STRUCTURE AND METHOD FOR ACCESSING AND POPULATING COMMUNITY WEBSITES

by Inventors:

Daniel L. Ahlberg
David A. Block
John Feldmeier

FIELD OF THE INVENTION

The present invention relates generally a network system used for the formation and populating of community websites, and in particular sports community websites. More specifically, the present invention provides a website structure and method of populating the site through membership invitations to non-members, and access-level change requests for members, with administrators overseeing the member lists.

BACKGROUND OF THE INVENTION

Computer networks provide an efficient means for transporting data between workstations or terminals on (or connected to) the network. Such networks can consist of Local Area Networks (LANs), which are generally restricted to one geographical area or location. Such networks can also include Wide Area Networks (WANs) which connect a number of machines over a larger geographic area. The Internet is also an example of one such network. The Internet is a worldwide system of computer networks -- or a network of networks -- wherein users at any one computer can, if they have permission, get information from any other computer. The Internet was conceived by the Advanced Research Projects Agency (ARPA) of the U.S. government in 1969 and was first known as the ARPANet. The original aim was to create a network that would allow users of a research computer at one university to be able to "talk to" research computers at other universities. A side benefit of the ARPANet design provided that messages can be routed or rerouted in more than one direction, and that the network can continue to function even if parts of it were destroyed in the event of a military attack or other disaster (including simple down-time of component parts).

Today, the Internet is a public, cooperative, and self-sustaining facility accessible to hundreds of millions of people worldwide. The Internet is providing ever increasing opportunities for persons across the world to interact with each other via a relatively cheap medium of communication. A person might use a computer to pull up a website and see information that might pertain to an organization to which that person belongs, or is affiliated. Many such websites require a registration procedure to be completed, wherein the user provides certain personalized information and is assigned an identifier to use when accessing the site. Through this identifier, the user can access personal, or private information from a database or the like associated with the website. The personalized identifier generally prevents such information from being accessed by other users of the website.

Many internet sites also have community aspects associated with them. Community aspects provide the ability for a member to interact with a variety of other members on the site. For instance, the user might post and/or retrieve information from a website, or certain areas of a website. Depending upon the nature of the information being posted or retrieved, security issues become important in discerning who will be allowed to become a member of any given community.

In present Internet sites, the impetus is placed on increasing the size of registration databases as quickly as possible. Larger registration databases provide the ability for websites to charge higher advertising rates. Additionally, larger registration databases generally lead to a higher relative valuation for the website company. Internet sites with registration systems are generally populated by various users coming to the site for the content contained therein. Typically, a certain amount of content is provided to casual visitors to the site. More content is offered thereafter upon completion of the registration process. In such situations, many users are dissuaded from joining because of the requirement to provide certain personal information. Such users believe that their privacy is being violated, as many websites will thereafter forward (or sell, or datamine) a user's information, for marketing purposes and the like.

The combination of security concerns around user registration information, and user community information often makes it difficult to expand a registration database. This is particularly true where the community information involves children, or other family members, or a particular user. Such situations often occur with websites involving sporting

events, school events, or the like. For instance, a website might be provided for certain team (or school activity) information, and a parent can access this site in order to find out various information regarding that team. Such information might include practice times, team news, and so forth. A open-ended "come and register" system for building up a registration database will likely create concerns for a parent regarding who else might be accessing such information about their child. Practice schedules and the like might not be available to the general public. However, any registered user associated with that team could access such schedules and thereby have personal information that might prove to be detrimental in certain circumstances (i.e. parent custody disputes, or access by persons with criminal intent towards children, etc). Such overriding concerns might dissuade a parent (or guardian) from registering with a website, as there is no control over who actually belongs to the community of users.

One method of controlling (and/or growing) the membership to a particular website is through the use of invitations sent out by existing members to other non-members. One such website that employs this principal (at least in part) is Sixdegrees.com. The premise of this website centers around the principle that any one person is separated from any other person by only six degrees of separation (or personal contacts). Hence, persons send out invitations to grow their particular network or web of contacts. A person might join the site without an invitation, but in such a case no underlying network would initially be associated with that person. Hence, it is preferable to join through an invitation from an existing member in order to maximize exposure to other people. Under such a system, no tangible policing aspects exist for associations made down the line in your network or web of contacts. For instance, you may become associated with persons in your network of contacts that are undesirable, and which simply resulted from your own invitation, sent to a trusted person known to you. As pointed out above, it is the very nature of the six degrees principal to reduce the level of separation between any two persons. This does not comport with security aspects needed for a site which offers personal information about an individual, particularly children involved in sports (or other) leagues.

Accordingly, what is needed in the field is a method and apparatus for structuring a website which allows a user to participate in various communities, but allows a certain level of self-policing (or restriction) to the persons joining (or participating) in these communities.

A structured level of access to various community information should be provided, wherein certain users will have more access than others to a user's personal or community information. The community members themselves might be used to propagate the growth of the community through invitations to others so that they might have access to certain levels of information. Administrator(s) at different levels, might be used to ultimately decide the access levels for any given Community user.

SUMMARY OF THE INVENTION

To achieve the foregoing, and in accordance with the purpose of the present invention, a certain web structures and methods are provided which will allow for more secure development of a website structure, and for more secure methods of populating the website with registered users. A community of inter-related users is created through the website structure, with the community growing through members of the site selectively sending out invitations to known and trusted individuals who are not yet members. Additionally, invitations can be sent to known and trusted individuals who are members, but are not part of a specific community. An Administrator will provide final approval of such invitations, and the invitees can thereafter choose to register with the website, and become a part of the Community. Each member of the Community will have a different access level based upon their role or status in the website structure.

Communities relating to the Internet generally provide a method of sharing information between a large number of persons who might be interested in one topic. Such communities might include sports teams, school activities, clubs, or the like. Information within such a community might include personal schedules, pictures, or other items having a personal nature. In certain instances, it will be desirable to share such personal information with other members of the community. The level of sharing will often depend upon the role (or status) of the person associated with the particular community.

The present invention is described in terms of a sports-oriented website, namely myteam.com. This site includes a multitude of web pages, some of which are restricted to viewing only by Members and their selected invitees. A given page may be viewable in two or more versions, with elements on the page appearing or being hidden from view depending on the access level that the individual has in relation to the page. Many of the elements on the page are contained within capsules that show a summary of the information that is displayed on the page that is linked to the capsule.

Three (3) types of Communities are described, and access to the list of each Community's members is available only to the owner (or administrator) of the Home pages which are associated with each Community. A first type of Community includes a Members

own Home page, and contains personalized material pertaining to that Member. A second type of Community includes a Team Home page, and contains Team information. A third type of Community includes a League Home page, and contains League information. These particular Communities are presented by way of example, and the present invention is not intended to be limited to these three example Communities. The spirit and scope of the present invention includes, among other things, the inter-related nature of the communities, along with selectable access being provided based upon the status of any particular user of the website.

Certain variations of the content associated with these Communities might be viewable from a different context. Additionally, a certain amount of limited information might be viewable by general Visitors to the myteam.com website. Other types of information can be made available to Members other than the one who owns the page. The pages of each Community contain, for instance, capsule information, and hyperlinked information, much of which should be protected from public distribution. As sports-oriented programs (or school programs, etc.) often involve children, and/or schedules oriented around children's activities, the need to limit access to such information becomes even more important. Yet despite such privacy concerns, it is also important to be able to expand the user base of the Community.

To expand the registration database, an Administrator (or owner) of a Personal Home page (i.e. "My Home" page) can send out invitations to other Members on the myteam.com system, thereby inviting them to see their My Home page. Such an invitation usually carries a reciprocal agreement to see the person's page that was so invited. Invitations might also be sent to Non-Members to join the myteam.com website. Invitations can be sent out via email or via hardcopies. A centralized message center can be used to facilitate sending out such invitations. The invitation will include an identification or code number which serves to identify the relationship between the invitor and invitee.

By expanding the registration base of the website, and/or access to personal information through invitations to trusted persons, a website can be expanded in a relatively secure manner. Persons joining the community will be a friend or trusted person of at least one other person in that community. Even with this structure, an undesirable person might enter a community (or be invited to enter) through an ill-advised invitation. As a result, the Administrator at any particular level will ultimately have overriding power in determining

who will be allowed to join a Community, or who will be removed from having trusted access to a Community.

5 Within the interacting (and overlying) structures of the various Communities -- i.e. League/ Team/ Personal (or My) Community structure -- persons can have access to different information based upon the particular access level assigned to that person. The person can request a change of access from the administrator in order to be allowed to see more information on the various sites. If deemed appropriate, the administrator will then invoke that particular change of status in the myteam.com system.

10 These and other aspects and advantages of the present invention will become apparent upon reading the following detailed descriptions and studying the various figures of the drawings.

BRIEF DESCRIPTION OF THE DRAWINGS

The invention, together with further advantages thereof, may best be understood by reference to the following description taken in conjunction with the accompanying drawings in which:

5 Figure 1 is block diagram showing a representative site map, according to one aspect of the present invention, of the myteam.com website.

Figure 2 shows a representative chart, according to one aspect of the present invention, of the various access levels that might be achieved by different types of users, in relation to different Home site elements.

10 Figure 3 shows certain representative webpage elements, according to one aspect of the present invention, of the My Home page for a player.

