereby grants the USPTO authority to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the World Intellectual Property Office (WIPO), and any other intellectual property offices in which a foreign application claiming priority to the instant patent application is filed access to the instant patent application. See 37 CFR 1.14(c) and (h). This box should not be checked if the applicant does not wish the EPO, JPO, KIPO, WIPO, or other intellectual property office in which a foreign application claiming priority to the instant patent application is filed to have access to the instant patent application.

In accordance with 37 CFR 1.14(h)(3), access will be provided to a copy of the instant patent application with respect to: 1) the instant patent application-as-filed; 2) any foreign application to which the instant patent application claims priority under 35 U.S.C. 119(a)-(d) if a copy of the foreign application that satisfies the certified copy requirement of 37 CFR 1.55 has been filed in the instant patent application; and 3) any U.S. application-as-filed from which benefit is sought in the instant patent application.

In accordance with 37 CFR 1.14(c), access may be provided to information concerning the date of filing this Authorization.

Applicant Information:

Providing assignment information in this section does not substitute for compliance with any requirement of part 3 of Title 37 of CFR to have an assignment recorded by the Office.

Applicant 1

If the applicant is the inventor (or the remaining joint inventor or inventors under 37 CFR 1.45), this section should not be completed. The information to be provided in this section is the name and address of the legal representative who is the applicant under 37 CFR 1.43; or the name and address of the assignee, person to whom the inventor is under an obligation to assign the invention, or person who otherwise shows sufficient proprietary interest in the matter who is the applicant under 37 CFR 1.46. If the applicant is an applicant under 37 CFR 1.46 (assignee, person to whom the inventor is obligated to assign, or person who otherwise shows sufficient proprietary interest) together with one or more joint inventors, then the joint inventor or inventors who are also the applicant should be identified in this section.

INTRAORAL DEVICE WITH SLIT

CROSS-REFERENCE TO RELATED APPLICATIONS

[0001] The present application is a continuation and claims the priority benefit of U.S. patent application 14/100,323 filed December 9, 2013, which claims the priority benefit of U.S. provisional patent application number 61/734,939 filed December 7, 2012, the disclosure of which is incorporated herein by reference.

BACKGROUND OF THE INVENTION

1. Field of the Invention

[0002] The present invention generally relates to the field of dental mouthpieces. More specifically, the present invention relates to intraoral dental suction and isolation mouthpieces.

2. Description of Related Art

[0003] Various mouthpieces are currently used by dental health professionals, dental hygienists, and dental assistants in the field of dentistry. In the past, a dental patient has been treated by a traditional two-person team that comprises a dental professional and a dental assistant. Further, dental treatment may be provided by the team using many different types of dental equipment and materials. Such dental equipment and materials may include such items as an intraoral mirror, a bite block, a slow speed suction ejector, a high speed suction ejector, gauzes, cotton rolls, and dry angles. Each item of dental equipment may be used for different purposes, though some may be used in combination for some types of dental services. As such, a dental professional seeking to provide such dental services may need to use multiple items of such dental equipment. An important role of the dental assistant is therefore to assist the dental professional in

coordinating the use of these multiple items of different equipment and materials.

[0004] There is, therefore, a need in the art for improved systems and methods of providing dental services in a more efficient, comfortable, and safe manner to the dental patient.

SUMMARY OF THE CLAIMED INVENTION

[0005] Embodiments of the present invention may include a mouthpiece that may be attached to a high-suction dental adapter for the purpose of assisting the dental staff during dental procedures through chair-side, hands-free suction, and isolation. Such a mouthpiece may comprise a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded in one piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

[0006] The main body portion may comprise an enclosed pocket made up of an anterior wall, a posterior wall, and a side wall in between the anterior and posterior walls. The side wall may be perforated with a plurality of perforations. Such perforations may constitute a mesh. Additional perforations may be located on the anterior and posterior walls. The main body portion may further include a slit along a longitudinal, central axis on the anterior wall. Such openings (*e.g.*, perforations and slit) allow for suction of air, fluids, and small debris from the patient's mouth, through the openings into the interior portion, and into the suction connector portion towards a suction source. Because the mouthpiece is made of a flexible and resilient material (*e.g.*, silicone), the mouthpiece may be bent when placed in a patient's mouth to conform to the shape of the mouth. When properly positioned, the suction connector portion may protrude from one side of the patient's mouth, while the main body lies against the back of the patient's mouth, and the cheek retractor presses against the patient's cheek on the opposite side of the patient's mouth.

[0007] The main body may further include an protruding bridge structure on the interior surface of the posterior wall. Such a bridge structure may protrude from the

interior surface in a wave shape with crests and troughs. The crests provide a plurality of contact points with the anterior wall to keep the anterior wall separated from the posterior wall during suction. Meanwhile, the troughs provide gaps that allow for suction of air, fluids, and small debris through the bridge structure.

BRIEF DESCRIPTION OF THE FIGURES

[0008] FIG. 1A is a perspective view of an exemplary mouthpiece with a detachable mouth prop.

[0009] FIG. 1B is a top view of the exemplary mouthpiece and detachable mouth prop of FIG. 1A.

[0010] FIG. 1C is a bottom view of the exemplary mouthpiece and detachable mouth prop of FIG. 1A.

[0011] FIG. 1D is a side view of the exemplary mouthpiece and detachable mouth prop of FIG. 1A.

[0012] FIG. 1E is a cross-sectional view of the exemplary mouthpiece and detachable mouth prop of FIG. 1A.

[0013] FIG. 2A is a perspective view of the exemplary mouthpiece of FIG. 1A where the detachable mouth prop has been detached.

[0014] FIG. 2B is a top view of the exemplary mouthpiece of FIG. 2A.

[0015] FIG. 2C is a bottom view of the exemplary mouthpiece of FIG. 2A.

[0016] FIG. 2D is a side view of the exemplary mouthpiece of FIG. 2A.

[0017] FIG. 2E is a cross-sectional view of the exemplary mouthpiece of FIG. 2A.

[0018] FIG. 3A is a front view of an exemplary mouth prop.

[0019] FIG. 3B is a back view of the exemplary mouth prop of FIG. 3A.

[0020] FIG. 3C is a bottom view of the exemplary mouth prop of FIG. 3A.

[0021] FIG. 3D is a perspective view of the exemplary mouth prop of FIG. 3A .

[0022] FIG. 3E is a side view of the exemplary mouth prop of FIG. 3A.

[0023] FIG. 3F is a top view of the exemplary mouth prop of FIG. 3A.

[0024] FIG. 4 is a close-up view of exemplary mesh sides in an exemplary mouthpiece.

[0025] FIG. 5 is a close-up view of an internal bridge in an exemplary mouthpiece.

[0026] FIG. 6A is a close-up view of an exemplary reinforcing bar in an exemplary mouthpiece.

[0027] FIG. 6B is a cross-sectional view of the exemplary reinforcing bar of FIG. 6A.

[0028] FIG. 7A is a close-up view of an exemplary cheek retractor portion in an exemplary mouthpiece.

[0029] FIG. 7B is a cross-sectional view of the exemplary cheek retractor portion of FIG. 7A.

DETAILED DESCRIPTION

[0030] Embodiments of the present invention provide for a mouthpiece comprising a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded as one-piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

[0031] FIGs. 1A-E are different views of an exemplary mouthpiece with an attachable mouth prop 160, while FIGs. 2A-E are different views of the exemplary mouthpiece of FIG. 1A where the attachable mouth prop 160 has been detached. Such a mouthpiece may include a main body portion 110, a suction connector portion 120, and a cheek retractor portion 130.

[0032] The main body portion 110 may include mesh or perforations140, a stability bar 150, an open slit 170, and an internal bridge 180. The main body potion 110 may connect to a suction connector portion 120 on one end and a cheek retractor portion 130 at the other end. Such a cheek retractor portion 130 may be configured to press against and retract a patient's cheek away from the patient's teeth. When placed in a patient's mouth, the suction connector portion 120 may protrude from one side of the patient's mouth, while the main body portion 110 lies against the back of the patient's mouth, and the cheek retractor portion 130 retracts the patient's cheek on the opposite side of the patient's mouth. The flexibility of the material used to form the mouthpiece allows for some bending when placed in the patient's mouth. The material is, however, resilient enough that the cheek retractor portion presses against the inside of the patient's cheek with such pressure being sufficient to move the cheek away from the patient's teeth.

[0033] An exemplary main body portion 110, when placed in a mouth, may include an

anterior wall facing the front of the mouth (*e.g.*, the side with slit 170) and a posterior wall facing the back of the mouth. The two walls may connect at a superior wall and an inferior wall forming a body that is at least partially enclosed.

Superior may be used herein to refer to the side that rests against a roof of a patient's mouth when placed therein, and inferior may be used to refer to the side that rests against the floor of the patient's mouth. The superior and inferior sides may be formed identically, which may allow for the mouthpiece to change orientation such that the superior side may appear as the inferior side and vice versa, in the new orientation. When in use, the respective sides of the main body portion 110 may serve to protect and separate the top of the mouth and the bottom of the mouth/tongue. In addition, the main body portion 110 may also serve to protect the back of the mouth (*e.g.*, throat and airway) from falling debris.

[0034] Much of the main body portion 110 of the mouthpiece may be shaped as a straight-line arrowhead or shield whose base generally conforms to the intraoral shape of a patient's mouth. Differently-sized mouthpieces may be provided for differently-sized mouths of adults and children. Part of the base side of the arrowhead may be formed with thicker walls than the rest of the main body. Such thickening may provide additional stability.

[0035] In addition, the main body portion 110 of the mouthpiece may include a plurality of holes 140 distributed along the superior and inferior sides of the anterior and posterior walls to assist in suctioning of water, saliva and debris from the oral cavity. In some embodiments, a set of holes may also form a mesh along the walls of the superior and inferior edges. FIG. 4 is a close-up view of an exemplary mesh wall in an exemplary mouthpiece.

[0036] At the narrow end of the arrowhead that connects to the cheek retractor portion 130, the main body portion 110 may include a rectangular portion. Narrower than the base of the arrowhead, the rectangle may additionally include a reinforcing bar (or stability bar) 150 (described in further detail below) and may be at least partially crossed by a slit 170 (described in further detail below) into the interior of the pocket of

the main body portion 110.

[0037] Stability bar 150 may be a protrusion or otherwise a thickened area that reinforces the stability of the rectangular portion and assist in shaping this region to the intraoral posterior shape of a patient's mouth. FIG. 6A is a close-up view of an exemplary stability bar 150 of an exemplary mouthpiece. FIG. 6B is a cross-sectional view of the exemplary reinforcing bar in the cheek retractor connector portion of FIG. 6A.

[0038] In some embodiments, the internal, rectangular-shaped reinforcing or stability bar 150 may be located distally to the internal wavelike bridge structure 180 and attached to both the interior side of the posterior surface of the main body and the rectangular portion. Such a stability bar 150 may be located in the area where a positioned mouthpiece begins to wrap from the lingual side of the most posterior mandibular tooth, around the distal side of the most posterior tooth, and to anterior side of the most posterior mandibular tooth, thereby assisting in shaping the mouthpiece to the general intraoral shape of a patient's mouth.

[0039] Various embodiments of the mouthpiece may further include a longitudinal, open slit 170 extending over approximately two-thirds of the main body on the anterior surface. Running along the center of the main body across the rectangle and most of the arrowhead, such a slit 170 may assist in capture and suction of water, saliva and debris, as well as assisting in cleaning and maintenance.

[0040] Additionally, the main body of the mouthpiece may include a bridge structure 180 on an interior surface to ensure that the anterior and posterior surfaces remain separated during suction. FIG. 1E is a cross-sectional view of the mouthpiece in which the bridge structure 180 is illustrated. FIG. 5 is a close-up view of the bridge structure 180 without the surrounding walls of the main body portion. Such a bridge structure 180 may be formed as an wave-like protrusion that generally corresponds to the distance between the anterior and posterior walls extending substantially (*e.g.*, within 1 mm) the full distance at its crest and substantially flush to the surface at its trough. In some embodiments, the bridge structure 180 may be centrally-located in the main body

portion 110 of the mouthpiece. The gaps (or troughs) between the waves of the bridge structure 180 assist in the suction-driven transfer of water and saliva to the suction connector portion 120 and ultimately, into a central suction vacuum. In some embodiments, the bridge structure 180 may follow the shape of a logo (e.g., an arrowhead or shield).

[0041] The suction connector portion 120 may be oval-shaped and also attached to the main body portion 110. The suction connector portion 120 may be formed with thicker walls than the main body portion 110 and configured to attach to a high-suction vacuum adapter and to assist in transferring water, saliva, and debris from the oral cavity to the external adapter for removal. The suction connector portion 120 may also include an internal stop to assist in sliding the mouthpiece onto the adapter to a desired depth. The suction connector portion 120 may additionally have an external, concave, notched region 210 that corresponds to a removable strap such that when the strap is in place, the external walls of the strap and the rest of the connector portion may be flush.

[0042] The cheek retractor portion 130 is illustrated as a hammerhead distal region, which may be attached to the main body portion 110. FIG. 7A is a close-up view of an exemplary cheek retractor portion 130 in an exemplary mouthpiece. FIG. 7B is a cross-sectional view of the exemplary cheek retractor portion 130 of FIG. 7A.

[0043] The mouthpiece may be used with a mouth prop 160, as illustrated in FIGs. 1 (with a mouth prop 160) and FIGs. 2 (illustrated without the mouth prop 160). FIGs. 3A-E provide different close-up views of an exemplary mouth prop 160. The removable strap 310 may be attached to mouth prop 160, which may be used to prop open a patient's mouth and teeth. In this regard, the suction connector portion 120 may additionally have an external plug 220 (FIG. 2C) protruding from the posterior side of the suction connector portion 120. Such a plug 220 may correspond to and serve to connect with an opening in the mouth prop 160. The mouth prop 160 may be reinforced by the presence of the plug 220 in the opening, thereby resulting in a more crush-resistant, nearly incompressible, and stable mouth prop 160. In some embodiments, the suction connector portion 120 may further have a cutout 230 (*e.g.*, which may be shaped

as a logo) providing extra interlocking with a corresponding protrusion (*e.g.*, which may also be shaped as a logo) on an external high-suction vacuum adapter.

[0044] The mouth prop 160 may be made of thickened silicone material injection molded in a single piece with an elastic strap corresponding to the circumference of the suction connector portion. The mouth prop 160 has an internal, rectangular-shaped female slot designed to fit snugly with the external, rectangular-shaped male plug 220 of the suction connector portion 120 of the mouthpiece. Mouth props may be made in different sizes for differently sized mouths. Because the mouth prop and mouthpiece are detachable from each other, different sizes of each may be mixed and matched as needed for a particular patient's mouth.

[0045] The mouthpiece as described herein may be used with a one-piece, autoclavable, high-suction vacuum adapter. Such a high-suction vacuum body adapter may be made of a single homogenous material. Having a single lever design, such a vacuum adapter may function in the same manner as all the current high-suction vacuum evacuators and saliva ejectors in controlling the removal of water, saliva, and debris from the oral cavity to the outside vacuum source. The single lever may be designed to control the removal of water, saliva, and debris from the at least partially enclosed so main body through a single, large evacuation conduit within the suction connector portion.

[0046] While various embodiments have been described above, it should be understood that they have been presented by way of example only, and not limitation. The descriptions are not intended to limit the scope of the invention to the particular forms set forth herein. Thus, the breadth and scope of a preferred embodiment should not be limited by any of the above-described exemplary embodiments. It should be understood that the above description is illustrative and not restrictive. To the contrary, the present descriptions are intended to cover such alternatives, modifications, and equivalents as may be included within the spirit and scope of the invention as defined by the appended claims and otherwise appreciated by one of ordinary skill in the art. The scope of the invention should, therefore, be determined not with reference to the

above description, but instead should be determined with reference to the appended claims along with their full scope of equivalents.

CLAIMS

WHAT IS CLAIMED IS:

1. A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by:

an anterior wall comprising a slit along a longitudinal axis of the main body portion,

a posterior wall, and

a side wall connecting an edge of the anterior wall to an edge of the posterior wall.

2. The mouthpiece of claim 1, wherein the posterior wall further includes a stability bar protruding from an interior surface of the posterior wall and along a longitudinal axis of the main body.

3. The mouthpiece of claim 2, wherein the stability bar is aligned with the slit on the anterior wall.

4. The mouthpiece of claim 1, wherein the main body portion is formed by injection-molding as one piece.

5. The mouthpiece of claim 1, wherein a material used in the injection-molding is a flexible, translucent, high heat-resistant, autoclavable silicone-based material.

6. The mouthpiece of claim 1, wherein the anterior wall and the posterior wall have different thicknesses.

7. The mouthpiece of claim 1, wherein the slit allows portions of the anterior wall to be pulled open to expose the interior of the pocket.

8. The mouthpiece of claim 1, further comprising a cheek retractor portion configured to press against a cheek of a patient when placed in a mouth of the patient, wherein resilience of the cheek retractor portion causes the cheek retractor portion to retract the cheek of the patient away from teeth of the patient.

9. The mouthpiece of claim 1, wherein the cheek retractor portion comprises an extension of the pocket and wherein the slit extends into the extension of the pocket.

10. The mouthpiece of claim 1, further comprising a bridge structure protruding from an interior surface of the posterior wall.

11. The mouthpiece of claim 10, wherein the protruding bridge structure comprises a plurality of spaced contact points.

12. The mouthpiece of claim 11, wherein the bridge structure protrudes from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.

13. The mouthpiece of claim 12, wherein spaces between the contact points are at troughs of the wave shape.

14. The mouthpiece of claim 1, further comprising a suction connector portion that connects the interior portion to a vacuum source, wherein activation of the vacuum source provides suction of fluids from the interior of the pocket toward the vacuum source.

15. The mouthpiece of claim 1, further comprising a detachable mouth prop.

16. The mouthpiece of claim 15, wherein the detachable mouth prop comprises a bite block portion and a strap portion.

17. The mouthpiece of claim 16, wherein the bite block portion and strap portion are injection-molded in one piece.

18. The mouthpiece of claim 15, wherein the bite block portion comprises an opening corresponding to a plug connected to the main body.

19. A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by:

an anterior wall, wherein portions of the anterior wall are thicker than other portions of the anterior wall,

a posterior wall, and

a side wall connecting an edge of the anterior wall to an edge of the posterior wall.

20. A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by:

an anterior wall,

a posterior wall, wherein portions of the posterior wall are thicker than other portions of the posterior wall and

a side wall connecting an edge of the anterior wall to an edge of the posterior wall.

ABSTRACT

A dental mouthpiece is provided that may be attached to a high-suction dental adapter for the purpose of assisting the dental staff during dental procedures through chair-side, hands-free suction, and isolation. Such a mouthpiece may comprise a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded in one piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Date Mailed: 04/18/2014

Receipt is acknowledged of this non-provisional patent application. The application will be taken up for examination in due course. Applicant will be notified as to the results of the examination. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please submit a written request for a Filing Receipt Correction. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections**

Title

INTRAORAL DEVICE WITH SLIT

Preliminary Class

433

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications: No

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at http://www.uspto.gov/web/offices/pac/doc/general/index.html.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, http://www.stopfakes.gov. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

LICENSE FOR FOREIGN FILING UNDER

Title 35, United States Code, Section 184

Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign AssetsControl, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

SelectUSA

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The U.S. offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to promote and facilitate business investment. SelectUSA provides information assistance to the international investor community; serves as an ombudsman for existing and potential investors; advocates on behalf of U.S. cities, states, and regions competing for global investment; and counsels U.S. economic development organizations on investment attraction best practices. To learn more about why the United States is the best country in the world to develop technology, manufacture products, deliver services, and grow your business, visit http://www.SelectUSA.gov or call +1-202-482-6800.

INFORMATIONAL NOTICE TO APPLICANT

Applicant is notified that the above-identified application contains the deficiencies noted below. No period for reply is set forth in this notice for correction of these deficiencies. However, if a deficiency relates to the inventor's oath or declaration, the applicant must file an oath or declaration in compliance with 37 CFR 1.63, or a substitute statement in compliance with 37 CFR 1.64, executed by or with respect to each actual inventor no later than the expiration of the time period set in the "Notice of Allowability" to avoid abandonment. See 37 CFR 1.53(f).

The item(s) indicated below are also required and should be submitted with any reply to this notice to avoid further processing delays.

- A properly executed inventor's oath or declaration has not been received for the following inventor(s):
  Thien Nguyen
  Tam Thanh Pham

STATEMENT UNDER 37 CFR 3.73(c)

Applicant/Patent Owner: Thien Nguyen

Application No./Patent No.: 14/228,057 Filed/Issue Date: March 27, 2014

Titled: Intraoral Device with Slit

Incept, Inc., a Corporation

(Name of Assignee) (Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that, for the patent application/patent identified above, it is (choose **one** of options 1, 2, 3 or 4 below):

1. ☑ The assignee of the entire right, title, and interest.

2. ☐ An assignee of less than the entire right, title, and interest (check applicable box):

   ☐ The extent (by percentage) of its ownership interest is _____%. Additional Statement(s) by the owners holding the balance of the interest must be submitted to account for 100% of the ownership interest.

   ☐ There are unspecified percentages of ownership. The other parties, including inventors, who together own the entire right, title and interest are:

   Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

3. ☐ The assignee of an undivided interest in the entirety (a complete assignment from one of the joint inventors was made). The other parties, including inventors, who together own the entire right, title, and interest are:

   Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

4. ☐ The recipient, via a court proceeding or the like (*e.g.*, bankruptcy, probate), of an undivided interest in the entirety (a complete transfer of ownership interest was made). The certified document(s) showing the transfer is attached.

The interest identified in option 1, 2 or 3 above (not option 4) is evidenced by either (choose **one** of options A or B below):

A. ☑ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel 032545, Frame 0891, or for which a copy thereof is attached.

B. ☐ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

   1. From: _____ To: _____

      The document was recorded in the United States Patent and Trademark Office at

      Reel _____, Frame _____, or for which a copy thereof is attached.

   2. From: _____ To: _____

      The document was recorded in the United States Patent and Trademark Office at

      Reel _____, Frame _____, or for which a copy thereof is attached.

This collection of information is required by 37 CFR 3.73(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

DECLARATION FOR PATENT APPLICATION

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name.

I believe I am an original inventor of the subject matter which is claimed and for which a patent is sought on the invention entitled **Intraoral Dental Suction and Isolation System** the specification of which was filed **December 9, 2013** and assigned U.S. patent application **14/100,323**.

I hereby state that the above-identified application was made or authorized to be made by me.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Full name of inventor: **Thien Nguyen**

Citizenship: U.S. CITIZEN

(Japan: prefecture, city, village, city ward, etc.; US: city and state)

37 CFR §1.56 Duty to disclose information material to patentability.

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

(1) Prior art cited in search reports of a foreign patent office in a counterpart application, and

(2) The closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

(1) It establishes, by itself or in combination with other information, a *prima facie* case of unpatentability of a claim; or

(2) It refutes, or is inconsistent with, a position the applicant takes in:

(i) Opposing an argument of unpatentability relied on by the Office, or

(ii) Asserting an argument of patentability. A *prima facie* case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

(1) Each inventor named in the application;

(2) Each attorney or agent who prepares or prosecutes the application; and

(3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

(e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

DECLARATION FOR PATENT APPLICATION

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name.

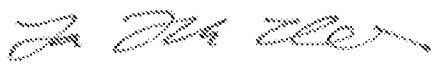

I believe I am an original inventor of the subject matter which is claimed and for which a patent is sought on the invention entitled **Intraoral Dental Suction and Isolation System** the specification of which was filed **December 9, 2013** and assigned U.S. patent application **14/100,323**.

I hereby state that the above-identified application was made or authorized to be made by me.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

(1) Prior art cited in search reports of a foreign patent office in a counterpart application, and

(2) The closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

(1) It establishes, by itself or in combination with other information, a *prima facie* case of unpatentability of a claim; or

(2) It refutes, or is inconsistent with, a position the applicant takes in:

(i) Opposing an argument of unpatentability relied on by the Office, or

(ii) Asserting an argument of patentability. A *prima facie* case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden of proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

(1) Each inventor named in the application;

(2) Each attorney or agent who prepares or prosecutes the application; and

(3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

(e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

Title:INTRAORAL DEVICE WITH SLIT

Publication No.US-2014-0212840-A1
Publication Date:07/31/2014

NOTICE OF PUBLICATION OF APPLICATION

The above-identified application will be electronically published as a patent application publication pursuant to 37 CFR 1.211, et seq. The patent application publication number and publication date are set forth above.

The publication may be accessed through the USPTO's publically available Searchable Databases via the Internet at www.uspto.gov. The direct link to access the publication is currently http://www.uspto.gov/patft/.

The publication process established by the Office does not provide for mailing a copy of the publication to applicant. A copy of the publication may be obtained from the Office upon payment of the appropriate fee set forth in 37 CFR 1.19(a)(1). Orders for copies of patent application publications are handled by the USPTO's Office of Public Records. The Office of Public Records can be reached by telephone at (703) 308-9726 or (800) 972-6382, by facsimile at (703) 305-8759, by mail addressed to the United States Patent and Trademark Office, Office of Public Records, Alexandria, VA 22313-1450 or via the Internet.

In addition, information on the status of the application, including the mailing date of Office actions and the dates of receipt of correspondence filed in the Office, may also be accessed via the Internet through the Patent Electronic Business Center at www.uspto.gov using the public side of the Patent Application Information and Retrieval (PAIR) system. The direct link to access this status information is currently http://pair.uspto.gov/. Prior to publication, such status information is confidential and may only be obtained by applicant using the private side of PAIR.

Further assistance in electronically accessing the publication, or about PAIR, is available by calling the Patent Electronic Business Center at 1-866-217-9197.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111
If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371
If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office
If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

PRELIMINARY AMENDMENT

Examiner Mai:

Prior to examination of the present application, please enter the following **amendments** to the **claims,** which commence on **page two**. The Applicants' **remarks** appear beginning on **page six**.

IN THE CLAIMS

PLEASE AMEND THE CLAIMS AS FOLLOWS:

1. (currently amended) A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by:

an anterior wall defined by an exterior edge, the anterior wall comprising a slit along a longitudinal axis of the main body portion,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, and

a side wall connecting [[an]] the exterior edge of the anterior wall to [[an]] the corresponding exterior edge of the posterior wall.

2. (original) The mouthpiece of claim 1, wherein the posterior wall further includes a stability bar protruding from an interior surface of the posterior wall and along a longitudinal axis of the main body.

3. (original) The mouthpiece of claim 2, wherein the stability bar is aligned with the slit on the anterior wall.

4. (original) The mouthpiece of claim 1, wherein the main body portion is formed by injection-molding as one piece.

5. (currently amended) The mouthpiece of claim 1, wherein a material used i~~n the injection molding~~ to form the main body portion is a flexible, translucent, high heat-resistant, autoclavable silicone-based material.

6. (original) The mouthpiece of claim 1, wherein the anterior wall and the posterior wall have different thicknesses.

7. (original) The mouthpiece of claim 1, wherein the slit allows portions of the anterior wall to be pulled open to expose the interior of the pocket.

8. (currently amended) The mouthpiece of claim 1, further comprising a cheek retractor portion ~~configured to press against a cheek of a patient~~ connected to the main body portion and having a surface that applies pressure when ~~placed in a mouth of the patient~~ bent, wherein the pressure is based on resilience of the cheek retractor portion ~~causes the cheek retractor portion to retract the cheek of the patient away from teeth of the patient~~.

9. (currently amended) The mouthpiece of claim [[1]] 8, wherein the cheek retractor portion comprises an extension of the pocket and wherein the slit extends into the extension of the pocket.

10. (currently amended) The mouthpiece of claim 1, further comprising a bridge structure comprising a plurality of protrusions protruding from an interior surface of the posterior wall, wherein the protrusions do not attach to the anterior wall.

11. (currently amended) The mouthpiece of claim 10, wherein the protruding bridge structure protrusions comprise[[s]] a plurality of spaced contact points.

12. (currently amended) The mouthpiece of claim 11, wherein the bridge structure protrusions protrude[[s]] from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.

13. (original) The mouthpiece of claim 12, wherein spaces between the contact points are at troughs of the wave shape.

14. (currently amended) The mouthpiece of claim 1, further comprising a suction connector portion that connects the interior ~~portion~~ of the pocket to a vacuum source, wherein activation of the vacuum source provides suction of fluids from the interior of the pocket toward the vacuum source.

15. (original) The mouthpiece of claim 1, further comprising a detachable mouth prop.

16. (original) The mouthpiece of claim 15, wherein the detachable mouth prop comprises a bite block portion and a strap portion.

17. (original) The mouthpiece of claim 16, wherein the bite block portion and strap portion are injection-molded in one piece.

18. (original) The mouthpiece of claim 15, wherein the bite block portion comprises an opening corresponding to a plug connected to the main body.

19. (currently amended) A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by:

an anterior wall defined by an exterior edge, wherein portions of the anterior wall are thicker than other portions of the anterior wall,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, and

a side wall connecting [[an]] the exterior edge of the anterior wall to [[an]] the corresponding exterior edge of the posterior wall.

20. (currently amended) A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by:

an anterior wall defined by an exterior edge,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, wherein portions of the posterior wall are thicker than other portions of the posterior wall and

a side wall connecting [[an]] the exterior edge of the anterior wall to [[an]] the corresponding exterior edge of the posterior wall.

REMARKS

The Applicants submit that the amended claims concern subject matter fully supported by the specification and to which the Applicants believe that they are entitled to claim. As such, no new matter has been added, and entry and consideration of the same is respectfully requested.

The Examiner is invited to contact the Applicants' undersigned representative with any questions concerning the present amendment.

The Director is authorized to charge any fees associated with or required by this filing to Deposit Account No. 500612.

Respectfully submitted,
Thien Nguyen et al.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111
If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371
If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office
If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

PCT

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference INCEP-001PCT	FOR FURTHER ACTION	see Form PCT/ISA/220 as well as, where applicable, item 5 below.
International application No. PCT/US2014/032892	International filing date *(day/month/year)* 03 April 2014	(Earliest) Priority Date *(day/month/year)* 09 December 2013
Applicant INCEPT, INC.		

This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of 2 sheets.

☐ It is also accompanied by a copy of each prior art document cited in this report.

1. **Basis of the report**

a. With regard to the **language**, the international search was carried out on the basis of:

☒ the international application in the language in which it was filed.

☐ a translation of the international application into _____ which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

b. ☐ This international search report has been established taking into account the **rectification of an obvious mistake** authorized by or notified to this Authority under Rule 91 (Rule 43.6*bis*(a)).

c. ☐ With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, see Box No. I.

2. ☐ **Certain claims were found unsearchable** (see Box No. II).

3. ☐ **Unity of invention is lacking** (see Box No. III).

4. With regard to the **title**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2, by this Authority as it appears in Box No. IV. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. With regard to the **drawings**,

a. the figure of the **drawings** to be published with the abstract is Figure No. 4

☐ as suggested by the applicant.

☐ as selected by this Authority, because the applicant failed to suggest a figure.

☒ as selected by this Authority, because this figure better characterizes the invention.

b. ☐ none of the figures is to be published with the abstract.

Solmetex Ex. 2025

INTERNATIONAL SEARCH REPORT

International application No.
PCT/US2014/032892

A. CLASSIFICATION OF SUBJECT MATTER
IPC(8) - A41C 17/00, 17/06 (2014.01)
CPC - A41C 17/00 (2014.07)
According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC(8) - A41C 17/00, 17/06 (2014.01)
CPC - A41C 17/00 (2014.07)

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched
USPC - 433/91, 92, 93, 140

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
Orbit, Google Patents, Google Scholar, PiubMed

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	US 2006/0084031 A1 (HIRSCH et al) 20 April 2006 (20.04.2006) entire document	1-6, 12, 17, 18
–		
Y		7-11, 13-16
Y	US 2013/0252193 A1 (BOWMAN et al) 26 September 2013 (26.09.2013) entire document	7
Y	US 2011/0311942 A1 (BLACK et al) 22 December 2011 (22.12.2011) entire document	8-10, 13-16
Y	US 4,822,278 A (OLIVA et al) 18 April 1989 (18.04.1989) entire document	11

☐ Further documents are listed in the continuation of Box C. ☐

* Special categories of cited documents:
"A" document defining the general state of the art which is not considered to be of particular relevance
"E" earlier application or patent but published on or after the international filing date
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
"O" document referring to an oral disclosure, use, exhibition or other means
"P" document published prior to the international filing date but later than the priority date claimed
"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"&" document member of the same patent family

Applicant INCEPT, INC.

1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43*bis*.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1 *bis*(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Fom PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US2014/032892

Box No. I Basis of this opinion

1. With regard to the **language**, this opinion has been established on the basis of:

   ☒ the international application in the language in which it was filed.

   ☐ a translation of the international application into _____ which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. ☐ This opinion has been established taking into account the **rectification of an obvious mistake** authorized by or notified to this Authority under Rule 91 (Rule 43*bis*.1(a))

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, this opinion has been established on the basis of a sequence listing filed or furnished:

   a. (means)

      ☐ on paper

      ☐ in electronic form

   b. (time)

      ☐ in the international application as filed

      ☐ together with the international application in electronic form

      ☐ subsequently to this Authority for the purposes of search

4. ☐ In addition, in the case that more than one version or copy of a sequence listing has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

5. Additional comments:

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US2014/032892

Box No. V **Reasoned statement under Rule 43*bis*.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims	5-11, 13-18	YES
	Claims	1-4, 12	NO
Inventive step (IS)	Claims	None	YES
	Claims	1-18	NO
Industrial applicability (IA)	Claims	1-18	YES
	Claims	None	NO

2. Citations and explanations:

Claims 1-4 and 12 lack novelty under PCT Article 33(2) as being anticipated by Hirsch et al hereinafter referred to as Hirsch.
Regarding claim 1, Hirsch teaches a dental mouthpiece (intraoral device 20; Fig. 2; para [0042]) composed of a material (Abstract), the dental mouthpiece comprising:
a main body portion (main body portion 50; Fig. 2; para [0047]) comprising a defined pocket (main receiving channel 62; Fig. 2; para [0047]) having an anterior wall (shown in Fig. 3), a posterior wall (shown in Fig. 4), and a side wall (shown in Figs. 5 and 8A-8B) in between the anterior wall and the posterior wall, wherein the anterior wall, the posterior wall, and the side wall define an interior portion of the defined pocket;
a cheek retractor portion (cheek retractor portion 52 of retractor 22; Fig. 2; para [0046]) configured to press against a cheek of a patient when placed in a mouth of the patient (para [0043]), wherein resilience of the material causes the cheek retractor portion to retract a cheek of the patient away from the teeth of the patient (para [0043]); and
a suction connector portion (exit port 108; Fig. 3; para[0058]) for connecting the interior portion of the main body to a vacuum suction source (vacuum source 110; Fig. 1; para [0062]).

Regarding claim 2, Hirsch teaches the mouthpiece of claim 1, wherein the side wall includes a plurality of perforations (evacuation holes 60; Figs. 3-4; para [0047]).

Regarding claim 3, Hirsch teaches the mouthpiece of claim 1, wherein the anterior wall and the posterior wall each includes a plurality of perforations (evacuation holes 60; Figs. 3-4).

Regarding claim 4, Hirsch teaches the mouthpiece of claim 1, wherein the anterior wall further includes a slit along a central axis (shown in Fig. 2 near channels 66).

Regarding claim 12, Hirsch teaches the mouthpiece of claim 1, further comprising a detachable (via pivot pins 92; para [0055]) mouth prop (bite block 26; Fig. 2).

