

MANAGEMENT

PRESIDENT + CEO

Bill Brennan

Bill Brennan brings more than 25 years' experience in leading and scaling organizations to deliver steady revenue growth and profit. Bill joined Credo in 2013 and has led the organization to greater than 90% CAGR revenue growth since 2014 while achieving profitability for five consecutive years. Bill has overseen the scaling of Credo's organization from 15 employees in 2013 to more than 200 today. Prior to Credo, Bill served as Vice President, Storage Business Unit of Marvell Semiconductor for 11 years. Prior to Marvell, he held sales management positions with NEC and Texas Instruments. Bill received his BSEE degree from the University of Colorado.

CTO + FOUNDER

Lawrence Cheng

Lawrence Cheng has over 20 years experience in Analog Design. Prior to Credo, Lawrence served as Engineering Director of Analog Design for Marvell Storage Products from 1997 to 2008. He designed the Analog Frontend for Credo's 28G and 56G Serdes in various process nodes since 2008.

COO + FOUNDER

Job Lam

Job Lam has over 20 years background of IC industry. Prior to Credo, Job served as Senior Design Engineering Director for Marvell Read Channel Division and had been with Marvell from 1996 to 2008.

VP, ANALOG

Arshan Aga

Arshan Aga brings more than 15 years' experience in analog design and management. Previously, he served as Vice President of Hardware Engineering at Vital Connect, Inc. for where he was responsible for overseeing chip, hardware, firmware and bio-sensor algorithm development. Prior to that, Arshan was a Design Manager at Marvell Semiconductor in the storage business unit where he designed and managed high speed analog circuits for storage products.

VICE PRESIDENT, DIGITAL DESIGN

Yifei Dai

Yifei Dai has more than 10 years' experience in digital design with deep knowledge in SoC integration and physical implementation. Yifei has been responsible for digital implementation and design flow development in Credo since 2009. Prior to Credo, Yifei

worked for S3 graphics on GPU products.

CHIEF FINANCIAL OFFICER

Dan Fleming

Dan Fleming has over 20 years of financial leadership experience in the Semiconductor and Solar industries. Prior to Credo, Dan served as VP of Finance at Siva Power, where he was responsible for Siva Power's Finance, Accounting and Administration functions. Prior to Siva Power, Dan held various financial management positions at SunPower, Marvell Semiconductor, Xilinx and Prism Solutions.

VP, WORLDWIDE SALES

Michael Lampe

Mike brings more than 30 years' experience in semiconductor sales, building global sales organizations. Prior to Credo, Mike served as Vice President of Connectivity Sales at MACOM where he was responsible for worldwide sales of their Connectivity product lines. Prior to MACOM, Mike held various sales and sales management roles at Marvell Semiconductor, Applied Micro and Quantance.

Rajan Pai

Rajan Pai is responsible for developing high performance transceiver solutions serving a broad market including service provider, data center and enterprise segments. Prior to joining Credo, he led the Storage Business Unit at Marvell delivering storage solutions for hard-disk drive and solid-state drive market. Rajan has more than 20 years of experience in mixed signal design development and has served in various leadership roles in applications, marketing and sales for numerous customer product designs.

VP, ENGINEERING

Dr. Haoli Qian

Dr. Haoli Qian has over 10 years of communication system architect experience with deep knowledge and insights in mixed-signal architecture optimization. Prior to Credo, Dr. Qian was the design manager and system architect leader for Marvell Ethernet Products and had been with Marvell Semiconductor from 2004 to 2009.

VP, SYSTEMS ENGINEERING

Joe Sheredy

Joe Sheredy brings over 30 years of experience in the data storage market in both HDD/SSD development as well as the IC industry supporting those products. Prior to joining the Credo team, Joe was with Marvell Semiconductor from 2000

to 2015, last serving as Vice President of Systems Engineering, Storage Business Unit.

GENERAL COUNSEL

Adam Thorngate-Gottlund

Adam Thorngate-Gottlund is an experienced transactional attorney with particular expertise in securities, corporate governance, and technology transactions. Prior to joining Credo, he practiced at a law firm in Silicon Valley where he advised start-ups and their founders on the broad range of issues arising during formation, through funding and growth, to exit. Adam's responsibilities cover the full range of Credo's legal needs. From corporate record keeping and intellectual property to immigration and export control, Adam brings a balanced approach to his role as General Counsel. With personal experience founding and running small companies, he is able to be a practical advisor to Credo's employees, management, and Board.

VP, MARKETING AND BUSINESS DEVELOPMENT

Jeff Twombly

Jeff Twombly has extensive knowledge in marketing and in selling complex, high-value based solutions to enterprise, networking, data center and telecommunications corporations. Jeff brings over two decades of marketing, sales, and business development experience to Credo. He thrives in technology evangelization, business development, sales, and support. Before joining Credo, Jeff held key senior executive positions at Frequentz, Parallocity, SiNett, and Cavium Networks.

Dr. Albert Wu

Dr. Albert Wu serves at Credo's Vice President to Operation. Prior to joining Credo, Dr. Wu served in key manufacturing technology leader roles in several successful Fabless companies from startup to IPO or M&A, including Marvell Semiconductor, Inc., Silicon Spice, Inc., Monolithic System Technologies, Inc. and ISSI, after leaving his R&D career at Intel Corporation where he was an active contributor in advanced process technology development in the Component Research department which explores future technologies 5+ years ahead into the future. The last tenure Dr. Wu had before joining Credo Semiconductor, Inc. is 15 years of Vice President of Operations at Marvell Semiconductor, Inc. where he leads the department to support company growth from a startup to an S&P500, billions of dollar annual revenue operations.

Credo is a provider of high performance mixed-signal integrated circuits used in high bandwidth applications, ranging from cloud-scale data center to high performance computing to enterprise networks. Founded in 2008, our technologies enable optimized solutions that demand leading edge speed, power, and signal processing requirements.