Figure 4 shows certain representative webpage elements, according to one aspect of the present invention, of the Team Home page as viewed by a Team Administrator.

15 Figure 5 shows certain representative webpage elements, according to one aspect of the present invention, of the League Home page as viewed by a Member.

Figure 6 shows certain representative webpage elements, according to one aspect of the present invention, of the Team Home page at the end of Team Find operation.

Figure 7 shows a flowchart having certain representative elements, according to one aspect of the present invention, of the My Communities site flow map.

20 Figure 8 shows a first representative webpage of certain elements, according to one aspect of the present invention, of the My Friends selection from the My Home page.

Figure 9 shows an alternative representative webpage of certain elements, according to one aspect of the present invention, of the My Friends selection from the My Home page.

Figure 21 shows a representative webpage of certain elements, according to one aspect of the present invention, of the League Spectators selection from the League Communities area.

5 Figure 22 shows a representative webpage of certain elements, according to one aspect of the present invention, of the New Invitations selection from the My Communities area.

Figure 23 shows an alternative representative webpage of certain elements, according to one aspect of the present invention, of the New Invitations selection.

10 Figure 24 shows a representative webpage of certain elements, according to one aspect of the present invention, of the Change User Access selection from the Communities area, which an Administrator might use to change the access, whether or not an individual requested the change.

15 Figure 25 shows a representative webpage of certain elements, according to one aspect of the present invention, of a Request for a Change of Access selection from the Communities area, which the Member uses when they want to request a change of access from the administrator.

Figure 26 shows a representative block diagram, according to one aspect of the present invention, of the hierarchy associated with the League structure, including League Profile, League Teams, and League Members.

20 Figure 27 shows a representative block diagram, according to one aspect of the present invention, of a hierarchy associated with the League Profile side bar item.

Figure 28 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with the League Profile selection.

25 Figure 29 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with the Editing League Profile selection.

Figure 30 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with the Select Contact selection.

Figure 31 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with the League Profile -- Divisions selection.

5 Figure 32 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with the League Divisions -- Add/Edit selection.

Figure 33 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with the League Teams selection.

10 Figure 34 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with the League Teams Main Page selection.

Figure 35 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with the League Teams Add/Edit selection.

15 Figure 36 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with the League Teams -- Team Roster page selection.

Figure 37 shows a representative block diagram, according to one aspect of the present invention, of a hierarchy associated with the League Members side bar item.

20 Figure 38 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with the League Members -- Players page selection.

25 Figure 39 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with adding Players, Volunteers, or Officers to the League Members.

Figure 40 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with selecting Players and assigning them to teams.

5 Figure 41 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with selecting available League Volunteers.

Figure 42 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with selecting available League Volunteers for officer positions.

10 Figure 43 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with displaying a League Member's detailed information.

15 Figure 44 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with displaying a League Officer's detailed information.

Figure 45 shows a webpage having certain representative elements, according to one aspect of the present invention, which are associated with editing detailed information pertaining to an individual.

20 Figures 46A and 46B show a generalized computer system architecture that might be used to implement certain aspects of the present invention.

DETAILED DESCRIPTION OF THE INVENTION

SECTION 1 -- COMMUNITIES (See also Appendix 1 materials)

The present application relates to providing a website (and associated webpages) having a structure which facilitate the secure access, development, and population of the website, and its community features. While the example website described herein is presented in terms of sports-oriented topical material and its related community, the principles described herein are readily applicable to other types of websites employing community aspects. This is particularly true for websites relating to the posting of personal information about a person, the person's family, or the like. Such instances might include school activities, extracurricular activities, clubs, and so forth. Accordingly, the present invention provides controllable levels of access for different visitors to the website, as conditioned upon the visitor's status and access level. The structure provides communities which are formed on an invitational basis, and as such, such selective invitations add a further level of control in populating a community with known persons. Additionally, administrator(s) at each structural level of the website have the ability to override and control access to certain information. Certain administrators can also control who can become a member of an administered community.

The present invention describes three types of communities. Each community is accessible only by the owner, and their invited guests, of certain respective Home Pages. Referring now to Figure 1, a block diagram 100 is shown of certain representative elements comprising a site map for the myteam.com website. There are two broad areas to the site. The first area has general content material, which is accessible by visitors to the myteam.com website. The second area is comprised of Home pages, which are generally accessible only by members. To a limited degree, however, a visitor can see some information on these pages.

A representative user model might include the following definitions. The present invention is not intended to be limited to such terms, and such terms are proposed only to facilitate description of the sports-oriented myteam.com website example. A "Member" is an individual who has registered with the myteam.com website, and has been assigned a user identification number (or symbol) and password. The Member uses this identification number and associated password when logging onto the system. Each Member is assigned a "My

Home" personal page. A "Visitor" is not a myteam.com Member, or is an individual viewing the site without currently being logged in. A Visitor cannot see any My Home personal pages. In order to see such pages, a Visitor must be invited by the individual who "owns" the page, and the Visitor will become a myteam.com member in the process of accepting the invitation.

5 "Friends" include other Members who must be invited by the individual to see their personal home page. "Team Members" exist from a private relationship that is created by the Team and/or League Administrator. At the discretion of the Administrator, such a relationship can include reciprocal pre-granted access between the personal Home pages of the Team Members.

10 Regarding specific Team or League Home pages, a "Spectator" is a site Visitor or Member who has not been granted Fan access to the Home page. The Spectator might also be referred to as an Anonymous Guest. "Fans" derive from a trusted relationship that must be granted or provided through invitation by the Team Administrator. Invited Fans must become a myteam.com Member, if they are not already. Fans include trusted friends and family who
15 do not directly participate in the running of the Team. "Team Members" derive from a private relationship granted by a League or Team Administrator only to those who play on, or directly participate, in the running of the team and/or its parent league.

Referring again to Figure 1, the myteam.com home page 102 is shown as the entry point for users entering the website. Visitors 104 can access a variety of general tabbed information
20 106, or overview information 108. Such overview information 108 is shown to include various information "About myteam.com." Example topics that are listed include: overview, partners & users, myteam.com Pros, Advisory board, Press Releases, Positive Quotes, Contact information, Preview information, jobs at myteam.com, and advertising information. The tabbed information includes: "News & Events," "Sports Central," "Fun & Games,"
25 "Community," and "Store." The "News & Events" tab can be used to pull up topics such as: feature stories, news headlines, multimedia, columns, sports wire, events, or news submission. The "Sport Central" tab is shown to include: Instruction about various sports (i.e. drill strategies, game instruction), 101 sports (i.e. descriptions of various sports), mental edge, training room, organizations, information about myteam.com experts, and print center
30 information. The "Fun & Games" tab includes: online games, backyard games, comics, trivia & crosswords, free stuff, and contest information. The "Community" tab includes: related

articles, polls (i.e. favorite equipment, etc.), "ask the pro" information, issue of the week, and live chat events. The "Store" tab is shown to include: equipment, auctions, personalized products, instructional products, myteam.com gear, and buying guides, all of which can be acquired as "ecommerce" (i.e. electronic commerce) items. For this set of Visitor information, anybody that comes to the myteam.com site will have access to such information. The viewing experience is generally the same for Members and Visitors.

Members of the myteam.com website will be provided an entry point, which will prompt the user for their identification number and password. Upon entering the system, Members are provided access to three types of mini-site areas, namely My Home, Team Home, and League Home. Each member can have access to multiple instances of each type of mini-site, as they may have relationships with more than one team and leagues. Note that non-members can also get limited access to the Team Home mini-site, and the League Home mini-site (See Figure 2 below for access levels).

The Member will be placed (by default) in their own My Home mini-site. Also shown are the Team Home mini-site, and the League Home mini-site. Only Members may access a My Home mini-site. Access is a result of ownership, or via invitation from the owner; otherwise even Members cannot access another person's My Home mini-site. Linked pages associated with the My Home mini-site include, for example: My Message, My Schedule, My Teams, My New, My Favorites, My Fans, and My Profile. Each of these links pulls up pages relating to the listed topics, and which are particularized with information pertaining to the mini-site owner.

Any team that a Member belongs to, will have a Team Home page and associated linked pages therefrom. Such link pages might include: Team Finder, Team News, Team Schedule, Team Scoreboard, Team Photos, Team Locations, Team Roster, and Team Fans. Each of these links pulls up pages relating to the listed topics, and which are particularized with information pertaining to that Team.

The Team might also be part of a larger League, and which has a League Home page. The Member belonging to this Team may also, though not necessarily, be granted Invited Guest access to the League Home page, with any linked pages therefrom. Such links might include: League Finder, League Sponsors, League news, League Scoreboard, League Photos,

League Locations, League Profile, League Teams, League Members, and League Fans. Each of these links pulls up pages relating to the listed topics, and which are particularized with information pertaining to that League. Several of these pages themselves have links to editable versions of the pages or other tools that modify the contents of these pages. These editing tools and the links to them can collectively be referred to as League Tools 126, and are only accessible to the League Administrator(s).

There also exist links to transition between the three mini-site Page areas. A My Teams capsule is generally provided on a user's My Home page. By clicking on a link associated with a team name in this capsule, the user will be linked over to the Team Page for that team. On the Team Page, there will exist a link to League Page associated with that Team. The League Page might further include a link to a even higher organization. For example, for a Little League (LL) team belonging to a local League, the League Page might include a link to www.littleleague.org, which is the public website for all of Little League.