Claims 5, 6, 17 and 18 lack an inventive step under PCT Article 33(3) as being obvious over Hirsch.
Regarding claim 5, Hirsch teaches the mouthpiece of claim 1, further comprising a stability bar (dispersion piece 24; Fig. 3).
Hirsch fails to teach the stability bar protruding from an interior surface of the posterior wall. In Fig. 3, Hirsch shows the stability bar protruding from an interior of the anterior wall.
It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the intraoral device of Hirsch to include the stability bar protruding from the interior wall of the posterior wall, since a mere reversal of essential working parts of a device involves only routine skill in the art. The motivation for doing so would be to provide a mouthpiece that would come in two different configurations, depending on the side of the mouth being examined (para [0045]).
Hirsch further fails to teach wherein a thickness of the stability bar increases resilience of the cheek retractor portion during bending. However, Hirsch teaches a combined thickness when the stability bar is connected to the mouthpiece (using pivot pins 92) (see Figs. 2 and 3 which shows the main body 50 before and after attachment of the stability bar).
Further, Hirsch teaches both the stability bar (dispersion piece 24) and the cheek retractor portion (cheek retractor portion 52) are made of flexible material and are in pivot connection (para [0045]; [0049]).
Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the intraoral device of Hirsh with increased resilience of the cheek retractor portion during bending in order to provide a mouthpiece to better accommodate different mouth sizes and shapes.

Supplemental Box

In case **the space in any of the preceding boxes is not sufficient.**
Continuation of:
Box V

Regarding claim 6, Hirsch teaches the mouthpiece of claim 1, wherein the main body portion, the cheek retractor portion, and the suction connector portion, but lacks the teaching that they are formed by injection-molded as one piece.
However, in an alternate embodiment shown in Fig. 18A, Hirsch teaches intraoral device (200) preferably has a single-piece, integrated homogenous-material, injection-molded construction (para [0074]).
Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the intraoral device of Hirsch, as taught in the alternate embodiment, for the purpose of minimize the cost of construction of each device, thus eliminating the need for reuse.

Regarding claim 17, Hirsch teaches the mouthpiece of claim 1, but lacks the teaching of the suction connector portion comprises a cutout corresponding to a protrusion on a vacuum adapter for an interlocking fit.
However, in alternate embodiment shown in Fig. 18B, Hirsch teaches the suction connector portion (connection section 570) comprises a cutout (slots 630) corresponding to a protrusion (barbs 690) on a vacuum adapter (vacuum-only adapter 230 by way of plug portion 640; Fig. 18B; para [0092]) for an interlocking fit (para [0092]).
Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the intraoral device of Hirsch, as taught in the alternate embodiment, for the purpose of providing a more secure connection between the suction connection portion and the vacuum.

Regarding claim 18, Hirsch teaches the mouthpiece of claim 1, but lacks the teaching of the anterior wall and the posterior wall having different thicknesses.
However, Hirsch teaches the intraoral device "may also come in different sizes...to accommodate different mouth sizes and shapes" (para [0056]). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the intraoral device of Hirsch to include an anterior wall and posterior wall having different thicknesses, for the purpose of providing a device that may accommodate a variety of patients' mouths.

Claim 7 lacks an inventive step under PCT Article 33(3) as being obvious over Hirsch in view of Bowman et al hereinafter referred to as Bowman.
Regarding claim 7, Hirsch teaches the mouthpiece of claim 1, wherein the material used in the injection molding is autoclavable.
Hirsch teaches "the bite piece 26 and dispersion piece 24 are autoclaved" (para [0060]). However, Hirsch lacks the teaching wherein the material used in the injection-molding is a flexible, translucent material.
However, in an alternate embodiment shown in Figs. 18A-18B, Hirsch teaches the "intraoral device is preferably injection molded out of a translucent, flexible...elastomer" (para [0074]).
Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the intraoral device, as taught by the alternate embodiment for the purpose of minimizing construction costs a provide a device that may accommodate many different patients mouths.
Hirsch also fails to teach the mouthpiece wherein the material used in the injection molding is a high heat-resistant, silicone-based material.
Bowman teaches dental positioners where the use of "silicone became very acceptable because of its...resistance to heat" (para [0018]).
It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the intraoral device of Hirsch to include a heat resistant silicone-based material, as taught by Bowman, since selection of a known material on the basis of its suitability for an intended use involves only routine skill in the art. The motivation for doing so would be to provide a device with enhanced efficacy and patient comfort.

Claims 8-10 and 13-16 lack an inventive step under PCT Article 33(3) as being obvious over Hirsch in view Black et al hereinafter referred to as Black.
Regarding claim 8, Hirsch teaches the mouthpiece of claim 1, but lacks the teaching of the mouthpiece further comprising a bridge structure protruding from an interior surface of the posterior wall, the protruding bridge structure comprising a plurality of spaced contact points that keep the anterior wall separated from the posterior wall during suction.
Black teaches an intraoral device comprising a bridge structure (transverse walls 348c; Figs. 23A and 23C) protruding from an interior surface of the posterior wall (posterior layer 348a), the protruding bridge structure comprising a plurality of spaced contact points that keep the anterior wall (anterior layer 348b) separated from the posterior wall during suction (para [0122]).
It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the intraoral device of Hirsch, as taught by Black, for the purpose of providing enhanced efficacy during suction.

Regarding claim 9, Hirsch and Black teach the mouthpiece of claim 8, but lack the teaching wherein the bridge structure protrudes from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.
It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the intraoral device of Hirsch to include bridge structures with the contact points are at crests of the wave shape, since a change in shape of an element involves only routine skill in the art. The motivation for doing so would be to provide enhanced efficacy during suction.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US2014/032892

Supplemental Box

In case **the space in any of the preceding boxes is not sufficient.**
Continuation of:

Regarding claim 10, Hirsch and Black teach the mouthpiece of claim 9, wherein troughs are configured to allow suction through the bridge structure. Black teaches "in this way the channels 342,343 (troughs)...thereby allowing for simultaneous aspiration of debris and fluid" para [0122]). However, Hirsch and Black lack the teaching wherein the bridge structure protrudes from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.
However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the intraoral device of Hirsch to include bridge structures with the contact points are at crests of the wave shape, since a change in shape of an element involves only routine skill in the art. The motivation for doing so would be to provide enhanced efficacy during suction.

Regarding claim 13, Hirsch teaches the mouthpiece of claim 12, but lacks the teaching of wherein the detachable mouth prop comprises a strap configured to fit around the suction connector portion, wherein an external surface of the suction connector portion comprises a notch region corresponding to the strap, and wherein an external surface of the strap is substantially flush with a remaining external surface of the suction connector portion when the strap sits in the notch region.
Hirsch does teache a notch region (plug portion 640) for matingly corresponding to connection section 570 of tube 590; Fig. 18B; para [0092]).
Black teaches an intraoral device comprising a strap (conduit 312; Fig. 20B; para [0114]) configured to fit around the suction connector portion ("neck of tongue..."; para [0114]) wherein an external surface of the suction connector portion (Figs. 23B-23C; neck 346; para [0126]), comprises a region corresponding to the strap, and wherein an external surface of the strap is substantially flush with a remaining external surface of the suction connector portion when the strap sits in the region (para [0126]).
It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the intraoral device of Hirsch, as taught by Black, for the purpose of providing a more secure connection between the mouth prop and suction connection portion.

Regarding claim 14, Hirsch and Black teach the mouthpiece of claim 13, but lack the teaching wherein the strap is injection-molded in a single piece with the mouth prop.
Hirsch teaches the use of injection molding for the intraoral device ("one piece, flexible injection-molded body; Abstract).
It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the Hirsch device, since the use of a one piece construction instead of the structure disclosed in the prior art would have required only routine skill in the art. The motivation for doing so would be to provide enhanced efficacy during suction.

Regarding claim 15, Hirsch teaches the mouthpiece of claim 1, but lacks the teaching wherein the suction connector portion further comprises an external plug protrusion corresponding to an opening in a mouth prop associated with the strap.
Black teaches an intraoral device wherein the suction connector portion further comprises an external plug protrusion (longitudinal projection 344; para [0126]) corresponding to an opening (groove 311; Fig. 20D; para [0126]) in a mouth prop associated with the strap (para [0126]). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the device of Hirsch, with the intraoral device as taught by Black, in order to provide a more secure connection at the suction connection portion.

Regarding claim 16, Hirsch and Black teach the mouthpiece of claim 15, wherein the plug protrusion fits into the opening to provide additional crush-resistance and decreased compressibility during biting by the patient.
Hirsch does teach, when adding plug 640 into connection section 570, "the plug...helps keep bite piece 250 from collapsing; para [0092]).
Specifically, Black teaches the plug protrusion (longitudinal projection 344) fits into the opening (groove 311).
It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the device of Hirsch, with the plug protrusion as taught by Black, for the purpose of providing a more secure connection at the suction connection portion.

Claims 11 lacks an inventive step under PCT Article 33(3) as being obvious over Hirsch in view of Oliva et al hereinafter referred to as Oliva.
Regarding claim 11, Hirsch teaches the mouthpiece of claim 1, but lacks the teaching wherein the suction connector portion comprises an internal stop to assist in positioning of a vacuum suction source or a vacuum adaptor.
Oliva teaches a dental instrument that comprises an internal stop (spring-loaded valve stem 239; Fig. 14; col.8, lns. 15-22).
It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the intraoral device of Hirsch to include an internal stop, as taught by Oliva, for the purpose of manually stopping the suctioning during positioning of the vacuum source.

Claims 1-18 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111
If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371
If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office
If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

(54) **Bite block**

(57) A bite block which is usefully employed in conjunction with endoscopy, bronchoscopy, endotracheal intubation and like medical-surgical procedures comprises a U shape plate (12) having grooves (18) which engage the upper and lower teeth keeping them apart and a ridge piece (60) attached to the bottom of the U shaped to engage the upper and lower lips and at least one bore hole (70, 72, 74) passing through the plate and the ridge capable of passing an endoscope, bronchoscope or endrotracheal tube into the mouth of the patient. The device prevents the patient from biting through the tube inserted through the mouth and from displacing the tube.

Ascentcare Dental Products v. Solmetex - IPR2025-01175

SPECIFICATION

Bite block

The invention relates to a bite block and more particularly relates to a bite block which is usefully employed in conjunction with endoscopy, bronchoscopy, endotracheal intubation and like medical-surgical procedures.

Not infrequently, patients in hospital emergency rooms and intensive care units require endotracheal intubation for mechanical ventillatory support during acute respiratory failure. Endotracheal tubes are formed of cylindrical pliable plastic, ranging in internal diameter from 4 to 9 millimeters.

Such patients are often unresponsive initially, but frequently struggle against both the endotracheal tube and the ventillator as their condition is stabilized and improves. Often they bite down with their teeth against the endotracheal tube such that necessary suctioning of pulmonary secretions is made difficult or impossible or occasionally the endotracheal tube or its pilot balloon is bitten in two, leading to potentially life threatening loss of control of the airway.

Small bite blocks or oropharyngeal airways that are now commercially available are unstable in maintaining position and are readily displaced by the patient's tongue or jaw movements. The present invention provides a bite block molded to fit the teeth, gums, jaw, palate, and lips in such a way that expulsion by the patient is unlikely. Structure is provided to permit stabilization of the endotracheal tube and allow catheter suctioning of oropharyngeal secretions or regurgitated gastric contents and drainage of gastric contents. The bite block prevents the patient from biting down on the endotracheal tube or suction catheters.

Other uses of the invention include assisting fiberoptic endoscopy and prevent the patient from biting down on the scopes thereby preventing costly damage to the fiberoptic components.

The invention comprises a bite block which is useful in conjunction with endoscopy, bronchoscopy, endotracheal intubation and like procedures, which comprises;

(a) a "U" shaped plate having first and second ends, each end being at the terminus of a separate upright leg of the "U", said plate comprising a plate body intermediate between and joining the first and second ends, said plate body having

(1) an upper surface delineated by the ends and inner and outer marginal zones;

(2) a lower surface delineated by the ends and inner and outer marginal zones;

(3) an inner side delineated by the ends and upper and lower marginal zones; and

(4) an outer side delineated by the ends and upper and lower marginal zones; the inner side joining at its upper marginal zone with the inner marginal zone of the upper surface and at its lower marginal zone with the inner marginal zone of the lower surface; the outer side joining at its upper marginal zone with the outer marginal zone of the upper surface and at its lower marginal zone with the outer marginal zone of the lower surface; said plate body further having

(5) a groove in the upper surface, between the inner and the outer marginal zones of the upper surface adapted by size and configuration to receive therein the upper teeth (or, in the absence of teeth, the associated gums) of a human being; and

(6) a groove in the lower surface, between the inner and the outer marginal zones of the lower surface, adapted by size and configuration to receive therein the lower teeth (or in the absence of teeth, the associated gums) of human being; whereby the plate is inserted into the vestibulum oris of a human being, the upper teeth or gums will be received in the upper surface groove and held apart by the plate body from the lower teeth or gums which are received in the lower surface groove;

(b) a ridge on the outer side of the plate body, positioned between the upper and and lower marginal zones of the outer side at the bottom of the "U" and extending outwardly from the outer side to a ridge terminus;

(c) an upper flange on and projecting upwardly from the ridge terminus, providing an open space between the upper flange, the upper marginal zone of the outer side and the upper side of the ridge, said space being of a size and configuration to receive the labium superiori oris of a human in sealing engagement with said flange, outer side and ridge;

(d) a lower flange on and projecting downwardly from the ridge terminus, providing an open space between the lower flange, the lower marginal zone of the outer side and the lower side of the ridge, said space being of a size and configuration to receive the labium inferiori oris of a human in sealing engagement with said lower flange, outer side and ridge;

(e) a bore traversing the plate and ridge at the bottom of the "U", communicating between the inner side of the plate and the ridge terminus, said bore being of a dimension to pass an edoscope, a bronchoscope, an endotracheal tube or the like; and

(f) optionally at least one additional bore traversing the plate and ridge adjacent the bottom of the "U", communicating between the inner side of the plate and the ridge terminus, said additional bore being of a dimension to pass an oropharyngeal endotracheal, or orogastric tube; said bite block being of a size and configuration permitting insertion of the "U" shaped plate component into the vestibulum oris of a human as described above and whereby the bridge and flange components sealingly engage the labium oris so that the oral cavity is restricted to communication to the exterior through the bore and optional bore.

A bite block constructed in accordance with the invention will now be described by way of example only with reference to the accompanying drawings, in which:

Figure 1 is an elevational view of an embodiment bite block of the invention, showing the inner

Solmetex Ex. 2025
AscentCare Dental Products v. Solmetex - IPR2025-01175

or posterior structure.

Figure 2 is a cross-sectional view along lines 2-2 of Figure 1.

Figure 3 is a front view of the embodiment of Figure 1.

Referring first to Figure 1, there is seen an elevational view of an embodiment bite block 10 of the invention, showing the inner or posterior structure. The bite block 10 is a generally "U" shaped plate 12 having a first end 14 and a second end 16. Each of the ends 14, 16 are at the terminus of a separate upright leg of the "U", and represents the end of plate 12 which will be inserted first into the vestibulum oris of a human being during use. The plate 12, intermediate between and joining ends 14, 16, has an upper surface 18 delineated by the ends and inner marginal zone 20 and outer marginal zone 22. The lower surface 24 of plate 12 is also delineated by the ends 14, 16 and by an inner margin 26 and an outer margin 28. The plate 12 is also bounded by an inner side 30 which has an upper 32 and a lower 34 marginal zone. An outer side 36 of the plate 12 is delineated by corresponding upper and lower marginal zones 38, 40 respectively (not seen in Figure 1; see Figure 3). The outer side 36 joins at the upper marginal zone 38 with the outer marginal zone 22 of upper surface 18 and at the lower marginal zone 40 with the outer marginal zone 28 of lower surface 24. The inner side 30 joins at its upper marginal zone 32 with the inner marginal zone 20 of upper surface 18 and at its lower margin zone 34 with the inner marginal zone 26 of lower surface 24.

The plate 12 further has a groove 50 in the upper surface 18 between the inner and outer marginal zones 20, 22 of the upper surface 18, said groove 50 being adapted by size and configuration to receive therein the upper teeth, or in the absence of teeth, the associated gums of a human being. A similar groove 52 is in the lower surface 24, between inner and outer marginal zones 26, 28 of the lower surface 24. The groove 52, like groove 50 is adapted by size and configuration to receive therein the lower teeth or associated gums of a human being when plate 12 is inserted in the vestibulum oris of the human being. When the plate 12 is so inserted, the upper teeth or gums of the human being will be received in the upper surface groove 50 and held apart by the plate body from the lower teeth or gums which are received in the lower surface 24 groove 52.

Referring now to Figure 2, there is seen a cross-sectional side elevation along lines 2-2 of Figure 1. As shown in the Figure 2, there is a ridge 56 on the outer side 36 of plate 12, positioned between the upper outside marginal zone 38 and the lower outside marginal zone 40, at the bottom of the "U" and extending outwardly from the outer side 36 to a ridge terminus 58. An upper flange 60 on and projecting upwardly from the ridge terminus 58 provides an open space 62 between the upper flange 60 and the upper marginal zone 38 of the outer side 36 and the upper side of ridge 56. The space 62 is of a size and configuration to receive the labium superiori oris of a human in sealing engagement with said flange 60, outer side 36 and ridge 56. A lower flange 64 on and projecting downwardly from the ridge terminus 58 provides an open space 66 between the lower flange 64, the lower marginal zone 40 of the outer side 36 and the lower side of the ridge 56. Space 66 is of a size and configuration to receive the labium inferiori oris of a human in sealing engagement with said lower flange 64, outer side 36 and ridge 56. A bore 70 traverses plate 12 and ridge 56 at the bottom of the "U", communicating between the inner side 30 of plate 12 and the ridge terminus 58, the bore 70 being of a dimension to pass an endoscope, a bronchoscope, an endotracheal tube or the like. In the preferred embodiment of bit block 10, there are additionally bores 72 and 74 tranversing the body of plate 12 and ridge 56 at the bottom of the "U", communicating between the inner side 30 of plate 12 and the ridge terminus 58. The bores 72, 74 are of a dimension to pass endotracheal, oropharyngeal, or orogastric tubes and also provide airways into the oral cavity of a patient when the bite block 10 is inserted therein. The entire bit block 10 is of a size and configuration permitting its use by insertion of ends 14, 16 into the mouth of a human as described above, leaving the ridge 56 and flanges 60, 64 external to the mouth. When bite block 10 is so inserted into the vestibulum oris of a patient, the ridge 56 and flanges 60, 64 cooperate to sealingly engage the labium oris so that the oral cavity of the patient is restricted in communication to the exterior, through the bores 70, 72 and 74. The bite block 10 may be fabricated in a range of standard sizes, selected to fit a range of humans, i.e.; children through adults.

Figure 3 is a front view of the embodiment bite block 10 shown in Figure 1 and shows further details of the bite block 10. The front surface 82 on terminus 58 may be used to hold an adhesive tape, for securing tubes passing through the bores 70, 72 or 74. A length of such tape passing around the back of the patient's neck and adhering in front to surface 82 would prevent voluntary expulsion of bite block 10.

The bite block 10 is employed when desired by insertion into the vestibulum oris of a human being. Secured in place by the patient's natural reflex to bite down on it, the patient is prevented from injury to self by the biting reflex. Since the bite block 10 fully conforms to the shape of the maxillary and mandibular arcades, it will not shift in position and is securely maintained in the vestibulum oris. The bite block 10 is stable in regard to movement and comfortable to the wearer. While stably maintained in place, such medical-surgical procedures as endoscopy or bronchoscopy, and the like may be carried out by insertion of the appropriate instrument through the bore hole 70. The proximal end of a previously placed endotracheal tube may be passed through bores 70, 72 or 74 as the bite block is inserted. When required, oral-pharyngeal or gastric suctioning of natural secretions may be carried out through the bores 72, 74. All of these procedures may be carried out without interference from the patient biting down upon the in-

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

strument, tubing or the like. Upon termination of a particular procedure, the bite block may be maintained in place to function as an airway and/o9r it may be removed as desired.

The bite block 10 may be fabricated from any conventional materials, preferably a polymeric resin which has sufficient strength to resist a patient biting through but which is resilient enough that injury to the patient's teeth and/or gums goes not occur. Preferably, the bite block 10 is fabricated from polyethylene, polypropylene and like polymeric resins.

In one example of the invention, the bite block 10 may be fabricated from an ethylene-vinyl acetate or like material which softens at a temperature of about 45 to 100°C. This bite block 10 may be made to conform and mold to the exact configuration of a particular patient's maxillary and mandibular arches, including the teeth and gums, by softening the bite block 10 in a hot water immersion. After removing the bite block 10 with its softened ethylene-vinyl acetate surface, from the immersion, it may be inserted into the vestibulum oris of a particular human individual (allowing it to cool first as necessary to avoid a burn injury to the individual). The human then brings his jaws together in a normal closing manner to displace softened thermoplastic material. In this way, the grooves 50 and 52 are made to conform to the anatomical structure of the individual's teeth and/or gums. The bite block 10 is then removed and allowed to reharden. It may then be used subsequently in the above described medical-surgical procedures wherein the bite block 10 will fit perfectly in the vestibulum oris of the individual patient.

CLAIMS

1. A bite block which is useful in conjunction with endoscopy, bronchoscopy, endotracheal intubation and like procedures, which comprises;

(a) a "U" shaped plate having first and second ends, each end being at the terminus of a separate upright leg of the "U", said plate comprising a plate body intermediate between and joining the first and second ends, said plate body having

(1) an upper surface delineated by the ends and inner and outer marginal zones;

(2) a lower surface delineated by the ends and inner and outer marginal zones;

(3) an inner side delineated by the ends and upper and lower marginal zones; and

(4) an outer side delineated by the ends and upper and lower marginal zones;

the inner side joining its upper marginal zone with the inner marginal zone of the upper surface and at its lower marginal zone with the inner marginal zone of the lower surface; the outer side joining at its upper marginal zone with the outer marginal zone of the upper surface and at its lower marginal zone with the outer marginal zone of the lower surface; said plate body further having

(5) a groove in the upper surface, between the inner and the outer marginal zones of the upper surface suited by size and configuration to receive therein the upper teeth (or, in the absence of teeth, the associated gums) of a human being; and

(6) a groove in the lower surface, between the inner and and the outer marginal zones of the lower surface, suited by size and configuration to receive therein the lower teeth (or in the absence of teeth, the associated gums) of a human being; whereby when the plate is inserted into the vestibulum oris of a human being, the upper teeth or gums will be received in the upper surface groove and held apart by the plate body from the lower teeth or gums which are received in the lower surface groove;

(b) a ridge on the outer side of the plate body positioned between the upper and the lower marginal zones of the outer side at the bottom of the "U" and extending outwardly from the outer side to a ridge terminus;

(c) an upper flange on and projecting upwardly from the ridge terminus, providing an open space between the upper flange, the upper marginal zone of the outer side and the upper side of the ridge, said space being of a size and configuration to receive the labium superiori oris of a human in sealing engagement with said flange, outer side and ridge;

(d) a lower flange on and projecting downwardly from the ridge terminus, providing an open space between the lower flange, the lower marginal zone of the outer side and the lower side of the ridge, said space being of a size and configuration to receive the labium inferiori oris of a human in sealing engagement with said lower flange, outer side and ridge;

(e) a bore traversing the plate and ridge at the bottom of the "U", communicating between the inner side of the plate and the ridge terminus, said bore being of a dimension to pass an endoscope, a bronchoscope, an endotracheal tube or the like; and

(f) optionally at least one additional bore traversing the plate and ridge adjacent to the bottom of the "U", communicating between the inner side of the plate and the ridge terminus, said additional bore being of a dimension to pass an endotracheal tube, oropharyngeal or orogastric tube; said bite block being of a size and configuration permitting insertion of the "U" shaped plate component into the vertibulum oris of a human as described above and whereby the ridge and flange components sealingly engage the labium oris so that the oral cavity is restricted to communication to the exterior through the bore and optional bores.

2. A block as claimed in claim having at least two additional bores as defined in paragraph (f) of claim 1.

3. A bite block substantially as herein described with reference to, and as illustrated by, the accompanying drawings.

4. A block as claimed in claim 3, wherein the block is fabricated from a material which softens at a temperature in the range 45 to 100°C.

(54)Title: SALIVA ASPIRATOR FOR DENTAL TREATMENT

(54)発明の名称　歯科医療用唾液吸引具

(57) Abstract

A saliva aspirator for dental treatment which can suck and discharge saliva and dirty water and at the same time can separate the tongue, the buccal mucosa and the like from the teeth as a treatment site merely by setting the aspirator within the mouth. An aspirator (1) is set in an opened oral cavity (22), and a vacuum pump (28) is turned on. This permits the interior of the aspirator (1) to be put under negative pressure, ensuring the suction and discharge, through a plurality of saliva suction holes (10) provided in a deep section (5) and a front returning section (7), of the saliva secreted from the submandibullar gland, parotid gland, and sublingual gland during dental treatment, dirty water within the oral cavity created during the treatment, and cooling water injected into the oral cavity when a rotary cutting tool (29) is used at the time of cutting the tooth. In this case, the patient's intraoral organs, such as the tongue (30) and the buccal mucosa, are impeded by the deep section (5), a curved continuous section (6), and the front returning section (7), thus permitting the organs to be prevented from approaching the tooth portion to be treated.

明細書

歯科医療用唾液吸引具

技術分野

本発明は、歯科医療用唾液吸引具に関するものである。

背景技術

歯科医療においては、治療中に口腔内に生じる唾液や汚水を吸引排出するとともに、治療部位の歯牙から舌や頬粘膜等を隔離する必要がある。このため従来は、歯科用ユニットのフレキシブルアームに取り付けたバキュームチップを用いて行ったり、アシスタントや衛生士が歯科用バキュームチップを用いて行っていた。

しかしながら、口腔内におけるバキュームチップの固定性や安定性が悪いため、歯科治療中に予期せぬ動きをする舌等の口腔内器官を、確実に治療部位の歯牙から隔離させておくことはできなかった。また、歯科医師の治療に応じて、バキュームチップを操作することは、アシスタントや衛生士にとって極めて熟練を要する作業であった。

本発明は上記に鑑みてなされたものであり、口腔内に装着するだけで唾液や汚水を吸引排出するとともに、治療部位の歯牙から舌や頬粘膜等を隔離できる歯科医療用唾液吸引具を提供することを目的とする。

発明の開示

上記の目的を達成するため請求項１に記載された本発明の歯科医療用唾液吸引具は、保形用の線材により保形される一本のチューブを用いて、該チューブの略中央部に上顎歯若しくは下顎歯の何れかに係止する略Ｕ字形の係止部と、該係止部から上顎堤若しくは下顎堤の両側に沿わせて口腔奥部に向かって略平行に延び

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

る奥行き部と、該奥行き部から前記下顎堤若しくは上顎堤の両側に沿って口腔の外方に向かって略平行に延びる前方帰還部と、該前方帰還部の前端から口腔外部に延びる吸引用連結部とを形成するとともに、少なくとも前記奥行き部若しくは前方帰還部に複数の唾液吸引孔を設けたことを特徴とする歯科医療用唾液吸引具。

また、請求項２に記載された本発明の歯科医療用唾液吸引具は、請求項１に記載の構成において、前記保形用の線材を前記奥行き部から前方帰還部に至る部位においてコイル状に巻回したことを特徴とする。

請求項３に記載された本発明の歯科医療用唾液吸引具は、請求項１及び請求項２に記載の構成において、前記保形用の線材に弾力性の線材を用いて、可撓性を付与したことを特徴とする。

請求項４に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項３に記載の構成において、前記保形用の線材に可撓性若しくは弾力性が異なる部位を設けたことを特徴とする。

請求項５に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項４に記載の構成において、前記保形用の線材に金属線を用いて熱処理により可撓性若しくは弾力性を付与したことを特徴とする。

請求項６に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項５に記載の構成において、前記保形用の線材にステンレス合金線材を用いたことを特徴とする。

請求項７に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項５に記載の構成において、前記保形用の線材にニッケル・チタン合金線材を用いたことを特徴とする。

請求項８に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項７に記載の構成において、前記係止部位で前記チューブを切断して前記略Ｕ字形に屈曲させた保形用の線材を露出させるとともに、前記チューブの切断端部を気

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

密に封止したことを特徴とする。

請求項９に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項８に記載の構成において、前記保形用の線材の露出部を軟質部材により被覆したことを特徴とする。

請求項１０に記載された本発明の歯科医療用唾液吸引具は、可撓性及び保形性を有するパイプ材を用いて、上顎歯若しくは下顎歯の何れかに係止する略Ｕ字形の係止部と、該係止部から上顎堤若しくは下顎堤の両側に沿わせて口腔奥部に向かって略平行に延びる奥行き部と、該奥行き部から前記下顎堤若しくは上顎堤の両側に沿って口腔の外方に向かって略平行に延びる前方帰還部と、該前方帰還部の前端に吸引用連結部とを形成するとともに、少なくとも前記下顎堤に沿う前記奥行き部若しくは前方帰還部に複数の唾液吸引孔を設けたことを特徴とする歯料医療用唾液吸引具。

請求項１１に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項１０に記載の構成において、前記前方帰還部の何れか一方の前端を気密に封止して、何れか他方の前端に前記吸引用連結部を形成したことを特徴とする。

請求項１２に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項１１に記載の構成において、前記前方帰還部の何れか一方の前端を気密に封止するとともに、該封止部から突出させた線材により略Ｕ字形の屈曲部を形成して、何れか他方の前記前方帰還部の前端部に掛け渡すとともに、該前端部に前記吸引用連結部を形成したことを特徴とする。

請求項１３に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項１０に記載の構成において、前記前方帰還部の何れか一方の前端部に屈曲部を形成して、前記上顎歯若しくは下顎歯の何れかを跨がせるとともに、前記前方帰還部の何れか他方に吸引可能に連結したことを特徴とする。

請求項１４に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項１３に記載の構成において、前記前方帰還部若しくは奥行き部の何れか一方に

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

咽喉部を塞ぐネット若しくはスクリーンを設けたことを特徴とする。

請求項１５に記載された本発明の歯科医療用唾液吸引具は、請求項１乃至請求項１４に記載の構成において、片側若しくは両側の前記奥行き部と前方帰還部間に口腔内器官を隔離する隔離部材を差し渡したことを特徴とする。

発明を実施するための最良の形態

請求項１に記載の本発明の歯科医療用唾液吸引具によれば、係止部を上顎歯若しくは下顎歯の何れかに係止するとともに、開口した口腔内に装着することにより、該係止部から略平行に延びる奥行き部が上顎堤若しくは下顎堤の両側に沿い、口腔外部に向かって略平行に延びる前方帰還部が下顎堤若しくは上顎堤の両側に沿う。そして、前方帰還部の前端から口腔外部に延びる吸引用連結部に吸引チューブを連結して吸引することにより、少なくとも奥行き部若しくは前方帰還部に設けた複数の唾液吸引孔から、歯科治療中に耳下腺、顎下腺及び舌下腺から生じる唾液や、治療中に生じる口腔内の汚水を確実に吸引排出できる。また、奥行き部及び前方帰還部により、舌や頬粒膜の口腔内器官が治療を施こす歯牙部分に近づくのを妨げたり、治療器具等に触れないように隔離できるから、治療の安全性を確保できる。さらに、保形用の線材に保形される一本のチューブを用いて係止部及び全体形状を形成したことにより、口腔内への装着及び取り外しが容易となるとともに、上顎歯の何れかに係止部を係止し、開口状態の上下の歯牙若しくは顎堤で保持して安定させることができるから、アシスタントを必要とすることなく歯科医師１人で治療が可能となるとともに、天地を逆にしても装着できる等の効果を有する。

請求項２に記載の本発明の歯科医療用唾液吸引具は、奥行き部から前方帰還部に至る部位の保形用の線材をコイル状に巻回したから、巻径やコイルピッチ等を変えることにより撓み力を調整することができる。従って、装着したときに口腔に作用する撓み反力により、治療のため患者が開口状態を維持する際の疲労を軽減することができ長時間の治療が可能になる。

請求項３に記載された本発明の歯科医療用唾液吸引具は、保形用の線材に弾力性を有する線材を用いたから、奥行き部と前方帰還部とが互いに接近離間するように撓ませることができ、口腔内への装着及び取り外しを容易にできる。

請求項４に記載された本発明の歯科医療用唾液吸引具は、保形用の線材に弾力

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

性が異なる部位を設けたから、歯科医師が患者の口腔部の大小や歯並び等に応じて形状を変化させることができ、口腔内への装着性を高めることができる。

請求項５に記載された本発明の歯科医療用唾液吸引具は、保形用の金属線に熱処理を施して弾力性を付与するもので、所定部位に所定の弾力性を持たせることができ、歯科医師が患者の口腔部の大小や歯並び等に応じて形状を変化させることが容易となり、より優れた装着性を実現できる。

請求項６に記載された本発明の歯科医療用唾液吸引具は、保形用の線材にステンレス合金線材を用いたから、熱処理条件や線径を調整することにより、部位に応じて容易に所定の弾力性を付与することができ、歯科医師が患者の口腔部の大小や歯並び等に応じて形状を変化させることが容易となり、より優れた装着性を実現できる。

請求項７に記載された本発明の歯科医療用唾液吸引具は、保形用の線材にニッケル・チタン合金線材を用いたもので、該ニッケル・チタン合金線材は成分比と焼鈍条件により使用温度領域において、超弾性特性、加工硬化型特性及び形状記憶特性等の好ましい特性を付与できる。従って、これらの特性を単独又は組み合わせて用いることにより、優れた使い勝手や装着性をもたらすことができる。

請求項８に記載された本発明の歯科医療用唾液吸引具は、係止部位で露出する略Ｕ字形に屈曲した保形用の線材を、上顎歯若しくは下顎歯の何れかに係止して口腔内に装着するようにしたから、係止部を容易かつ確実に係止できる。

請求項９に記載された本発明の歯科医療用唾液吸引具は、前記保形用の線材の露出部を軟質部材により被覆したから、露出した線材が直接上顎歯若しくは下顎歯に接触することがなく、装着時の患者の違和感を軽減できる。

請求項１０に記載された本発明の歯科医療用唾液吸引具は、可撓性及び保形性を有するパイプ材を用いて形成したものであり、前方帰還部の前端に形成した吸引連結部に吸引パイプを連結して用いる。パイプ内部に保形用の線材を有しないから、製作が容易であるとともに、洗浄や消毒が簡単にできる。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

請求項１１に記載された本発明の歯科医療用唾液吸引具は、前方帰還部の何れか一方の前端を封止して、何れか他方の前端に前記吸引用連結部を形成したもので、口腔外へ延びる吸引連結部、又は吸引用連結部に連結する吸引パイプが何れか一方のみとなるから、装着時の患者の違和感を軽減することができる。

請求項１２に記載された本発明の歯科医療用唾液吸引具は、前方帰還部の何れか一方の前端を気密に封止するとともに、該封止部から突出させた線材により略U字形の屈曲部を形成して、何れか他方の前記前方帰還部の前端部に掛け渡したもので、係止部とこの屈曲部とにより上顎歯と下顎歯の双方に係止することができ、口腔内で位置がずれることがない確実な装着を施こすことができる。

請求項１３に記載された本発明の歯科医療用唾液吸引具は、前方帰還部の何れか一方の前端部に屈曲部を形成して、上顎歯若しくは下顎歯の何れかを跨がせるとともに、前方帰還部の何れか他方に吸引可能に連結したものであり、口腔外へ延びる吸引連結部、又は吸引用連結部に連結する吸引パイプが何れか一方のみとなるから、装着時患者の違和感を軽減することができる。また、屈曲部を上顎歯若しくは下顎歯の何れかを跨がせているから、係止部とこの屈曲部とにより上顎歯と下顎歯の双方に係止することができ、口腔内で位置がずれることがない確実な装着を施こすことができる。

請求項１４に記載された本発明の歯科医療用唾液吸引具は、前方帰還部若しくは奥行き部の何れかに咽喉部を塞ぐネット若しくはスクリーンを設けたから、治療中に誤って治療用小器具等が口腔内に外れ落ちても、飲み込んでしまうことがない。