Each mini-site will present a variety of information, which generally includes Photos 118, News 120, Schedules 122, and Scoreboard 124 information. The discontinuous line 130 associated with the Photos information 118 shows that photos will be particularized for each mini-site, and information will not be passed there between. Hence, "local" photos pertaining to the owner, the Team, or the League will be shown on each mini-site. Varying levels of photo crossover are intended to be included within the scope of the present invention. The discontinuous line 132 associated with the News information 120 indicates that different types of news will be shown for each different mini-site, without passing of information there between. For instance, the My Home news might include a National news feed. Team news is written and submitted by a Team Administrator. News that is on the League Home page is submitted by the League Administrator. Varying levels of news crossover are intended to be included within the scope of the present invention. The continuous line 134, with bi-directional arrows between the mini-sites Team Home and League Home, indicates that Schedule information will be shared between the mini-sites. The continuous line 136 spanning the Team Home and League Home mini-sites indicates that Scoreboard information will be shared from the Team Home mini-site to the League Home mini-site.

It should also be noted that much of the content in the general content area, i.e. information that Visitors can see, will be seeded (or linked) into the various Home pages, and

capsules therein. For example, a "tip of the week" listed on a Member page is really going to lead the user (i.e. the Member) over to a page (or information) residing underneath the "Sport Central" tab. This serves to distribute, in a convenient way, the wealth of information found in the general content area over the various Member pages, without the Member having to
5 backtrack through the myteam.com general website.

Any number of exceptions might also exist from the structures described above, and still remain within the scope of the present invention. For example, a League Administrator may not be initially dropped into their My Home Member page. Instead, this League official will find it more convenient to be directed initially to the particular League Home page over which
10 they preside. A League President (or the like) can also use a My Teams capsule that is generally presented on every My Home page to quickly jump over to the League Home area.

As noted above, there are publically viewable Team and League Home pages available for Non-Members (or anonymous Visitors). These users, however, do not see a number of capsules located on the pages. In general, the present system preserves a certain level of
15 privacy when dealing with certain capsule information. Since the present sports-oriented website deals with youth, and youth oriented activities, it becomes important to limit certain access to such anonymous visitors. In might be detrimental if an anonymous visitor were able to freely access practice schedules, pizza party information, or photographs of a particular child. Various examples of prior art do allow free access to such youth oriented information.
20 For instance, visitors to such prior art sites are able to freely access telephone numbers of League Officers and Administrators. Also, such visitors can access photographs of children posted on the website, and the like. This is unacceptable under the present invention, and access is limited based upon the status of the individual accessing the site.

Referring now to Figure 2, an access level chart 200 is shown with four (4) key access
25 levels in relation to the My Home, Team Home, and League Home web pages. Certain fundamental concepts behind the formation of the Community aspects of the present invention were derived (in part) from security models. Aspects of security access were taken and incorporated into determining the population of the Community. Hence, the present system pre-defines the access levels in relation to the Community relationships, and combines them
30 into a consistent model. The types of Pages (i.e. My Home, Team Home, and League Home) are shown on the vertical axis, and are charted against the types of users (i.e. Non-Members

and Members). Non-members would include the Anonymous Visitor. Members would include the Invited Guest (Fan/Friend), Participant, or Administrator. The Invited Guest is also referred to as a Fan or Friend. A Fan is also an invited guest of Team Home or the League Home pages.

5 The My Home page is the most private of the mini-sites, as it contains the personal information of the registered Member of the myteam.com site. In general, nobody can see such information except the Administrator (i.e. the owner), or a Member who has been invited to view the information by the Administrator. As shown by the chart in box 202, no access is allowed to the My Home page for an Anonymous visitor. Proceeding right, box 204 shows
10 that an Invited Guest (or Fan/Friend) is allowed access to the My Home page. A personal invitation (with a personal invitation number) would be sent by paper or email, inviting the recipient to view they invitation sender's My Home page. The recipient would take the code number and go to the myteam.com registration page (which prompts for the code). The system now knows the relationship between the new member and the person that invited the
15 new member. The new Member gets their own My Home page, and the person giving them the invitation shows up on their My Friends list (and vice versa). If the Invited Guest is already a Member, upon entering their personal invitation code on the registration page, the person that invited the Member will be listed on the invited Member's My Friend's list. From that list, the user can click through and see the listed My Home page of the listed "Friend."
20 Hence, the Invited Guest shares in a reciprocal arrangement with the My Home page owner, in that both parties can view each other's My Home pages. Box 206 shows access is allowed for a Participant who is a verified family member, such as a parent or guardian. Box 208 indicates that the Administrator of the My Home page is the owner, and hence full access is allowed.

25 The Team Home page allows slightly more access to the different types of users. In box 210, the Anonymous Visitor is allowed limited access to the page. Limited access means that only certain capsules on the page are viewable, and the more private the nature of such capsules, the more likely that they will be precluded from being viewed by a Non-Member. When an Anonymous Visitor views the Team Home page, there will be an information
30 capsule that will say something to the effect of "contact name and email for this page is John Doe." The Team Photo capsule will display a "bookmark this team" button which will add the

Team Page to the list of teams on the My Teams capsule and My Teams page of the Anonymous Visitor. If the Anonymous Visitor wants to be added as an Invited Guest to this page, then the Visitor might click on a "request invitation" button that would notify the Administrator of the request to be sent an invitation. Alternatively, the Anonymous Visitor
5 may email John Doe and request that he be sent a personal invitation (and code). The Administrator (i.e. John Doe) will then send such an invitation to this Visitor if they know and/or trust the Visitor. Additionally, a Team Administrator might be pro-active and gather up all of the parents names, or sponsoring company, or owner of the sponsoring company, and so forth, and send such persons an invitation.

10 Invitations might also be automated in certain respects, in that parents, authorities, or contributors can be sent invitations automatically by the system. Yet another automatic feature might allow invitations to be sent out to all the other teammates of an individual, given that the common membership on a team provides the level of trusted needed to send out an invitation. This allows for convenient establishment of access rights, so that these
15 myteam.com Members can view each other's My Home pages.

In general, the system could look at what relationship exists, and predetermine what type of invitation to send out. For example, kids on a team would likely give their coach the right to see their My Home pages. However, the coach might not necessarily wish to give the kids the right to see his own My Home page. This situation (and others like it) might prompt
20 a two-way invitation to be sent out that could be responded to in a one-way fashion. For example, the response to a two-way invitation would be that the user would like to see the invitor's My Home page, but the user does not want to provide the right for the invitor to see the user's My Home page.

In box 212, the Invited Guest is shown as being allowed to see more information than a
25 Visitor, because the Invited Guest is a trusted individual. The only way to become an Invited Guest is through approval of the Administrator of that particular Home page. As a result, a self-policing level of security is introduced. In many cases, the Team Administrator would be the team coach, and would invite all of the parents of the players to become Invited Guests to view the Team Home page. The parents would get their invitation with a unique code for
30 each invitation, and take the invitation back to their personal computer. The code uniquely identifies the Home and League pages that the invited person is allowed to see, along with the

MYTEP001P

linking relationship to the person that invited them. This person will then become a myteam.com Member, and the system will know (through the code number) that this invited member is a guest of whomever invited them. Hence, a security relationship has been established because of the invitation required by an existing Community Member.

5 Additionally, if the Invited Guest is also a player, or staff member, or the like, they also get Participant status relating to the Team Home page. The Invited Guest is not offered full access to the Team Home page, but can see more capsules than the Anonymous Visitor. In box 214, the Participant is shown to have full access to the Team Home page, as this will be a key viewing area for any Participant on such a team. A Team Administrator will exist for the
10 each team, and box 216 shows that full access (including edit rights) is allowed for such an individual.

The League Home page is similar to the Team Home page. Box 218 shows that an Anonymous Visitor can see some information, but is limited from viewing certain capsule information. In box 220, an Invited Guest can see still more information. In box 222, a
15 Participant can see still more information. The League Administrator has a large realm of responsibility, and box 224 shows the League Administrator having full access to the League Home page.

At the Team Home level, as indicated by the asterisk, the present system will allow Participants (i.e. players and volunteers) to also be able to see Fan Lists for each team, and to
20 invite other people to be Fans. The Fan List includes individuals that have been invited, but have not yet accepted the invitation. In general, only the owner of a page gets to see the associated Fan List, and send out invitations in order to increase overall membership from that Fan List. At the Team level, however, the aforementioned exception is made. Such use of Fan Lists by Participants is self-policing, in that at any time, a Team Administrator can review
25 the Team's Fan List and delete an individual. Deletion of an individual could be based upon certain information known by the Administrator, that may not have been known by the person who placed the person on the Fan List. It is important to have several checks and balances regarding the status of certain individuals, as a wide variety of potentially private information is posted on the Team Home site, including for instance practice schedules, parties, and so
30 forth. Without approval of the Team Administrator, an Anonymous Visitor is generally limited to publically available information, such as game schedules and the like. This use of

Fan Lists by Participants will not be allowed, however, at the League Home level. It is believed that a League is too spread out, and it would be difficult to adequately police such an effort.

The League Administrator also has access to a set of League Tools (See Figures 26-45, described below). Such tools allow the Administrator to enable the league structuring, and league divisions. The tools also provide for arranging and organizing the teams in those divisions. Different league members (i.e. volunteers and players) can also be arranged and organized via such tools.

Referring now to Figure 3, a representative webpage 300 is shown of the My Home page for a player on a team. The various general information tabs 302 can be accessed from the upper border. Click-through hyperlinks 304 are available on the left border, or navigation bar. Various capsules are shown on the page, including news 306, online games 308, store 310, polls 312, My Teams 314, My Messages 316, My Schedule 318, My Favorites 320, and instructional information 322. Personalized information 326 is shown regarding the owner of this page (Jimmy Johnson), including for instance pictures of the player in action, or captions regarding the player's nickname. Advertisements 324 are also interspersed (in available spots) across the page. As noted above, the My Teams capsule (or click-through to a My Teams page), allows quick access to the Team Home pages for the various teams with which this player is affiliated. The My Teams capsule also includes a "Find any team" click-through link 315, as further described in association with Figure 6.

Referring now to Figure 4, a representative webpage 400 is shown of the Team Home page for a particular team. The shown view is from the access vantage level of a Team Administrator. As before, the general information tabs 402 are available on the upper border, along with a caption 403 identifying the Team (Foster City Giants). Click-through links 404 are shown for access in the navigation bar area. The various capsules on the page include Team Photos 406, Team news 408, store information 410, polls 412, Scoreboard information 414, Standing information 416, and Schedule information 418. Again, advertisements 422 can be included in available spots on the page. A click-through link 420 is also included to provide convenient access to the League Home page associated with the particular Team.

Referring now to Figure 5, a representative webpage 500 is shown of the League Home page for a particular team. The shown view is from the access vantage level of a Member of the myteam.com website. Once again, the general information tabs 502 are available across the upper border, along with a caption 503 identifying the League. Click-through links 504 are available for access in the navigation bar area. The various capsules associated with the page include: League photographs 506, League news 508, store information 510, League Standings 512, and the League Schedule 514. Advertisements 516 are similarly included on the page 500. The League logo 518 is also shown to further identify the page and to optionally provide a click-through link to a league's parent organization external site.

Referring now to Figure 6, a representative webpage 600 is shown which might result from invoking the "Find any team" link 316 from the My Teams capsule of Figure 3 above. This search has located the team "Foster City Giants," as was specified by the user. The resulting page is similar to the Team Home page for the located team, with a few exceptions. A list of additional options 602 is produced for this page, and presented via click-through boxes which are oriented in the navigation bar area, and superimposed over the previously listed click-through links. Having found this team, the user is given a range of options relevant to their membership status in the myteam.com site. The options could include (but are not limited to): Become a member & remember this team; add the team to the player's My Teams area; request to be made a fan of this team; try a search for another team; or cancellation of the "find any team" operation altogether.

The interaction of the various features on the myteam.com website can further be illustrated by the site flow map 700 as shown in Figure 7. The user enters the map via the My Home Page 702. A My Communities click-through area 704 in the navigation column (i.e. the left-most column on the My Home page) links to access an area shown as My Friends (or My Fans, or My Guests) 706. My Friends (Fans) is a list of people with whom the user has a relationship. Exceptions (i.e. names not shown) might include those people that are on the same team as the user. If all persons are so listed, then exploration of the Team's roster page will indicate which person's on that team having a sharing relationship with the user. This My Friends list provides a form of "bookmarking" between a user's site and a Friend's site, and indicates whether the relationship is reciprocal, a Friend only sharing with user, or the user only sharing with Friend. If a Friend is listed in My Friends and the name is a link, then

permission to view the other sites has already been granted. If a Friend is listed in My Friends and the name is not a link, then the Friend has permission to view the user's page, but the Friend has not granted permission to the user to view their site. If such permission has not been granted, a request can be formed via step 708 wherein the Fan asks the My Home page owner whether they can see various aspects. The request may be forwarded (or handled) through a message center 710.

The My Friends list can also be used by the My Home Page Administrator to send out a new invitation 712 to persons on the list. The invitation might be in the form of: "see my page," or "let's share pages," or "join myteam.com." The invitations are forwarded (or handled) through the message center 710. The email invitation can be broadcast from the myteam.com site, with the myteam.com return email address. Alternatively, the email invitation might be sent directly from the invitor, so the invitee can respond directly via email. The invitation might be handled in the form of an email invitation 714, or in the form of a paper invitation 716. The invitation (with its associated code number) can be used by the person receiving it to complete registration 718 with myteam.com, and subsequently gain access to the My Home page of the Administrator.

Note that a person can become an Administrator through several means. For a My Home page, the person that created that page through the registration process is its Administrator. Otherwise, at the league level, the League President will generally determine who is going to be the League Administrator (or may also appoint multiple Administrators). When the League Administrator populates the membership of that league, with both volunteers and players, and populates the league structure by creating divisions and the like for the teams, the League Administrator is prompted to create an Administrator for each individual team. If an independent team chooses to become associated with the myteam.com site, then the person who adds the team is (by default) the Team Administrator. Likewise, if an independent league is created in addition to the independent team, then the person who adds the league and team is (by default) both the League Administrator and the Team Administrator for any teams created in the league. If, however, this team should be associated with an existing League, then the existing League Administrator can exercise control. Ultimately, the myteam.com site will have super-administrative powers, and be able to give

control to the proper person who should exercise League Administrative powers in any given situation.

Referring again to Figure 7, a My Teams capsule 720 is shown, which would be found on the My Home page 702. The My Teams capsule 720 offers the option to click-through on teams that are listed. In doing so, the user will be taken to the Team Home page 722 for that particular team. Additionally, the Team Finder option 724 might be used to find a particular team. The user can also click-through to the My Teams page by clicking on the header of the My Teams capsule 720. The My Teams page displays the teams listed in the My Teams capsule, plus any additional teams that do not fit on the capsule and the team's respective leagues.

Referring now to Figure 8, a first version of a My Friends web page listing 800 is shown. This page is the initial page that comes up when a user clicks on "My Communities" in the navigation column (i.e. the left-most column) on the My Home page. This page is viewable only by the owner of the page. The page is capable of displaying multiple tables, all sharing the same column headings. This first My Friends version shows a first table which displays "friends" who are people that the user has invited to be myteam.com members, or other myteam.com members with which the user has a relationship. Members of the team that the user is a member of might be excluded. These "friends" are people that can see the user's My Home page, and vice versa. Subsequent tables are described in association with the alternative version of the My Friends web page (Figure 9 below).

In the first column 802, a listing of the names of the persons on the My Friends list is shown. If a name is not underlined or highlighted, i.e. name 804, then a click-through cannot be performed. If the name is underlined or highlighted, i.e. name 806, then permission has been granted by that person to see their My Home page. The user can thereby click-through on the name in order to see that person's My Home page. In column 808, the User ID or email of the listed persons are shown. The underlined or highlighted "myteamuserid" can be used to click-through a send a message to that particular myteam.com Member, through the myteam.com messaging system. Column 810 shows the access level for each listed name. If "yes" is shown, then the current user has granted the person click-through acces to their My Home page. Otherwise "n/a" might be shown if the current user has not granted the person access to their My Home page and/or if the person is not a myteam.com Member. An

"invited" status is shown if an invitation (i.e. a reciprocal invitation) has been sent to see the listed person's My Home page. Column 812 shows a "select" option which shows a checkmark if a name is selected. The "deleted selected" tab 814 deletes the selected names from the My Friends list, resulting in their access to the current user's My Home page being terminated. The "cancel" button 816 serves to cancel the selection of any names. A button 818 for "invite a friend" facilitates sending an invitation to Friends that are not on the list. A link back to My Home 820 is also shown.

Referring now to Figure 9, an alternative My Friends web page listing 900 is shown. In this arrangement, the user is given the option to select between a showing of My Friends or the listing of Teams the user is involved with via the click-through selector 902. A drop-down menu 904 is also shown for selecting which grouping to view. The dropdown values might include: All, Friends, Team1, Team2, and so forth. The listing of My Friends includes click-through names to see that person's My Home page, and click-through myteamuserid's to send that person a message (as above). The access level is shown in the "See My Home" column. The invitation column includes the type of invitation (and indication of status). As before, names can be selected, deleted, or canceled via the corresponding selection boxes and control tabs. This arrangement also includes (optional) team listings for Team 1 (906), and Team 2 (908). These listings include fellow teammates on the particular team (and league) shown. An "invite" hyperlink 910 links to the Invitations page, where additional friends can be invited. A "My Home" hyperlink 912 links back to the My Home page. The "delete selected" button 914 removes the people that were selected from the table. The "Cancel" button 916 returns the user to the page from which they came without taking any action.

Figure 10 shows a first version 1000 of a My Teams web page listing. This is the destination page if a user clicks on the My Teams capsule header. In this first version, a "Find Team" hyperlink 1002 is shown, and a My Home hyperlink 1004 is shown. A table is shown with teams listed and sorted according to the role of the user in relation to that team. For instance, teams on which the user is an Administrator are listed first, and so forth. In column 1006, the Team names are shown, with hyperlinks to various Team Home pages. In column 1008, the League Names are shown, or an indication of "not affiliated" if no such affiliation exists for a team. Column 1010 shows the role that the user has regarding each team (i.e. Administrator, coach, player, fan, or spectator). Column 1012 provides the ability to select (or

deselect) each team from the My Teams list, and button 1014 facilitates deletion of the selected teams from the table.