請求項１５に記載された本発明の歯科医療用唾液吸引具は、片側若しくは両側の奥行き部と前方帰還部間に、口腔内器官を隔離する隔離部材を差し渡したから、治療を施こす歯牙部分に舌や頬粘膜の口腔内器官が近づくことを防止できる。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

［実施例］

本発明の実施の形態を添付図面を参照して説明する。図１は、本発明に係る歯科医療用唾液吸引具（以下単に吸引具という）１の斜視図である。この吸引具１は、軟質のゴム、合成樹脂若しくは高分子樹脂製のチューブ２内に保形用の線材３を挿入して屈曲及び曲成することにより形成される。先ず、チューブ２の略中央部を二つ折状に屈曲して略Ｕ字形の係止部４が形成される。そして、該係止部４から略平行に連続させるとともに、上方に向かって膨らむように緩やかに湾曲させた奥行き部５と、該奥行き部５と略同じ曲率で湾曲させた湾曲連続部６と、該湾曲連続部６に続けて、下方に向かって膨らむように緩やかに湾曲させた前方帰還部７とが順次曲成される。チューブ２内の保形用の線材３は、該前方帰還部７まで挿入されていて、上記各部を保形している。前方帰還部７に続くチューブ２には、吸引用連結部８が形成され、その吸引用連結部８の二つの端部を合わせて連結する吸引用連結管９が接続されている。また、上記奥行き部５及び前方帰還部７には、所定の間隔を置いて複数個の唾液吸引孔１０が形成されている。

尚、上記吸引具１は、予め各部を屈曲成形した保形用の線材３の一端部から、チューブ２を挿し通すことによっても形成できる。また、保形用の線材３は、チューブ２の製造時に一体にインサートしたものであってもよい。さらに、チューブ２の外周面の形状は、円形の外に四角形、楕円形等任意の形状とすることができる。

上記吸引具１は図２に示すように、係止部４を上顎歯２１の何れかに係止して開口した口腔２２内に装着したとき、略平行な奥行き部５が上顎堤２３の両側に沿って口腔奥部に向かう。このとき、患者の頬側の奥行き部５の頂部５ａは、頬移行部（頬粘膜と歯肉の境界部）付近に位置し、舌側の奥行き部５の頂部５ｂは、口蓋と歯肉の境界部付近に位置する。そして、奥行き部５に連続する湾曲連続部６は、上顎堤２３に対向する下顎堤２４の奥部両側に向かって略平行に下がっている。湾曲連続部６に連続する前方帰還部７は、下顎堤２４の両側に沿って

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

口腔の外方に向かう。このとき、患者の頬側の前方帰還部７の最低部７ａは、齦頬移行部に位置し、舌側の前方帰還部７の最低部７ｂは、口腔底と歯肉の境界部に位置する。下唇２５を越えて口腔２２外に導き出された頬側の吸引用連結部８と、下顎前歯２６を乗り越えて口腔２２外に導き出された舌側の吸引用連結部８の端部を連結した吸引用連結管９には、吸引チューブ２７を介してバキュームポンプ２８が接続されている。

上記したように開口した口腔２２内に吸引具１を装着して、バキュームポンプ２８をオンすると、吸引具１内が負圧になって奥行き部５及び前方帰還部７に設けた複数の唾液吸引孔１０から、歯科治療中に顎下腺、耳下腺及び舌下腺から生じる唾液や、治療中に生じる口腔内の汚水及び歯牙切削時に回転切削具２９の使用で注水される冷却水を確実に吸引排出できる。このとき、患者の舌３０や頬粘膜の口腔内器官が、奥行き部５、湾曲連続部６及び前方帰還部７に妨げられて、治療を施こす歯牙部分に近づかないように隔離できる。従って、治療の邪魔にならないばかりでなく、予期せぬ動きを生じる患者の舌３０が、回転切削具２９等に触れて傷付くようなこともない。また、口腔２２内では、上顎歯２１の何れかに係止部４を係止し、開口状態の上下の顎堤２３、２４が保持できるから、アシスタントを必要とすることなく歯科医師１人で治療が可能となる。

尚、バキュームポンプを用いない吸引排出装置を使用してもよい。

また、上記吸引具１は、係止部４を下顎歯の何れかに係止して、奥行き部５を下顎堤２４の両側に、前方帰還部７を上顎堤２３の両側とする天地を逆にした装着形態とすることもできる。そして、上顎堤２３に沿う奥行き部５若しくは前方帰還部７に、唾液吸引孔１０を設けないで、下顎堤２４に沿う奥行き部５若しくは前方帰還部７の唾液吸引孔１０から、下顎堤２４の付近に溜まる唾液や、治療中に生じる口腔内の汚水等を吸引排出するようにしてもよい。

本発明の吸引具１は、前方帰還部７だけ若しくは奥行き部５及び前方帰還部７の両方を湾曲しない直線形状にすることもできる（図３（ａ），（ｂ））。さら

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

に、図４に示すように、直線状の奥行き部５と前方帰還部７を連続させて、唾液吸引孔１０を全体に亘って形成することもできる。

また、図５に示すように奥行き部５から前方帰還部７に至る湾曲連続部６のチューブ２内の位置に、保形用の線材３を巻回したコイル状部３ａを設けて可撓性を付与することもできる。これにより、該コイル状部３ａを撓ませて、図６に示すように奥行き都５と前方帰還部７とを互いに接近離間させることができ、口腔２２内への装着及び取り外しが容易にできる。また、巻径やコイルピッチ等を変化させて撓み力を調整することが可能となり、装着したときに作用する撓み反力により、治療のため患者が開口状態を維持する際の疲労を軽減することができる。

さらに、保形用の線材３として、全長に亘って小径のコイル状に巻回したものや、ピアノ線等の弾力性を有する線材を用いることにより、奥行き部５と前方帰還部７とが互いに接近離間するように大きく撓ませることができる。これにより、上記と同様な利点を生じさせることが可能になる。

図７に示す吸引具３１は、係止部３４でチューブ３２を切断して、略Ｕ字形に屈曲成形した保形用の線材３３を露出させ、上顎歯の何れかに係止するようにするとともに、チューブ３２の両切断端部３２ａを気密に封止したものである。露出した略Ｕ字形に屈曲した保形用の線材３３により、容易かつ確実に上顎歯２１の何れかに係止することができる。さらに、図８に示すように、保形用の線材３３が露出した係止部３４ａにゴムや合成樹脂等の軟質部材３５を被覆して、係止する際金属線が直接歯牙に当たる際の違和感を軽減することができる。その他、保形用の線材３に被覆線材を用いることもできる。

また、保形用の線材３の所定部位毎に可撓性を異ならせて、歯科医師が患者の口腔部の大小や歯並び等に応じて吸引具１，３１の形状を変化させて、装着性を高めることができる。構造的に弾力性を異ならせるには、所定部位を延伸加工などで線材径を変えたり、細い線材の外周にパイプを嵌めてかしめたりねじ込んで

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

接続したり、或いはろう付け加工等を施して補強したりすることで弾力性を異ならせることが可能となる。さらに、保形用の線材の所定部位を合成樹脂製の線材により代用することもできる。又、金属線を用いる場合、予め所定部位を通電加熱急冷等の熱処理を施すことで弾力性を他の部位と異ならせることができる。

保形用の線材３にステンレス合金線材を用いて、所定部位毎に可撓性を異ならせることもできる。例えば、オーステナイト組織のステンレス鋼は、塑性加工によって一部マルテンサイト組織に変態し硬くなる。また、約１１００℃まで加熱し急冷する固溶化処理を施こすと、全体が完全なオーステナイト組織となり、極めて柔らかくなる。従って、所定の部位に必要な可撓性を付与でき、吸引具１を歯科医師が患者の口腔部の大小や歯並び等に応じて変形させることができ、優れた装着性を実現することができる。そして、ステンレス合金線材は、保形用の線材３の特定の部位のみに用いることもできる

保形用の線材３にニッケル・チタン合金線材を用いてもよい。ニッケル・チタン合金には、超弾性特性や加工硬化型特性、或いは形状記憶特性を示すものが知られている。これらの特性を単独又は組み合わせて用いることにより、優れた使い勝手や装着性を実現できる。ニッケル・チタン合金線材はその組成比にもよるが、３５０℃～４００℃近傍で長時間熱処理することにより超弾性特性を示すが、短時間の熱処理では加工硬化特性を示す。従って、熱処理条件や線径を調整することにより、簡単に弾力性を変化させることができる。従って、保形用の線材３の特に奥行き部５及び前方帰還部７に相当する部位を、固溶化処理などの熱処理により柔軟にして、患者の上顎堤２３若しくは下顎堤２４の高さに合わせて吸引具１，３１を形作ることができるから、口腔内への装着がより確実となり、使い勝手が向上するとともに、装着時の患者の違和感を軽減することができる。

尚ニッケル・チタン合金の他に、例えば形状記憶合金等の銅－アルミニウム－ニッケル系合金、銅－亜鉛－アルミニウム系合金等も保形用の線材に用いることができる。そして、該ニッケル・チタン合金線材等は、保形用の線材３の特定の

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

部位のみに用いることもできる。

図９に示す吸引具４１は、可撓性及び保形用を有する金属製或いは高分子樹脂製パイプ４２を用いて、係止部４４、奥行き部４５、湾曲連続部４６、前方帰還部４７及び口腔内で終わる吸引用連結部４８を曲成するとともに、奥行き部４５及び前方帰還部４７に複数の唾液吸引孔５０を形成したものである。そして、吸引用連結部４８に、下唇２５や下顎前歯２６を乗り越える吸引用チューブ４９を連結する。素材を可撓性を有する合成樹脂製とした場合は、ソフトな装着感を感得でき患者に違和感を与えることがない。また、金属製或いは合成樹脂製のパイプ４２内に保形用の線材を通していないから、洗浄、消毒等が容易となる。

上記吸引具４１も、奥行き部４５を下顎堤２４の両側に、前方帰還部４７を上顎堤２３の両側とする天地を逆にした装着形態とすることもできる。そして、上顎堤２３に沿う奥行き部４５若しくは前方帰還部４７に、唾液吸引孔５０を設けないで、下顎堤２４に沿う奥行き部４５若しくは前方帰還部４７の唾液吸引孔５０のみから、下顎堤２４部分に溜まる唾液や、治療中に生じる口腔内の汚水等を吸引排出するようにしてもよい。また、前記図３（ａ），（ｂ）で示したのと同様に、奥行き部４５及び前方帰還部４７の両方若しくは前方帰還部４７のみを湾曲しない直線形状にすることもできる。さらに、図４に示したのと同様に、直線状の奥行き部４５と前方帰還部４７を連続させた形状とすることもできる。その他、左右一対の吸引具１，３１，４１を、係止部どうし連結したり、吸引用連結部どうしを連結する等して、左右の上顎堤２１及び下顎堤２４に同時に装着して用いることもできる。

また、図１０に示す吸引具５１は、上記各吸引具における頬側の前方帰還部５７を口腔２２内の位置で切断し、その切断端５７ａを気密に封止したものである。口腔２２外へ延びる吸引連結部５８が一方のみとなるから、患者の装着感を軽減することができる。切断する前方帰還部５７は、舌側のものでもよい。

図１１に示す吸引具５１の変形例は、切断端５７ａの封止部から突出する保形

用の線材５３により略Ｕ字形の屈曲部５９を形成して、他方の前方帰還部５７の前端部に掛け渡したもので、この屈曲部５９を下顎歯の何れかに係止する。これにより、吸引具５１の係止位置が、係止部５４と屈曲部５９による２カ所となり、口腔内への装着をより確実に行うことができる。この場合も切断する前方帰還部５７は、舌側のものでもよい。また、屈曲部５９は保形用の線材ではなく、単に封止部の先端に固着した線材であってもよい。

図１２に示す吸引具６１は、略平行な湾曲連続部６６間に管軸部材７０を差し渡したもので、該管軸部材７０に図１３に示すネット７１の柄７２を挿し込んで固定することにより、該ネット７１により咽喉部を塞ぐことができる。これにより、治療中に誤って口腔２２内に外れ落ちた治療小器具等を飲み込んでしまうことがない。ネット７１の代わりに通気性を有するスクリーンであってもよい。

図１４に示す吸引具８１は、頬側若しくは舌側となる奥行き部８５と前方帰還部８７間に、テープ状の隔離部材９０を張設したものである。この隔離部材９０を設けることにより、治療を施こす歯牙部分に舌や頬粘膜の口腔内器官が近づいて、治療器具等に触れてしまうのを防止できる。従って、歯科医師が治療に集中できるとともに、患者も治療の邪魔にならない位置に舌を移動させる等、気を使って緊張することもない。また、図１５に示すように、ネット状の隔離部材９１を張設してもよい。テープやネット等の伸縮他の隔離部材を用いることにより、吸引具８１の装着時に隔離部材を緊張させることができ、確実に舌や頬粘膜の口腔内器官を治療部位から隔離することができる。

図１６に示す吸引具１０１は、上記各吸引具における頬側の前方帰還部９７を口腔２２内の位置で切断し、その端部に屈曲部１０７ａを形成して下顎歯の何れかに跨がせるとともに、舌側の前方帰還部１０７に吸引可能に連結したものである。口腔２２外へ延びる吸引連結部１０８が一方のみとなるから、患者の装着感を軽減することができる。また、屈曲部１０７ａを下顎歯の何れかに跨がせているから、吸引具１０１の係止位置が、係止部１０４と屈曲部１０７ａによる２カ

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

所となり、口腔内への装着をより確実に行うことができる。この場合、切断する前方帰還部１０７は、舌側のものでもよい。係止部１０４は図５及び図６に示したように、保形用の線材を露出した形態であってもよい。

尚、図１７は上記吸引具１（４１）の口腔２２内への他の装着例を示し、口腔奥部において前方帰還部７（４７）を交差させて装着したものである。

また、上記各吸引具５１、６１、８１及び９１も、吸引具１、３１、４１と同様天地を逆にした形態で、口腔内へ装着できる。

また、上記したチューブ３やパイプ４２の素材である高分子樹脂材料としては、ポリ塩化ビニル樹脂、シリコン樹脂、ラテックスゴム、ポリアミド樹脂、ポリアミドエラストマー、ポリエステル樹脂、ポリエステルエラストマー、ポリプロピレン樹脂、ポリプロピレンエラストマー、ポリエチレン樹脂、ＦＥＰ（四フッ化エチレン六フッ化プロピレン共重合樹脂）、ＰＦＡ（パーフルオロアルコキシ樹脂）、ＰＴＦＥ（ポリ四フッ化エチレン樹脂）、ＰＶＤＦ（ポリビニルフルオロライド）等のフッ素樹脂、形状記憶樹脂、ＡＢＳ樹脂、ポリカーボネート樹脂、ポリアセタール樹脂、ポリアクリレート樹脂等を用いることができる。

また、これらの材料を用いて発泡成形にすることで、より違和感を軽減することもできる。

そして、保形性を有する線材を併用する場合は、柔軟性に優れた樹脂材料が好ましい。比較的硬質な樹脂材料により、保形性及び可撓性を有するパイプ材を形成してもよい。これらのチューブやパイプ材を形成する素材は多層構造であったり、２種類以上の素材を組み合わせたものでもよく、内部に金属やエンプラなどによる編組若しくは補強線、コイル線等の補強材が設けられていても良い。

尚、本唾液吸引具に適用可能な高分子樹脂材料は、上記に例示した樹脂材料に限定されるものではない。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

産業上の利用可能性

本発明の歯科医療用唾液吸引具によれば、係止部を上顎歯若しくは下顎歯の何れかに係止するとともに、開口した口腔内に装着することにより、該係止部から略平行に延びる奥行き部が上顎堤若しくは下顎堤の両側に沿い、口腔外部に向かって略平行に延びる前方帰還部が下顎堤若しくは上顎堤の両側に沿う。そして、前方帰還部の前端から口腔外部に延びる吸引用連結部に吸引チューブを連結して吸引することにより、少なくとも奥行き部若しくは前方帰還部に設けた複数の唾液吸引孔から、歯科治療中に耳下腺、顎下腺及び舌下腺から生じる唾液や、治療中に生じる口腔内の汚水を確実に吸引排出できる。また、奥行き部及び前方帰還部により、舌や頬粒膜の口腔内器官が治療を施こす歯牙部分に近づくのを妨げたり、治療器具等に触れないように隔離できるから、治療の安全性を確保できる。さらに、保形用の線材に保形される一本のチューブを用いて係止部及び全体形状を形成したことにより、口腔内への装着及び取り外しが容易となるとともに、上顎歯の何れかに係止部を係止し、開口状態の上下の歯牙若しくは顎堤で保持して安定させることができるから、アシスタントを必要とすることなく歯科医師１人で治療が可能となるとともに、天地を逆にしても装着できる等の効果を有する。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

請求の範囲

1．保形用の線材により保形される一本のチューブを用いて、

該チューブの略中央部に上顎歯若しくは下顎歯の何れかに係止する略U字形の係止部と、

該係止部から上顎堤若しくは下顎堤の両側に沿わせて口腔奥部に向かって略平行に延びる奥行き部と、

該奥行き部から前記下顎堤若しくは上顎堤の両側に沿って口腔の外方に向かって略平行に延びる前方帰還部と、

該前方帰還部の前端から口腔外部に延びる吸引用連結部と、

を形成するとともに、

少なくとも前記奥行き部若しくは前方帰還部に複数の唾液吸引孔を設けたことを特徴とする歯科医療用唾液吸引具。

2．前記保形用の線材を前記奥行き部から前方帰還部に至る部位においてコイル状に巻回したことを特徴とする請求項1に記載の歯科医療用唾液吸引具。

3．前記保形用の線材に弾力性を有する線材を用いて、可撓性を付与したことを特徴とする請求項1及び請求項2に記載の歯科医療用唾液吸引具。

4．前記保形用の線材に可撓性若しくは弾力性が異なる部位を設けたことを特徴とする請求項1乃至請求項3に記載の歯科医療用唾液吸引具。

5．前記保形用の線材に金属線を用いて熱処理により可撓性若しくは弾力性を付与したことを特徴とする請求項1乃至請求項4に記載の歯科医療用唾液吸引具。

6．前記保形用の線材にステンレス合金線材を用いたことを特徴とする請求項1乃至請求項5に記載の歯科医療用唾液吸引具。

7．前記保形用の線材にニッケル・チタン合金線材を用いたことを特徴とする請求項1乃至請求項5に記載の歯科医療用唾液吸引具。

8．前記係止部位で前記チューブを切断して前記略U字形に屈曲させた保形用の線材を露出させるとともに、前記チューブの切断端部を気密に封止したことを特徴とする請求項1乃至請求項7に記載の歯科医療用唾液吸引具。

9．前記保形用の線材の露出部を軟質部材により被覆したことを特徴とする請求項8に記載の歯科医療用唾液吸引具。

10．可撓性及び保形性を有するパイプ材を用いて、

上顎歯若しくは下顎歯の何れかに係止する略U字形の係止部と、

該係止部から上顎堤若しくは下顎堤の両側に沿わせて口腔奥部に向かって略平行に延びる奥行き部と、

該奥行き部から前記下顎堤若しくは上顎堤の両側に沿って口腔の外方に向かって略平行に延びる前方帰還部と、

該前方帰還部の前端に吸引用連結部とを形成するとともに、

少なくとも前記奥行き部若しくは前方帰還部に複数の唾液吸引孔を設けたことを特徴とする歯料医療用唾液吸引具。

11．前記前方帰還部の何れか一方の前端を気密に封止して、何れか他方の前端に前記吸引用連結部を形成したことを特徴とする請求項1乃至請求項10の何れかに記載の歯科医療用唾液吸引具。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

１２．前記前方帰還部の何れか一方の前端を気密に封止するとともに、該封止部から突出させた線材により略Ｕ字形の屈曲部を形成して、何れか他方の前記前方帰還部の前端部に掛け渡すとともに、該前端部に前記吸引用連結部を形成したことを特徴とする請求項１乃至請求項１１に記載の歯科医療用唾液吸引具。

１３．前記前方帰還部の何れか一方の前端部に屈曲部を形成して、前記上顎歯若しくは下顎歯の何れかを跨がせるとともに、前記前方帰還部の何れか他方に吸引可能に連結したことを特徴とする請求項１乃至請求項１０の何れかに記載の歯科医療用唾液吸引具。

１４．前記前方帰還部若しくは奥行き部の何れか一方に咽喉部を塞ぐネット若しくはスクリーンを設けたことを特徴とする請求項１乃至請求項１３に記載の歯科医療用唾液吸引具。

１５．片側若しくは両側の前記奥行き部と前方帰還部間に口腔内器官を隔離する隔離部材を差し渡したことを特徴とする請求項１乃至請求項１４に記載の歯科医療用唾液吸引具。

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

(54) Title: INTRAORAL DENTAL SUCTION AND ISOLATION SYSTEM

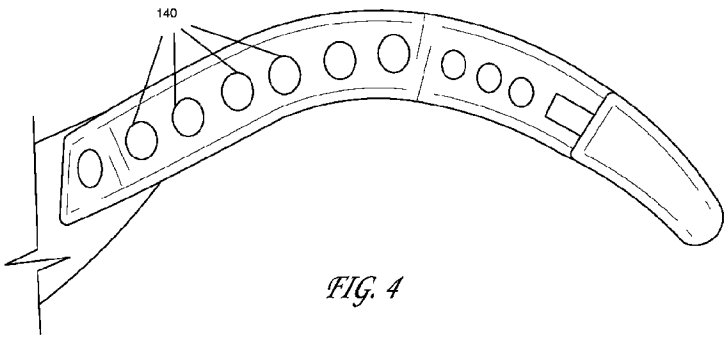

FIG. 4

(57) Abstract: A dental mouthpiece is provided that may be attached to a high-suction dental adapter for the purpose of assisting the dental staff during dental procedures through chair-side, hands-free suction, and isolation. Such a mouthpiece may comprise a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded in one piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

WO 2015/088577 A1

Ascentcare Dental Products v. Solmetex - IPR2025-01175 Solmetex Ex. 2025

INTRAORAL DENTAL SUCTION AND ISOLATION SYSTEM

BACKGROUND OF THE INVENTION

1. Field of the Invention

The present invention generally relates to the field of dental mouthpieces. More specifically, the present invention relates to intraoral dental suction and isolation mouthpieces.

2. Description of Related Art

Various mouthpieces are currently used by dental health professionals, dental hygienists, and dental assistants in the field of dentistry. In the past, a dental patient has been treated by a traditional two-person team that comprises a dental professional and a dental assistant. Further, dental treatment may be provided by the team using many different types of dental equipment and materials. Such dental equipment and materials may include such items as an intraoral mirror, a bite block, a slow speed suction ejector, a high speed suction ejector, gauzes, cotton rolls, and dry angles. Each item of dental equipment may be used for different purposes, though some may be used in combination for some types of dental services. As such, a dental professional seeking to provide such dental services may need to use multiple items of such dental equipment. An important role of the dental assistant is therefore to assist the dental professional in coordinating the use of these multiple items of different equipment and materials.

There is, therefore, a need in the art for improved systems and methods of providing dental services in a more efficient, comfortable, and safe manner to the dental patient.

SUMMARY OF THE CLAIMED INVENTION

Embodiments of the present invention may include a mouthpiece that may be attached to a high-suction dental adapter for the purpose of assisting the dental staff during dental procedures through chair-side, hands-free suction, and isolation. Such a mouthpiece may comprise a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded in one piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

The main body portion may comprise an enclosed pocket made up of an anterior wall, a posterior wall, and a side wall in between the anterior and posterior walls. The side wall may be perforated with a plurality of perforations. Such perforations may constitute a mesh. Additional perforations may be located on the anterior and posterior walls. The main body portion may further include a slit along a longitudinal, central axis on the anterior wall. Such openings (*e.g.*, perforations and slit) allow for suction of air, fluids, and small debris from the patient's mouth, through the openings into the interior portion, and into the suction connector portion towards a suction source. Because the mouthpiece is made of a flexible and resilient material (*e.g.*, silicone), the mouthpiece may be bent when placed in a patient's mouth to conform to the shape of the mouth. When properly positioned, the suction connector portion may protrude from one side of the patient's mouth, while the main body lies against the back of the patient's mouth, and the cheek retractor presses against the patient's cheek on the opposite side of the patient's mouth.

The main body may further include an protruding bridge structure on the interior surface of the posterior wall. Such a bridge structure may protrude from the interior surface in a wave shape with crests and troughs. The crests provide a plurality of contact points with the anterior wall to keep the anterior wall separated

from the posterior wall during suction. Meanwhile, the troughs provide gaps that allow for suction of air, fluids, and small debris through the bridge structure.

BRIEF DESCRIPTION OF THE FIGURES

FIG. 1A is a perspective view of an exemplary mouthpiece with a detachable mouth prop.

exemplary mouthpiece.

FIG. 7B is a cross-sectional view of the exemplary cheek retractor portion of FIG. 7A.

DETAILED DESCRIPTION

Embodiments of the present invention provide for a mouthpiece comprising a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded as one-piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

FIGs. 1A-E are different views of an exemplary mouthpiece with an attachable mouth prop 160, while FIGs. 2A-E are different views of the exemplary mouthpiece of FIG. 1A where the attachable mouth prop 160 has been detached. Such a mouthpiece may include a main body portion 110, a suction connector portion 120, and a cheek retractor portion 130.

The main body portion 110 may include mesh or perforations140, a stability bar 150, an open slit 170, and an internal bridge 180. The main body potion 110 may connect to a suction connector portion 120 on one end and a cheek retractor portion 130 at the other end. Such a cheek retractor portion 130 may be configured to press against and retract a patient's cheek away from the patient's teeth. When placed in a patient's mouth, the suction connector portion 120 may protrude from one side of the patient's mouth, while the main body portion 110 lies against the back of the patient's mouth, and the cheek retractor portion 130 retracts the patient's cheek on the opposite side of the patient's mouth. The flexibility of the material used to form the mouthpiece allows for some bending when placed in the patient's mouth. The material is, however, resilient enough that the cheek retractor portion presses against the inside of the patient's cheek with such pressure being sufficient to move the cheek away from the patient's teeth.

An exemplary main body portion 110, when placed in a mouth, may include an anterior wall facing the front of the mouth (*e.g.*, the side with slit 170) and a posterior

wall facing the back of the mouth. The two walls may connect at a superior wall and an inferior wall forming a body that is at least partially enclosed.

Superior may be used herein to refer to the side that rests against a roof of a patient's mouth when placed therein, and inferior may be used to refer to the side that rests against the floor of the patient's mouth. The superior and inferior sides may be formed identically, which may allow for the mouthpiece to change orientation such that the superior side may appear as the inferior side and vice versa, in the new orientation. When in use, the respective sides of the main body portion 110 may serve to protect and separate the top of the mouth and the bottom of the mouth/tongue. In addition, the main body portion 110 may also serve to protect the back of the mouth (*e.g.*, throat and airway) from falling debris.

Much of the main body portion 110 of the mouthpiece may be shaped as a straight-line arrowhead or shield whose base generally conforms to the intraoral shape of a patient's mouth. Differently-sized mouthpieces may be provided for differently-sized mouths of adults and children. Part of the base side of the arrowhead may be formed with thicker walls than the rest of the main body. Such thickening may provide additional stability.

In addition, the main body portion 110 of the mouthpiece may include a plurality of holes 140 distributed along the superior and inferior sides of the anterior and posterior walls to assist in suctioning of water, saliva and debris from the oral cavity. In some embodiments, a set of holes may also form a mesh along the walls of the superior and inferior edges. FIG. 4 is a close-up view of an exemplary mesh wall in an exemplary mouthpiece.

At the narrow end of the arrowhead that connects to the cheek retractor portion 130, the main body portion 110 may include a rectangular portion. Narrower than the base of the arrowhead, the rectangle may additionally include a reinforcing bar (or stability bar) 150 (described in further detail below) and may be at least partially crossed by a slit 170 (described in further detail below) into the interior of the pocket of the main body portion 110.

Stability bar 150 may be a protrusion or otherwise a thickened area that reinforces the stability of the rectangular portion and assist in shaping this region to

the intraoral posterior shape of a patient's mouth. FIG. 6A is a close-up view of an exemplary stability bar 150 of an exemplary mouthpiece. FIG. 6B is a cross-sectional view of the exemplary reinforcing bar in the cheek retractor connector portion of FIG. 6A.

In some embodiments, the internal, rectangular-shaped reinforcing or stability bar 150 may be located distally to the internal wavelike bridge structure 180 and attached to both the interior side of the posterior surface of the main body and the rectangular portion. Such a stability bar 150 may be located in the area where a positioned mouthpiece begins to wrap from the lingual side of the most posterior mandibular tooth, around the distal side of the most posterior tooth, and to anterior side of the most posterior mandibular tooth, thereby assisting in shaping the mouthpiece to the general intraoral shape of a patient's mouth.

Various embodiments of the mouthpiece may further include a longitudinal, open slit 170 extending over approximately two-thirds of the main body on the anterior surface. Running along the center of the main body across the rectangle and most of the arrowhead, such a slit 170 may assist in capture and suction of water, saliva and debris, as well as assisting in cleaning and maintenance.

Additionally, the main body of the mouthpiece may include a bridge structure 180 on an interior surface to ensure that the anterior and posterior surfaces remain separated during suction. FIG. 1E is a cross-sectional view of the mouthpiece in which the bridge structure 180 is illustrated. FIG. 5 is a close-up view of the bridge structure 180 without the surrounding walls of the main body portion. Such a bridge structure 180 may be formed as an wave-like protrusion that generally corresponds to the distance between the anterior and posterior walls extending substantially (*e.g.*, within 1 mm) the full distance at its crest and substantially flush to the surface at its trough. In some embodiments, the bridge structure 180 may be centrally-located in the main body portion 110 of the mouthpiece. The gaps (or troughs) between the waves of the bridge structure 180 assist in the suction-driven transfer of water and saliva to the suction connector portion 120 and ultimately, into a central suction vacuum. In some embodiments, the bridge structure 180 may follow the shape of a logo (e.g., an arrowhead or shield).

The suction connector portion 120 may be oval-shaped and also attached to the main body portion 110. The suction connector portion 120 may be formed with thicker walls than the main body portion 110 and configured to attach to a high-suction vacuum adapter and to assist in transferring water, saliva, and debris from the oral cavity to the external adapter for removal. The suction connector portion 120 may also include an internal stop to assist in sliding the mouthpiece onto the adapter to a desired depth. The suction connector portion 120 may additionally have an external, concave, notched region 210 that corresponds to a removable strap such that when the strap is in place, the external walls of the strap and the rest of the connector portion may be flush.

The cheek retractor portion 130 is illustrated as a hammerhead distal region, which may be attached to the main body portion 110. FIG. 7A is a close-up view of an exemplary cheek retractor portion 130 in an exemplary mouthpiece. FIG. 7B is a cross-sectional view of the exemplary cheek retractor portion 130 of FIG. 7A.

The mouthpiece may be used with a mouth prop 160, as illustrated in FIGs. 1 (with a mouth prop 160) and FIGs. 2 (illustrated without the mouth prop 160). FIGs. 3A-E provide different close-up views of an exemplary mouth prop 160. The removable strap 310 may be attached to mouth prop 160, which may be used to prop open a patient's mouth and teeth. In this regard, the suction connector portion 120 may additionally have an external plug 220 (FIG. 2C) protruding from the posterior side of the suction connector portion 120. Such a plug 220 may correspond to and serve to connect with an opening in the mouth prop 160. The mouth prop 160 may be reinforced by the presence of the plug 220 in the opening, thereby resulting in a more crush-resistant, nearly incompressible, and stable mouth prop 160. In some embodiments, the suction connector portion 120 may further have a cutout 230 (*e.g.*, which may be shaped as a logo) providing extra interlocking with a corresponding protrusion (*e.g.*, which may also be shaped as a logo) on an external high-suction vacuum adapter.

The mouth prop 160 may be made of thickened silicone material injection molded in a single piece with an elastic strap corresponding to the circumference of the suction connector portion. The mouth prop 160 has an internal, rectangular-

shaped female slot designed to fit snugly with the external, rectangular-shaped male plug 220 of the suction connector portion 120 of the mouthpiece. Mouth props may be made in different sizes for differently sized mouths. Because the mouth prop and mouthpiece are detachable from each other, different sizes of each may be mixed and matched as needed for a particular patient's mouth.

The mouthpiece as described herein may be used with a one-piece, autoclavable, high-suction vacuum adapter. Such a high-suction vacuum body adapter may be made of a single homogenous material. Having a single lever design, such a vacuum adapter may function in the same manner as all the current high-suction vacuum evacuators and saliva ejectors in controlling the removal of water, saliva, and debris from the oral cavity to the outside vacuum source. The single lever may be designed to control the removal of water, saliva, and debris from the at least partially enclosed so main body through a single, large evacuation conduit within the suction connector portion.

While various embodiments have been described above, it should be understood that they have been presented by way of example only, and not limitation. The descriptions are not intended to limit the scope of the invention to the particular forms set forth herein. Thus, the breadth and scope of a preferred embodiment should not be limited by any of the above-described exemplary embodiments. It should be understood that the above description is illustrative and not restrictive. To the contrary, the present descriptions are intended to cover such alternatives, modifications, and equivalents as may be included within the spirit and scope of the invention as defined by the appended claims and otherwise appreciated by one of ordinary skill in the art. The scope of the invention should, therefore, be determined not with reference to the above description, but instead should be determined with reference to the appended claims along with their full scope of equivalents.

CLAIMS

WHAT IS CLAIMED IS:

1. A dental mouthpiece composed of a material, the dental mouthpiece comprising:

a main body portion comprising a defined pocket having an anterior wall, a posterior wall, and a side wall in between the anterior wall and the posterior wall, wherein the anterior wall, the posterior wall, and the side wall define an interior portion of the defined pocket;

a cheek retractor portion configured to press against a cheek of a patient when placed in a mouth of the patient, wherein resilience of the material causes the cheek retractor portion to retract a cheek of the patient away from the teeth of the patient; and

a suction connector portion for connecting the interior portion of the main body to a vacuum suction source.

2. The mouthpiece of claim 1, wherein the side wall includes a plurality of perforations.

3. The mouthpiece of claim 1, wherein the anterior wall and the posterior wall each includes a plurality of perforations.

4. The mouthpiece of claim 1, wherein the anterior wall further includes a slit along a central axis.

5. The mouthpiece of claim 1, further comprising a stability bar protruding from an interior surface of the posterior wall, wherein a thickness of the stability bar increases resilience of the cheek retractor portion during bending.

6. The mouthpiece of claim 1, wherein the main body portion, the cheek retractor portion, and the suction connector portion are formed by injection-molded as one

piece.

7. The mouthpiece of claim 1, wherein the material used in the injection-molding is a flexible, translucent, high heat-resistant, autoclavable silicone-based material.

8. The mouthpiece of claim 1, further comprising a bridge structure protruding from an interior surface of the posterior wall, the protruding bridge structure comprising a plurality of spaced contact points that keep the anterior wall separated from the posterior wall during suction.

9. The mouthpiece of claim 8, wherein the bridge structure protrudes from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.

10. The mouthpiece of claim 9, wherein troughs of the wave shape are configured to allow suction through the bridge structure.

11. The mouthpiece of claim 1, wherein the suction connector portion comprises an internal stop to assist in positioning of a vacuum suction source or a vacuum adaptor.

12. The mouthpiece of claim 1, further comprising a detachable mouth prop.

13. The mouthpiece of claim 12, wherein the detachable mouth prop comprises a strap configured to fit around the suction connector portion, wherein an external surface of the suction connector portion comprises a notch region corresponding to the strap, and wherein an external surface of the strap is substantially flush with a remaining external surface of the suction connector portion when the strap sits in the notch region.

14. The mouthpiece of claim 13, wherein the strap is injection-molded in a single piece with the mouth prop.

15. The mouthpiece of claim 1, wherein the suction connector portion further comprises an external plug protrusion corresponding to an opening in a mouth prop associated with the strap.