Figure 11 shows an alternative version 1100 of the My Teams web page listing. Features not found on the previous version include a My Friends hyperlink 1102 which goes to the My Friends page. In column 1104, the sport is listed for each team. A table is shown with the teams of which the owner is a member listed first, bolded, in a different color, and sorted alphabetically by team name. Following this are teams of which the user is a fan, sorted alphabetically, and so forth. Column 1106 shows the access level of the user in relation to each team listed. Each of these is hyperlinked 1108 to the Access Request page, except for Administrator. A Cancel button takes no action on any selected teams, and returns the user to the page from which they originally came.

Referring now to Figure 12, a flowchart 1200 is shown of representative elements associated with the Team Communities site flow map. A user enters the mini-site from the Team Home page 1202. A Team Communities hyperlink 1204 is accessible from the navigation bar area on the Team Home page. The Team Communities hyperlink brings up the Team Roster 1206. From the Team Roster 1206, a Team Fans page 1208, or a Team Spectators (also "Team Visitors") page 1210, can be accessed. From each of these lists (1206, 1208, and 1210), invitations can be sent out to the persons on the lists. Such invitations may be facilitated by a message center 1214, or the invitations may be broadcast in bulk from the myteam.com website. Either email invitations 1216 or paper invitations 1218 can be sent out (which will include an identification code, as before). The recipient can thereafter use the identification code to complete the registration process 1220. On various pages with user listings, hyperlinks will provide the ability for the Admin 1224 to Change User Access 1226 for that user (See Figure 24).

A Team Finder hyperlink 1230 can also be invoked from the Team Home page 1202. If such a Team Finder is used to find a team or league, additional buttons can be provided to facilitate requests for status changes in relation to that team or league.

The Team Spectators ("Team Visitors") page shows people who are not Invited Guests, but have requested to be granted Invited Guest status. The Administrator would thereafter go through the list and select which ones to approve and then invoke the grant

access function. A change of access operation is provided on the Team Fan and Team Roster pages for each individual listed who does not have administrator status. This enables access levels of Participant and Owner (Administrator) to be granted to those who already have at least Invited Guest access.

- 5 Note that similar data fields will exist for the Administrator view of the League Officer's page, but with the top of the page providing a League Communities context. This flow map 1200 also provides the same general data fields as the Team Members view of the Team Member page, but with the top of the page providing a Team Communities context.

- Referring now to Figure 13, a representative version of the Team Roster web page 10 1300 is shown. This is the initial page when the user clicks on "Team Communities" in the navigation column of the Team Home page. This version of the Team Roster page is viewable only by the Team Administrator and focuses on the functionality of enabling the Administrator to communicate with the listed persons, and to invite the persons to become myteam.com Members. To be able to delete and add members to the roster, the user must 15 click on the "Edit Roster" hyperlink 1302, to thereafter go to the Team Members - Team Administrator View (Unaffiliated) which is further described in League Tools (See Figures 26-45 below). The shown view is one of many possible views for a Team Roster, including for instance the League Administrator view, and the Team Administrator view for Unaffiliated. Two tables 1304 and 1306 are shown having Team Volunteers, followed by Team Players. 20 Both tables share similar columns.

- As an alternative version, rather than having separate tables for players, volunteers, and the like, a field (not shown here) could be included which would indicate the role of the listed person. Hence all persons will be included in one long listing, with the role indicated for each such person. Such roles might include: coach, administrator, team parent, field crew, 25 player, and the like. As one example, the listings might be sorted according to such roles.

- The Team Roster columns include a name column 1308, with each name having a hyperlink to that particular person's profile page. An access level column 1310 includes a hyperlink to the Change access page. Values for the access level might include: coach, administrator, team-member, and so forth. Column 1312 shows the phone number for each 30 listed person. Column 1314 shows the myteamuserid or email for each person on the Roster.

The myteamuserid's are hyperlinked to the myteam.com message center, whereas the email addresses are not hyperlinked. "N/A" might also be shown if the person is not affiliated with myteam.com, or does not have an available email address. Additional hyperlinks and buttons are also shown for the Team Roster page. A Team Profile hyperlink 1316 provides a direct link to the Team Profile page. A Team Fans hyperlink 1318 provides a direct link to the Team Fans page. A Team Visitors hyperlink 1320 provides a direct link to the Team Visitors page.

Figure 14 shows another Team Roster web page listing 1400, but in this instance for a Team-Member view. This page is similar to that shown in Figure 13, except that it does not include the access level column from the previous page.

Figure 15 shows a first representation 1500 of the Team Fans web page listing. This page lists the myteam.com members who have been granted Fan access by the Team Administrator. An "invite..." hyperlink 1502 is shown tied to the myteam.com Communities invitation pages. A table is shown listing the Fans of this particular Team. A column 1504 includes the name of each Fan. Column 1506 shows the myteamuserid for each Fan. Each Fan can be selected via column 1508. The Delete Selected button 1510 can be used to delete the selected Fans from the table. The Cancel button 1512 takes no action and returns the user to the page from which they came.

Figure 16 shows an alternative representation 1600 of the Team Fans web page listing. This version additionally includes a View dropdown menu 1602, with the initial view being "all." Dropdown menu values might include: All, fan, league administrator, league volunteers, and league players. Depending upon the value chosen, the various Fans displayed in the table will have that particular access level. This version also includes an additional column 1604 which shows the access level for each listed Team Fan. Access level values might include: fan, league administrator, league volunteer, and league player. Each of these values is hyperlinked to the Change Access page.

Referring now to Figure 17, a representation 1700 of the Team Spectators ("Team Visitors") web page listing is shown. Team Spectators are generally people who have requested, but have not yet been granted Team Fan ("Invited Guest") status. The most common means by which people will appear on the Team Spectators web page is by finding the Team page through the Team/League Finder and clicking on a "Request Invitation" button.

3
4
5 A "view" dropdown menu 1702 is shown, with an initial value of "all." The dropdown values would include: all, visited, invited, and members. A table is shown which lists the Team Spectators according to the dropdown menu value selected, and the corresponding status of each Team Spectator. A first column 1704 shows the name of each Team Spectator. Column 1706 shows the email addresses. Column 1708 shows the status of each Team Spectator, with the table listings sorted by status in the order of: Visited, Invited by Team, Invited, and Member. Column 1710 provides for selection of the Team Spectators.

6
7
8
9
10 A checkbox 1712 is included to "Auto invite all Spectators that are site Visitors to join myteam.com." If this box is enabled, the system will automatically send an invitation to all the site Visitors that "sign-in" to the Team Home page to join myteam.com. This invitation does not invite the Spectator to have Fan status, since this is a trusted relationship that should only be extended to people that the Team Administrator knows. Another checkbox 1714 is included to "Auto approve all members and visitors invited to Fan status by team members." Since the trusted relationship exists, then auto approval can be performed. The checkboxes
15 are generally visible in all Views except "all."

16
17
18
19
20 Other hyperlinks and buttons are included. For instance, a team roster hyperlink 1716 provides a link to the Team Roster page. A Team Fans hyperlink 1718 provides a link to the Team Fans page. A "Grant Fan Access to Selected" button 1720 will only be made visible when the View dropdown value is "members." This feature changes access to Fan status for those selected people. An "invite selected" button 1722 is only visible when the View dropdown value is "visited," and if the checkbox to "Auto invite all spectators..." is not enabled. This feature sends an invitation to become myteam.com members to the selected people. A "Cancel" button 1724 is only visible when either of the above buttons (1720, 1722) are visible. Clicking on this button takes no action and returns the user to the page from
25 which they came.

26
27
28
29 Referring now to Figure 18, a representation 1800 of a League Members web page listing is shown. A league administrator will generally see a list of all League Members, and then they can be assigned to teams, and the like. The League Member list includes anybody that has signed the registration form, paid the registration fee, and has had their data entered
30 by a league data processor. This page allows a League Administrator to go through and

selectively invite any of the League Members to become myteam.com members. Batch invitations might be sent out, based upon such things as the person's title, and so forth.

5 A parent navigation bar 1802 is shown with example Guest click-through links, and example Member click-through links. A table is shown with League Members listed, and sorted with League Administrators at the top, and Players at the bottom. Column 1804 includes the League Member name. Column 1806 includes the League Title for each League Member, including for instance: League Administrator, President, Administrator, Treasurer, Assistant President, Head Umpire, and Player. Column 1808 include the myteam.com ID or email address for each League Member. Column 1810 allows selection of members. A View
10 dropdown menu 1812 can be used to selectively limit the persons listed in the table. Dropdown values might include: all, Officers, Volunteers, or Players. An Invited Selected button 1814 allows invitations to be sent to the selected League Members. The Cancel button 1816 takes no action, and returns the user to the page from which they came. A League Fans hyperlink 1818 provides a link to the League Fans page. A League Visitors hyperlink 1820
15 provides a link to the League Visitors page.

Note that the data table shown on this page is the same as the Administrator's view of the League Officers page that is linked from the League Profile. Differences include: the top of the page, as defined above, is different in order to provide a League Communities context; the ability to select and invite a League Officer to be a Fan of the Team Home page. On a
20 regular League Officer's page, the action is to assign and remove their status as a League Officer and/or League Administrator.

Referring now to Figure 19, a first representative version 1900 of a League Fans web page is shown. This page displays all the myteam.com Members who have been granted Fan access to the League Home page. This page is similar to the Team Fans page, however, this
25 page is viewable only by League Administrators. No League Participants can see this page, as there is more concern for security this level.

A table is shown of the League Fans, sorted alphabetically by Name (last and/or first). Column 1902 shows the listed names of the League Fans. A hyperlink is associated with each name to the Change Access page to enable the individual's access level to be changed.
30 Column 1904 shows the myteamuserid for each listed name. A hyperlink is associated with

each myteamuserid which facilitates sending a message to that person. Column 1906 shows select/deselect checkboxes for each listed name. The Delete Selected Button 1908 will remove the selected individuals removed from the table. The Cancel button 1910 takes no action and returns the user to the page from which they came. The "invite..." hyperlink 1912
5 links to an invitations page, as populated by My Communities invitations.

Referring now to Figure 20, an alternative version 2000 of the League Fans web page is shown. This page is similar to the one shown in Figure 19. A parent navigation bar 2002 is shown across the top, and includes Guest and Member hyperlinks. Also in this version, a View dropdown menu 2004 allows the selection of only individuals with a specific access
10 level to be viewed. Access levels might include: fan, league administrator, league volunteer, or league player.

Referring now to Figure 21, an example representation 2100 is shown of League Spectators web page listing. League Spectators are generally people who have not been granted any special access, but have requested it. If a League Administrator has sent out an
15 invitation, then this page would provide the status of the invited who have not yet accepted such invitations.

This page lists all of the site Visitors and myteam.com Members who have found this League page using the Team/League finder, and have clicked on a "Request Invitation" button that appears on the League home page in that context. A View dropdown menu 2102 is
20 shown with an initial value of "all." Example dropdown values would include: all, visited, invited, or member. A table of League Spectators is shown, and the list includes names sorted according to their status, and limited by the dropdown menu choice. Column 2104 shows the list of League Spectator names. Column 2106 shows the email address for each listed Spectator, with a hyperlink associated with the name for send the Spectator a message through
25 the Message Center. Column 2108 shows the status of the listed Spectator, including status value including: visited, invited, or member. Members have a hyperlink through the status display enabling the League Administrator to click-through to the Change Access Level page for the selected individual and change their access level to a Participant or Owner (Administrator). Column 2110 provides a checkbox for selecting various Spectators. A
30 checkbox 2112 is provided to "Auto invite all league spectators who are not myteam.com members to join myteam.com." The Invite Selected button 2114 is only visible when the

MYTEP001P

View dropdown value is "visited" and if the "Auto invite..." checkbox is not enabled. This button sends an invitation to the selected person to become myteam.com members, but does not grant them Invited Guest access. A "Grant Fan access to Selected" button (not shown) is visible only when the View dropdown value is "member." This button changes the access to Fan status for those selected people. Once granted Fan status, the selected individuals will appear on the League Fans webpage and will no longer appear on the League Spectators webpage. The Cancel button 2116 is visible only when either the "Grant Fan..." or "Invited Selected" button are visible. This button takes no action, and returns the user to the page from which that came. The League Members hyperlink 2118, and the League Fans hyperlink 2220 each link to those respective web pages.

Figure 22 shows a first representative version 2200 of a New Invitations web page. A first table on the page allows invitations to be sent for joining myteam.com. A second table allows a Member to invite friends and family whom are already Members to visit the home page of themselves, their team, or their league (i.e. My Home, Team Home, and League Home pages) on myteam.com. The invited persons will be added to the respective Visitor's Community list on the personal, team, or league pages. When the invitees have joined myteam.com their name will be added to the respective Community page. For each name in the "Join myteam.com" table, a first pulldown menu 2202 allows the invitor to chose what the invitee is allowed to see. Example pulldown values for My Communities include: My Home, My Home & Team1 Home, My Home & Team2 Home, and so forth. A second pulldown menu 2204 allows the relationship between the invitor and the invitee to be specified. Example pulldown values for My Communities include: Friend, Parent, Relative, and Family Friend. Example pulldown values for Team Communities include: Team-member, Friend, Parent, Relative, or Family Friend. This provides the Administrator with a quick reference as to the trustworthiness of this extended invitation, as the Administrator will be required to approve the various invitations. A "Send Now" button 2206 submits the entered persons and returns the user to the page from which they came, with new persons added to the table listing on that page. The "Send and Add More" button 2208 submits the entered persons and returns the user to the invitations page to add more persons. The "Cancel" button 2210 takes no action and returns the user to the page from which they came.

Figure 23 shows an alternative representation 2300 of the New Invitations web page listing. This is a simplified version of the page shown previously, in that only a single table is used, and no pulldown menus are provided. Instead, the invitor enters the name and email address of the person to be invited to join the myteam.com website. The invitations are thereafter sent out via buttons similar to those described above.

Referring now to Figure 24, a first version 2400 of a Change User Access page is shown. This page is typically used by an Administrator to facilitate an access change for a particular user. The type of page (i.e. team page or league page) is displayed in area 2402. The "Access to:" information is displayed in area 2404. The "For" information 2406 shows the myteam.com member name and myteamuserid. The "Change from" information 2408 indicates the current access level of the user. The "To new access level of" information 2410 includes a dropdown menu of access level values that can be assigned. Such values might include: Team Administrator, Team-member, League Administrator, and so forth. The "submit" button 2412 sends the change request information for processing. The "Cancel" button 2414 takes no action, and returns the user to the page from which they originated.

Figure 25 shows a representative version 2500 of a Request for a Change of Access page. This page would typically be used by an individual wishing to change their access capabilities (i.e. to a higher level) for certain pages. The request would then be sent to the appropriate Administrator for approval and granting of any new access. The "Access to:" information 2502 indicates what page(s) are being accessed. The "Change From" information 2504 indicates the current access level of this particular user. The "To New" access level includes a dropdown menu 2506 for specifying what access is desired (i.e. Team Administrator, League Administrator, or Team-member). A "submit" button 2508 again sends the change request information for processing, and the "Cancel" button 2510 again takes no action, and returns the user to the page from which the originated.

SECTION 2 -- LEAGUE TOOLS (See also Appendix 2 materials)

The league tools interface provides the user access to detailed information about a league, its structure, and its members. The information to be managed is arranged in a representative hierarchy as described below.

The first branch of the hierarchy manages the individuals associated with the league. These individuals are categorized into groups based upon their role in the league. The interface provides access to four groups: Officers, Volunteers, Players, and Contacts. The other branch of data managed for a league is related to the organization within the league. For the purposes of this interface, a league is organized into divisions. Each division, in turn, has a number of teams. The conceptual hierarchy could be overlapped, with the first branch to partitioning down to each team's roster, and the contacts within that roster.

Referring now to Figure 26, three sidebar items 2600 are shown which provide access to this information. The League Profile item provides access to league contact information, league division information, and the list of league officers. The League Teams item provides access to the teams in the league and their rosters and contacts. The League Members item provides access to the players and volunteers in the league. As shown in the block diagram, the hierarchy branches from the League 2602 down to Divisions 2604 and Members 2606. The Members include Officers 2608, Volunteers 2610, Players 2612, and Contacts 2614. The Divisions block 2604 branches to include Teams 2616, Roster (subset of Members) 2618, and Contacts (subset of Members) 2620. The League Profile sidebar item is associated with the League 2602, Officers 2608, and Divisions 2604 blocks (as indicated by the single asterisk). The League Teams sidebar item is associated with the Contacts 2614, Teams 2616, Roster 2618, and Contacts 2620 blocks (as indicated by the double asterisk). The League Member sidebar items are associated with the Volunteers 2610 and Members 2612 blocks (as indicated by the triple asterisk).

Note that the Divisions aspect might also be incorporated differently, as needed to support certain league/association configurations. For instance, in Pop Warner, AAU, tournament play, and the like, teams that play one another do not necessarily all reside within the same league. As such, the underlying database structure would allow for less rigid associations of a team with a particular division, or league.

The League profile sidebar item provides access to data that tends to be set up once at the beginning of a season. This is generally the "high-level" information about the league. This high-level information includes General League Data, League Officers, and League Divisions. General League Data includes such items as league name, location (state, zip), primary contact person, and national affiliation (if any). League Officers usually consist of a

President, Treasurer, Secretary, etc. League Divisions are used to manage sets of similar teams (i.e. age, sport) that play one another and compete in standings. Figure 27 identifies eight possible screens (or pages) that might be used to comprise this section. The Overview page 2700 provides contact and officer information. Page 2702 provides for editing league information. Officers (i.e. single or multiple) can be added via 2704. The Officers are then assigned from a league list via 2706. A list of Divisions is available for viewing via 2708, and the divisions can be edited, or new divisions can be added, via 2710. The blocks with dotted lines represent jumps into other sections of the web site, so they are generally not considered to be part of this current area (or hierarchy). Volunteer Details 2712 is associated with the League Members area, and Team Info & Roster 2714 is associated with the League Teams area, both described above. Block 2716 provides the ability to list teams with a division selector. Block 2718 provides the ability add new teams (one at a time). Several pages also have shared implementations. Add Officers 2704 shares an implementation with Add Players and Add Volunteers. Assign Officers 2706 shares an implementation with Assign Players and Assign Volunteers.