16. The mouthpiece of claim 15, wherein the plug protrusion fits into the opening to provide additional crush-resistance and decreased compressibility during biting by the patient.

17. The mouthpiece of claim 1, wherein the suction connector portion comprises a cutout corresponding to a protrusion on a vacuum adapter for an interlocking fit.

18. The mouthpiece of claim 1, wherein the anterior wall and the posterior wall have different thicknesses.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111
If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371
If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office
If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE *3* MONTHS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on *10/21/2015*.

☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

2a)☐ This action is **FINAL**. 2b)☒ This action is non-final.

3)☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.

4)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims*

5)☒ Claim(s) *1-20* is/are pending in the application.

5a) Of the above claim(s) _____ is/are withdrawn from consideration.

6)☐ Claim(s) _____ is/are allowed.

7)☒ Claim(s) *1-20* is/are rejected.

8)☐ Claim(s) _____ is/are objected to.

9)☐ Claim(s) _____ are subject to restriction and/or election requirement.

* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.

Application Papers

10)☒ The specification is objected to by the Examiner.

11)☒ The drawing(s) filed on *03/27/2014* is/are: a)☒ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

a)☐ All b)☐ Some** c)☐ None of the:

1.☐ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____.

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

** See the attached detailed Office action for a list of the certified copies not received.

4) ☐ Other: _____.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

DETAILED ACTION

Notice of Pre-AIA or AIA Status

1. The present application is being examined under the pre-AIA first to invent provisions.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The abstract of the disclosure is objected to because it currently contains legal phraseologies, e.g. “comprising”. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. **Claim 1-4, 6-9, and 14-20, are rejected under pre-AIA 35 U.S.C. 102(b) as anticipated by Rhoades (4,802,851).**

Regarding claim 1, Rhoades discloses a dental mouthpiece 50 comprising a main body portion 50 comprising a defined pocket (i.e. interior of 50) having an anterior wall having an exterior edge, a posterior wall having an exterior edge that corresponds to the exterior edge of the anterior wall; and a side wall connecting the corresponding exterior edges of the anterior

and posterior walls. Note the slit/channel (best pointed to by reference numberal 58 in Fig. 4) formed on anterior wall. Alternatively, the device has scallops, wherein the troughs between the scallops are considered to be the slits as claimed.

As to claims 2-3, the bulb 144 is considered to be equivalent to the claimed stability bar aligned with the slit on the anterior wall. As to claim 4, note that the claim language "by injection-molded" is a product-by-process recitation in a product claim. Even though product-by-process recitation is limited by and defined by the recited process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe,* 777 F.2d 695, 227 USPQ 964 (Fed. Cir. 1985). In this case, Rhoades discloses the end product and the structures thereof as claimed as detailed above; the device shown comprised of the main body, cheek retractor portion, and suction connection portion, all of which are essential portions forming the device as one piece. The burden is shifted to applicant to show an unobvious difference between Rhoades' device and the invention that would have resulted from the injection molding process.

As to claim 6, the scallops 56 formed thereon the anterior and posterior walls make the walls having different thicknesses (Fig. 1). As to claim 7, note that the slit defined either by the side channel 58 or the trough between scallops have to thinner/weaker thickness and therefore capable of allowing portions of the anteior wall to be pulled open to expose the interior of the pocket. As to claims 8-9, the mouthpiece 50 further comprises a cheek retractor portion, i.e. side scallops 56, capable of pressing against a cheek of a patient when placed in a mouth of the patient. Note that Rhoades discloses the mouthpiece 50 being formed of resilient elastomeric material (column 6 lines 21-27); therefore there is a resilience of such material such that the

cheek retractor portion (side scallops 56) having a surface that applies pressure when bent, wherein it is inherent that the pressure is based on resilience of a material that forms the cheek retractor portion 56.

As to claim 14, note a suction connector portion 62 capable of connecting the interior portion of the main body to a vacuum suction source (Fig. 1; column 3 lines 35-37, 48-50). As to claim 15-18, note the detachable mouth prop 68 having a mouth prop 68 and a strap portion 73 comprising an opening 70 corresponding to a plug 62 connected to the main body 50 (Fig. 1).

As to claims 19-20, Rhoades discloses the invention substantially as claimed as detailed above with respect to claim 1 and 6. Note that the scallops 56 formed thereon the anterior and posterior walls make the walls having different thicknesses (Fig. 1).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

7. **Claims 10-13 are rejected under pre-AIA 35 U.S.C. 103(a) as being unpatentable over Rhoades in view of Black (2009/0274991).** Rhoades discloses the invention substantially as claimed except for wave-shaped bridge structure. Black et al. discloses an intraoral suction device comprising a wave-shaped bridge structure 48c having formed therein the interior wall of the device 40 (Fig. 3B; paragraph 80). Note that the troughs between bridges/transverse walls 48c allow for communication with the suction source. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify

Rhoades by forming such bridge/transverse walls therein the interior of the intraoral device as taught by Black et al. in order to reinforce the device while still allowing effective suction.

8. **Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rhoades in view of Sclafani (5,890,899).** Rhoades discloses the invention substantially as claimed including the material used to form the device being flexible, translucent, high heat-resistant, as evidenced by disclosure of sterilization for reuse (column 5 lines 20-21; column 6 lines 21-27). However, Rhoades fails to disclose the material being silicone-base. Sclafani discloses a dental suction isolator device formed of silicone-based material (Figs. 1-9, column 8 lines 10-15). It would have been obvious to one having ordinary skill in the art at the time the invention was made to make Rhoades' device from silicone-based material as taught by Sclafani to be a known alternative suitable known material while yielding the same and/or predictable results.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Hao D. Mai whose telephone number is (571) 270-3002. The examiner can normally be reached on Monday-Friday 8:00AM – 4:30PM. If attempts to reach the examiner by telephone are unsuccessful, please contact the examiner's supervisor, Cris Rodriguez, at (571) 272-4964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private

PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Examiner Signature	/Hao D Mai/ (11/16/2015)	Date Considered	11/16/2015

*EXAMINER: Initial if reference considered, whether or not citation is in conformance with MPEP 609; Draw line through citation if not in conformance and not considered. Include copy of this form with next communication to applicant. [1]Applicant's unique citation designation number (optional). [2]See Kinds Codes of USPTO Patent Documents at www.uspto.gov or MPEP 901.04. [3]Enter Office that issued the document, by the two-letter code (WIPO Standard ST.3). [4]For Japanese patent documents, the indication of the year of reign of the Emperor must precede the serial number of the patent document. [5]Kind of document by the appropriate symbols as indicated on the document under WIPO Standard ST. 16 if possible. [6]Applicant is to place a check mark here if English language translation is attached.

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 2 hours to complete including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SENT FEES OR COMPLETED FORMS TO THIS ADDRESS.

SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450

If you need assistance in completing the form, call 1-800-PTO-9199 (1-800-786-9199) and select option 2.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Under 37 C.F.R. § 1.56, and 1.97-1.98

SIR:

Pursuant to the provisions of 37 C.F.R. §§ 1.56 and 1.97-98 of the Rules of Practice in Patent Cases, enclosed herewith is form PTO-SB-08, listing several references. The Examiner is requested to make these references of official record in the application.

The references cited may be material to examination of the application and are submitted in compliance with the Applicants' duty of disclosure as defined by 37 C.F.R. § 1.56.

Applicants hereby declare, pursuant to 37 C.F.R. §1.97(e)(2), that no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application and, to the knowledge of the person signing the certification after having made a reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 C.F.R. §1.56(c) more than three months prior to the filing of the information disclosure statement.

No representation is made or intended as to the completeness of this list, nor is the inclusion of any reference on this list an admission that it is prior art or pertinent to this application.

The Commissioner is hereby authorized to charge any necessary fee to Account Number 50-0612.

Respectfully submitted,
LEWIS ROCA ROTHGERBER CHRISTIE LLP

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT
Under 37 C.F.R. § 1.56, and 1.97-1.98

SIR:

Pursuant to the provisions of 37 C.F.R. §§ 1.56 and 1.97-98 of the Rules of Practice in Patent Cases, enclosed herewith is form PTO-SB-08, listing several references. The Examiner is requested to make these references of official record in the application.

The references cited may be material to examination of the application and are submitted in compliance with the Applicants' duty of disclosure as defined by 37 C.F.R. § 1.56.

Applicants hereby declare, pursuant to 37 C.F.R. §1.97(e)(1), that each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement.

No representation is made or intended as to the completeness of this list, nor is the inclusion of any reference on this list an admission that it is prior art or pertinent to this application.

The Commissioner is hereby authorized to charge any necessary fee to Account Number 50-0612.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

PTO/AIA/96 (08-12)
Approved for use through 01/31/2013. OMB 0651-0031
U.S. Patent and Trademark Office; U.S. DEPARTMENT OF COMMERCE
Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

STATEMENT UNDER 37 CFR 3.73(c)

Applicant/Patent Owner: Incept, Inc.

Application No./Patent No.: 14/228,057 Filed/Issue Date: March 27, 2014

Titled: Intraoral Device with Slit

Incept, Inc., a corporation

(Name of Assignee) (Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that, for the patent application/patent identified above, it is (choose **one** of options 1, 2, 3 or 4 below):

1. ☑ The assignee of the entire right, title, and interest.

2. ☐ An assignee of less than the entire right, title, and interest (check applicable box):

   ☐ The extent (by percentage) of its ownership interest is _____%. Additional Statement(s) by the owners holding the balance of the interest must be submitted to account for 100% of the ownership interest.

   ☐ There are unspecified percentages of ownership. The other parties, including inventors, who together own the entire right, title and interest are:

   Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

3. ☐ The assignee of an undivided interest in the entirety (a complete assignment from one of the joint inventors was made). The other parties, including inventors, who together own the entire right, title, and interest are:

   Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

4. ☐ The recipient, via a court proceeding or the like (*e.g.*, bankruptcy, probate), of an undivided interest in the entirety (a complete transfer of ownership interest was made). The certified document(s) showing the transfer is attached.

The interest identified in option 1, 2 or 3 above (not option 4) is evidenced by either (choose **one** of options A or B below):

A. ☑ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel 032545, Frame 0891, or for which a copy thereof is attached.

B. ☐ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

   1. From: _____ To: _____

      The document was recorded in the United States Patent and Trademark Office at

      Reel _____, Frame _____, or for which a copy thereof is attached.

   2. From: _____ To: _____

      The document was recorded in the United States Patent and Trademark Office at

      Reel _____, Frame _____, or for which a copy thereof is attached.

This collection of information is required by 37 CFR 3.73(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

AMENDMENT

Examiner Mai:

In response to the November 20, 2015 Office Action (*Office Action*), please enter the following amendments to the **specification** and **claims**, which commence on **pages two** and **three**, respectively. The Applicant's **remarks** and **conclusion** appear beginning on **pages seven** and **nine**, respectively.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

IN THE SPECIFICATION

PLEASE AMEND THE ABSTRACT AS FOLLOWS:

A dental mouthpiece is provided that may be attached to a high-suction dental adapter for the purpose of assisting the dental staff during dental procedures through chair-side, hands-free suction, and isolation. Such mouthpiece may ~~comprise~~ include a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded in one piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

Solmetex Ex. 2025
Accentcare Dental Products v. Solmetex - IPR2025-01175

IN THE CLAIMS

PLEASE AMEND THE CLAIMS AS FOLLOWS:

1. (currently amended) A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by:

an anterior wall defined by an exterior edge, the anterior wall comprising a slit along a longitudinal axis of the main body portion, the slit comprising an opening into the interior of the pocket,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, and

a side wall connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall.

2. (original) The mouthpiece of claim 1, wherein the posterior wall further includes a stability bar protruding from an interior surface of the posterior wall and along a longitudinal axis of the main body.

3. (original) The mouthpiece of claim 2, wherein the stability bar is aligned with the slit on the anterior wall.

4. (original) The mouthpiece of claim 1, wherein the main body portion is formed by injection-molding as one piece.

5. (previously presented) The mouthpiece of claim 1, wherein a material used to form the main body portion is a flexible, translucent, high heat-resistant, autoclavable silicone-based material.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

6. (original) The mouthpiece of claim 1, wherein the anterior wall and the posterior wall have different thicknesses.

7. (original) The mouthpiece of claim 1, wherein the slit allows portions of the anterior wall to be pulled open to expose the interior of the pocket.

8. (previously presented) The mouthpiece of claim 1, further comprising a cheek retractor portion connected to the main body portion and having a surface that applies pressure when bent, wherein the pressure is based on resilience of the cheek retractor portion.

9. (previously presented) The mouthpiece of claim 8, wherein the cheek retractor portion comprises an extension of the pocket and wherein the slit extends into the extension of the pocket.

10. (previously presented) The mouthpiece of claim 1, further comprising a bridge structure comprising a plurality of protrusions protruding from an interior surface of the posterior wall, wherein the protrusions do not attach to the anterior wall.

11. (previously presented) The mouthpiece of claim 10, wherein the protruding bridge structure protrusions comprise a plurality of spaced contact points.

12. (previously presented) The mouthpiece of claim 11, wherein the bridge structure protrusions protrude from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.

13. (original) The mouthpiece of claim 12, wherein spaces between the contact points are at troughs of the wave shape.

Solmetex Ex. 2025
Accentcare Dental Products v. Solmetex - IPR2025-01175

14. (previously presented) The mouthpiece of claim 1, further comprising a suction connector portion that connects the interior of the pocket to a vacuum source, wherein activation of the vacuum source provides suction of fluids from the interior of the pocket toward the vacuum source.

15. (original) The mouthpiece of claim 1, further comprising a detachable mouth prop.

16. (original) The mouthpiece of claim 15, wherein the detachable mouth prop comprises a bite block portion and a strap portion.

17. (original) The mouthpiece of claim 16, wherein the bite block portion and strap portion are injection-molded in one piece.

18. (original) The mouthpiece of claim 15, wherein the bite block portion comprises an opening corresponding to a plug connected to the main body.

19. (currently amended) A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by:

an anterior wall defined by an exterior edge, the anterior wall comprising a base portion at one end of the anterior wall, wherein ~~portions of~~ the anterior wall [[are]] is thicker at the base portion than ~~other portions of the anterior wall~~ at another portion at another end of the anterior wall,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, and

a side wall connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

20. (currently amended) A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by:

an anterior wall defined by an exterior edge,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, the posterior wall comprising a base portion at one end of the posterior wall, wherein ~~portions of~~ the posterior wall [[are]] is thicker at the base portion than ~~other portions of the posterior wall~~ at another portion at another end of the posterior wall, and

a side wall connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall.

REMARKS

Amendment to the Specification

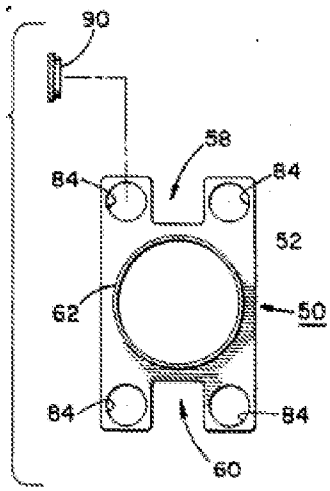

The Examiner objects to the user of the term "comprise" in the Abstract. *Office Action*, 2. The Applicant has amended the abstract to replay "comprise" with "include." As such, the Applicant submits that the objection to the specification has been overcome.

Rejection under 35 U.S.C. §§ 102, 103

The Examiner stated that claims 1-4, 6-9, and 14-20 are anticipated by U.S. patent number 4,802,851 (hereinafter *Rhoades*). *Office Action*, 2. Claimsd 10-13 are rejected over *Rhoades* in view of U.S. patent application number 2009/0274991 (hereinafter *Black*). *Office Action*, 4. Claim 5 is rejected over *Rhoades* in view of U.S. patent number 5,890,899 (hereinafter *Sclafani*). *Office Action*, 5. The Applicant respectfully traverses the rejections.

"Because the hallmark of anticipation is prior invention, the prior art reference—in order to anticipate under 35 U.S.C. § 102—must not only disclose all elements of the claim within the four corners of the document, but must also disclose those elements 'arranged as in the claim.'" *Net MoneyIN, Inc. v. VeriSign, Inc.*, 545 F.3d 1359, 1370 (Fed. Cir. 2008) (citations omitted). To support a conclusion that the claim would have been obvious requires that "**all** the claimed elements were known in the prior art and that one skilled in the art could have combined the elements as claimed." MPEP 2143.02 (citing *KSR v. Teleflex*, 127 S.Ct. 1727, 1739 (2007)).

Rhoades—individually or in any combination with *Black* or *Sclafani*—fails to teach at least the claimed 'slit comprising an opening into the interior of the pocket' or a respective wall comprising a base portion at one end of the respective wall, wherein the respective wall is thicker at the base portion than at another portion at another end of the respective wall.

In contrast, the "tooth channel" (*e.g.*, channel 58) disclosed in *Rhoades* fails to teach any opening to the interior of a pocket. *Rhoades,* FIG. 4 (provided below); 3:29-33. Likewise, the referenced "troughs between the scallops" are not openings into the interior of the pocket as claimed. That is because, as illustrated by *Rhoades*' FIG. 4, the tooth channels are not connected to the interior of *Rhoades*' mouthpiece. Rather, *Rhoades*' troughs are closed off and separate from the mouthpiece interior.

Rhoades therefore fails to disclose all the elements of independent claim 1. *Rhoades* further fails to teach all the elements of independent claims 19 and 20, which recite that the base portion of a respective wall is thicker than another portion of that respective wall. *See e.g.*, *Specification*, [0036] ("Part of the base side of the arrowhead may be formed with thicker walls than the rest of the main body").

Neither *Black* or *Sclafani* cures the failure of *Rhoades* to teach each and every limitation of the independent claims. Both are wholly silent regarding any slit or opening along a longitudinal axis of the main body, as well as wholly silent regarding wall thicknesses at a base portion at one end.

Rhoades—individually or in any combination with *Black* or *Sclafani*—therefore fail to disclose all the elements of the independent claim. For at least the foregoing reasons, the independent claim is patentable. Further, because each of the dependent claims incorporates by reference all the limitations of the independent claim from which it depends, the dependent claims are allowable for at least the same reasons. Accordingly, the Applicant respectfully requests the withdrawal of the § 103 rejections of the claims.

CONCLUSION

The Applicant has evidenced the failure of *Rhoades*—individually or in any combination with *Black* or *Sclafani*—to disclose all the limitations of the independent claim, including at least 'slit comprising an opening into the interior of the pocket' or a respective wall comprising a base portion at one end of the respective wall, wherein the respective wall is thicker at the base portion than at another portion at another end of the respective wall.

Any claim dependent upon the aforementioned independent claim—either directly or via an intermediate dependent claim—is allowable for at least the same reasons as the claim from which it depends.

As all rejections have been overcome, the Applicant contends the present application is in condition for allowance. The Examiner is invited to contact the Applicant's undersigned representative with any questions concerning the present amendment.

Respectfully submitted,
INCEPT, INC.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

DETAILED ACTION

Notice of Pre-AIA or AIA Status

1. The present application is being examined under the pre-AIA first to invent provisions.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. **Claims 1-4, 6-14, and 19-20, are rejected under pre-AIA 35 U.S.C. 103(a) as being unpatentable over Rogers (3,802,081) in view of Ames (2013/0095450).**

Regarding claim 1, Rogers discloses a dental mouthpiece 11 comprising a main body portion (tube 23) comprising a defined pocket (i.e. interior of tube 23). Rogers shows the tube 23 to be cylindrical, and per se lacking an anterior wall defined by an exterior edge, posterior wall defined by an exterior edge, and a side wall connecting the corresponding exterior edges of the anterior and posterior walls. Rogers discloses a slit 25 (Fig. 5) along a longitudinal axis of the main body portion, and the slit 25 comprises an opening into the interior of the pocket.

Ames discloses a dental suction tube 20 which can be cylindrical or square/rectangular (paragraph 23). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Rogers' tube to be square/rectangular such that it would have an anterior wall with an exterior edge, a posterior wall having a corresponding exterior edge, and a side wall connecting the exterior edges of the anterior wall and posterior wall as a well-known suitable cross-sectional shape for such tube as taught by Ames.

As to claims 2-3, note the stability bar 20 protruding from the posterior/upper wall and aligning with the slit (Figs. 4). **As to claim 4**, note that the claim language "by injection-molded" is a product-by-process recitation in a product claim. Even though product-by-process recitation is limited by and defined by the recited process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe,* 777 F.2d 695, 227 USPQ 964 (Fed. Cir. 1985). In this case, Rogers in view of Ames discloses the end product and the structures thereof as claimed as detailed above, wherein the main body is formed as one piece. The burden is shifted to applicant to show an unobvious difference between the cited prior art's device and the invention that would have resulted from the injection molding process.

As to claim 6, Rogers' protrusions 18, 19 and bar 22 formed thereon the upper wall make it having different thickness from the lower wall (Fig. 4). **As to claim 7**, the slit 25 is capable of allowing portions of the anterior wall to be pulled open to expose the interior of the pocket. **As to claim 8**, Rogers discloses a cheek retractor portion 17 capable of retracting cheek and having a surface that is capable of applying pressure when bent based on its resilience. **As to claim 9**, Rogers shows an extension (interior best pointed to by reference numeral 16) of the pocket and the slit extends into said extension (Fig. 4). **As to claim 10**, Rogers discloses a bridge structure 18/19 (Fig. 4) which comprises a plurality of protrusions 18, 19, protruding from an interior surface of the posterior/upper wall and substantially extending a distance between the opposite anterior/lower wall and the posterior/upper wall, wherein the bridge structure 18/19 is not attached to the opposite anterior/lower wall. **As to claims 11-13**, the protruding protrusions 18, 19, comprise a plurality of spaced contact points and are

considered to be in wave shape of which crests of 18, 19, and troughs being non-protrusion portion there between the protrusions**. As to claim 14,** Rogers discloses a suction connector portion 12 connecting the device to a source of vacuum (column 1 line 60-65).

As to claims 19-20. Rogers in view of Ames discloses all the elements substantially as claimed as detailed above with respect to claim 1. Note Rogers disclosing the base portion 16 where tube 23 and 12 connect with each other, therefore forming a thicker anterior and posterior walls than another portion at another end 23 (Figs. 1-4).

4. **Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rogers in view of Ames, as applied to claim 1 as detailed above, and further in view of Sclafani (5,890,899).** Rogers/Ames discloses the invention substantially as claimed except for the main body is of a flexible, translucent, high heat-resistant, autoclavable silicone-based material as recited in claim 5. Sclafani discloses a dental suction isolator device formed of silicone-based material (Figs. 1-9, column 8 lines 10-15). It would have been obvious to one having ordinary skill in the art at the time the invention was made to make Rogers/Ames' device from silicone-based material as taught by Sclafani to be a known alternative suitable known material while yielding the same and/or predictable results.

5. **Claims 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rogers in view of Ames, as applied to claim 1 as detailed above, and further in view of Schubert (4,167,814).**

As to claim 15, Rogers/Ames fails to disclose a detachable mouth prop. Schubert discloses an oral evacuation device 10 having a detachable mouth prop 30. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify

Rogers/Ames by including such mouth prop as taught by Schubert in order to properly prop open the mouth during dental or medical procedures. **As to claims 16-18**, the incorporated Schubert's mouth prop 30 comprises a bite block 30 and strap and/or opening 32 (Figs. 1-3) which is configured to fit around a plug or the suction connector portion (Fig. 1).

Response to Arguments

6. Applicant's arguments with respect to the amended claims have been considered but are moot because the arguments do not apply to any of the references being used in the current rejection.

Regarding the newly recited limitations "the slit comprising an opening into the interior of the pocket" in claim 1, Rogers discloses a slit 25 (Fig. 5) along a longitudinal axis of the main body portion, and the slit 25 comprises an opening into the interior of the pocket. Regarding the newly recited limitation(s) "base portion at one end of the anterior/posterior wall... [that] is thicker at the base portion than at another portion at another end of the anterior/posterior wall" in claims 19-20, Rogers disclosing the base portion 16 where tube 23 and 12 connect with each other, therefore forming a thicker anterior and posterior walls than another portion at another end 23 (Figs. 1-4).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of

this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Hao D. Mai whose telephone number is (571) 270-3002. The examiner can normally be reached on Monday-Friday 8:00AM – 4:30PM. If attempts to reach the examiner by telephone are unsuccessful, please contact the examiner's supervisor, Cris Rodriguez, at (571) 272-4964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT
Under 37 C.F.R. § 1.56 and 1.97-1.98

SIR:

Pursuant to the provisions of 37 C.F.R. §§ 1.56 and 1.97-98 of the Rules of Practice in Patent Cases, enclosed herewith is form PTO-SB-08, listing several references. The Examiner is requested to make these references of official record in the application.

The reference cited may be material to examination of the application and are submitted in compliance with the Applicants' duty of disclosure as defined by 37 C.F.R. § 1.56.

Applicants hereby declare, pursuant to 37 C.F.R. §1.97(e)(2), that no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application and, to the knowledge of the person signing the certification after having made a reasonable inquiry, no item of information contained in the information disclosure statement was

known to any individual designated in 37 C.F.R. §1.56(c) more than three months prior to the filing of the information disclosure statement.

No representation is made or intended as to the completeness of this list, nor is the inclusion of any reference an admission that it is prior art or pertinent to this application.

The Commissioner is hereby authorized to charge any necessary fee to Account Number 50-1662.

Respectfully submitted,
POLSINELLI LLP

Foreign Priority Information

****If no data is shown, no data has been corrected****

This section allows for the applicant to claim priority to a foreign application. Providing this information in the application data sheet constitutes the claim for priority as required by 35 U.S.C. 119(b) and 37 CFR 1.55. When priority is claimed to a foreign application that is eligible for retrieval under the priority document exchange program (PDX) the information will be used by the Office to automatically attempt retrieval pursuant to 37 CFR 1.55(i)(1) and (2). Under the PDX program, applicant bears the ultimate responsibility for ensuring that a copy of the foreign application is received by the Office from the participating foreign intellectual property office, or a certified copy of the foreign priority application is filed, within the time period specified in 37 CFR 1.55(g)(1).

NOTE: This Application Data Sheet must be signed in accordance with 37 CFR 1.33(b).

This Application Data Sheet **must** be signed by a patent practitioner if one or more of the applicants is a **juristic entity** (e.g., corporation or association). If the applicant is two or more joint inventors, this form must be signed by a patent practitioner, **all** joint inventors who are the applicant, or one or more joint inventor-applicants who have been given power of attorney (e.g., see USPTO Form PTO/AIA/81) on behalf of **all** joint inventor-applicants.

See 37 CFR 1.4(d) for the manner of making signatures and certifications.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at http://www.uspto.gov/web/offices/pac/doc/general/index.html.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, http://www.stopfakes.gov. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

LICENSE FOR FOREIGN FILING UNDER

Title 35, United States Code, Section 184

Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign AssetsControl, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

SelectUSA

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The U.S. offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to promote and facilitate business investment. SelectUSA provides information assistance to the international investor community; serves as an ombudsman for existing and potential investors; advocates on behalf of U.S. cities, states, and regions competing for global investment; and counsels U.S. economic development organizations on investment attraction best practices. Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

Doc Code: A.NE.AFCP
Document Description: After Final Consideration Pilot Program Request

PTO/SB/434 (05-13)

CERTIFICATION AND REQUEST FOR CONSIDERATION UNDER THE AFTER FINAL CONSIDERATION PILOT PROGRAM 2.0

Practitioner Docket No.:	Application No.:	Filing Date:
084892-514250	14/228,057	March 27, 2014
First Named Inventor:	**Title:**	
Thien Nguyen	INTRAORAL DEVICE WITH SLIT	

APPLICANT HEREBY CERTIFIES THE FOLLOWING AND REQUESTS CONSIDERATION UNDER THE AFTER FINAL CONSIDERATION PILOT PROGRAM 2.0 (AFCP 2.0) OF THE ACCOMPANYING RESPONSE UNDER 37 CFR 1.116.

1. The above-identified application is (i) an original utility, plant, or design nonprovisional application filed under 35 U.S.C. 111(a) [a continuing application (*e.g.*, a continuation or divisional application) is filed under 35 U.S.C. 111(a) and is eligible under (i)], or (ii) an international application that has entered the national stage in compliance with 35 U.S.C. 371(c).
2. The above-identified application contains an outstanding final rejection.
3. Submitted herewith is a response under 37 CFR 1.116 to the outstanding final rejection. The response includes an amendment to at least one independent claim, and the amendment does not broaden the scope of the independent claim in any aspect.
4. This certification and request for consideration under AFCP 2.0 is the only AFCP 2.0 certification and request filed in response to the outstanding final rejection.
5. Applicant is willing and available to participate in any interview requested by the examiner concerning the present response.
6. This certification and request is being filed electronically using the Office's electronic filing system (EFS-Web).
7. Any fees that would be necessary consistent with current practice concerning responses after final rejection under 37 CFR 1.116, *e.g.*, extension of time fees, are being concurrently filed herewith. [There is no additional fee required to request consideration under AFCP 2.0.]
8. By filing this certification and request, applicant acknowledges the following:
    - Reissue applications and reexamination proceedings are not eligible to participate in AFCP 2.0.
    - The examiner will verify that the AFCP 2.0 submission is compliant, *i.e.*, that the requirements of the program have been met (see items 1 to 7 above). For compliant submissions:
        - The examiner will review the response under 37 CFR 1.116 to determine if additional search and/or consideration (i) is necessitated by the amendment and (ii) could be completed within the time allotted under AFCP 2.0. If additional search and/or consideration is required but cannot be completed within the allotted time, the examiner will process the submission consistent with current practice concerning responses after final rejection under 37 CFR 1.116, *e.g.*, by mailing an advisory action.
        - If the examiner determines that the amendment does not necessitate additional search and/or consideration, or if the examiner determines that additional search and/or consideration is required and could be completed within the allotted time, then the examiner will consider whether the amendment places the application in condition for allowance (after completing the additional search and/or consideration, if required). If the examiner determines that the amendment does not place the application in condition for allowance, then the examiner will contact the applicant and request an interview.
            - The interview will be conducted by the examiner, and if the examiner does not have negotiation authority, a primary examiner and/or supervisory patent examiner will also participate.
            - If the applicant declines the interview, or if the interview cannot be scheduled within ten (10) calendar days from the date that the examiner first contacts the applicant, then the examiner will proceed consistent with current practice concerning responses after final rejection under 37 CFR 1.116.

[✓] * Total of 1 forms are submitted.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

AMENDMENT

In response to the Final Office Action mailed June 7, 2016 (*Office Action)*, please amend the above-identified application as follows. Applicants make the following remarks.

Amendments to the Drawings begin on page 2 of this paper.

Amendments to the Claims begin on page 3 of this paper.

Remarks/Arguments begin on page 7 of this paper.

IN THE DRAWINGS

A replacement sheet containing a replacement Fig. 5 is submitted herewith. No new matter has been added.

IN THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

1. (currently amended) A mouthpiece comprising:

a main body portion having a distal portion and a proximal portion, the main body configured as a pocket having an interior defined by:

an anterior wall defined by an exterior edge, the anterior wall comprising a slit along a longitudinal axis of the main body portion between the distal portion and the proximal portion, the slit extending at least half a length of the main body between the distal portion and the proximal portion and comprising an opening that allows for fluids to enter into the interior of the pocket,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, and

a side wall connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall.

2. (original) The mouthpiece of claim 1, wherein the posterior wall further includes a stability bar protruding from an interior surface of the posterior wall and along a longitudinal axis of the main body.

3. (original) The mouthpiece of claim 2, wherein the stability bar is aligned with the slit on the anterior wall.

4. (original) The mouthpiece of claim 1, wherein the main body portion is formed by injection-molding as one piece.

5. (previously presented) The mouthpiece of claim 1, wherein a material used to form the main body portion is a flexible, translucent, high heat-resistant, autoclavable silicone-based material.

6. (original) The mouthpiece of claim 1, wherein the anterior wall and the posterior wall have different thicknesses.

7. (original) The mouthpiece of claim 1, wherein the slit allows portions of the anterior wall to be pulled open to expose the interior of the pocket.

8. (previously presented) The mouthpiece of claim 1, further comprising a cheek retractor portion connected to the main body portion and having a surface that applies pressure when bent, wherein the pressure is based on resilience of the cheek retractor portion.

9. (previously presented) The mouthpiece of claim 8, wherein the cheek retractor portion comprises an extension of the pocket and wherein the slit extends into the extension of the pocket.

10. (previously presented) The mouthpiece of claim 1, further comprising a bridge structure comprising a plurality of protrusions protruding from an interior surface of the posterior wall, wherein the protrusions do not attach to the anterior wall.

11. (previously presented) The mouthpiece of claim 10, wherein the protruding bridge structure protrusions comprise a plurality of spaced contact points.

12. (previously presented) The mouthpiece of claim 11, wherein the bridge structure protrusions protrude from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.

13. (original) The mouthpiece of claim 12, wherein spaces between the contact points are at troughs of the wave shape.

14. (previously presented) The mouthpiece of claim 1, further comprising a suction connector portion that connects the interior of the pocket to a vacuum source, wherein activation of the vacuum source provides suction of fluids from the interior of the pocket toward the vacuum source.

15. (original) The mouthpiece of claim 1, further comprising a detachable mouth prop.

16. (original) The mouthpiece of claim 15, wherein the detachable mouth prop comprises a bite block portion and a strap portion.

17. (original) The mouthpiece of claim 16, wherein the bite block portion and strap portion are injection-molded in one piece.

18. (original) The mouthpiece of claim 15, wherein the bite block portion comprises an opening corresponding to a plug connected to the main body.

19. (previously presented) A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by: an anterior wall defined by an exterior edge, the anterior wall comprising a base portion at one end of the anterior wall, wherein the anterior wall is thicker at the base portion than at another portion at another end of the anterior wall,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, and

a side wall connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall.

20. (previously presented) A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by: an

anterior wall defined by an exterior edge,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, the posterior wall comprising a base portion at one end of the posterior wall, wherein the posterior wall is thicker at the base portion than at another

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

portion at another end of the posterior wall, and a side wall connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall.

REMARKS

Status of the Claims

The Applicants have amended claim 1. No new matter has been added. In view of the following remarks, Applicants respectfully submit that the application is in condition for allowance.

Rejections under 35 U.S.C. §103

Claims 1-4, 6-14, and 19-20 were rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 3,802,081 to Rogers ("*Rogers*") in view of U.S. Patent Application Publication No. 2013/0095450 to Ames ("*Ames*"). Claim 5 was rejected under 35 U.S.C. 103(a) as being unpatentable over *Rogers* in view of *Ames* and further in view of U.S. Patent No. 5,890,899 to Sclafani ("*Sclafani*"), while claims 15-18 were as being unpatentable over *Rogers* in view of *Ames* and further in view of U.S. Patent No. 4,167,814 to Schubert ("*Schubert*"). Applicants respectfully disagree.

Regarding independent claim 1, Applicants submit that *Rogers* does not disclose a slit extending at least half a length of the main body between the distal portion and the proximal portion that is configured to allow fluids to enter the interior of the pocket. Rather, *Rogers* discloses a slit with exceedingly short dimensions in order to receive the lugs of the rigid tongue guard member of *Rogers*. Further, the slit of *Rogers* is not open as the tongue guard is received in the slit and clearly intended to obstruct the opening when assembled and when used as intended. For at least the foregoing reasons, Applicants submit that *Rogers* fails to teach a slit extending at least half the length of the main body as claimed. The *Ames* reference does not remedy this deficiency of *Rogers*. As such, the combination of *Rogers* and *Ames* fails to teach each element of amended clam 1. Withdrawal of the rejection is respectfully requested.