Referring now to Figure 28, certain representative elements are shown comprising a League Profile Overview web page (or screen shot) 2800. This screen provides read access to two sets of information: basic league contact information, and the list of league officers. This screen also provides links or actions to access the divisional hierarchy, edit all general league data, and manage the list of league officers. The name of the officer is provided in column 2802, with the officers listed in alphabetical order by last name. The email address of each officer is provided in column 2804. Both the name and email addresses can have hyperlinks for messages to be sent to that person, and/or information retrieved about that person. Column 2808 shows a checkbox to remove an officer.

This page is available to all visitors, but is editable only by league administrators. There are two types of data groups available on this page: League Info and League Officers. The types of viewers of the page include: Anonymous Visitor (AV), Invited Guest (IG), Participant (P), and Administrator (A). The information can be available for read, write, or none access based upon the type of user. In this instance, the Administrator can write League Info and League officer data. Participants can read both types of data. AV and IG can only read League Info. Data to which the user does not have read rights should not be displayed to

that user. Therefore, the page is dynamic. If there is no access to League Info., then that data is not displayed. If there is no access to League Officers, then that table is not displayed.

Access to the actions (i.e. hyperlinks shown as edit league info, add officers, assign officers, and remove checked) as shown in box 2810, are generally available to users with write access. All visitors to a page see the contact information. The only difference between read-users and write-users is that write-users can see the "Remove" checkbox in column 2808. League address and contact information is displayed in 2812, along with a league logo 2814 (if available). This information is accessed directly from a league's record in the web site's league database.

Referring now to Figure 29, certain representative elements are shown which comprise a web page 2900 for editing the League Profile. This page generally permits the user to edit the data associated with the league itself (as opposed to data that might be embedded more so within the league's hierarchy of information). The League Basics are entered in the fields shown by 2902. Primary league contact information is entered in the fields of 2904. A link ("assign") is included that allows the user to select a primary contact from a list of existing league contacts. This link leads to the "Choose Contact" screen, described below.

Welcome messages to the league can be entered via 2906. If a league logo exists, it will be displayed on the screen as indicated by the file in box 2908, which uploads the image, and overwrites any old images. One of the checkboxes 2910 is shown for "Delete existing logo." The message and logo allow the league to customize their home page with their league logo and a short message welcoming the people to the league site. The message is a text-only message entered into the profile and is thereafter viewable only from the league home page. The logo can generally be restricted in size (i.e. 100K) for ease in uploading. Only one logo may be uploaded and dropped into the "league logo" slot. This logo is displayed at the top of the League Profile page, in addition to being displayed on the league home page.

Access to actions is standard in that actions are available only to users with write access to the page. This particular page is only available to league administrators. Another checkbox 2910 also shows the option to "Allow teams to create themselves." This allows checkbox controls to facilitate whether or not teams can be added in a "bottoms up" manner to a league. In the strict security model, all teams inside a league must be created by a league

administrator. The league administrator thereby allows access requests or changes to be made. This checkbox overrides that control, so that anyone can create a team and "enter" it into the league. Among other advantages, this makes it easier for the coach to add teams into currently inactive leagues. The "allow teams" checkbox will not be displayed for certain

5 leagues (i.e. Little League Baseball leagues, or others that do not provide this ability). For Little League Baseball, the security remains tight, therefore the "allows teams" setting is turned "off" for all Little League teams, and the checkbox control is not displayed for Little Leagues. All other organizations will have this under their control, and the "allow teams" setting is turned "on" by default.

10 All information on this particular page is stored in a single record, i.e. the league's main record. This includes primary contact fields (i.e. name, email, and phone). Although it is likely that the primary contact for the league will be listed in the individual table, making this a freeform field allows the Administrator to change this information independently. When the first league administrator is assigned (or becomes active) on this league, his or her

15 name and contact information is automatically copied into these three fields. As such, this critical information is filled in automatically (at least the first time).

Referring now to Figure 30, certain representative elements are shown which comprise a web page 3000 for choosing a contact. This screen is used from the team and league profile edit screens. The screen is generally used to select a contact as the primary contact for the

20 team or league. For both the team and league, a list of available contacts is displayed, in this instance "available league volunteers." All available volunteers in this league are listed with radio buttons to the left of each name (for selection). Selections on this page are mutually exclusive: if one button gets selected, then all others are turned off. If the paging of the screen information kicks in, then the prev/next buttons will appear on the screen. For

25 submission of the choice, clicking on these buttons does not "confirm" the selection as the primary contact. Instead, it cancels the user's selection (if any). If the user chooses to submit without selecting a radio button, no error is displayed. The user is simply returned to the profile edit screen, and the contact information remains unchanged. A help text block 3006 is also shown, which directs the user to: 1) check the league volunteer, and 2) click the assign

30 selected item to add the volunteer as the primary contact. In general, the title of the page should change to show the league name, if in the league context. The user selects (or checks)

a volunteer and then invokes the assign checked action 3004 (which might also be labeled "choose selected") to add the volunteer as the primary contact. Access to this page depends upon the context, i.e. whether the team or league profile information is being edited. Generally, however, the administrator has write access. All actions are accessible by individuals that can get to the page.

Figure 31 shows certain representative elements that comprise a web page 3100 for allowing the user to view and delete League Profile Division information for the league (versus the Overview selection from Figure 28). Note that this page (and others) might change significantly for certain specialized leagues, including for instance Little League Baseball. A League Divisions table is shown the Division name in column 3102. The initiation date is shown in column 3104, and the "before" date is shown in column 3106. The sport is shown in column 3108 and the Division is listed in column 3110. The number of teams in each division is shown in column 3112. Checkboxes 3114 can be used for removing any division.

The page may be read by the public, and may be edited only by league administrators. Access to actions, as shown in 3116, are available only to users with write access to the page (i.e. the Administrator). Certain columns might also be made to appear only to individuals with edit access to the page. Read only visibility might only show the Division name, born after, born before, and sport items. Little League Baseball might also warrant a separately viewable column for "LL Division." The "Sport" column might also be hidden if the national organization with which this league is affiliated is associated with only one sport.

Most of the information can be databased (or stored) right on the division record. However, the number of teams must be calculated by query to see how many teams are in each division. Little League division information might be stored in a separate record.

The Update charter button (or link) 3118 is visible only to administrators of specialized leagues including Little League Baseball. This button sets the field for the "officially chartered" number of teams for each little league division to match the number of teams actually created in the system for those divisions. The button facilitates the syncing up of charter information with the teams listed in myteam.com. Once this charter information

has been set, it is sent to Little League on a regularly updated basis (i.e. hourly). This button can be made to warn the user before performing its operation, with a simple message box.

Referring now to Figure 32, certain representative elements are shown which comprise a web page 3200, which allows the user to add, edit, and remove league divisions. The screen uses a "freeform" approach, which lets the user enter division data into edit boxes, which can be changed as needed. Skipped rows will not be processed or stored. Column 3202 provides edit boxes for the Division names. Columns 3204 and 3206 provide the born before/after edit boxes for date entries. Column 3208 provides a box for the sport associated with each division, and might also include a drop-down list from which to choose. Column 3210 (optional) provides a LL Division column that is only visible to LL administrators. The LL Teams column 3212 is optional and allows entry of the number teams in that LL division.

This page is generally accessible only to league administrators. The page will implement this by checking for the "League Divisions" data group, and only permit access to users with at least "edit" access. Once the user gets to the page, all actions 3214 are accessible. Of course, since a "read" user cannot even get to this page, "read" users cannot utilize the shown actions. The LL Division column is displayed only if the league is a member of the LL organization. The Sport column is not displayed if the national organization is affiliated with only one sport. The control is filled with different values depending upon the national organization with which the league is affiliated.

Error messages are displayed for incorrect entries. In this multiple entry form, it becomes important that the information entered is not lost on errors. Display of the error page, and a "try again" link, brings the user back to the edit screen, with all existing entries intact (except that invalid data might be excluded).

Referring now to Figure 33, a block diagram 3300 is shown of the sidebar item League Teams which provides access to team information at the league level. This includes Lists of Teams, and Lists of Rosters. The Lists of Teams can be filtered by available division. The Lists of Rosters allows the user to add, delete, and modify the players and volunteers associated with each team. Figure 33 shows six potential pages (or screens) that might comprise this sidebar item. The entry point is the Teams screen 3302, which provides a list of the teams with a division selector. The Add Team screen 3304 allows teams to be added, one

at a time. The Team Info & Roster page 3306 provides roster lists and basic information. From this screen the user can Edit Team Info 3308, Add Players or Volunteers 3310, or Assign Players or Volunteers 3312. The dotted boxes for Invitations 3314 (Printed Invitations 3316) and Player/Volunteer details 3318 represent jumps into other sections of the myteam.com web site (and are not part of this sidebar section). Two of the screens also have a shared implementation. Add Officers (not shown) shares an implementation with Add Players and Add Volunteers. Assign Officers (not shown) shares an implementation with Assign Players and Assign Volunteers.