Regarding independent claims 19 and 20, Applicants submit that the Office Action is improperly combining the detent mechanism (16) and the tube (23) to read upon previously presented claims 19 and 20. Applicants submit that *Rogers* does not disclose, suggest, or teach

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

any variation in the thickness of the anterior or posterior wall of the flexible tube (23) of *Rogers*, which alone has been equated to the claimed main body and its posterior and anterior walls. *See the Office Action at pages 2 and 4*. Rather, *Rogers* discloses a uniform flexible tube wall that is engaged to the rigid tube (12) using the detent mechanism 16 formed on the rigid tube and that projects through the aperture 26. While the combined thickness of the rigid suction tube (12), detent mechanism (16), and flexible tube (23) may be greater than that of the flexible tube alone, claims 19 and 20 address the structure of the anterior or proximal walls of the main body portion specifically. *Rogers* does not disclose or teach that the wall of the alleged main body is any thicker at one end versus another end. For at least this reason, Applicants submit that claims 19 and 20 are not rendered obvious by *Rogers* in view of *Ames*.

For at least the same reasons as amended claim 1, dependent claims 2-18 are also patentable over the cited prior art references as *Rogers* fails to teach all of the limitations of independent claim 1. Applicants submit that *Ames, Sclafani,* and *Schubert* fail to remedy the deficiencies of *Rogers*. As such, the combination of *Rogers* with the other cited references fails to teach all of the limitations of dependent claims 2-18. Withdrawal of these rejections is respectfully requested. Not all reasons for allowability and distinctions over the asserted combination of prior art references of record have been discussed and no inference regarding such should be made.

CONCLUSION

Based on the foregoing, it is submitted that Applicants' invention as defined by the claims is patentable over the references of record. Issuance of a Notice of Allowance is solicited. Applicants' attorney welcomes the opportunity to discuss the case with the Examiner in the event that there are any questions or comments regarding the response or the application.

Applicants are submitting this response with an After Final Consideration Pilot Program request.

The Commissioner is hereby authorized to withdraw any additional fees that may be required or credit any overpayment to Deposit Account 50-1662, referencing the docket number above.

September 7, 2016

Respectfully submitted,
POLSINELLI PC

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111
If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371
If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office
If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Examiner-Initiated Interview Summary	Application No.	Applicant(s)	
	14/228,057	NGUYEN ET AL.	
	Examiner	Art Unit	
	HAO D. MAI	3732	

All participants (applicant, applicant's representative, PTO personnel):

(1) *Hao Mai*. (3)_____.

(2) *Elton Dean*. (4)_____.

Date of Interview: *15 September 2016*.

Type: ☒ Telephonic ☐ Video Conference
☐ Personal [copy given to: ☐ applicant ☐ applicant's representative]

Exhibit shown or demonstration conducted: ☐ Yes ☒ No.
If Yes, brief description: _____.

Issues Discussed ☐101 ☐112 ☐102 ☒103 ☒Others
(For each of the checked box(es) above, please describe below the issue and detailed description of the discussion)

Claim(s) discussed: *1*.

Identification of prior art discussed: *Rogers*.

Substance of Interview
(For each issue discussed, provide a detailed description and indicate if agreement was reached. Some topics may include: identification or clarification of a reference or a portion thereof, claim interpretation, proposed amendments, arguments of any applied references etc...)

The proposed amendment regarding the limitation(s) "the slit extending at least half a length of the main body between the distal portion and the proximal portion and comprising an opening that allows for fluids to enter into the interior of the pocket" would overcome the current ground(s) of rejection under Rogers. However, independent claim 1 is still broad and the newly recited range "at least half a length of the main body" appears to be new matter. Applicant is suggested to provide support from the application as originally filed for all limitation(s) newly recited in the claim and to further distinguish the invention, particularly by claiming inventive feature(s) in combination with other elements in the claim(s).

Applicant recordation instructions: It is not necessary for applicant to provide a separate record of the substance of interview.

Examiner recordation instructions: Examiners must summarize the substance of any interview of record. A complete and proper recordation of the substance of an interview should include the items listed in MPEP 713.04 for complete and proper recordation including the identification of the general thrust of each argument or issue discussed, a general indication of any other pertinent matters discussed regarding patentability and the general results or outcome of the interview, to include an indication as to whether or not agreement was reached on the issues raised.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

Advisory Action Before the Filing of an Appeal Brief	**Application No.** 14/228,057	**Applicant(s)** NGUYEN ET AL.	
	Examiner HAO D. MAI	**Art Unit** 3732	**AIA (First Inventor to File) Status** No

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 07 September 2016 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

NO NOTICE OF APPEAL FILED

1. ☒ The reply was filed after a final rejection. No Notice of Appeal has been filed. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance;

(2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114 if this is a utility or plant application. Note that RCEs are not permitted in design applications. The reply must be filed within one of the following time periods:

a) ☒ The period for reply expires 3 months from the mailing date of the final rejection.

b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action; or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

c) ☐ A prior Advisory Action was mailed more than 3 months after the mailing date of the final rejection in response to a first after-final reply filed within 2 months of the mailing date of the final rejection. The current period for reply expires months from the mailing date of *the prior Advisory Action* or SIX MONTHS from the mailing date of the final rejection, whichever is earlier.

Examiner Note: If box 1 is checked, check either box (a), (b) or (c). ONLY CHECK BOX (b) WHEN THIS ADVISORY ACTION IS THE FIRST RESPONSE TO APPLICANT'S FIRST AFTER-FINAL REPLY WHICH WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. ONLY CHECK BOX (c) IN THE LIMITED SITUATION SET FORTH UNDER BOX (c). See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) or (c) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

AMENDMENTS

3. ☒ The proposed amendments filed after a final rejection, but prior to the date of filing a brief, will not be entered because
   a) ☒ They raise new issues that would require further consideration and/or search (see NOTE below);
   b) ☒ They raise the issue of new matter (see NOTE below);
   c) ☒ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
   d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.

   NOTE: *See Continuation Sheet*. (See 37 CFR 1.116 and 41.33(a)).

4. ☐ The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).

5. ☒ Applicant's reply has overcome the following rejection(s): 35 USC 103(a) as being unpatentable over Rogers in view of Ames.

6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).

7. ☒ For purposes of appeal, the proposed amendment(s): (a) ☒ will not be entered, or (b) ☐ will be entered, and an explanation of how the new or amended claims would be rejected is provided below or appended.

AFFIDAVIT OR OTHER EVIDENCE

8. ☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

9. ☐ The affidavit or other evidence filed after final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e).

10. ☐ The affidavit or other evidence filed after the date of filing the Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellant fails to provide a showing of good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).

11. ☐ The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached.

REQUEST FOR RECONSIDERATION/OTHER

12. ☒ The request for reconsideration has been considered but does NOT place the application in condition for allowance because: See Continuation Sheet.

13. ☐ Note the attached Information *Disclosure Statement*(s). (PTO/SB/08) Paper No(s). _____

14. ☒ Other: PTOL-2323, PTOL-413.

STATUS OF CLAIMS

15. The status of the claim(s) is (or will be) as follows:
    Claim(s) allowed: .
    Claim(s) objected to: .
    Claim(s) rejected: 1-13.
    Claim(s) withdrawn from consideration: .

/Cris L. Rodriguez/ Supervisory Patent Examiner, Art Unit 3732	/HAO D MAI/ Examiner, Art Unit 3732

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

Continuation of 3. NOTE: The proposed amendment to recite "the slit extending at least half a length of the main body between the distal portion and the proximal portion and comprising an opening that allows for fluids to enter into the interior of the pocket" raise new issues that would require further consideration and/or search.

The newly recited range "at least half a length…" is considered to be new matter because it is lacking support from the application as originally filed. The proposed amendment would necessitate new ground(s) of rejection, at least under 112 first for the new matter indicated above and therefore does not materially reduce or simplify the issues for appeal.

Continuation of 12. does NOT place the application in condition for allowance because: the proposed amendment regarding the limitation(s) "the slit extending at least half a length of the main body between the distal portion and the proximal portion and comprising an opening that allows for fluids to enter into the interior of the pocket" would overcome the current ground(s) of rejection under Rogers. However, independent claim 1 is still broad. Applicant is suggested to further distinguish the invention over prior art, particularly by claiming inventive feature(s) in combination with other elements in the claim(s).

AFCP 2.0 Decision	Application No.	Applicant(s)
	14/228,057	NGUYEN ET AL.
	Examiner	Art Unit
	HAO D. MAI	3732

This is in response to the After Final Consideration Pilot request filed 07 September 2016.

1. **Improper Request** – The AFCP 2.0 request is improper for the following reason(s) and the after final amendment submitted with the request will be treated under pre-pilot procedure.

   ☐ An AFCP 2.0 request form PTO/SB/434 (or equivalent document) was not submitted.

   ☐ A non-broadening amendment to at least one independent claim was not submitted.

   ☐ A proper AFCP 2.0 request was submitted in response to the most recent final rejection.

   ☐ Other:

2. **Proper Request**

   A. After final amendment submitted with the request will not be treated under AFCP 2.0.
   The after final amendment cannot be reviewed and a search conducted within the guidelines of the pilot program.

   ☐ The after final amendment will be treated under pre-pilot procedure.

   B. Updated search and/or completed additional consideration.
   The examiner performed an updated search and/or completed additional consideration of the after final amendment within the time authorized for the pilot program. The result(s) of the updated search and/or completed additional consideration are:

   ☐ 1. All of the rejections in the most recent final Office action are overcome and a Notice of Allowance is issued herewith.

   ☐ 2. The after final amendment would not overcome all of the rejections in the most recent final Office action. See attached interview summary for further details.

   ☐ 3. The after final amendment was reviewed, and it raises a new issue(s). See attached interview summary for further details.

   ☒ 4. The after final amendment raises new issues, but would overcome all of the rejections in the most recent final Office action. A decision on determining allowability could not be made within the guidelines of the pilot. See attached interview summary for further details, including any newly discovered prior art.

   ☐ 5. Other:

   Examiner Note: Please attach an interview summary when necessary as described above.

ABSTRACT

A dental mouthpiece is provided that may be attached to a high-suction dental adapter for the purpose of assisting the dental staff during dental procedures through chair-side, hands-free suction, and isolation. Such a mouthpiece may comprise a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded in one piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

INTRAORAL DENTAL SUCTION AND ISOLATION SYSTEM

BACKGROUND OF THE INVENTION

1. Field of the Invention

The present invention generally relates to the field of dental mouthpieces. More specifically, the present invention relates to intraoral dental suction and isolation mouthpieces.

2. Description of Related Art

Various mouthpieces are currently used by dental health professionals, dental hygienists, and dental assistants in the field of dentistry. In the past, a dental patient has been treated by a traditional two-person team that comprises a dental professional and a dental assistant. Further, dental treatment may be provided by the team using many different types of dental equipment and materials. Such dental equipment and materials may include such items as an intraoral mirror, a bite block, a slow speed suction ejector, a high speed suction ejector, gauzes, cotton rolls, and dry angles. Each item of dental equipment may be used for different purposes, though some may be used in combination for some types of dental services. As such, a dental professional seeking to provide such dental services may need to use multiple items of such dental equipment. An important role of the dental assistant is therefore to assist the dental professional in coordinating the use of these multiple items of different equipment and materials.

There is, therefore, a need in the art for improved systems and methods of providing dental services in a more efficient, comfortable, and safe manner to the dental patient.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

SUMMARY OF THE CLAIMED INVENTION

Embodiments of the present invention may include a mouthpiece that may be attached to a high-suction dental adapter for the purpose of assisting the dental staff during dental procedures through chair-side, hands-free suction, and isolation. Such a mouthpiece may comprise a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded in one piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

The main body portion may comprise an enclosed pocket made up of an anterior wall, a posterior wall, and a side wall in between the anterior and posterior walls. The side wall may be perforated with a plurality of perforations. Such perforations may constitute a mesh. Additional perforations may be located on the anterior and posterior walls. The main body portion may further include a slit along a longitudinal, central axis on the anterior wall. Such openings (*e.g.*, perforations and slit) allow for suction of air, fluids, and small debris from the patient's mouth, through the openings into the interior portion, and into the suction connector portion towards a suction source. Because the mouthpiece is made of a flexible and resilient material (*e.g.*, silicone), the mouthpiece may be bent when placed in a patient's mouth to conform to the shape of the mouth. When properly positioned, the suction connector portion may protrude from one side of the patient's mouth, while the main body lies against the back of the patient's mouth, and the cheek retractor presses against the patient's cheek on the opposite side of the patient's mouth.

The main body may further include an protruding bridge structure on the interior surface of the posterior wall. Such a bridge structure may protrude from the interior surface in a wave shape with crests and troughs. The crests provide a plurality of contact points with the anterior wall to keep the anterior wall separated

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

from the posterior wall during suction. Meanwhile, the troughs provide gaps that allow for suction of air, fluids, and small debris through the bridge structure.

Accordingly, in one aspect, the present invention resides in a dental mouthpiece composed of a bendable material, the dental mouthpiece formed in a curve and comprising: a main body portion at a central part of the curve and comprising a defined pocket having an anterior wall inside the curve, a posterior wall outside the curve, and a side wall in between the anterior wall and the posterior wall, wherein the anterior wall, the posterior wall, and the side wall define an interior portion of the defined pocket, wherein the posterior wall comprises a bridge structure protruding from an interior surface of the posterior wall in a wave shape, the protruding bridge structure comprising a plurality of spaced contact points that keep the anterior wall separated from the posterior wall during suction, wherein the spaced contact points are at crests of the wave shape, and wherein a plurality of troughs of the wave shape between the spaced contact points allow for suction through the bridge structure; a cheek retractor portion connected to the main body portion and having a surface that applies pressure when the dental mouthpiece is bent, wherein the pressure is based on resilience of the bendable material; and a suction connector portion for connecting the interior portion of the main body portion to a vacuum suction source, wherein the suction connector portion is connected to the main body portion on an end opposite the cheek retractor.

In another aspect, the present invention resides in a dental mouthpiece composed of a bendable material, the dental mouthpiece formed in a curve and comprising: a main body portion at a central part of the curve and comprising a defined pocket having an anterior wall inside the curve, a posterior wall outside the curve, and a side wall in between the anterior wall and the posterior wall, wherein the anterior wall, the posterior wall, and the side wall define an interior portion of the defined pocket; a cheek retractor portion connected to the main body portion and having a surface that applies pressure when the dental mouthpiece is bent, wherein the pressure is based on resilience of the bendable material; a suction connector portion for connecting the interior portion of the main body portion to a vacuum suction source, wherein the suction connector portion is connected to the main body portion on an end opposite the cheek retractor; and a detachable mouth prop comprising a strap configured to fit

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

around the suction connector portion, wherein an external surface of the suction connector portion comprises a notch region corresponding to the strap, and wherein an external surface of the strap is substantially flush with a remaining external surface of the suction connector portion when the strap sits in the notch region.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

DETAILED DESCRIPTION

Embodiments of the present invention provide for a mouthpiece comprising a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded as one-piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

FIGs. 1A-E are different views of an exemplary mouthpiece with an attachable mouth prop 160, while FIGs. 2A-E are different views of the exemplary mouthpiece of FIG. 1A where the attachable mouth prop 160 has been detached. Such a mouthpiece may include a main body portion 110, a suction connector portion 120, and a cheek retractor portion 130.

The main body portion 110 may include mesh or perforations140, a stability bar 150, an open slit 170, and an internal bridge 180. The main body potion 110 may connect to a suction connector portion 120 on one end and a cheek retractor portion 130 at the other end. Such a cheek retractor portion 130 may be configured to press against and retract a patient's cheek away from the patient's teeth. When placed in a patient's mouth, the suction connector portion 120 may protrude from one side of the patient's mouth, while the main body portion 110 lies against the back of the patient's mouth, and the cheek retractor portion 130 retracts the patient's cheek on the opposite side of the patient's mouth. The flexibility of the material used to form the mouthpiece allows for some bending when placed in the patient's mouth. The material is, however, resilient enough that the cheek retractor portion presses against the inside of the patient's cheek with such pressure being sufficient to move the cheek away from the patient's teeth.

An exemplary main body portion 110, when placed in a mouth, may include an anterior wall facing the front of the mouth (*e.g.*, the side with slit 170) and a posterior

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

wall facing the back of the mouth. The two walls may connect at a superior wall and an inferior wall forming a body that is at least partially enclosed.

Superior may be used herein to refer to the side that rests against a roof of a patient's mouth when placed therein, and inferior may be used to refer to the side that rests against the floor of the patient's mouth. The superior and inferior sides may be formed identically, which may allow for the mouthpiece to change orientation such that the superior side may appear as the inferior side and vice versa, in the new orientation. When in use, the respective sides of the main body portion 110 may serve to protect and separate the top of the mouth and the bottom of the mouth/tongue. In addition, the main body portion 110 may also serve to protect the back of the mouth (*e.g.*, throat and airway) from falling debris.

Much of the main body portion 110 of the mouthpiece may be shaped as a straight-line arrowhead or shield whose base generally conforms to the intraoral shape of a patient's mouth. Differently-sized mouthpieces may be provided for differently-sized mouths of adults and children. Part of the base side of the arrowhead may be formed with thicker walls than the rest of the main body. Such thickening may provide additional stability.

In addition, the main body portion 110 of the mouthpiece may include a plurality of holes 140 distributed along the superior and inferior sides of the anterior and posterior walls to assist in suctioning of water, saliva and debris from the oral cavity. In some embodiments, a set of holes may also form a mesh along the walls of the superior and inferior edges. FIG. 4 is a close-up view of an exemplary mesh wall in an exemplary mouthpiece.

At the narrow end of the arrowhead that connects to the cheek retractor portion 130, the main body portion 110 may include a rectangular portion. Narrower than the base of the arrowhead, the rectangle may additionally include a reinforcing bar (or stability bar) 150 (described in further detail below) and may be at least partially crossed by a slit 170 (described in further detail below) into the interior of the pocket of the main body portion 110.

Stability bar 150 may be a protrusion or otherwise a thickened area that reinforces the stability of the rectangular portion and assist in shaping this region to

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

the intraoral posterior shape of a patient's mouth. FIG. 6A is a close-up view of an exemplary stability bar 150 of an exemplary mouthpiece. FIG. 6B is a cross-sectional view of the exemplary reinforcing bar in the cheek retractor connector portion of FIG. 6A.

In some embodiments, the internal, rectangular-shaped reinforcing or stability bar 150 may be located distally to the internal wavelike bridge structure 180 and attached to both the interior side of the posterior surface of the main body and the rectangular portion. Such a stability bar 150 may be located in the area where a positioned mouthpiece begins to wrap from the lingual side of the most posterior mandibular tooth, around the distal side of the most posterior tooth, and to anterior side of the most posterior mandibular tooth, thereby assisting in shaping the mouthpiece to the general intraoral shape of a patient's mouth.

Various embodiments of the mouthpiece may further include a longitudinal, open slit 170 extending over approximately two-thirds of the main body on the anterior surface. Running along the center of the main body across the rectangle and most of the arrowhead, such a slit 170 may assist in capture and suction of water, saliva and debris, as well as assisting in cleaning and maintenance.

Additionally, the main body of the mouthpiece may include a bridge structure 180 on an interior surface to ensure that the anterior and posterior surfaces remain separated during suction. FIG. 1E is a cross-sectional view of the mouthpiece in which the bridge structure 180 is illustrated. FIG. 5 is a close-up view of the bridge structure 180 without the surrounding walls of the main body portion. Such a bridge structure 180 may be formed as an wave-like protrusion that generally corresponds to the distance between the anterior and posterior walls extending substantially (*e.g.*, within 1 mm) the full distance at its crest and substantially flush to the surface at its trough. In some embodiments, the bridge structure 180 may be centrally-located in the main body portion 110 of the mouthpiece. The gaps (or troughs) between the waves of the bridge structure 180 assist in the suction-driven transfer of water and saliva to the suction connector portion 120 and ultimately, into a central suction vacuum. In some embodiments, the bridge structure 180 may follow the shape of a logo (e.g., an arrowhead or shield).

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

The suction connector portion 120 may be oval-shaped and also attached to the main body portion 110. The suction connector portion 120 may be formed with thicker walls than the main body portion 110 and configured to attach to a high-suction vacuum adapter and to assist in transferring water, saliva, and debris from the oral cavity to the external adapter for removal. The suction connector portion 120 may also include an internal stop to assist in sliding the mouthpiece onto the adapter to a desired depth. The suction connector portion 120 may additionally have an external, concave, notched region 210 that corresponds to a removable strap such that when the strap is in place, the external walls of the strap and the rest of the connector portion may be flush.

The cheek retractor portion 130 is illustrated as a hammerhead distal region, which may be attached to the main body portion 110. FIG. 7A is a close-up view of an exemplary cheek retractor portion 130 in an exemplary mouthpiece. FIG. 7B is a cross-sectional view of the exemplary cheek retractor portion 130 of FIG. 7A.

The mouthpiece may be used with a mouth prop 160, as illustrated in FIGs. 1 (with a mouth prop 160) and FIGs. 2 (illustrated without the mouth prop 160). FIGs. 3A-E provide different close-up views of an exemplary mouth prop 160. The removable strap 310 may be attached to mouth prop 160, which may be used to prop open a patient's mouth and teeth. In this regard, the suction connector portion 120 may additionally have an external plug 220 (FIG. 2C) protruding from the posterior side of the suction connector portion 120. Such a plug 220 may correspond to and serve to connect with an opening in the mouth prop 160. The mouth prop 160 may be reinforced by the presence of the plug 220 in the opening, thereby resulting in a more crush-resistant, nearly incompressible, and stable mouth prop 160. In some embodiments, the suction connector portion 120 may further have a cutout 230 (*e.g.*, which may be shaped as a logo) providing extra interlocking with a corresponding protrusion (*e.g.*, which may also be shaped as a logo) on an external high-suction vacuum adapter.

The mouth prop 160 may be made of thickened silicone material injection molded in a single piece with an elastic strap corresponding to the circumference of the suction connector portion. The mouth prop 160 has an internal, rectangular-

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

shaped female slot designed to fit snugly with the external, rectangular-shaped male plug 220 of the suction connector portion 120 of the mouthpiece. Mouth props may be made in different sizes for differently sized mouths. Because the mouth prop and mouthpiece are detachable from each other, different sizes of each may be mixed and matched as needed for a particular patient's mouth.

The mouthpiece as described herein may be used with a one-piece, autoclavable, high-suction vacuum adapter. Such a high-suction vacuum body adapter may be made of a single homogenous material. Having a single lever design, such a vacuum adapter may function in the same manner as all the current high-suction vacuum evacuators and saliva ejectors in controlling the removal of water, saliva, and debris from the oral cavity to the outside vacuum source. The single lever may be designed to control the removal of water, saliva, and debris from the at least partially enclosed so main body through a single, large evacuation conduit within the suction connector portion.

While various embodiments have been described above, it should be understood that they have been presented by way of example only, and not limitation. The descriptions are not intended to limit the scope of the invention to the particular forms set forth herein. Thus, the breadth and scope of a preferred embodiment should not be limited by any of the above-described exemplary embodiments. It should be understood that the above description is illustrative and not restrictive. To the contrary, the present descriptions are intended to cover such alternatives, modifications, and equivalents as may be included within the scope of the invention as defined by the appended claims and otherwise appreciated by one of ordinary skill in the art. The scope of the invention should, therefore, be determined not with reference to the above description, but instead should be determined with reference to the appended claims along with their full scope of equivalents.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

What is claimed is:

1. A dental mouthpiece composed of a bendable material, the dental mouthpiece formed in a curve and comprising:

a main body portion at a central part of the curve and comprising a defined pocket having an anterior wall inside the curve, a posterior wall outside the curve, and a side wall in between the anterior wall and the posterior wall, wherein the anterior wall, the posterior wall, and the side wall define an interior portion of the defined pocket, wherein the posterior wall comprises a bridge structure protruding from an interior surface of the posterior wall in a wave shape, the protruding bridge structure comprising a plurality of spaced contact points that keep the anterior wall separated from the posterior wall during suction, wherein the spaced contact points are at crests of the wave shape, and wherein a plurality of troughs of the wave shape between the spaced contact points allow for suction through the bridge structure;

a cheek retractor portion connected to the main body portion and having a surface that applies pressure when the dental mouthpiece is bent, wherein the pressure is based on resilience of the bendable material; and a suction connector portion for connecting the interior portion of the main body portion to a vacuum suction source, wherein the suction connector portion is connected to the main body portion on an end opposite the cheek retractor.

2. The mouthpiece of claim 1, wherein the side wall includes a plurality of perforations.

3. The mouthpiece of claim 1, wherein the anterior wall and the posterior wall each includes a plurality of perforations.

4. The mouthpiece of claim 1, wherein the anterior wall further includes a slit along a central axis.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

5. The mouthpiece of claim 1, further comprising a stability bar protruding from an interior surface of the posterior wall, wherein a thickness of the stability bar reinforces stability during bending of the dental mouthpiece.

6. The mouthpiece of claim 1, wherein the main body portion, the cheek retractor portion, and the suction connector portion are injection-molded as one piece.

7. The mouthpiece of claim 1, wherein the material is a flexible, translucent, high heat-resistant, autoclavable silicone-based material.

8. The mouthpiece of claim 1, wherein the suction connector portion comprises an internal stop to assist in positioning of the vacuum suction source or a vacuum adaptor.

9. The mouthpiece of claim 1, further comprising a detachable mouth prop.

10. The mouthpiece of claim 9, wherein the detachable mouth prop comprises a strap configured to fit around the suction connector portion, wherein an external surface of the suction connector portion comprises a notch region corresponding to the strap, and wherein an external surface of the strap is substantially flush with a remaining external surface of the suction connector portion when the strap sits in the notch region.

11. The mouthpiece of claim 10, wherein the strap and other portions of the mouth prop are injection-molded as a single piece.

12. The mouthpiece of claim 9, wherein the suction connector portion further comprises an external plug protrusion corresponding to an opening in the mouth prop.

13. The mouthpiece of claim 12, wherein the plug protrusion fits into the opening to provide additional crush-resistance and decreased compressibility.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

14. The mouthpiece of claim 1, wherein the suction connector portion comprises a cutout corresponding to a protrusion on a vacuum adapter for an interlocking fit.

15. The mouthpiece of claim 1, wherein the anterior wall and the posterior wall have different thicknesses.

16. The mouthpiece of claim 1, wherein the main body portion comprises:

a base portion connected to the suction connector portion at a first end,

a cheek retractor connector portion connected to a second end of the base portion, the second end opposite the first end of the base portion, wherein the cheek retractor connector portion is narrower than the base portion, and the cheek retractor connects to main body portion at the cheek retractor connector portion.

17. The mouthpiece of claim 1, wherein one or more of the walls is a protective wall, and wherein debris external to mouthpiece is subject to being caught by suction and/or by the protective wall.

18. A dental mouthpiece composed of a bendable material, the dental mouthpiece formed in a curve and comprising:

a main body portion at a central part of the curve and comprising a defined pocket having an anterior wall inside the curve, a posterior wall outside the curve, and a side wall in between the anterior wall and the posterior wall, wherein the anterior wall, the posterior wall, and the side wall define an interior portion of the defined pocket;

a cheek retractor portion connected to the main body portion and having a surface that applies pressure when the dental mouthpiece is bent, wherein the pressure is based on resilience of the bendable material;

a suction connector portion for connecting the interior portion of the main body portion to a vacuum suction source, wherein the suction connector portion is connected to the main body portion on an end opposite the cheek retractor; and

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

a detachable mouth prop comprising a strap configured to fit around the suction connector portion, wherein an external surface of the suction connector portion comprises a notch region corresponding to the strap, and wherein an external surface of the strap is substantially flush with a remaining external surface of the suction connector portion when the strap sits in the notch region.

19. The mouthpiece of claim 18, wherein the side wall includes a plurality of perforations.

20. The mouthpiece of claim 18, wherein the anterior wall and the posterior wall each includes a plurality of perforations.

21. The mouthpiece of claim 18, wherein the anterior wall further includes a slit along a central axis.

22. The mouthpiece of claim 18, further comprising a stability bar protruding from an interior surface of the posterior wall, wherein a thickness of the stability bar reinforces stability during bending of the dental mouthpiece.

23. The mouthpiece of claim 18, wherein the main body portion, the cheek retractor portion, and the suction connector portion are injection-molded as one piece.

24. The mouthpiece of claim 18, wherein the material is an autoclavable silicone-based material.

25. The mouthpiece of claim 18, further comprising a bridge structure protruding from an interior surface of the posterior wall, the protruding bridge structure comprising a plurality of spaced contact points that keep the anterior wall separated from the posterior wall during suction.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

26. The mouthpiece of claim 25, wherein the bridge structure protrudes from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.

27. The mouthpiece of claim 26, wherein troughs of the wave shape allow suction through the bridge structure.

28. The mouthpiece of claim 18, wherein the suction connector portion comprises an internal stop to assist in positioning of the vacuum suction source or a vacuum adaptor.

29. The mouthpiece of claim 18, wherein the strap and other portions of the mouth prop are injection-molded as a single piece.

30. The mouthpiece of claim 18, wherein the suction connector portion further comprises an external plug protrusion corresponding to an opening in the mouth prop.

31. The mouthpiece of claim 30, wherein the plug protrusion fits into the opening to provide additional crush-resistance and decreased compressibility.

32. The mouthpiece of claim 18, wherein the suction connector portion comprises a cut-out corresponding to a protrusion on a vacuum adapter for an interlocking fit.

33. The mouthpiece of claim 18, wherein the anterior wall and the posterior wall have different thicknesses.

34. The mouthpiece of claim 18, wherein the main body portion comprises:

a base portion connected to the suction connector portion at a first end,

a cheek retractor connector portion connected to a second end of the base portion, the second end opposite the first end of the base portion, wherein the cheek retractor connector portion is narrower than the base portion, and the cheek retractor connects to main body portion at the cheek retractor connector portion.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

35. The mouthpiece of claim 18, wherein one or more of the walls is a protective wall, and wherein debris external to mouthpiece is subject to being caught by suction and/or by the protective wall.

Abstract

A dental mouthpiece is provided that may be attached to a high-suction dental adapter for the purpose of assisting the dental staff during dental procedures through chair-side, hands-free suction, and isolation. Such a mouthpiece may comprise a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded in one piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

口内牙科抽吸和隔离系统

(57)摘要

本发明提供了一种牙科口腔件，其可附接到高抽吸牙科转接器以便在牙科手术期间通过椅旁免提抽吸和隔离来帮助牙科工作人员。这种口腔件可包括主体部分、颊牵开器部分以及抽吸连接器部分。在一些实施方案中，所述主体部分、颊牵开器部分以及抽吸连接器部分（及其子部分）可优选通过注射成型模制成单件。在示例性实施方案中，所述口腔件可以由柔性、半透明、有助于注射成型、高耐热性且高压灭菌的材料制成。这种材料可包含硅酮。因为所述口腔件可以由高耐热且高压灭菌的材料制成，所以这种口腔件可以重复使用。

CN 105578986 A

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

1.一种由材料构成的牙科口腔件，所述牙科口腔件包括：

主体部分，所述主体部分包括具有前壁、后壁以及在所述前壁与所述后壁之间的侧壁的限定凹腔，其中所述前壁、所述后壁以及所述侧壁限定所述限定凹腔的内部部分；

颊牵开器部分，所述颊牵开器部分被配置来当被放置在患者的口腔中时压靠所述患者的脸颊，其中所述材料的弹性导致所述颊牵开器部分使所述患者的脸颊缩进而远离所述患者的牙齿；以及

抽吸连接器部分，所述抽吸连接器部分用于将所述主体部分的所述内部部分连接到真空抽吸源。

2.根据权利要求1所述的口腔件，其中所述侧壁包括多个穿孔。

3.根据权利要求1所述的口腔件，其中所述前壁和所述后壁各自包括多个穿孔。

4.根据权利要求1所述的口腔件，其中所述前壁还包括沿中心轴线的狭缝。

5.根据权利要求1所述的口腔件，其还包括从所述后壁的内表面突出的稳定杆，其中所述稳定杆的厚度使所述颊牵开器部分在弯曲过程中的弹性增加。

6.根据权利要求1所述的口腔件，其中所述主体部分、所述颊牵开器部分以及所述抽吸连接器部分注射成型为单件。

7.根据权利要求1所述的口腔件，其中在所述注射成型中使用的所述材料是柔性、半透明、高耐热、高压灭菌的硅酮基材料。

8.根据权利要求1所述的口腔件，其还包括从所述后壁的内表面突出的桥接结构，所述桥接结构包括在抽吸期间保持所述前壁与所述后壁分离的多个隔开的接触点。

9.根据权利要求8所述的口腔件，其中所述桥接结构从所述后壁的所述内表面以波形突出，并且其中所述接触点是在所述波形的波峰处。

10.根据权利要求9所述的口腔件，其中所述波形的波谷被配置成允许穿过所述桥接结构的抽吸。

11.根据权利要求1所述的口腔件，其中所述抽吸连接器部分包括有助于定位真空抽吸源或真空转接器的内部止挡件。

12.根据权利要求1所述的口腔件，其还包括可拆卸的口腔支撑件。

13.根据权利要求12所述的口腔件，其中所述可拆卸的口腔支撑件包括被配置来配合在所述抽吸连接器部分周围的绑带，其中所述抽吸连接器部分的外表面包括对应于所述绑带的缺口区，并且其中当所述绑带处于所述缺口区中时，所述绑带的外表面与所述抽吸连接器部分的剩余外表面基本上齐平。

14.根据权利要求13所述的口腔件，其中所述绑带与所述口腔支撑件注射成型为单件。

15.根据权利要求1所述的口腔件，其中所述抽吸连接器部分还包括对应于与所述绑带相关联的口腔支撑件中的开口的外部插塞凸起。

16.根据权利要求15所述的口腔件，其中所述插塞凸起配合到所述开口中以便在被所述患者咬住时提供附加的抗压性和减少的压缩性。

17.根据权利要求1所述的口腔件，其中所述抽吸连接器部分包括对应于真空转接器上的凸起的保险开关以用于联锁配合。

18.根据权利要求1所述的口腔件，其中所述前壁和所述后壁具有不同的厚度。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

口内牙科抽吸和隔离系统

技术领域

[0001] 本发明总体上涉及牙科口腔件领域。更具体地说，本发明涉及口内牙科抽吸和隔离口腔件。

背景技术

[0002] 当前，牙科领域的牙科健康专业人员、牙科保健员以及牙科助理使用各种口腔件。在过去，由包括牙科专业人员和牙科助手的传统二人团队对牙科患者进行治疗。此外，所述团队可以使用许多不同类型的牙科设备和材料来提供牙科治疗。此类牙科设备和材料可包括以下物品：如口腔镜、牙垫、慢速抽吸喷射器、高速抽吸喷射器、纱布、棉卷和干燥角状物。牙科设备的每种物品可用于不同目的，但一些物品可以组合使用以用于一些类型的牙科服务。由此，试图提供此类牙科服务的牙科专业人员可能需要使用此类牙科设备的多种物品。因此，牙科助理的一个重要的任务是帮助牙科专业人员协调不同设备和材料的这些多个物品的使用。

[0003] 因此，本领域中需要以更高效、更舒适且更安全的方式为牙科患者提供牙科服务的改进的系统和方法。

发明内容

[0004] 本发明的实施方案可包括一种口腔件，所述口腔件可附接到高抽吸牙科转接器以便在牙科手术期间通过椅旁免提抽吸和隔离来帮助牙科工作人员。这种口腔件可包括主体部分、颊牵开器部分以及抽吸连接器部分。在一些实施方案中，所述主体部分、颊牵开器部分以及抽吸连接器部分(及其子部分)可优选通过注射成型模制成单件。在示例性实施方案中，所述口腔件可以由柔性、半透明、有助于注射成型、高耐热性且高压灭菌的材料制成。这种材料可包含硅酮。因为所述口腔件可以由高耐热且高压灭菌的材料制成，所以这种口腔件可以重复使用。

[0005] 所述主体部分可包括由前壁、后壁以及在前壁与后壁之间的侧壁构成的封闭凹腔。所述侧壁可以被穿透成具有多个穿孔。此类穿孔可构成筛孔。附加的穿孔可定位在前壁和后壁上。主体部分还可包括沿着前壁上的纵向中心轴线的狭缝。此类开口(例如，穿孔和狭缝)允许从患者口腔抽吸空气、流体以及小的杂物，穿过所述开口进入内部部分并且进入朝向抽吸源的抽吸连接器部分。因为所述口腔件是由柔性和弹性材料(例如，硅酮)制成，所以所述口腔件当被放置在患者的口腔中时可以弯曲以符合口腔的形状。当正确定位时，所述抽吸连接器部分可从患者口腔的一侧突出，同时主体抵靠患者口腔的后部，并且颊牵开器在患者口腔的相对侧上压靠患者的脸颊。

[0006] 主体部分还可包括在后壁的内表面上的突出桥接结构。这种桥接结构可以具有波峰和波谷的波形从所述内表面突出。所述波峰提供与前壁的多个接触点以便在抽吸期间保持前壁与后壁分离。同时，所述波谷提供允许穿过桥接结构抽吸空气、流体以及小的杂物的间隙。

[0027] 图7A示例性口腔件中的示例性颊牵开器部分的近距离视图。

[0028] 图7B是图7A的示例性颊牵开器部分的截面图。

具体实施方式

[0029] 本发明的实施方案提供了一种口腔件，其包括主体部分、颊牵开器部分以及抽吸连接器部分。在一些实施方案中，主体部分、颊牵开器部分以及抽吸连接器部分(及其子部分)可优选地通过注射成型而模制成单件。在示例性实施方案中，所述口腔件可以由柔性、半透明、有助于注射成型、高耐热性且高压灭菌的材料制成。这种材料可包含硅酮。因为所述口腔件可以由高耐热的且高压灭菌的材料制成，所以这种口腔件可以重复使用。

[0030] 图1A-E是具有可附接的口腔支撑件160的示例性口腔件的不同视图，而图2A-E是图1A的示例性口腔件的不同视图，其中可附接的口腔支撑件160已被拆除。这种口腔件可包括主体部分110、抽吸连接器部分120以及颊牵开器部分130。

[0031] 主体部分110可包括筛孔或穿孔140、稳定杆150、开口狭缝170以及内部桥接件180。主体部分110可在一端连接到抽吸连接器部分120并且在另一端连接到颊牵开器部分130。这种颊牵开器部分130可被配置来压靠在患者的脸颊上并且使其缩进而远离患者的牙齿。当被放置在患者口腔中时，抽吸连接器部分120可以从患者口腔的一侧突出，同时主体部分110抵靠患者口腔的后部，并且颊牵开器部分130使在患者口腔的相对侧上的患者脸颊

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

缩进。当所述口腔件被放置在患者口腔中时，用于形成所述口腔件的材料的柔韧性允许一定程度的弯曲。然而，所述材料具有足够弹性，以使得颊牵开器部分利用足以使患者脸颊远离患者牙齿移动的压力来压靠患者脸颊的内侧。

[0032] 当被放置在口腔中时，示例性主体部分110可包括面向口腔前部的前壁(例如，具有狭缝170的一侧)和面向口腔后部的后壁。两个壁可以在上壁和下壁处连接，从而形成至少部分地被封闭的本体。

[0033] 在本文中，上可用于指代当被放置在患者口腔中时抵靠患者口腔的顶部的一侧，并且下可用于指代抵靠患者口腔的底部的一侧。上侧和下侧可同样地形成，这允许所述口腔件改变方向，从而使得在新取向上上侧可以表现为下侧并且反之亦然。在使用时，主体部分110的相应侧可以用来保护口腔的顶部和口腔/舌头的底部并将它们分开。另外，主体部分110还可以用来保护口腔的后部(例如，咽喉和气道)避开掉落的杂物。

[0034] 所述口腔件的主体部分110的大部分可成形为直线形箭头或护盾，其基座大体符合患者口腔的口内形状。可提供不同尺寸的口腔件以用于成年人和儿童的不同大小的口腔。与主体的其余部分相比，所述箭头的基座侧的部分可形成为具有更厚的壁。这种增厚可提供附加的稳定性。

[0035] 另外，所述口腔件的主体部分110可包括沿前壁和后壁的上侧和下侧分布的多个孔140，以便有助于从口腔抽吸水、唾液以及杂物。在一些实施方案中，一组孔还可以沿上边缘和下边缘的壁形成筛孔。图4是示例性口腔件中的示例性筛孔壁的近距离视图。

[0036] 在所述箭头的连接到颊牵开器部分130的窄端处，主体部分110可包括矩形部分。所述矩形比所述箭头的基座更窄，可另外包括加强杆(或稳定杆)150(下文进一步详细进行描述)，并且可以至少部分地与进入主体部分110的凹腔内部的狭缝170(下文进一步详细进行描述)相交。

[0037] 稳定杆150可以是凸起或另外增厚区域，其加强矩形部分的稳定性并且有助于使这个区成形为患者口腔的口内后部形状。图6A是示例性口腔件的示例性稳定杆150的近距离视图。图6B是图6A的颊牵开器连接器部分中的示例性加强杆的截面图。

[0038] 在一些实施方案中，所述内部矩形加强杆或稳定杆150可定位在内部波形桥接结构180的远侧并且附接到主体和矩形部分的后表面内侧。这种稳定杆150可定位在以下区域：其中所定位的口腔件开始从最后部下颌颊齿的舌侧、围绕最后部牙齿的远极面到最后部下颌颊齿的前侧进行包裹，从而有助于使所述口腔件成形为患者口腔的大体口内形状。

[0039] 所述口腔件的各种实施方案还可包括在前表面上延伸超过主体的约三分之二的纵向开口狭缝170。沿着主体的中心延伸穿过所述矩形和所述箭头的大部分，这种狭缝170可有助于俘获并且抽吸水、唾液以及杂物，并且有助于清洗和维修。

[0040] 此外，所述口腔件的主体可包括在内表面上的桥接结构180以确保前表面和后表面在抽吸期间保持分离。图1E是所述口腔件的截面图，其中示出了桥接结构180。图5是桥接结构180的近距离视图，其中不具有主体部分的周壁。这种桥接结构180可形成为波状凸起，其大体上对应于前壁与后壁之间的距离，从而在其波峰处基本上(例如，在1mm内)延伸全部距离并且在其波谷处基本上与所述表面齐平。在一些实施方案中，桥接结构180可居中定位在所述口腔件的主体部分110中。桥接结构180的波形之间的间隙(或波谷)有助于将水和唾液抽吸驱动转移到抽吸连接器部分120并且最终进入中央抽吸真空室。在一些实施方案中，

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

桥接结构180可遵循标志(例如,箭头或护盾)的形状。

[0041] 抽吸连接器部分120可以是卵形并且也可以附接到主体部分110。抽吸连接器部分120可以形成为具有比主体部分110更厚的壁并且被配置来附接到高抽吸真空转接器并且有助于将水、唾液以及杂物从口腔转移到外部转接器以便移除。抽吸连接器部分120还可包括有助于将所述口腔件滑动到转接器上达所期望深度的内部止挡件。抽吸连接器部分120可另外具有对应于可移除绑带(strap)的外部凹面缺口区210,以便当所述绑带处于适当位置时,所述绑带的外壁和连接器部的其余部分可以齐平。

[0042] 颊牵开器部分130被示出为锤头形远侧区,其可以附接到主体部分110。图7A是示例性口腔件中的示例性颊牵开器部分130的近距离视图。图7B是图7A的示例性颊牵开器部分130的截面图。

[0043] 所述口腔件可以与口腔支撑件160一起使用,如图1(具有口腔支撑件160)和图2(示出为不具有口腔支撑件160)所示。图3A-E提供了示例性口腔支撑件160的不同的近距离视图。可移除绑带310可以附接到口腔支撑件160,所述口腔支撑件160可用于撑开患者的口腔和牙齿。在这方面,抽吸连接器部分120可另外具有从抽吸连接器部分120的后侧突出的外部插塞220(图2C)。这种插塞220可对应于口腔支撑件160中的开口并且用于与所述开口连接。口腔支撑件160可由于开口中存在插塞220而得到加强,从而得到更抗压的、几乎不可压缩的且稳定的口腔支撑件160。在一些实施方案中,抽吸连接器部分120还可具有提供与外部高抽吸真空转接器上的对应凸起(例如,其也可成形为标志)额外联锁的保险开关230(例如,其可成形为标志)。

[0044] 口腔支撑件160可以由增厚的硅酮材料制成,所述硅酮材料与对应于抽吸连接器部分的圆周的弹性绑带注射成型为单件。口腔支撑件160具有内部矩形凹槽,其被设计成与所述口腔件的抽吸连接器部分120的外部矩形凸塞220紧密配合。口腔支撑件可以被制成具有不同尺寸以用于不同大小的口腔。因为口腔支撑件和口腔件是彼此可拆卸的,所以可以根据特定患者口腔的需要来配合和匹配每一个的不同尺寸。

[0045] 本文所述的口腔件可以与单件式可高压灭菌的高抽吸真空转接器一起使用。这种高抽吸真空体转接器可以由单一的均质材料制成。具有单杆设计的这种真空转接器可以与所有当前的高抽吸真空装置和吸涎器相同的方式作用来控制水、唾液以及杂物从口腔到外部真空源的移除。所述单杆可以被设计来控制水、唾液以及杂物穿过抽吸连接器部分内的单一大的排泄管道从至少部分地被这样封闭的主体移除。

[0046] 尽管上文已描述了各种实施方案,但应了解所述实施方案仅是以举例的方式呈现而不具限制性。本说明书并不意图将本发明的范围限制于本文所述的特定形式。因此,优选实施方案的广度和范围不应受任何上述示例性实施方案的限制。应了解以上描述是说明性的而不是限制性的。相反地,本说明书意图涵盖可包含在如所附权利要求限定的和以其他方式由本领域普通技术人员所理解的本发明的精神和范围内的此类替代、修改和等效物。因此,不应参照上面的描述来确定本发明的范围,而是应参照所附的权利要求和其等效物的全部范围来确定本发明的范围。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

Information:	
Total Files Size (in bytes):	6214696

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT
Under 37 C.F.R. § 1.56 and 1.97-1.98

Examiner:

Pursuant to the provisions of 37 C.F.R. §§ 1.56 and 1.97-98 of the Rules of Practice in Patent Cases, enclosed herewith is form PTO-SB-08, listing several references. The Examiner is requested to make these references of official record in the application.

The references cited may be material to examination of the application and are submitted in compliance with the Applicants' duty of disclosure as defined by 37 C.F.R. § 1.56.

No representation is made or intended as to the completeness of this list, nor is the inclusion of any reference an admission that it is prior art or pertinent to this application.

The Commissioner is hereby authorized to charge any necessary fee to Account Number 50-1662.

Respectfully submitted,
POLSINELLI LLP

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.

2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.

3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.

4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).

5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.

6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).

7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.

8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.

9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

AMENDMENT

In response to the Final Office Action mailed June 7, 2016 (*Office Action)* and the Advisory Action mailed September 22, 2016 (*Advisory Action*), please amend the above-identified application as follows. Applicants make the following remarks.

Amendments to the Drawings begin on page 2 of this paper.

Amendments to the Claims begin on page 3 of this paper.

Remarks/Arguments begin on page 6 of this paper.

IN THE DRAWINGS

A replacement sheet containing a replacement Fig. 5 is submitted herewith. No new matter has been added.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

IN THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

1. (currently amended) A mouthpiece comprising:

a main body portion having a distal portion and a proximal portion, the main body configured as a pocket having an interior defined by:

an anterior wall defined by an exterior edge, the anterior wall comprising a slit extending along a longitudinal axis of the main body portion between the distal portion and the proximal portion, the slit comprising an opening that allows fluids to enter into the interior of the pocket when suction is applied within the interior of the pocket,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, and

a side wall connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall.

2. (original) The mouthpiece of claim 1, wherein the posterior wall further includes a stability bar protruding from an interior surface of the posterior wall and along a longitudinal axis of the main body.

3. (original) The mouthpiece of claim 2, wherein the stability bar is aligned with the slit on the anterior wall.

4. (original) The mouthpiece of claim 1, wherein the main body portion is formed by injection-molding as one piece.

5. (previously presented) The mouthpiece of claim 1, wherein a material used to form the main body portion is a flexible, translucent, high heat-resistant, autoclavable silicone-based material.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

6. (original) The mouthpiece of claim 1, wherein the anterior wall and the posterior wall have different thicknesses.

7. (currently amended) The mouthpiece of claim 1, wherein flexibility of material of the anterior wall ~~the slit~~ allows portions of the anterior wall to be pulled open at the slit to expose the interior of the pocket.

8. (previously presented) The mouthpiece of claim 1, further comprising a cheek retractor portion connected to the main body portion and having a surface that applies pressure when bent, wherein the pressure is based on resilience of the cheek retractor portion.

9. (previously presented) The mouthpiece of claim 8, wherein the cheek retractor portion comprises an extension of the pocket and wherein the slit extends into the extension of the pocket.

10. (previously presented) The mouthpiece of claim 1, further comprising a bridge structure comprising a plurality of protrusions protruding from an interior surface of the posterior wall, wherein the protrusions do not attach to the anterior wall.

11. (previously presented) The mouthpiece of claim 10, wherein the protruding bridge structure protrusions comprise a plurality of spaced contact points.

12. (previously presented) The mouthpiece of claim 11, wherein the bridge structure protrusions protrude from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.

13. (original) The mouthpiece of claim 12, wherein spaces between the contact points are at troughs of the wave shape.

14. (currently amended) The mouthpiece of claim 1, further comprising a suction connector portion that connects the interior of the pocket to a vacuum source, wherein activation of the vacuum source applies the suction to the interior of the pocket, wherein the ~~provides suction of~~ fluids [[from]] that enter through the slit opening into the interior of the pocket are suctioned toward the vacuum source.

15. (original) The mouthpiece of claim 1, further comprising a

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

detachable mouth prop.

16. (original) The mouthpiece of claim 15, wherein the detachable mouth prop comprises a bite block portion and a strap portion.

17. (original) The mouthpiece of claim 16, wherein the bite block portion and strap portion are injection-molded in one piece.

18. (original) The mouthpiece of claim 15, wherein the bite block portion comprises an opening corresponding to a plug connected to the main body.

19. (previously presented) A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by: an anterior wall defined by an exterior edge, the anterior wall comprising a base portion at one end of the anterior wall, wherein the anterior wall is thicker at the base portion than at another portion at another end of the anterior wall,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, and

a side wall connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall.

20. (previously presented) A mouthpiece comprising:

a main body portion configured as a pocket having an interior defined by: an

anterior wall defined by an exterior edge,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, the posterior wall comprising a base portion at one end of the posterior wall, wherein the posterior wall is thicker at the base portion than at another portion at another end of the posterior wall, and a side wall connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall.

REMARKS

Status of the Claims

The Applicants have amended claims 1, 7, and 14. No new matter has been added. In view of the following remarks, Applicants respectfully submit that the application is in condition for allowance.

Interview Summary

The Applicants thank the Examiner for the interview conducted with the Applicants representative on September 15, 2016. During the interview, the proposed amendments were discussed along with newly identified reference U.S. Patent No. 6, 974,321 to Hirsch et al., (*Hirsch*) was discussed. No agreement was reached during the interview.

Rejections under 35 U.S.C. §103

Claims 1-4, 6-14, and 19-20 were rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 3,802,081 to Rogers ("*Rogers*") in view of U.S. Patent Application Publication No. 2013/0095450 to Ames ("*Ames*"). Claim 5 was rejected under 35 U.S.C. 103(a) as being unpatentable over *Rogers* in view of *Ames* and further in view of U.S. Patent No. 5,890,899 to Sclafani ("*Sclafani*"), while claims 15-18 were as being unpatentable over *Rogers* in view of *Ames* and further in view of U.S. Patent No. 4,167,814 to Schubert ("*Schubert*"). Applicants respectfully disagree.

Regarding independent claim 1, Applicants submit that *Rogers* does not disclose a slit comprising an opening that allows for fluids to enter into the interior of the pocket when suction is applied to the interior of the pocket. Rather, *Rogers* discloses a slit with exceedingly limited dimensions in order to receive the lugs of the rigid tongue guard member of *Rogers*. Further, the slit of *Rogers* is not open as the tongue guard is received in the slit and clearly intended to obstruct the opening when assembled and when used as intended. *Rogers* recites "the material of the tubular member 23 being sufficiently elastic to allow the lugs to be forced through the-apertures so that the narrow neck portions 21 of lugs 18 and 19 and the corresponding relatively narrow neck portion of lug 20 finally are lockingly received in the

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

apertures 24 and the slot 25. " (emphasis added) *See Rogers at col. 2, lines 36-41.* Applicants submit that *Rogers* does not teach a slit in the anterior wall that is configured to allow fluids to enter into the interior of the pocket when suction is applied within the interior of the pocket . Furthermore, modifying the slit 25 of *Rogers* to permit such fluid flow would render it unsatisfactory for its intended purpose to "lockingly" receive the lug forced therein.

For at least the foregoing reasons, Applicants submit that *Rogers* fails to teach a slit extending along the length of the main body as claimed. The *Ames* reference does not remedy this deficiency of *Rogers*. As such, the combination of *Rogers* and *Ames* fails to teach each element of amended clam 1. Withdrawal of the rejection is respectfully requested.

Regarding independent claims 19 and 20, Applicants submit that the Office Action is improperly combining the detent mechanism (16) and the tube (23) to read upon previously presented claims 19 and 20. Applicants submit that *Rogers* does not disclose, suggest, or teach any variation in the thickness of the anterior or posterior wall of the flexible tube (23) of *Rogers*, which alone has been equated to the claimed main body and its posterior and anterior walls. *See the Office Action at pages 2 and 4.* Rather, *Rogers* discloses a uniform flexible tube wall that is engaged to the rigid tube (12) using the detent mechanism 16 formed on the rigid tube and that projects through the aperture 26. While the combined thickness of the rigid suction tube (12), detent mechanism (16), and flexible tube (23) may be greater than that of the flexible tube alone, claims 19 and 20 address the structure of the anterior or proximal walls of the main body portion specifically. *Rogers* does not disclose or teach that the wall of the alleged main body is any thicker at one end versus another end. For at least this reason, Applicants submit that claims 19 and 20 are not rendered obvious by *Rogers* in view of *Ames*.

Applicants also submit that the *Hirsch* reference discussed during the Interview of September 15, 2016, also fails to teach the slit in the anterior wall configured to allow fluids to enter into the interior of the pocket. *Hirsch* discloses an intraoral illumination device that includes cheek retractor that receives a light dispersion piece (24). The light dispersion piece is received in receiving channel (62). Applicants that this receiving channel is not a slit configured to allow fluid to enter the device when suction is applied within the interior of the pocket, but

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

rather, is configured to receive the light dispersion piece (24). The *Hirsch* device collects fluid through holes (60) which communicate with an internal channels (58). The channel (62) is not configured to receive fluid like the claimed slit and is sealed off by the light dispersion piece (24) during intended usage of the *Hirsch* device.

Applicants further submit that removing the light dispersion piece (24) from the *Hirsch* device to provide an open channel in the anterior wall would render the device unsatisfactory for its intended use of providing illumination within a patient's mouth. Thus the light dispersion piece (24) is essential to the *Hirsch* device. Aside from housing the dispersion piece, *Hirsch* does not disclose, suggest, or teach any elongated orifice or aperture for receiving fluid into the interior pocket of the device. For at least these reasons, Applicants submit that *Hirsch* does not disclose an anterior wall slit configured to allow fluid to enter the interior pocket when suction is applied within the pocket. Additionally, it would be improper to modify *Hirsch* and omit the light dispersion piece (24) as this would render *Hirsch* unsatisfactory for its intended purpose. *See MPEP 2143.01 (V).*

For at least the same reasons as amended claim 1, dependent claims 2-18 are also patentable over the cited prior art references as *Rogers* fails to teach all of the limitations of independent claim 1. For example, dependent claim 7 further claims that the flexibility of the anterior wall allows the wall to be pulled open at the slit. This allows for cleaning and maintenance, as described in the present application at paragraph [0041]. For at least the same reasons as discussed regarding claim 1, Applicants submit that the slit of *Rogers* is not articulable for accessing the interior pocket. Such articulation would render it unsuitable to lockingly engage the lugs forced therein.

Applicants submit that *Ames*, *Sclafani*, and *Schubert* fail to remedy the deficiencies of *Rogers*. As such, the combination of *Rogers* with the other cited references fails to teach all of the limitations of dependent claims 2-18. Withdrawal of these rejections is respectfully requested. Not all reasons for allowability and distinctions over the asserted combination of prior art references of record have been discussed and no inference regarding such should be made.

CONCLUSION

Based on the foregoing, it is submitted that Applicants' invention as defined by the claims is patentable over the references of record. Issuance of a Notice of Allowance is solicited.

Applicants are submitting this response with a Request for Continued Examination. Applicants' attorney welcomes the opportunity to discuss the case with the Examiner in the event that there are any questions or comments regarding the response or the application.

The Commissioner is hereby authorized to withdraw any additional fees that may be required or credit any overpayment to Deposit Account 50-1662, referencing the docket number above.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Office Action Summary	Application No. 14/228,057	Applicant(s) NGUYEN ET AL.	
	Examiner HAO D. MAI	Art Unit 3732	AIA (First Inventor to File) Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE *3* MONTHS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on *12/12/2016*.

☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

2a)☐ This action is **FINAL**. 2b)☒ This action is non-final.

3)☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.

4)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims*

5)☒ Claim(s) *1-20* is/are pending in the application.

5a) Of the above claim(s) _____ is/are withdrawn from consideration.

6)☐ Claim(s) _____ is/are allowed.

7)☒ Claim(s) *1-11 and 14-20* is/are rejected.

8)☒ Claim(s) *12 and 13* is/are objected to.

9)☐ Claim(s) _____ are subject to restriction and/or election requirement.

* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.

Application Papers

10)☐ The specification is objected to by the Examiner.

11)☐ The drawing(s) filed on _____ is/are: a)☐ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

DETAILED ACTION

Notice of Pre-AIA or AIA Status

1. The present application is being examined under the pre-AIA first to invent provisions.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/12/2016 has been entered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of 35 U.S.C. 112(b):

> (b) CONCLUSION.—The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the inventor or a joint inventor regards as the invention.
>
> The following is a quotation of 35 U.S.C. 112 (pre-AIA), second paragraph:
> The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112(b) or 35 U.S.C. 112 (pre-AIA), second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the inventor or a joint inventor, or for pre-AIA the applicant regards as the invention.

- Claim 1 recites “a main body *portion*” (lines 2, 5) and "the main body" (line 2) which are inconsistent.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of pre-AIA 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. **Claims 1, 4-11, and 14-20, are rejected under pre-AIA 35 U.S.C. 102(b) as being anticipated by Hirsch (2006/0063129).**

Regarding claim 1, Hirsch discloses a mouthpiece 20 comprising: a main body portion 22 (Fig. 2; paragraph 49) having a distal portion 52 and a proximal portion 50. The main body is configured as a pocket having an interior (channel 58) defined by an anterior wall (best pointed to by reference numeral 50 in Fig. 4) defined by an exterior edge, and a posterior wall (best pointed to by reference numeral 54 in Fig. 3) defined by an exterior edge that corresponds to the exterior edge of the anterior wall. The main body 22 has a side wall (i.e. surrounding edge of the two opposite walls) connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall (Fig. 2). Hirsch discloses slit 68 extending along a longitudinal axis of the main body portion between the distal portion and the proximal portion (Fig. 4). The slit 68 comprising an opening that allows fluids to enter into the interior of the pocket when suction is applied within the interior of the pocket (paragraph 52).

As to claim 4, note that the claim language "by injection-molded" is a product-by-process recitation in a product claim. Even though product-by-process recitation is limited by and defined by the recited process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe,* 777

F.2d 695, 227 USPQ 964 (Fed. Cir. 1985). In this case, Hirsch discloses the end product and the structures thereof as claimed as detailed above, wherein the main body is formed as one piece. The burden is shifted to applicant to show an unobvious difference between the cited prior art's device and the invention that would have resulted from the injection molding process.

As to claim 5, the device is disclosed to be formed of a flexible, translucent, high heat-resistant, autoclavable silicone-based material of Pebax (paragraph 49). As to claim 6, Figs. 8A-8B show the anterior and posterior walls having different thicknesses. As to claim 7, since the device is disclose to be formed of flexible silicone material (paragraph 49), which would portions of the anterior wall to be pulled open at the slit to expose the interior of the pocket.

As to claim 8, Hirstch discloses the device further comprises a cheek retractor portion 52 having a surface that applies pressure when the mouthpiece is bent, wherein the pressure is based on resilience of the elastomeric material from which the cheek retractor portion is formed. As to claim 9, the cheek retractor portion 52 comprises an extension 52 of the pocket and wherein the slit 68 extends into the extension of the pocket (Fig. 4).

As to claim 10, the device to shown to further comprise a bridge structure 24 comprising a plurality of protrusions (walls of channels 80 and 82, best shown in Fig. 8A) protruding from an interior surface of the posterior wall (best pointed to by reference 60 in Figs. 8A-8B) and substantially extending a distance between the anterior wall and the posterior wall, wherein the bridge structure is not attached to the anterior wall (best pointed to by reference numeral 56 in Figs. 8A-8B). As to claim 11, the plurality of protrusions of the bridge structure 24 comprises a plurality of spaced contact points, i.e. spaced-apart extending walls of 24 forming channels 80 and 82 (Figs. 8A-8B).

As to claim 14, Hirsch discloses a suction connector portion, e.g. suction tube 114 shown in Figs. 9-10, that connect the interior of the pocket to a vacuum source, wherein

activation of the vacuum source applies the suction to the interior of the pocket, wherein fluids that enter through the slit opening into the interior of the pocket are suctioned toward the vacuum source (Figs. 5-7; paragraph 62).

As to claims 15-18, Hirsch discloses a mouth prop 26 having a bite block portion 94 and a strap portion 108. The bite block portion 94 is shown having an opening 100 corresponding to a plug 86/88 connected to the main body (Fig. 2). The strap portion 108 is capable of fitting around a suction connector portion, e.g. a suction tube (Fig. 2). Particularly to claim 17, the bite block portion 94 and the strap portion 108 is shown to be one piece (Fig. 3). Note that the claim language "injection-molded" is a product-by-process recitation in a product claim. Even though product-by-process recitation is limited by and defined by the recited process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe,* 777 F.2d 695, 227 USPQ 964 (Fed. Cir. 1985). In this case, Hirsch discloses the end product and the structures thereof as claimed as detailed above, wherein the bite block portion 94 and the strap portion 108 is shown to be one piece (Fig. 3). The burden is shifted to applicant to show an unobvious difference between the cited prior art's device and the invention that would have resulted from the injection molding process.

Regarding claims 19-20, Hirsch discloses the mouthpiece substantially as claimed as detailed above with respect to claim 1. Note that Figs. 8A-8B show the anterior and posterior walls being thicker at the base portion (toward 22) than at another portion (e.g. 56 and 60) at another end of the anterior wall.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

8. **Claims 2-3 is rejected under pre-AIA 35 U.S.C. 103(a) as being unpatentable over Hirsch in view of Black et al. (2009/0274991).**

As to claim 2, Hirsch discloses the invention substantially as claimed except for a stability bar. Black et al. discloses mouthpiece having a stability bar (stiffener 247) on the anterior wall (paragraph 127). It would have been obvious to one having ordinary skill in the art at the time the invention was made to include such stability bar to Hirsch's mouthpiece in order to reinforce the mouthpiece and prevent kinking when the mouthpiece is flexed or bent as explicitly taught by Black et al. (paragraph 127). As to claim 3, the incorporated stability would be aligned, i.e. along the longitudinal axis, with the slit on the anterior wall.

Allowable Subject Matter

9. Claims 12-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

10. Applicant's arguments with respect to the amended claims have been considered but are moot because the arguments do not apply to any of the references being used in the current rejection.

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Hao D. Mai whose telephone number is (571) 270-3002. The examiner can normally be reached on Monday-Friday 8:00AM – 4:30PM. If attempts to reach the examiner by telephone are unsuccessful, please contact the examiner's supervisor, Cris Rodriguez, at (571) 272-4964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT
Under 37 C.F.R. § 1.56 and 1.97-1.98

Examiner:

Pursuant to the provisions of 37 C.F.R. §§ 1.56 and 1.97-98 of the Rules of Practice in Patent Cases, enclosed herewith is form PTO-SB-08, listing several references. The Examiner is requested to make these references of official record in the application.

The references cited may be material to examination of the application and are submitted in compliance with the Applicants' duty of disclosure as defined by 37 C.F.R. § 1.56.

Applicants hereby declare, pursuant to 37 C.F.R. §1.97(e)(2), that no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application and, to the knowledge of the person signing the certification after having made a reasonable inquiry, no item of information contained in the information disclosure statement was

known to any individual designated in 37 C.F.R. §1.56(c) more than three months prior to the filing of the information disclosure statement.

No representation is made or intended as to the completeness of this list, nor is the inclusion of any reference an admission that it is prior art or pertinent to this application.

The Commissioner is hereby authorized to charge any necessary fee to Account Number 50-1662.

Abstract of CN102026587 (A)

The present invention relates to a TIPS (Twist Isolated Plate of Suction) for protecting the tongue, to a bite block, and to an intraoral illumination device having a saliva-sucking function. More particularly, the present invention relates to a TIPS for protecting the tongue, to a bite block, and to an intraoral illumination device having a saliva-sucking function, which enables a dental patient to undergo examination and treatment with the tongue thereof comfortably protected, quickly removes saliva from the throat of the patient to minimize disagreeable feelings of irritation, and isolates the tongue of the patient to the side opposite the side of the mouth to be treated, and also lightens the oral cavity of the patient to enable a dentist to perform examination and treatment with ease.

(54)发明名称

具有吸除唾液功能的舌头保护装置、牙垫及口腔照明设备

(57)摘要

本发明公开一种具有唾液吸除功能的舌头保护装置、牙垫及口腔照明设备。具体来说，能使得患者的舌头得到安全保护的情况下进行牙科治疗；迅速吸除从咽喉涌来的唾液减少异物感；把舌头隔离在需要进行口腔治疗一侧的另一侧，确保治疗的空间；同时完全照亮患者的口腔内部，使医生的治疗能更容易进行的具有唾液吸除功能的舌头保护装置，牙垫和唾液吸除功能的口腔照明设备。

CN 102026587 A

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

1. 一种舌头保护装置，所述舌头保护装置安装在由口腔内一侧上下牙齿咬住并打开口腔的牙垫上，所述舌头保护装置一端与所述牙垫连接，另一端向口腔内另一侧舌根部延伸，在牙科治疗时保护舌头。

2. 根据权利要求 1 所述的舌头保护装置，其特征在于：包括与所述牙垫连接的牙垫连接部、从牙垫连接部向所述另一侧舌根部弯曲延长的装置主体和从所述装置主体的一侧由上向下延长保护舌头一侧的舌头保护部位。

3. 根据权利要求 2 所述的舌头保护装置，其特征在于：所述舌头保护部位保护舌尖部，使舌头与口腔内另一侧牙齿隔离。

4. 根据权利要求 1-3 中任何一项所述的舌头保护装置，其特征在于：所述舌头保护装置的另一端是以假想的延长轴为中心从所述舌头保护装置的一端延长，并以所述延长轴为中心以一定的角度弯曲延长，这样能保护舌头的一侧面。

5. 根据权利要求 1-3 中任何一项所述的舌头保护装置，其特征在于：所述舌头保护装置的一端到另一端设有通孔，且通孔中装有唾液吸管，用于吸除从咽侯涌到口腔内另一侧舌根处的唾液。

6. 根据权利要求 5 所述的舌头保护装置，其特征在于：所述唾液吸管为多数个。

7. 根据权利要求 4 所述的舌头保护装置，其特征在于：所述舌头保护装置的一端到另一端被穿孔打通，且孔中装有唾液吸管，用于吸除从咽侯涌到口腔内另一侧舌根处的唾液。

8. 根据权利要求 7 所述的舌头保护装置，其特征在于：所述唾液吸管为多数个。

9. 一种牙垫，包括由口腔内一侧的上下牙齿咬住并能打开口腔的牙垫主体，所述牙垫主体的一端被穿孔形成插入外部光源的光源插入孔；所述牙垫主体位于口腔内侧的部分设有装置连接孔；在所述牙垫主体上设有光源插入孔的一端设有唾液传递孔，唾液传递孔与所述光源插入孔相互分离，唾液传递孔与所述装置连接孔相连通，唾液传递孔中装有唾液传递管，唾液传递管与外部吸入排管连接，经所述装置连接孔流入的唾液通过唾液传递管传递到所述吸入排管。

10. 根据权利要求 9 所述的牙垫，其特征在于：所述装置连接孔是相互分离的多数个装置连接孔，所述唾液传递管分别穿过装置连接孔，所述唾液传递管是相互分离的多数个唾液传递管。

11. 根据权利要求 10 所述的牙垫，其特征在于：所述装置连接孔包括第 1 装置连接孔和第 2 装置连接孔；所述唾液传递管包括分别设置在第 1 唾液传递孔和第 2 唾液传递孔中的第 1 唾液传递管和第 2 唾液传递管。

12. 根据权利要求 9 所述的牙垫，其特征在于：所述装置连接孔是相互分离的多数个装置连接孔，所述唾液传递管在所述装置连接孔处分离，并能分别穿过多个装置连接孔。

13. 根据权利要求 12 所述的牙垫，其特征在于：所述装置连接孔是相互分离的第 1 装置连接孔和第 2 装置连接孔两个装置连接孔。

14. 根据权利要求 9-13 中任何一项所述的牙垫，其特征在于：所述的牙垫主体的上部和下部设有上下牙齿咬住的凹槽。

15. 根据权利要求 14 所述的牙垫，其特征在于：所述的凹槽处有防止上下牙齿打滑

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

的突起。

16. 根据权利要求 14 所述的牙垫，其特征在于：所述的突起是在凹槽的底部。

17. 根据权利要求 9 所述的牙垫，其特征在于：所述牙垫主体是能使光源的光透过的透明牙垫主体。

18. 一种口腔照明设备，该设备包括设有光源的机头，所述机头上设有光源的一端与在口腔内一侧用上下牙齿咬住打开口腔的牙垫连接，使得所述光源的光传递到口腔内部，所述牙垫一侧面上连接保护舌头的一侧面并向口腔内另一侧舌根延长的舌头保护装置。

19. 根据权利要求 18 所述的口腔照明设备，其特征在于：所述的舌头保护装置包括与所述牙垫连接的牙垫连接部、从所述牙垫连接部向口腔内另一侧舌根弯曲延长的装置主体和从所述装置主体的一侧向下部延长保护舌头一侧面的舌头保护部位。

20. 根据权利要求 19 所述的口腔照明设备，其特征在于：所述舌头保护部位着重保护舌尖部，使舌头与口腔内另一侧牙齿隔离。

21. 根据权利要求 18-20 中任何一项所述的口腔照明设备，其特征在于：所述舌头保护装置的另一端是以假想的延长轴为中心从所述舌头保护装置的一侧延长，并以所述延长轴为中心以一定的角度弯曲延长，这样能保护舌头的一侧面。

22. 根据权利要求 18-20 中任何一项所述的口腔照明设备，其特征在于：所述舌头保护装置的一端到另一端被穿孔打通，且穿孔中装有吸除从咽喉涌到口腔内另一侧舌根处唾液的唾液吸管。

23. 根据权利要求 22 所述的口腔照明设备，其特征在于：所述唾液吸管为多数个。

24. 根据权利要求 21 所述的口腔照明设备，其特征在于：所述舌头保护装置的一端到另一端被穿孔打通，且穿孔中装有吸除从咽喉涌到口腔内另一侧舌根处唾液的唾液吸管。

25. 根据权利要求 24 所述的口腔照明设备，其特征在于：所述唾液吸管是多数个。

26. 根据权利要求 22 所述的口腔照明设备，其特征在于：所述牙垫位于口腔内一侧的是由上下牙齿咬住的牙垫主体，所述牙垫主体的一端被穿孔，成为光源插入的光源插入孔；所述牙垫主体在口腔内的部分有连接所述舌头保护装置的装置连接孔。

27. 根据权利要求 26 所述的口腔照明设备，其特征在于：所述机头的一端与另一端之间被打通，所述机头与连接吸入排管的外部吸入器连接，所述牙垫与所述吸入排管连接，由所述装置连接孔流入的唾液经唾液传递管传递到所述吸入排管。

28. 根据权利要求 27 所述的口腔照明设备，其特征在于：所述装置连接孔是相互分离的多数个装置连接孔，所上述唾液传递管是分别穿过所述装置连接孔的相互分离的多数个唾液传递管。

29. 根据权利要求 28 所述的口腔照明设备，其特征在于：所述吸入排管是相互分离的多数个吸入排管，所述唾液传递管分别连接所述吸入排管。

30. 根据权利要求 29 所述的口腔照明设备，其特征在于：所述吸入排管分为第 1 吸入排管和第 2 吸入排管两个吸入排管，所述装置连接孔分为第 1 连接孔和第 2 连接孔两个装置连接孔，所述唾液传递管分别连接第 1 吸入排管和第 2 吸入排管，第 1 唾液传递管和第 2 唾液传递管分别穿过所述第 1 装置连接孔和第 2 连接孔。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

31. 根据权利要求 27 所述的口腔照明设备，其特征在于：所述装置连接孔是相互分离的多数个装置连接孔，所述唾液传递管被所述装置连接孔分开，并穿过所述装置连接孔。

32. 根据权利要求 30 所述的口腔照明设备，其特征在于：所述牙垫主体的上部和下部有上下牙齿咬住时的凹槽。

33. 根据权利要求 32 所述的口腔照明设备，其特征在于：所述凹槽处有防止上下牙齿打滑的突起。

34. 根据权利要求 33 所述的口腔照明设备，其特征在于：所述突起是在所述凹槽的底部。

35. 根据权利要求 30 所述的口腔照明设备，其特征在于：所述机头包括控制所述吸入排管开闭的阀门。

36. 根据权利要求 35 所述的口腔照明设备，其特征在于：所述阀门位于所述机头的内部同时与所述吸入排管相连，阀门是能选择性的开闭所述吸入排管的开闭阀门。

37. 根据权利要求 35 所述的口腔照明设备，其特征在于：所述机头还包括驱动所述开闭阀门的阀门驱动杠杆。

38. 根据权利要求 37 所述的口腔照明设备，其特征在于：在所述机头上某特定部位设有光源的开关。

39. 根据权利要求 38 所述的口腔照明设备，其特征在于：所述光源开关是触摸开关。

40. 根据权利要求 18 所述的口腔照明设备，其特征在于：所述牙垫是能使所述光源的光透过的透明牙垫。

41. 根据权利要求 18 所述的口腔照明设备，其特征在于：所述光源是 LED 光源。

42. 根据权利要求 18-20 项中任何一项所述的口腔照明设备，其特征在于：在所述机头的某一特定部位上有向口腔内部照射紫外线的紫外线灯。

43. 根据权利要求 42 所述的口腔照明设备，其特征在于：所述紫外线灯在所述光源内。

44. 根据权利要求 18-20 项中任何一项所述的口腔照明设备，其特征在于：所述机头的某一特定部分上还包括了取得口腔内部治疗时影像的摄像头。

45. 根据权利要求 44 所述的口腔照明设备，其特征在于：所述摄像头设置在光源上。

具有吸除唾液功能的舌头保护装置、牙垫及口腔照明设备

技术领域

[0001] 本发明是具有唾液吸除功能的舌头保护装置、牙垫及口腔照明设备。具体来说，是一种能使患者的舌头在处于被保护的状态下进行牙科治疗，并能抽出咽喉部位涌出的唾液以减少异物感，把舌头隔离在需要进行治疗一侧的另一侧能够确保治疗的空间，同时为患者的口腔内部提供全方位的照明使医生的牙科治疗更便利的设备。

背景技术

[0002] 一般的牙科治疗为了对患者的口腔内部进行观察是利用外部光源对患者的口腔内部进行照明来确保医生和护士的视线。

[0003] 但即使是对于熟练的医生和护士来说，利用外部光源对口腔内部进行照明同时还要进行牙科治疗是非常困难的事情，利用外部光源对狭长口腔内部进行照明是不可能完全照亮口腔内部的。

[0004] 图 1 是传统的口腔照明设备的示意图，图 2 是传统的口腔照明设备在口腔内使用的示意图，图 3 是为了说明传统的口腔照明设备吸除唾液过程的示意图。

[0005] 参照这些示意图，传统的口腔照明设备包括一侧与光纤维结合的管子连接孔 11 形成管子连接部位 10，上下两侧的薄片 (21，22) 可以把舌头推向内侧，在中间形成舌头保护部分 20；还包括与上述管子连接部位 10 和上述舌头保护部分 20 之间形成的牙垫 30，患者可以用牙齿咬住牙垫 30 在口腔内起到固定作用。

[0006] 即传统的口腔照明设备是当患者在口腔内用一侧的上下牙齿咬住牙垫 30 时，舌头保护部分 20 从舌头的前方插入把舌头推向口腔内侧以确保医生实施手术的空间，并且，在管子连接部位 10 的光纤维连接孔 53 中插入光纤维对口腔内部进行照明。

[0007] 因此，上述光纤维在口腔内部发光，能产生对口腔内部所有部位均匀的照明的效果。

[0008] 并且，在牙垫 30 上设有突起 32 和凹槽 31，防止口腔照明设备在患者的牙齿间打滑脱落，另外，延长的分支部分 40 固定在口腔另一侧的上下牙齿间，使得口腔照明设备在患者口腔内牢牢的固定住。

[0009] 利用上述管子连接部位 10 处形成的第 1 吸入孔 51，第 2 吸入孔 52、牙垫吸入孔 54 和舌头保护部分 20 处的吸入细孔 23 吸收口腔内的唾液 1 并向外部排出。

[0010] 所述吸入细孔 23 虽然具有吸入口腔内各部位唾液的效果，但是它的缺点是因为没有直接与所述吸入孔 (51，52，54) 连接，导致吸力不强。

[0011] 另外，传统的口腔照明设备中的舌头保护部分 20 是从前方把舌头推向口腔内侧固定，因此患者可能感觉舌头受到压迫，只有在唾液从咽喉部位上涌到舌头前方时才能通过上述吸入细孔 23 吸出唾液 1，在次过程中因唾液引起的异物感也是一大缺点。

[0012] 并且，传统的口腔照明设备的管子连接部位 10、舌头保护部分 20 和牙垫 30 是制作成一体的，体积较大会对患者的心理上造成不安，而且清洗不便也是一个缺点。

发明内容

[0013] 为了解决现有技术中存在的上述问题，本发明的目的是提供一种插入口腔内部进行口腔照明，并能吸除口腔内唾液的舌头保护装置、牙垫及口腔照明设备，能使得患者在牙科治疗时舌头得到保护，利用本发明口腔中的唾液能被迅速吸除，而且清洗方便，同时能对口腔内部各部位进行均匀照明，另外在使用过程中患者的舌头可以免受压迫，把舌头隔离在治疗一侧的另一侧，在保护舌头的同时能充分保证口腔内一侧的治疗空间。

[0014] 本发明是一种能使从咽喉涌出的唾液能被迅速吸除并排到外部，减少因唾液引起的异物感的舌头保护装置、牙垫及口腔照明的设备。

[0015] 本发明是利用患者口腔一侧的上下牙齿咬住牙垫使口腔张开，同时利用插入牙垫内部的光源对口腔内部直接照明的舌头保护装置、牙垫及口腔照明设备。

[0016] 本发明是一个舌头保护装置与牙垫相互分离的舌头保护装置、牙垫及口腔照明设备。

[0017] 本发明在治疗时能对口腔内部进行杀菌，可以为医生、患者提供拍摄治疗过程的舌头保护装置、牙垫及口腔照明设备。

[0018] 本发明的目的并不只限于上述提及的目的，未提及的其他目的通过以下内容本领域的技术人员将能够清楚理解。

[0019] 为了达到上述目的，本发明的技术方案是这样实现的：一种舌头保护装置、牙垫及口腔照明设备，包括由口腔内一侧的上下牙齿咬住并能打开口腔的牙垫和舌头保护装置，舌头保护装置一端与所述牙垫 连接，另一端护住舌头并向舌根部延伸，在牙科治疗时可以保护舌头。

[0020] 在实施过程中所述舌头保护装置包括牙垫连接部、装置主体和舌头保护部位，与所述牙垫相连接的部位为牙垫连接部，从所述牙垫连接部向口腔内舌头另一侧的舌根部弯曲延长构成装置主体，装置主体的一侧面由上向下延长护住舌头的一侧为舌头保护部位。

[0021] 在实施过程中所述舌头保护部位主要实现对舌尖部的保护，把舌头与口腔内部另一侧的牙齿分开，保护舌头。

[0022] 在实施过程中所述舌头保护装置的另一端是以假想的延长轴为中心护住舌头的一侧面并以一定的角度弯曲延长。

[0023] 在实施过程中所述舌头保护装置的一端到另一端设有通孔，且通孔中装有唾液吸管，用于吸除从咽侯涌到口腔内另一侧舌根处的唾液。

[0024] 在实施过程中所述唾液吸管可以是由几个唾液吸管组合而成。

[0025] 本发明中所述牙垫包括通过口腔内的一侧牙齿咬住打开口腔的牙垫主体，在所述牙垫主体一端穿孔成为插入外部光源的光源插入孔，所述牙垫主体位于口腔内部分的一侧面上设有装置连接孔，所述舌头保护装置通过装置连接孔与所述牙垫主体连接，所述牙垫主体上的装置连接孔与所述光源插入孔连通形成唾液传递孔，传递管从唾液传递孔中穿过，通过唾液吸管吸入的唾液经传递管传递到外部的吸入排管。

[0026] 在实施过程中所述牙垫的装置连接孔为多数个且相互分离，所述唾液传递管分别穿过装置连接孔，唾液传递管为多数个且相互分离。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

[0027] 在实施过程中所述装置连接孔分为第 1 连接孔和第 2 连接孔两个连接孔，所述唾液传递管包括分别连接所述第 1 装置连接孔和第 2 装置连接孔的第 1 唾液传递管和第 2 唾液传递管。

[0028] 在实施过程中所述舌头保护装置的装置连接孔为至少一个且相互分离，所述唾液传递管能同时被连接入所述装置连接孔。

[0029] 在实施过程中所述牙垫的装置连接孔是相互分离的，有第 1 装置连接孔和第 2 装置连接孔两个连接孔。

[0030] 在实施过程中所述牙垫主体的上部和下部设有依据牙齿咬住时的形状做成的凹凸状的凹槽。

[0031] 在实施过程中所述凹槽处有为了防止上下牙齿打滑形成的突起。

[0032] 在实施过程中所述突起是在凹槽的底部。

[0033] 在实施过程中所述牙垫主体是由能使光源透过的透明材料制成的。

[0034] 并且，本发明还包括具备光源的机头，光源连接在所述机头的一端，为了使所述光源的光传递到口腔内部，所述机头带光源的一端插入利用口腔内一侧牙齿咬住并打开口腔的牙垫中构成口腔照明器械，牙垫的另一侧面上是护住一侧舌头并向另一侧舌根部延长的舌头保护装置的。

[0035] 在实施过程中所述舌头保护装置包括与所述牙垫连接的牙垫连接部，从所述连接部位向口腔内部另一侧舌根弯曲延长的舌头保护装置主体和从舌头保护装置主体的一侧向下延长护住舌头的一侧面的舌头保护部位。

[0036] 在实施过程中所述舌头保护装置着重保护舌尖，把舌头与口腔内的另一侧牙齿隔开。

[0037] 在实施过程中所述舌头保护装置的另一端是以假想的延长轴为中心护住舌头的一侧面并以一定的角度弯曲延长。

[0038] 在实施过程中所述舌头保护装置的一端到另一端被穿孔打通，且孔中装有唾液吸管，用于吸除从咽侯涌到口腔内另一侧舌根处的唾液。

[0039] 在实施过程中所述唾液吸管可以是多数个唾液吸管。

[0040] 在实施过程中所述牙垫包括所述插入光源的光源插入孔和在所述牙垫主体的一侧穿孔形成的与所述舌头保护装置连接的装置连接孔。

[0041] 在实施过程中所述机头的一端与另一端之间被穿孔打通，通孔中装有与外部吸入器相连的吸入排管，所述吸入排管穿过所述牙垫上的装置连接孔，吸入的唾液经装置连接孔和传递管传递到吸入排管。

[0042] 在实施过程中所述装置连接孔是多数个装置连接孔，且是相互分离的，所述唾液传递管是通过装置连接孔相互分离的多数个唾液传递管。

[0043] 在实施过程中所述吸入排管可以多数个，并且是相互分离的，所述唾液传递管分别与所述吸入排管连接。

[0044] 在实施过程中所述吸入排管分为第 1 吸入排管和第 2 吸入排管两个吸入排管。所述装置连接孔分为第 1 装置连接孔和第 2 连接孔两个装置连接孔。 所述唾液传递管分别连接第 1 吸入排管和第 2 吸入排管， 第 1 唾液传递管和第 2 唾液传递管穿过所述第 1 装置连接孔和第 2 装置连接孔。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

[0045] 在实施过程中所述装置连接孔可以是多数个，并且是相互分离的，所述唾液传递管可以同时穿过装置连接孔。

[0046] 在实施过程中所述牙垫主体的上部和下部有所述得便于上下牙齿咬住的凹槽。

[0047] 在实施过程中所述凹槽上有为了防止上下牙齿打滑的突起。

[0048] 在实施过程中所述突起是在凹槽的底部。

[0049] 在实施过程中所述机头包括控制所述吸入排管开闭的阀门。

[0050] 在实施过程中所述阀门位于所述机头内部与所述吸入排管同时设置，并能对所述装置连接孔进行选择性的开闭。

[0051] 在实施过程中所述机头还包括了驱动所述开闭阀门的阀门驱动杠杆。

[0052] 在实施过程中所述机头的外部的某一特定部分上有控制光源的光源开关。

[0053] 在实施过程中所述光源的开关为触摸开关。

[0054] 在实施过程中所述牙垫是能使光源的光透过的透明的牙垫。

[0055] 在实施过程中所述光源是 LED 光源。

[0056] 在实施过程中所述机头的某一特定部分上设置了在口腔内部放射紫外线的紫外线灯。

[0057] 在实施过程中所述光源中包括所述紫外线灯。

[0058] 在实施过程中所述机头的某一特定部分上还包括了能取得口腔 内部治疗影像的摄像头。

[0059] 在实施过程中上述摄像头包括在上述光源中。

[0060] 本发明的有益效果：

[0061] 首先，有了本发明的舌头保护装置、牙垫和口腔照明设备使得患者的舌头不会再被向口腔后方挤压，舌头的侧面受到保护，把舌头与治疗部位分离，使患者的舌头在安全的状态下接受牙科治疗。

[0062] 本发明的舌头保护装置、牙垫和口腔照明设备可以利用舌头保护装置把患者的舌头隔离在需要治疗的口腔内的另一侧，充分保证口腔内牙齿治疗的空间，便于医生进行治疗。

[0063] 本发明舌头保护装置、牙垫和口腔照明设备中的舌头保护装置向一侧舌根延长，在唾液涌到舌头前部之前可以把从咽喉部涌向舌根的唾液吸除，减小因唾液产生的异物感。

[0064] 本发明的舌头保护装置、牙垫和口腔照明设备中舌头保护装置，牙垫和机头相互分离，利用洗涤剂可以使整个设备保持清洁，防止患者发生二次感染。

[0065] 本发明的舌头保护装置、牙垫和口腔照明设备中利用紫外线可以减少治疗时发生的细菌感染。

[0066] 本发明的舌头保护装置、牙垫和口腔照明设备中利用摄像头能取得治疗时的影像，能为医生和患者提供治疗的过程。

[0067] [77]

具体实施方式

[0078] 本发明中使用的用语尽可能选择现在广泛使用的一般用语，特定情况下有申请人任意选择使用的用语，但此种情况并非单纯的名称用语，而是为了详细说明发明的某部分或充分考虑了用语的语义。

[0079] 以下，参照附图对本发明的技术构成作详细的说明。

[0080] 但本发明并不局限于此处说明的用途，还可有其他具体化的形态。 在整个说明书中，相同的编号对应同一个部位。

[0081] 图 4 是本发明使用时舌头保护装置上面的示范图，图 5 是本发明 使用时舌头保护装置下面的示范图，图 6 是本发明使用时唾液吸除过程的说明图。

[0082] 参照示意图本发明实施时舌头保护装置 100 是安装在打开口腔的在口腔内用一侧上下牙齿咬住的牙垫 200 上，在治疗时起到保护舌头的作用。

[0083] 所述舌头保护装置 100 的一端 100a 连接所述牙垫 200，另一端 100b 护住舌头 2 的一个侧面 2a 向口腔内的另一侧舌根 2b 方向延长。

[0084] 即所述舌头保护装置 100 从口腔内的一侧牙齿向另一侧舌根 2b 方向呈流线型弯曲的形态。

[0085] 传统口腔照明设备中的舌头保护部分 20 是通过把舌头从上往下按，把舌头向后方压迫来是实现的，而本发明中的舌头保护装置 100 是通过护住舌头 2 的一个侧面 2a 同时向口腔内一侧靠拢并隔离，充分保证口腔内另一侧牙齿治疗的空间。

[0086] 这样，医生就能够更加方便的为患者进行口腔内部治疗，患者的舌头不再受到压迫能在安全舒适的状态下接受治疗。

[0087] 传统的口腔照明设备的舌头保护部分 20 是从上向下把舌头压迫向口腔后方，患者的舌头 2 不能活动，本发明在使用中舌头保护装置 100 护住舌头 2 的一侧面 2a 使得舌头 2 靠向另一侧能安全的活动。

[0088] 所述舌头保护装置 100 在一端 100a 形成与所述牙垫 200 连接的牙垫连接部 110，装置主体 120 从所述牙垫连接部 110 向口腔内的另一侧舌根 2b 弯曲延长，舌头保护部位

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

130 是从所述装置主体 120 的一侧向下延长，护住舌头 2 的一侧面 2a。

[0089] 所述舌头保护部位 130 能着重保护舌头 2 的舌尖 2c，确保患者的门牙和口腔内另一侧牙齿的治疗空间。

[0090] 所述舌头保护装置 100 一端 100a 到另一端 100b 被打通穿孔，孔内装有吸除涌到上述口腔内的另一侧舌根 2b 处唾液的唾液吸管 140。

[0091] 所述唾液吸管 140 可以是多数个。

[0092] 所述唾液吸管 140 是从所述舌头保护装置 100 的另一端 100b 向所述舌头保护装置 100 的一端 100a 传递唾液。

[0093] 本发明中舌头保护装置 100 的使用如图 6 所示，能及时吸除涌到口腔内另一侧舌根 2b 处的唾液。

[0094] 因此，与传统的口腔照明设备的吸入细孔 23 比较，本发明中唾液吸管 140 由于直接吸入唾液 1 而没有吸力的损失，使得唾液 1 在涌到舌头 2 的前面之前在舌根处被迅速吸除，最大限度减少因唾液使患者产生的异物感。

[0095] 所述舌头保护装置 100 的另一端 110b 是以假想的延长轴 a 为中心护住上述舌头 2 的一侧面 2a 并以一定的角度 α 弯曲延长。

[0096] 因此所述舌头保护装置 100 能保护到上述舌头 2 的一侧面 2a 的下部。

[0097] 图 7 是本发明口腔照明设备的示意图，图 8 是本发明口腔照明设备的分解图，图 9 是本发明口腔照明设备在口腔内使用时的说明示意图。

[0098] 参照图示本发明的口腔照明设备是由机头 300，牙垫 200 和舌头保护装置 100 构成。

[0099] 所述机头 300 一端设有光源 310，所述光源 310 是从牙垫 200 的一端处插入固定的，能直接对口腔内部照明。

[0100] 在所述机头 300 上某一特定部位处装有所述光源 310 的光源开关 320。

[0101] 光源开关 320 是触摸开关，用手碰触一次光源开关 320 则所述光源 310 打开，再碰触一次光源开关 320 则所述光源 310 关闭。

[0102] 所述光源开关 320 可以是各种开关装置。

[0103] 所述光源 310 包含多数个 LED 光源，从所述牙垫 200 一端插入形成面光源，在口腔内部照明能减少阴影。

[0104] 所述光源 310 中还包含与 LED 光源连接的照射口腔内部可以对治疗时产生的细菌起到杀菌作用的紫外线灯（没有图示）。

[0105] 所述紫外线灯要能在口腔内部照射紫外线的话可以安装在所述机头 300 的任何部位。

[0106] 所述光源 310 中还包含取得口腔内部治疗影像的摄像头（没有图示），使得医生和患者能在事后看到治疗时的影像确保了对治疗的信赖。

[0107] 所述摄像头要能在口腔内部摄像可以设置在所述机头 300 的任何部位，本发明中所述机头 300 上的摄像头能有效的取得治疗影像。

[0108] 在所述机头 300 的一端到另一端被打通穿孔，通孔中装有吸入排管 330，吸入排管 330 是将唾液传递到外部的吸入机（没有图示）。

[0109] 所述机头 300 内部有控制所述吸入排管 330 开闭的阀门 340，在所述机头 300 的

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

外部有驱动上述阀门 340 的阀门杠杆 350。

[0110] 具体来说，所述吸入排管 330 包括相互分离的第 1 吸入排管 (331) 和第 2 吸入排管 (332) 两个吸入排管，所述第 1、2 吸入排管 (331，332) 上同时设置上述阀门 340，阀门 340 是具有选择性的使上述第 1、2 吸入排管 (331，332) 单独开关的开关阀门。

[0111] 所述阀门 340 位于机头 300 上的穿孔内，阀门 340 分别与所述第 1 吸入排管 331 和第 2 吸入排管 332 连接并形成第 1 阀门孔 341 和第 2 阀门孔 342。

[0112] 即所述第 1 阀门孔 341 将所述第 1 吸入排管 331 打开时，所述第 2 吸入排管 332 关闭，所述第 2 阀门孔 342 将所述第 2 吸入排管 332 打开时，所述第 1 吸入排管 331 关闭，所述阀门 340 驱动杠杆 350 可以选择性的开关上述第 1、2 吸入排管 (331，332)。

[0113] 所述阀门 340 在第 1 吸入排管 331 和第 2 吸入排管 332 上分别设置一个阀门，所述阀门驱动杠杆 350 包括分别驱动上述两个阀门的两个驱动杠杆。

[0114] 所述吸入排管 (331，332) 在所述阀门 340 和所述外部的吸入器（没有图示）之间相互合并，使得所述外部的吸入器（没有图示）能有效的吸除唾液。

[0115] 但所述吸入排管 (331，332) 可以分别与所述外部的吸入器（没有图示）连接。

[0116] 所述牙垫 200 是通过口腔内一侧的上下牙齿咬住打开口腔的，口腔内一侧上下牙齿咬住的是牙垫主体 210。

[0117] 在所述牙垫主体 210 的一端上穿孔形成所述光源 310 插入的光源 插入孔 211。

[0118] 具体来说，所述光源插入孔 211 是在患者咬住所述牙垫主体时从口腔前方能看见的牙垫主体一端上的穿孔。

[0119] 所述牙垫主体 210 是用高透明材质制成，从所述光源插入孔 211 插入的光源 310 能向牙垫主体 210 外部透光。

[0120] 患者咬住所述牙垫主体 210 时口腔内侧是与所述舌头保护装置 100 连接的装置连接孔 212。

[0121] 所述牙垫主体 210 上与所述光源插入孔 211 位于同一端的并与所述光源插入孔 211 相分离的唾液传递孔与所述装置连接孔 212 相连通，唾液传递管 213 从上述唾液传递孔和装置连接孔 212 中穿过。

[0122] 所述装置连接孔 212 是相互分离的多数个装置连接孔，更具体的说是有可以分别与舌头保护装置 100 连接的第 1 装置连接孔 212a 和第 2 装置连接孔 212b 两个连接孔。

[0123] 所述唾液传递管 213 是相互分离的，包括穿过所述牙垫主体 210 的一端和所述装置连接孔 (212a，212b) 的两个唾液传递管 (213a，213b)。

[0124] 但其中一根上述唾液传递管 213 可以从所述装置连接孔 (212a，212b) 处分开连接。

[0125] 所述各唾液传递管 (213a，213b) 的一端是与所述机头 300 的吸入排管 (331，332) 相互咬合连接，另一端与所述舌头保护装置 100 的唾液吸入管 140 连接。

[0126] 即口腔内的唾液 1 由所述舌头保护装置 100 的唾液吸管 140 吸入，通过所述牙垫 200 的唾液传递管 213 向所述机头 300 的吸入排管传递，最后吸至外部的吸入器（没有图示）。

[0127] 具体来说，所述吸入排管 330 和所述外部的吸入器（没有图示）靠唾液排出管 360 连接，传递到所述吸入排管 330 的唾液经过唾液排出管 360，向外部吸入器（没有图

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

示）排出。

[0128] 所述唾液排出管 360 和所述吸入排管 330 可以是相同的排管。

[0129] 所述牙垫主体 210 的上部和下部是患者上下牙齿咬住的凹槽 214，凹槽 214 的底部有防止上下牙齿打滑的突起 215。

[0130] 所述牙垫主体 210 在患者用上下牙齿咬住的状态下不能前后左右移动，不会从牙齿中脱落，所述光源 310 可以安全的在口腔内进行照明。

[0131] 所述舌头保护装置 100 参照图 4 至图 6 的说明，此处省略。

[0132] 以上是对本发明图示的说明，在上述说明的基础上在此技术领域的技术人员可以对本发明进行多种多样的变化和修改。

[0133] 生产利用的可能性

[0134] 本发明是具有唾液吸除功能的舌头保护装置、牙垫和口腔照明设备，在医疗领域特别是牙科和五官科对患者进行口腔内部治疗时可以使治疗安全有效的进行。

Abstract of CN102247140 (A)

The invention provides a multifunctional electrocardio examining table, aiming to provide a multifunctional electrocardio examining table with high examination efficiency and low labor intensity. The technical scheme of the invention is that: the multifunctional electrocardio examining table comprises a table board and a connected electrode, wherein a lower limb connected electrode plate exposed to the table board is arranged on the front and the back sides of the table board at the right end respectively; two connected electrode plates which are exposed to the table board and opposite to the lower part of the upper limb of an examined person are also arranged on the table board; four hollow screws penetrate through table board holes and are connected with upper and lower limb connected electrode plates respectively; four connected wires penetrate through the hollow screws and are connected with the upper and the lower limb connected electrode plates respectively; a stand is arranged on the front side at the left end of the table board, and two hanging hooks are arranged on the top of the stand; and the upper and the lower limb connected wires and a chest connected wire are arranged on the lower surface of the table board, and the chest connected wire is extracted from the front side at the left end of the table board and hung on the two hanging hooks on the top of the stand. The multifunctional electrocardio examining table is particularly suitable for physical examination of large sample crowds.

一种心电多功能检查床

(57)摘要

一种心电多功能检查床，本发明目的是提供一种检查效率高、劳动强度低心电多功能检查床。实现发明目的的技术方案是，一种心电多功能检查床，包括床板和导联电极，在床板右端的前后床板上各设一个外露于床板的下肢导联电极板，在床板上还设有两个外露于床板且与受测人员上肢下部相对的导联电极板，四个空心螺钉穿于床板孔分别与上述的上、下肢导联电极板连接，四条导联线穿于所述空心螺钉中与所述上、下肢导联电极板连接，在床板左端的前侧设有一支架，支架的顶部设有两个挂钩；上、下肢导联线和胸部的导联线设在床板的下表面上，其中胸部导联线由床板左端前侧引出后挂在所述支架顶部的两挂钩上。本发明特别适合大样本人群的健康体检。

CN 102247140 A

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

1. 一种心电多功能检查床，包括床板和导联电极，其特征在于：在床板右端的前后床板上各设一个外露于床板的下肢导联电极板，在床板上还设有两个外露于床板且与受测人员上肢下部相对的导联电极板，四个空心螺钉穿于床板孔分别与上述的上、下肢导联电极板连接，四条导联线穿于所述空心螺钉中与所述上、下肢导联电极板连接，在床板左端的前侧设有一支架，支架的顶部设有两个挂钩；上、下肢导联线和胸部的导联线设在床板的下表面上，其中胸部导联线由床板左端前侧引出后挂在所述支架顶部的两挂钩上。

2. 如权利要求 1 所述的一种心电多功能检查床，其特征在于：所述上、下肢导联电极板为弧形面。

3. 如权利要求 1 或 3 所述的一种心电多功能检查床，其特征在于：在床板左端的前侧板上设有盛导电糊盒。

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

一种心电多功能检查床

技术领域：

[0001] 本发明涉及一种医用检查床，特别是一种心电多功能检查床。

背景技术：

[0002] 现有心电图检查床在检查心脏功能时，受检者躺在床上，检查医生将两个下肢导联电极夹分别夹在受检者的左、右下肢体上，再将两个上肢导连电极夹夹在其左、右上肢体上，最后将六个胸部导连电极吸盘分别吸到受检者胸部的指定位置上后，即可开机对受检者心脏的生物电信号进行采集并打印出心电图，由医生对受检者的心电信号进行分析作出结论。上述四个上下肢导联电极夹，每作一次需上夹和取夹八个动作，耗时长劳动强度大，特别是大样本人群健康体检时，其缺点尤为突出；此外，10 个导联电极板的导联连线较长，而且各个导联线极易发生缠绕，如果出现缠绕需进行整理，否则容易发生导联错误连接，出现误接误判现象。

发明内容：

[0003] 本发明目的是提供一种检查效率高、劳动强度低和导联线不易缠绕的一种心电多功能检查床。本发明实现发明目的的技术方案是，一种心电多功能检查床，包括床板和导联电极，其特征在于：在床板右端的前后床板上各设一个外露于床板的下肢导联电极板，在床板上还设有两个外露于床板且与受测人员上肢下部相对的导联电极板，四个空心螺钉穿于床板孔分别与上述的上、下肢导联电极板连接，四条导联线穿于所述空心螺钉中与所述上、下肢导联电极板连接，在床板左端的前侧设有一支架，支架的顶部设有两个挂钩；上、下肢导联线和胸部的导联线设在床板的下表面上，其中胸部导联线由床板左端前侧引出后挂在所述支架顶部的两挂钩上。一种心电多功能检查床，其特征在于：所述上、下肢导联电极板为弧形面。一种心电多功能检查床，其特征在于：在床板左端的前侧板上设有盛导电糊盒。本发明与现有技术比较具有效率高和劳动强度低及避免导联线错误连接，且导联线不易缠绕的显著优点。

附图说明：

[0004] 图 1 是本发明的立体结构示意图，图 2 是图 1 的 A-A 局部剖视图。

具体实施方式：

[0005] 结合以下实施例对本发明作详细说明，在床板 1 右端部的前后两侧各设有一外露于床板的下肢导联电极板 2，此电极板的表面呈弧形面，可避免电极板表面的棱角对受测人员产生的不舒服感，在床板的下肢导联电极板的上方设有两个与受测人员上肢相对的上肢导联电极板 3，此上肢导联电极板的上表面呈弧形面外露于床板的上表面，上述下肢导联电极板和上肢导联电极板与空心螺钉 7 连接，此空心螺钉穿于床板的孔内，在床板下表面下方的空心螺钉上套设有元宝螺帽 8，两条下肢导联线和两条上肢导联线分别穿在空心螺

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

空心螺钉的孔中与两个下肢导联电极板和两个上肢导联电极板连接。上述四个导联电极板用导电性能好的材料如铜合金制作，其表面上设有涂覆银层。为了适应个别身高特高或者过低人员进行检查，可将穿空心螺钉的床板孔制成长孔，以便于移动电极板，在床板的左部的前侧设有一支架 4，支架的顶部设有两个挂钩 5，三个胸部导联电极吸盘和三个左胸部导联电极吸盘的导联线分别挂在上述支架顶部的两个挂钩上。上述上、下肢导联线和左右胸部导联线设在床板的下表面上，其中左右胸部导联线从床板的左端前侧引出吊挂在支架的挂钩上。在床板左端的前侧板上设有盛导电糊盒 6，方便操作医生向四个肢体导联电极板以及受检测人员涂抹导电糊（或其它湿润液）。

[0006] 本发明的操作原理，受测人员从床板的后侧躺在床板上，直接将左、右上、下肢下部的裸露处置于各上、下肢导联电极板上，操作医生将六个左、右胸部导联电极吸盘吸在受测人员胸部的指定部位上后，即可启动仪器进行各种心电监测，检测结束时，只需将六个胸部导联电极吸盘从受测人员身上取下即可，省去了肢体电极夹的上、下动作，减轻了劳动强度，提高了效率。本发明检查床适用于检查常规心电图和检查心电向量图，还可以用于检查心率变异分析、高频心电检测和 Q-T 离散检测，本发明特别适合大样本人群的健康体检。

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record
A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews
Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.
All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:
- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

1) A brief description of the nature of any exhibit shown or any demonstration conducted,
2) an identification of the claims discussed,
3) an identification of the specific prior art discussed,
4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
5) a brief identification of the general thrust of the principal arguments presented to the examiner,
   (The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
6) a general indication of any other pertinent matters discussed, and
7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant(s):	Thien Nguyen et al.	Examiner:	Hao D. Mai
Serial No.:	14/228,057	Group Art No.:	3732
Filed:	March 27, 2014	Conf. No.:	1983
Title:	INTRAORAL DEVICE WITH SLIT	Dkt. No.:	INCEP- 001COD

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

AMENDMENT

In response to the Non-Final Office Action mailed April 13, 2017, please amend the above-identified application as follows. Applicants make the following remarks.

Amendments to the Claims begin on page 2 of this paper.

Remarks/Arguments begin on page 5 of this paper.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

IN THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

1. (currently amended) A mouthpiece comprising:

a main body portion ~~having a distal portion and a proximal portion, the main body~~ configured as a pocket having an interior defined by:

an anterior wall defined by an exterior edge, the anterior wall comprising a slit extending along a longitudinal and central axis of the main body portion between ~~the distal portion and the proximal portion~~ opposite ends of the main body portion, the slit comprising an opening that allows fluids exterior to the pocket to enter into the interior of the pocket ~~when suction is applied within the interior of the pocket~~,

a posterior wall defined by an exterior edge that corresponds to the exterior edge of the anterior wall, and

a side wall connecting the exterior edge of the anterior wall to the corresponding exterior edge of the posterior wall.

2. (currently amended) The mouthpiece of claim 1, wherein the posterior wall further includes a stability bar protruding from an interior surface of the posterior wall and along [[a]] the longitudinal and central axis of the main body portion.

3. (original) The mouthpiece of claim 2, wherein the stability bar is aligned with the slit on the anterior wall.

4. (original) The mouthpiece of claim 1, wherein the main body portion is formed by injection-molding as one piece.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

5. (previously presented) The mouthpiece of claim 1, wherein a material used to form the main body portion is a flexible, translucent, high heat-resistant, autoclavable silicone-based material.

6. (original) The mouthpiece of claim 1, wherein the anterior wall and the posterior wall have different thicknesses.

7. (previously presented) The mouthpiece of claim 1, wherein flexibility of material of the anterior wall allows portions of the anterior wall to be pulled open at the slit to expose the interior of the pocket.

8. (previously presented) The mouthpiece of claim 1, further comprising a cheek retractor portion connected to the main body portion and having a surface that applies pressure when bent, wherein the pressure is based on resilience of the cheek retractor portion.

9. (previously presented) The mouthpiece of claim 8, wherein the cheek retractor portion comprises an extension of the pocket and wherein the slit extends into the extension of the pocket.

10. (previously presented) The mouthpiece of claim 1, further comprising a bridge structure comprising a plurality of protrusions protruding from an interior surface of the posterior wall, wherein the protrusions do not attach to the anterior wall.

11. (previously presented) The mouthpiece of claim 10, wherein the protruding bridge structure protrusions comprise a plurality of spaced contact points.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

12. (previously presented) The mouthpiece of claim 11, wherein the bridge structure protrusions protrude from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.

13. (original) The mouthpiece of claim 12, wherein spaces between the contact points are at troughs of the wave shape.

14. (previously presented) The mouthpiece of claim 1, further comprising a suction connector portion that connects the interior of the pocket to a vacuum source, wherein activation of the vacuum source applies the suction to the interior of the pocket, wherein the fluids that enter through the slit opening into the interior of the pocket are suctioned toward the vacuum source.

15. (original) The mouthpiece of claim 1, further comprising a detachable mouth prop.

16. (original) The mouthpiece of claim 15, wherein the detachable mouth prop comprises a bite block portion and a strap portion.

17. (original) The mouthpiece of claim 16, wherein the bite block portion and strap portion are injection-molded in one piece.

18. (currently amended) The mouthpiece of claim 15, wherein the bite block portion comprises an opening corresponding to a plug connected to the main body portion.

19. (cancelled)

20. (cancelled)

REMARKS

Interview Summary

Applicants thank the Examiner for the interview conducted with the Applicants' representative on June 30, 2017.

Applicant has incorporated claim language discussed into independent claim 1.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

Status of the Claims

The Applicants have amended claims 1-2 and cancelled claims 19-20. Support for claim 1 can be found in paragraphs [0008] and [0034] and throughout the *Specification*. Support for claim 2 can be found in paragraph [0008] and throughout the *Specification*. No new matter has been added. In view of the following remarks, Applicants respectfully submit that the application is in condition for allowance.

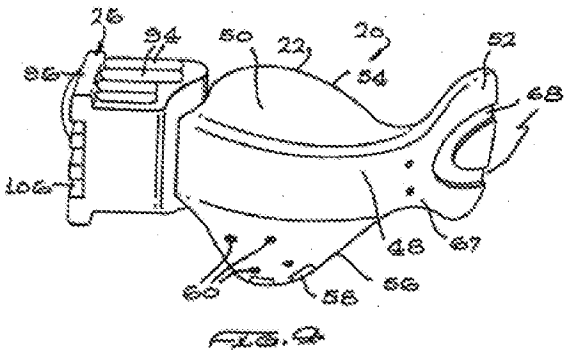

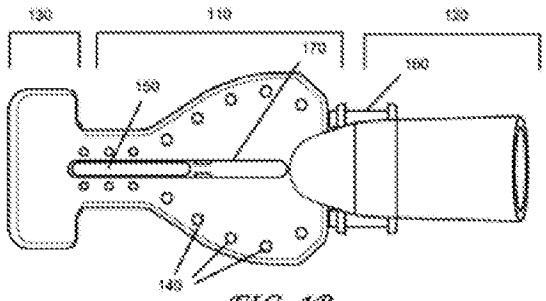

Rejections under 35 U.S.C. §112

Claim 1 was rejected under 35 U.S.C. 112(b) or 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter. *Office Action*, 2. Claim 1 has been amended to recite, "**a main body portion** configured as a pocket having an interior defined by: . . . opposite ends of **the main body portion**." (emphasis added). Withdrawal of the rejection is respectfully requested.

Rejections under 35 U.S.C. §102

Claims 1, 4-11, and 14-20 were rejected under pre-AIA 35 U.S.C. 102(b) as being anticipated by U.S. Publication No. 2006/0063129 to Hirsch et al., ("*Hirsch*"). *Office Action*, 3. Applicants respectfully submits that *Hirsch* fails to teach the claimed "slit extending along a longitudinal and central axis of the main body portion **between opposite ends of the main body portion**, the slit comprising an opening that allows fluids **exterior to the pocket to enter into the interior of the pocket**." (emphasis added). Applicant's slit is shown in Figure 1B (provided below) for reference. The *Office Action* points to *Hirsch*'s component "68" as purportedly teaching the claimed slit, shown below in Figure 4. *Office Action*, 3. *Hirsch* refers to that component as "a pair of evacuation channels 68 exposed to the outer surface." *Hirsch*, [0052].

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

HIRSCH	APPLICANT
	

As illustrated above, the ends of the evacuation channel 68 extend to the same end or edge of *Hirsch's* device. In other words, the evacuation channel 68 begins and ends on the same end of *Hirsch's* device. Nowhere does *Hirsch* teach or show a slit extending along a **longitudinal and central axis** between **opposite ends** of the main body portion that allows fluids exterior to the pocket to enter into the interior of the pocket. Thus, *Hirsch* fails to disclose the claimed slit explicitly recited as extending along a longitudinal and central axis of the main body portion between opposite ends of the main body portion and comprising an opening that allows fluids exterior to the pocket to enter into the interior of the pocket.

MPEP § 2131 states: "A claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described, in a single prior art reference." (*citing Verdegaal Bros. v. Union Oil Co. of California, 814 F.2d 628, 631, 2 USPQ2d 1051, 1053 (Fed. Cir. 1987)*). "Moreover, unless a reference discloses within the four corners of the document not only all of the limitations claimed but also all of the limitations arranged or combined in the same way as recited in the claim, it cannot be said to prove prior invention of the thing claimed and, thus, cannot anticipate under 35 U.S.C. § 102. *Net MoneyIn, Inc. v. VeriSign, Inc. 545 F.3d 1359 (Fed Cir. 2008).*" Applicants submit that the limitations allegedly taught by *Hirsch* are not

arranged or combined in the same way as recited in the claims. Therefore, the claims are not anticipated under 35 U.S.C. § 102 by *Hirsch*.

Claims 4-11 and 14-18 depend from independent claim 1. Thus, for at least the same reasons as discussed above, withdrawal of the rejections for claims 4-11 and 14-18 are respectfully requested.

Rejections under 35 U.S.C. §103

Claims 2-3 were rejected under pre-AIA 35 U.S.C. 103(a) as being unpatentable over *Hirsch* in view of U.S. Publication No. 2009/0274991 to Black et al., ("*Black*"). *Office Action*, 6. Applicants respectfully disagree. *Black* fails to cure *Hirsch*'s failure to teach the claimed slit. Because claims 2-3 depend from claim 1, claims 2-3 are allowable for at least the same reasons as claim 1. Withdrawal of the rejection is respectfully requested.

Not all reasons for allowability and distinctions over the asserted combination of prior art references of record have been discussed, and no inference regarding such should be made.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

CONCLUSION

Based on the foregoing, it is submitted that Applicants' invention as defined by the claims is patentable over the references of record. Issuance of a Notice of Allowance is solicited.

Applicants' attorney welcomes the opportunity to discuss the case with the Examiner in the event that there are any questions or comments regarding the response or the application.

The Commissioner is hereby authorized to withdraw any additional fees that may be required or credit any overpayment to Deposit Account 50-1662, referencing the docket number above.

Respectfully submitted,

July 13, 2017

Authorization or Opt-Out of Authorization to Permit Access:

When this Application Data Sheet is properly signed and filed with the application, applicant has provided written authority to permit a participating foreign intellectual property (IP) office access to the instant application-as-filed (see paragraph A in subsection 1 below) and the European Patent Office (EPO) access to any search results from the instant application (see paragraph B in subsection 1 below).

Should applicant choose not to provide an authorization identified in subsection 1 below, applicant must opt-out of the authorization by checking the corresponding box A or B or both in subsection 2 below.

NOTE: This section of the Application Data Sheet is **ONLY** reviewed and processed with the **INITIAL** filing of an application. After the initial filing of an application, an Application Data Sheet cannot be used to provide or rescind authorization for access by a foreign IP office(s). Instead, Form PTO/SB/39 or PTO/SB/69 must be used as appropriate.

1. Authorization to Permit Access by a Foreign Intellectual Property Office(s)

A. Priority Document Exchange (PDX) - Unless box A in subsection 2 (opt-out of authorization) is checked, the undersigned hereby grants the USPTO authority to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the State Intellectual Property Office of the People's Republic of China (SIPO), the World Intellectual Property Organization (WIPO), and any other foreign intellectual property office participating with the USPTO in a bilateral or multilateral priority document exchange agreement in which a foreign application claiming priority to the instant patent application is filed, access to: (1) the instant patent application-as-filed and its related bibliographic data, (2) any foreign or domestic application to which priority or benefit is claimed by the instant application and its related bibliographic data, and (3) the date of filing of this Authorization. See 37 CFR 1.14(h)(1).

B. Search Results from U.S. Application to EPO - Unless box B in subsection 2 (opt-out of authorization) is checked, the undersigned hereby grants the USPTO authority to provide the EPO access to the bibliographic data and search results from the instant patent application when a European patent application claiming priority to the instant patent application is filed. See 37 CFR 1.14(h)(2).

The applicant is reminded that the EPO's Rule 141(1) EPC (European Patent Convention) requires applicants to submit a copy of search results from the instant application without delay in a European patent application that claims priority to the instant application.

2. Opt-Out of Authorizations to Permit Access by a Foreign Intellectual Property Office(s)

☐ A. Applicant **DOES NOT** authorize the USPTO to permit a participating foreign IP office access to the instant application-as-filed. If this box is checked, the USPTO will not be providing a participating foreign IP office with any documents and information identified in subsection 1A above.

☐ B. Applicant **DOES NOT** authorize the USPTO to transmit to the EPO any search results from the instant patent application. If this box is checked, the USPTO will not be providing the EPO with search results from the instant application.

NOTE: Once the application has published or is otherwise publicly available, the USPTO may provide access to the application in accordance with 37 CFR 1.14.

STATEMENT UNDER 37 CFR 3.73(c)

Applicant/Patent Owner: Dryshield, LLC

Application No./Patent No.: 14/228,057 Filed/Issue Date: March 27, 2014

Titled: INTRAORAL DEVICE WITH SLIT

Dryshield, LLC, a corporation

(Name of Assignee) (Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that, for the patent application/patent identified above, it is (choose **one** of options 1, 2, 3 or 4 below):

1. ☑ The assignee of the entire right, title, and interest.

2. ☐ An assignee of less than the entire right, title, and interest (check applicable box):

   ☐ The extent (by percentage) of its ownership interest is _____%. Additional Statement(s) by the owners holding the balance of the interest must be submitted to account for 100% of the ownership interest.

   ☐ There are unspecified percentages of ownership. The other parties, including inventors, who together own the entire right, title and interest are:

   Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

3. ☐ The assignee of an undivided interest in the entirety (a complete assignment from one of the joint inventors was made). The other parties, including inventors, who together own the entire right, title, and interest are:

   Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

4. ☐ The recipient, via a court proceeding or the like (*e.g.*, bankruptcy, probate), of an undivided interest in the entirety (a complete transfer of ownership interest was made). The certified document(s) showing the transfer is attached.

The interest identified in option 1, 2 or 3 above (not option 4) is evidenced by either (choose **one** of options A or B below):

A. ☐ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____, or for which a copy thereof is attached.

B. ☑ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

1. From: NGUYEN, THIEN To: INCEPT, INC.

   The document was recorded in the United States Patent and Trademark Office at
   Reel 032545, Frame 0891, or for which a copy thereof is attached.

2. From: PHAM, THAM THANH To: INCEPT, INC.

   The document was recorded in the United States Patent and Trademark Office at
   Reel 032545, Frame 0891, or for which a copy thereof is attached.

This collection of information is required by 37 CFR 3.73(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

STATEMENT UNDER 37 CFR 3.73(c)

3. From: INCEPT INCORPORATED To: DRYSHIELD, LLC

The document was recorded in the United States Patent and Trademark Office at
Reel 042916, Frame 0954, or for which a copy thereof is attached.

4. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

5. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

6. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

☐ Additional documents in the chain of title are listed on a supplemental sheet(s).

☐ As required by 37 CFR 3.73(c)(1)(i), the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO. See MPEP 302.08]

The undersigned (whose title is supplied below) is authorized to act on behalf of the assignee.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at http://www.uspto.gov/web/offices/pac/doc/general/index.html.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, http://www.stopfakes.gov. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

LICENSE FOR FOREIGN FILING UNDER

Title 35, United States Code, Section 184

Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign AssetsControl, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

SelectUSA

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The U.S. offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to promote and facilitate business investment. SelectUSA provides information assistance to the international investor community; serves as an ombudsman for existing and potential investors; advocates on behalf of U.S. cities, states, and regions competing for global investment; and counsels U.S. economic development organizations on investment attraction best practices. To learn more about why the United States is the best country in the world to develop technology, manufacture products, deliver services, and grow your business, visit http://www.SelectUSA.gov or call +1-202-482-6800.

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT
Under 37 C.F.R. § 1.56 and 1.97-1.98

Examiner:

Pursuant to the provisions of 37 C.F.R. §§ 1.56 and 1.97-98 of the Rules of Practice in Patent Cases, enclosed herewith is form PTO-SB-08, listing several references. The Examiner is requested to make these references of official record in the application.

The references cited may be material to examination of the application and are submitted in compliance with the Applicants' duty of disclosure as defined by 37 C.F.R. § 1.56.

Applicants hereby declare, pursuant to 37 C.F.R. §1.97(e)(2), that no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application and, to the knowledge of the person signing the certification after having made a reasonable inquiry, no item of information contained in the information disclosure statement was

known to any individual designated in 37 C.F.R. §1.56(c) more than three months prior to the filing of the information disclosure statement.

No representation is made or intended as to the completeness of this list, nor is the inclusion of any reference an admission that it is prior art or pertinent to this application.

The Commissioner is hereby authorized to charge any necessary fee to Account Number 50-1662.

Respectfully submitted,

(54) INTRAORAL DENTAL SUCTION AND ISOLATION SYSTEM

(57) A dental mouthpiece is provided that may be attached to a high-suction dental adapter for the purpose of assisting the dental staff during dental procedures through chair-side, hands-free suction, and isolation. Such a mouthpiece may comprise a main body portion (110), a cheek retractor portion (130), and a suction connector portion (120). In some embodiments, the main body portion (110), cheek retractor portion (130), and suction connector portion (120) (and sub-portions thereof) may be molded in one piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

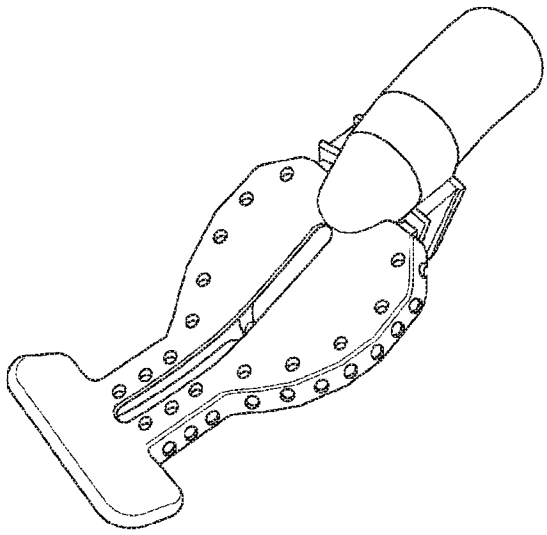

FIG. 1A

EP 3 184 076 A1

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

Description

BACKGROUND OF THE INVENTION

1. Field of the Invention

[0001] The present invention generally relates to the field of dental mouthpieces. More specifically, the present invention relates to intraoral dental suction and isolation mouthpieces.

2. Description of Related Art

[0002] Various mouthpieces are currently used by dental health professionals, dental hygienists, and dental assistants in the field of dentistry. In the past, a dental patient has been treated by a traditional two-person team that comprises a dental professional and a dental assistant. Further, dental treatment may be provided by the team using many different types of dental equipment and materials. Such dental equipment and materials may include such items as an intraoral mirror, a bite block, a slow speed suction ejector, a high speed suction ejector, gauzes, cotton rolls, and dry angles. Each item of dental equipment may be used for different purposes, though some may be used in combination for some types of dental services. As such, a dental professional seeking to provide such dental services may need to use multiple items of such dental equipment. An important role of the dental assistant is therefore to assist the dental professional in coordinating the use of these multiple items of different equipment and materials.

[0003] There is, therefore, a need in the art for improved systems and methods of providing dental services in a more efficient, comfortable, and safe manner to the dental patient.

[0004] Different intraoral devices are known. For example, U.S. Patent Application Publication No. 2012/0015320 A1 discloses a bite block, an illumination device having a saliva suction function, and a TIPS (twist isolated plates of suction) for protecting the tongue of a patient. The described solution guides the tongue of the patient such that when dental treatment is performed, the tongue of the patient can be safely and comfortably protected. Furthermore, saliva collected around the throat of the patient can be rapidly removed so that the patient feels little foreign-body like sensations. In addition, the TIPS can isolate the tongue from one side of the mouth cavity to be treated so as to ensure space for treatment. Moreover, the entirety of the mouth cavity of the patient can be illuminated to enable a doctor to conveniently conduct the dental treatment.

[0005] Further, U.S. Patent No. 6,974,321 relates to dental appliances for illuminating and/or vacuum suction of the mouth of a dental patient for examination and/or operative purposes.

[0006] U.S. Patent Application Publication No. US 2009/0274991 A1 teaches devices and methods for providing intra-oral operative isolation, fluid and debris aspiration, and tongue and check retraction.

SUMMARY OF THE CLAIMED INVENTION

[0007] The invention is defined in claims 1 and 15, respectively. Particular embodiments are set out in the dependent claims.

[0008] In particular, a dental mouthpiece is described herein. The mouthpiece may be attached to a high-suction dental adapter for the purpose of assisting the dental staff during dental procedures through chair-side, hands-free suction, and isolation. Such a mouthpiece comprises a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and sub-portions thereof) may be molded in one piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

[0009] The main body portion comprises an enclosed pocket made up of an anterior wall, a posterior wall, and a side wall in between the anterior and posterior walls. The side wall may be perforated with a plurality of perforations. Such perforations may constitute a mesh. Additional perforations may be located on the anterior and posterior walls. The main body portion may further include a slit along a longitudinal, central axis on the anterior wall. Such openings (e.g., perforations and slit) allow for suction of air, fluids, and small debris from the patient's mouth, through the openings into the interior portion, and into the suction connector portion towards a suction source. Because the mouthpiece is made of a flexible and resilient material (*e.g.*, silicone), the mouthpiece is bendable when placed in a patient's mouth to conform to the shape of the mouth. When properly positioned, the suction connector portion may protrude from one side of the patient's mouth, while the main body lies against the back of the patient's mouth, and the cheek retractor presses against the patient's cheek on the opposite side of the patient's mouth.

[0010] The main body further includes an protruding bridge structure on the interior surface of the posterior wall. Such a bridge structure protrudes from the interior surface in a wave shape with crests and troughs. The crests provide a plurality of contact points with the anterior wall to keep the anterior wall separated from the posterior wall during suction. Meanwhile, the troughs provide gaps that allow for suction of air, fluids, and small debris through the bridge structure.

FIG. 3D is a perspective view of the exemplary mouth prop of FIG. 3A.
FIG. 3E is a side view of the exemplary mouth prop of FIG. 3A.
FIG. 3F is a top view of the exemplary mouth prop of FIG. 3A.
FIG. 4 is a close-up view of exemplary mesh sides in an exemplary mouthpiece.
FIG. 5 is a close-up view of an internal bridge in an exemplary mouthpiece.
FIG. 6A is a close-up view of an exemplary reinforcing bar in an exemplary mouthpiece.
FIG. 6B is a cross-sectional view of the exemplary reinforcing bar of FIG. 6A.
FIG. 7A is a close-up view of an exemplary cheek retractor portion in an exemplary mouthpiece.
FIG. 7B is a cross-sectional view of the exemplary cheek retractor portion of FIG. 7A.

DETAILED DESCRIPTION

[0012] Embodiments of the present invention provide for a mouthpiece comprising a main body portion, a cheek retractor portion, and a suction connector portion. In some embodiments, the main body portion, cheek retractor portion, and suction connector portion (and subportions thereof) may be molded as one-piece, preferably by injection molding. In an exemplary embodiment, the mouthpiece may be made of a material that is flexible, translucent, conducive to injection molding, high heat-resistant, and autoclavable. Such a material may include silicone. Because the mouthpiece may be made of a high heat-resistant and autoclavable material, such a mouthpiece may be reusable.

[0013] FIGs. 1A-E are different views of an exemplary mouthpiece with an attachable mouth prop 160, while FIGs. 2A-E are different views of the exemplary mouthpiece of FIG. 1A where the attachable mouth prop 160 has been detached. Such a mouthpiece includes a main body portion 110, a suction connector portion 120, and a cheek retractor portion 130.

[0014] The main body portion 110 may include mesh or perforations 140, a stability bar 150, an open slit 170, and an internal bridge 180. The main body potion 110 connects to a suction connector portion 120 on one end and a cheek retractor portion 130 at the other end. Such a cheek retractor portion 130 may be configured to press against and retract a patient's cheek away from the patient's teeth. When placed in a patient's mouth, the suction connector portion 120 may protrude from one side of the patient's mouth, while the main body portion 110 lies against the back of the patient's mouth, and the cheek retractor portion 130 retracts the patient's cheek on the opposite side of the patient's mouth. The flexibility of the material used to form the mouthpiece allows for some bending when placed in the patient's mouth. The material is, however, resilient enough that the cheek retractor portion presses against the inside of the patient's cheek with such pressure being sufficient to move the cheek away from the patient's teeth.

An exemplary main body portion 110, when placed in a mouth, may include an anterior wall facing the front of the mouth (*e.g.*, the side with slit 170) and a posterior wall facing the back of the mouth. The two walls may connect at a superior wall and an inferior wall forming a body that is at least partially enclosed.

[0015] Superior may be used herein to refer to the side that rests against a roof of a patient's mouth when placed therein, and inferior may be used to refer to the side that rests against the floor of the patient's mouth. The superior and inferior sides may be formed identically, which may allow for the mouthpiece to change orientation such that the superior side may appear as the inferior side and vice versa, in the new orientation. When in use, the respective sides of the main body portion 110 may serve to protect and separate the top of the mouth and the bottom of the mouth/tongue. In addition, the main body portion 110 may also serve to protect the back of the mouth (e.g., throat and airway) from falling debris.

[0016] Much of the main body portion 110 of the mouthpiece may be shaped as a straight-line arrowhead or shield whose base generally conforms to the intraoral shape of a patient's mouth. Differently-sized mouthpieces may be provided for differently-sized mouths of adults and children. Part of the base side of the arrowhead may be formed with thicker walls than the rest of the main

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

body. Such thickening may provide additional stability.

[0017] In addition, the main body portion 110 of the mouthpiece may include a plurality of holes 140 distributed along the superior and inferior sides of the anterior and posterior walls to assist in suctioning of water, saliva and debris from the oral cavity. In some embodiments, a set of holes may also form a mesh along the walls of the superior and inferior edges. FIG. 4 is a close-up view of an exemplary mesh wall in an exemplary mouthpiece.

[0018] At the narrow end of the arrowhead that connects to the cheek retractor portion 130, the main body portion 110 may include a rectangular portion. Narrower than the base of the arrowhead, the rectangular portion may additionally include a reinforcing bar (or stability bar) 150 (described in further detail below) and may be at least partially crossed by a slit 170 (described in further detail below) into the interior of the pocket of the main body portion 110.

[0019] Stability bar 150 may be a protrusion or otherwise a thickened area that reinforces the stability of the rectangular portion and assist in shaping this region to the intraoral posterior shape of a patient's mouth. FIG. 6A is a close-up view of an exemplary stability bar 150 of an exemplary mouthpiece. FIG. 6B is a cross-sectional view of the exemplary reinforcing bar in the cheek retractor connector portion of FIG. 6A.

[0020] In some embodiments, the internal, rectangular-shaped reinforcing or stability bar 150 may be located distally to the internal wavelike bridge structure 180 and attached to both the interior side of the posterior surface of the main body and the rectangular portion. Such a stability bar 150 may be located in the area where a positioned mouthpiece begins to wrap from the lingual side of the most posterior mandibular tooth, around the distal side of the most posterior tooth, and to anterior side of the most posterior mandibular tooth, thereby assisting in shaping the mouthpiece to the general intraoral shape of a patient's mouth.

[0021] Various embodiments of the mouthpiece may further include a longitudinal, open slit 170 extending over approximately two-thirds of the main body on the anterior surface. Running along the center of the main body across the rectangle and most of the arrowhead, such a slit 170 may assist in capture and suction of water, saliva and debris, as well as assisting in cleaning and maintenance.

[0022] Additionally, the main body of the mouthpiece may include a bridge structure 180 on an interior surface to ensure that the anterior and posterior surfaces remain separated during suction. FIG. 1E is a cross-sectional view of the mouthpiece in which the bridge structure 180 is illustrated. FIG. 5 is a close-up view of the bridge structure 180 without the surrounding walls of the main body portion. Such a bridge structure 180 may be formed as an wave-like protrusion that generally corresponds to the distance between the anterior and posterior walls extending substantially (e.g., within 1 mm) the full distance at its crest and substantially flush to the surface at its trough. In some embodiments, the bridge structure 180 may be centrally-located in the main body portion 110 of the mouthpiece. The gaps (or troughs) between the waves of the bridge structure 180 assist in the suction-driven transfer of water and saliva to the suction connector portion 120 and ultimately, into a central suction vacuum. In some embodiments, the bridge structure 180 may follow the shape of a logo (e.g., an arrowhead or shield).

[0023] The suction connector portion 120 may be oval-shaped and also attached to the main body portion 110. The suction connector portion 120 may be formed with thicker walls than the main body portion 110 and configured to attach to a high-suction vacuum adapter and to assist in transferring water, saliva, and debris from the oral cavity to the external adapter for removal. The suction connector portion 120 may also include an internal stop to assist in sliding the mouthpiece onto the adapter to a desired depth. The suction connector portion 120 may additionally have an external, concave, notched region 210 that corresponds to a removable strap such that when the strap is in place, the external walls of the strap and the rest of the connector portion may be flush.

The check retractor portion 130 is illustrated as a hammerhead distal region, which may be attached to the main body portion 110. FIG. 7A is a close-up view of an exemplary cheek retractor portion 130 in an exemplary mouthpiece. FIG. 7B is a cross-sectional view of the exemplary cheek retractor portion 130 of FIG. 7A.

[0024] The mouthpiece may be used with a mouth prop 160, as illustrated in FIGs. 1 (with a mouth prop 160) and FIGs. 2 (illustrated without the mouth prop 160). FIGs. 3A-E provide different close-up views of an exemplary mouth prop 160. The removable strap 310 may be attached to mouth prop 160, which may be used to prop open a patient's mouth and teeth. In this regard, the suction connector portion 120 may additionally have an external plug 220 (FIG. 2C) protruding from the posterior side of the suction connector portion 120. Such a plug 220 may correspond to and serve to connect with an opening in the mouth prop 160. The mouth prop 160 may be reinforced by the presence of the plug 220 in the opening, thereby resulting in a more crush-resistant, nearly incompressible, and stable mouth prop 160. In some embodiments, the suction connector portion 120 may further have a cutout 230 (*e.g.*, which may be shaped as a logo) providing extra interlocking with a corresponding protrusion (*e.g.*, which may also be shaped as a logo) on an external high-suction vacuum adapter.

[0025] The mouth prop 160 may be made of thickened silicone material injection molded in a single piece with an elastic strap corresponding to the circumference of the suction connector portion. The mouth prop 160 has an internal, rectangular-shaped female slot designed to fit snugly with the external, rectangular-shaped male plug 220 of the suction connector portion 120 of the mouthpiece. Mouth props may be made in different sizes for differently sized mouths. Because the mouth prop and mouthpiece are detachable from each other, different siz-

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

es of each may be mixed and matched as needed for a particular patient's mouth.

[0026] The mouthpiece as described herein may be used with a one-piece, autoclavable, high-suction vacuum adapter. Such a high-suction vacuum body adapter may be made of a single homogenous material. Having a single lever design, such a vacuum adapter may function in the same manner as all the current high-suction vacuum evacuators and saliva ejectors in controlling the removal of water, saliva, and debris from the oral cavity to the outside vacuum source. The single lever may be designed to control the removal of water, saliva, and debris from the at least partially enclosed so main body through a single, large evacuation conduit within the suction connector portion.

[0027] Particular aspects of the present disclosure are set out in the following numbered clauses:

1. A dental mouthpiece composed of a material, the dental mouthpiece comprising: a main body portion comprising a defined pocket having an anterior wall, a posterior wall, and a side wall in between the anterior wall and the posterior wall, wherein the anterior wall, the posterior wall, and the side wall define an interior portion of the defined pocket; a cheek retractor portion configured to press against a cheek of a patient when placed in a mouth of the patient, wherein resilience of the material causes the cheek retractor portion to retract a cheek of the patient away from the teeth of the patient; and a suction connector portion for connecting the interior portion of the main body to a vacuum suction source.

2. The mouthpiece of clause 1, wherein the side wall includes a plurality of perforations.

3. The mouthpiece of clause 1, wherein the anterior wall and the posterior wall each includes a plurality of perforations.

4. The mouthpiece of clause 1, wherein the anterior wall further includes a slit along a central axis.

5. The mouthpiece of clause 1, further comprising a stability bar protruding from an interior surface of the posterior wall, wherein a thickness of the stability bar increases resilience of the cheek retractor portion during bending.

6. The mouthpiece of clause 1, wherein the main body portion, the cheek retractor portion, and the suction connector portion are formed by injection-molded as one piece.

7. The mouthpiece of clause 1, wherein the material used in the injection-molding is a flexible, translucent, high heat-resistant, autoclavable silicone-based material.

8. The mouthpiece of clause 1, further comprising a bridge structure protruding from an interior surface of the posterior wall, the protruding bridge struchue comprising a plurality of spaced contact points that keep the anterior wall separated from the posterior wall during suction.

9. The mouthpiece of clause 8, wherein the bridge structure protrudes from the interior surface of the posterior wall in a wave shape, and wherein the contact points are at crests of the wave shape.

10. The mouthpiece of clause 9, wherein troughs of the wave shape are configured to allow suction through the bridge structure.

11. The mouthpiece of clause 1, wherein the suction connector portion comprises an internal stop to assist in positioning of a vacuum suction source or a vacuum adaptor.

12. The mouthpiece of clause 1, further comprising a detachable mouth prop.

13. The mouthpiece of clause 12, wherein the detachable mouth prop comprises a strap configured to fit around the suction connector portion, wherein an external surface of the suction connector portion comprises a notch region corresponding to the strap, and wherein an external surface of the strap is substantially flush with a remaining external surface of the suction connector portion when the strap sits in the notch region.

14. The mouthpiece of clause 13, wherein the strap is injection-molded in a single piece with the mouth prop.

15. The mouthpiece of clause 1, wherein the suction connector portion further comprises an external plug protrusion corresponding to an opening in a mouth prop associated with the strap.

16. The mouthpiece of clause 15, wherein the plug protrusion fits into the opening to provide additional crush-resistance and decreased compressibility during biting by the patient.

17. The mouthpiece of clause 1, wherein the suction connector portion comprises a cutout corresponding to a protrusion on a vacuum adapter for an interlocking fit.

18. The mouthpiece of clause 1, wherein the anterior wall and the posterior wall have different thicknesses.

[0028] While various embodiments have been described above, it should be understood that they have been presented by way of example only, and not limitation. The descriptions are not intended to limit the scope of the invention to the particular forms set forth herein. Thus, the breadth and scope of a preferred embodiment should not be limited by any of the above-described exemplary embodiments. It should be understood that the above description is illustrative and not restrictive. To the contrary, the present descriptions are intended to cover such alternatives, modifications, and equivalents as may be included within the scope of the invention as defined by the appended claims.

[0029] The scope of the invention should, therefore, be determined not with reference to the above description, but instead should be determined with reference to the appended claims.

Solmetex Ex. 2025
Ascentcare Dental Products v. Solmetex - IPR2025-01175

Claims

1. A dental mouthpiece composed of a bendable material, the dental mouthpiece comprising:

   a main body portion (110) comprising a defined pocket having an anterior wall, a posterior wall, and a side wall in between the anterior wall and the posterior wall, wherein the anterior wall, the posterior wall, and the side wall define an interior portion of the defined pocket, wherein the posterior wall comprises a bridge structure protruding from an interior surface of the posterior wall in a wave shape, the protruding bridge structure comprising a plurality of spaced contact points that keep the anterior wall separated from the posterior wall during suction, wherein the spaced contact points are at crests of the wave shape, and wherein a plurality of troughs of the wave shape allow for suction through the bridge structure;
   a cheek retractor portion (130) connected to the main body portion (110); and
   a suction connector portion (120) configured to connect the interior portion of the main body portion (110) to a vacuum suction source, wherein the suction connector portion (120) is connected to the main body portion (110) on an end opposite the cheek retractor portion (130).

2. The mouthpiece of claim 1, wherein the side wall includes a plurality of perforations (140).

3. The mouthpiece of claim 1 or 2, wherein the anterior wall and the posterior wall each includes a plurality of perforations (140).

4. The mouthpiece of claim 1, 2 or 3, wherein the anterior wall further includes a slit (170) along a central axis.

5. The mouthpiece of any of the preceding claims, wherein the main body portion (110) is shaped as a straight-line arrowhead and includes a rectangular portion at a narrow end of the arrowhead, wherein the narrow end of the arrowhead is connected to the cheek retractor portion (130), wherein the mouthpiece further comprises a stability bar (150) protruding from an interior surface of the posterior wall, and wherein a thickness of the stability bar (150) is adapted to reinforce stability of the rectangular portion of the main body portion (110).

6. The mouthpiece of any of the preceding claims, wherein the main body portion (110), the cheek retractor portion (130), and the suction connector portion (120) are mold in one piece, preferably by injection molding.

7. The mouthpiece of any of the preceding claims, wherein the material is a flexible, translucent, high heat-resistant, autoclavable silicone-based material.

8. The mouthpiece of any of the preceding claims, wherein the suction connector portion (120) comprises an internal stop to assist in positioning of the vacuum suction source.

9. The mouthpiece of any of the preceding claims, further comprising a detachable mouth prop (160), wherein the detachable mouth prop (160) comprises a strap (310) configured to fit around the suction connector portion (120), wherein an external surface of the suction connector portion (120) comprises a notch region (210) corresponding to the strap (310), and wherein an external surface of the strap (310) is substantially flush with a remaining external surface of the suction connector portion (120) when the strap (310) sits in the notch region.

10. The mouthpiece of claim 9, wherein the strap (310) and other portions of the mouth prop (160) are injection-molded as a single piece.

11. The mouthpiece of claim 9 or 10, wherein the suction connector portion (120) further comprises an external plug protrusion (220) corresponding to an opening in the mouth prop (160).

12. The mouthpiece of claim 11, wherein the plug protrusion (220) fits into the opening to provide additional crush-resistance and decreased compressibility.

13. The mouthpiece of any of the preceding claims, wherein the anterior wall and the posterior wall have different thicknesses.

14. The mouthpiece of any of the preceding claims, wherein the cheek retractor portion (130) is configured to press against a cheek of a patient when placed in a mouth of the patient, wherein resilience of the material causes the cheek retractor portion (130) to retract a cheek of the patient away from the teeth of the patient.

15. A combination comprising:

   a mouthpiece according to any of the preceding claims; and
   a vacuum adapter;
   wherein the suction connector portion (120) of the mouthpiece comprises an internal stop to assist in positioning of the vacuum adapter; and/or
   wherein the suction connector portion (120) of the mouthpiece comprises a cutout (230) corre-