Figure 34 shows certain representative elements that comprise the League Teams Main Page 3400. This page lists the teams in a league, as filtered by division. Regardless of how this page is reached, the League Teams sidebar item should become selected when this page is displayed. This would be the default situation if the user selected "League Teams" from the sidebar. However, the sidebar should become selected even if this page is reached by clicking on a division from the "League Profile" section.

The League Teams page shows the team name in column 3402. The Team contact is shown in column 3404. A remove checkbox for each team is shown in column 3406. A pulldown menu 3410 is provided for selecting the type of division. This control permits the user to select which list of teams is to be displayed in the main table of the page. The list of divisions from which to choose from is the list of all divisions associated with the league. The list is sorted by sport (alphabetically or otherwise), then born/after age. The default division may be specified by the caller of the page (via a URL parameter). This provides the ability for a user to click on a division from the League Divisions page to arrive at the current page. If not default division is specified, then the first division listed is selected. Actions can be accessed via links 3408. All columns (except Remove) are visible to readers. The remove column is shown only to editors (i.e. users with write access). The actions 3408 are available only to page editors.

Referring now to Figure 35, certain representative elements are shown comprising a web page 3500 that allows a team to be edited. The page allows for editing of basic team information, for the purposes of added a new team, or editing an existing team. This page can be accessed from the Add Team selection on the League Teams page; or from the Edit Team Info. action on the Team Roster and Info page. The page receives state information

(preferably on the URL) indicating: what team is being edited; or if a new team is being created, the division in which to create the team. The title can be changed to reflect how the user arrived at the page. The page is accessible only to coaches or league administrators. The access level is checked against the entity (team or league) through which the user entered the page. Column 3502 shows the entry fields for the team information. The contact information is entered in fields 3504. Actions 3506 are available only to page editors.

A "choose a contact" link (not shown) can be provided to permit the user to select an existing league contact to use as the primary team contact. The interface uses the "Assign Volunteers" page to select a contact for use. If this operation is performed at the "team" level, then the list of available volunteers would be the team's volunteers. If this operation is performed at the "league" level, then the list of available volunteers would be all league volunteers. The result of the selection does not create an association between the individual and the contact. Instead, the selected contact's name and email information are copied into the team's "primary contact" information fields. This information is maintained separately. This link simply provides a convenient way of copying information into those fields.

Figure 36 shows certain representative elements comprising a web page 3600 for displaying the roster (i.e. players and volunteers) of a team. This page is accessed from various places in the user interface: the League sidebar (i.e. League Teams, after clicking on a team); the Team sidebar (Team Roster); and from clicking on the Team Info capsule from the Team Home page. The page title is dynamic based upon how the user arrived on the page. The roster table includes the name, phone, email, and role of each listed individual. The roster table is actually the sum of records from two queries. The volunteers are retrieved from the contact table by asking for all contacts associated with the team. Each contact association includes an association type (enumerated) and a title (freeform text). Display of the role column on the screen uses the title if available, and the association type if not. The players are listed in the player table and are extracted for the team. In either case, the name, phone, and email are taken from the related individual record for each person. An "unassign" checkbox is also provided for each person. General team and contact information is shown as 3604. User actions are shown as 3606.

The page generally contains two data groups: Team Info and Team Roster. Access to Team Info data is "read" for AV, IG, and P type users, and access to Team Roster data is

"none" for AV and IG type users, and "read" for P users. Administrators have full write access for both types of data. Access to actions is based upon both the data group and the access level of the user. The column data is also varied depending upon the user access level. The name column is visible to anyone with read access, but has an underlined link only if the user has write access to the page. The "unassign" column appears only to individuals with edit access to the Roster information. When a player or volunteer that has a valid user ID in their individual record is "unassigned" off the roster, their security access to the team is removed as well.

Referring now to Figure 37, a block diagram is shown of certain representative elements 3700 comprising the League Members sidebar item. This sidebar item provides access to information about the people that make up the league, i.e. the players, volunteers, and officers. Since access has been provided to the officers in the League Profile, this section provides access to League Players, and League Volunteers. League Players provides for tracking players in the league, regardless of their affiliation with an individual team. League Volunteers provides for tracking the volunteers of the league (coaches and other individuals) that help run the league. Figure 37 identifies screens that might be used to comprise this sidebar item. The Member block 3702 provides the entry point for accessing information about Players & Volunteers. Block 3704 provides the ability to Add players or volunteers, whereas block 3706 allows information to be imported from desktop (or other) software. Block 3708 provides further Player/volunteer details (as desired), and such information can be edited via 3710. The Invitations 3712 and Printed Invitations 3714 boxes are shown with dotted lines to represent jumps into other sections of the web site.

Referring now to Figure 38, certain representative elements 3800 are shown comprising the League Member page with Players/volunteers shown thereon. By using the link 3802, the user can decide whether to view players or volunteers. In this instance "Players" has been selected. This page is reached through the League sidebar. On the volunteer side, all non-players (all individuals with a contact association type not equal to 'player') are listed. On the player side, only the players are listed. The table 3804 shows the name, phone, and email of the listed players, along with a remove checkbox. A list of actions are shown as 3806.

Figure 39 shows certain representative elements 3900 comprising the screen used to add players, volunteers, or officers to the league. This particular page permits the user to add up to 15 players, volunteers, or officers to the league, all at once. Since all information about the league member cannot be entered on this multiple-entry screen, the user may later click on the member and edit that individual's information in order to fill in more details not captured on this screen. The title of the page will reflect the operation that the user is performing, i.e. Add Players, Add Volunteers, or Add Officers (instead of "New members, as shown). A link might also be provided to allow the user to "submit and add more" if the form is filled up, and more individuals need to be added. Required fields might also be given a special designator, such as red labeling or the like. The table 3902 provides for entry of the first and last name, myteam-Id, email, phone, and title of the individual. The user action links 3904 allow the entries to be submitted or cancelled. For a Submit action, and for each member being added, database entries are created as follows: create and fill in an individual record with most fields; contact association of the individual to the league; contact association of the individual to the team (if being added to the team); lookup of user-Id to fill in number user-Id in individual record; if valid user-Id, security association to the league; if valid user-Id, security association to the team (if being added to the team).

This page is generally available only to team or league administrators. The system implementing the site should check for the proper data group (depending upon whether the user is intending on adding players, volunteers, or players to the team or league). Access to this page should be permitted only if "write" access is permitted to the data group. There are generally no changes to the inner workings of the page based upon access level of the user. However, the title and some of the columns do change based upon whether the page is being used to add player, volunteers, or officers. Access to actions is all standard, in that actions are available only to users with "write" access to the page.

Most of the information on this page (except for the "title") should be stored in a single record, namely the individual record. The title field is actually stored in the contact association. The user Id is stored in the individual record as a form of the user's account number, with a lookup being performed to retrieve this number. When this page operates at the "team" level (i.e. when a player or volunteer is being added to a team), a contact

association is created to both the team and the league. This type of association with the league matches the type of the association with the team (player or volunteer).

5 If a user-Id is specified for individuals being added, then the submit operation has security implications. From this screen, new individuals with valid user Ids are always added as Participants to the target entity. In addition, if an individual is being added to a team, then a Participant-level League relationship is automatically created. For example, if a volunteer is being added to a team, and a valid user Id is provided for that new volunteer, then the new individual's user should be given Participant-level access to the team and to the League.

10 Referring now to Figure 40, certain representative elements are shown of a web page 4000 for assigning players or volunteers to teams, or to permit the designation of officers in the league. In this instance, the "Player" option has been selected from link 4002. The page can display a list of available volunteers to become officers, and allows the user to select therefrom. A list of players 4004 are shown, which can be assigned (via the checkboxes) to the team indicated above. The players are sorted by the type of Division selected in the dropdown menu 4008. The user actions are shown as 4006. A help box 4010 provides instructional text on using the page. For this particular page, administrative access is assigned through the Assign Officers interface. Hence, a user must be a league officer in order to gain administrative access to the league.

20 Figure 41 shows certain representative elements of a web page 4100 for assigning volunteers to the league (as similar to Figure 40). In this instance, the list of volunteers 4102 can also assigned as an administrator via the checkboxes 4104. The possible user actions 4106 include assigning the checked individuals to their new roles.

25 Figure 42 again shows a similar set of representative elements comprising a web page 4200. In this instance, the list of league volunteers can also be selected to be officers via the checkboxes 4204. If only a name is checked, and not the "assign" button, then the member will be assigned accordingly, without being made an administrator, or officer.

The pages represented in Figures 40-42 are available only to league administrators when the page is accessed as part of a league entity. The pages are available only to team administrators when the page is accessed as part of a team entity. There are no changes to the

inner workings of the page based upon access level. However, the title and "section switch" control (i.e. link 4002) do change based upon whether the page is being used to assign players, volunteers, or officers. Also, the "assign as admin." column is displayed only in Volunteer mode. Since these pages can be invoked from a number of contexts, the behavior of the controls will change based upon the context.

These pages utilize the standard style-sheet for modal selection from a list. As a result, previous/next controls may show up if more than 100 names are available for display. The Division control appears in the "Assign Player" context. This control contains a list of all divisions in the league, with the last selection being "All." The default is the division of which the team being assigned is a member. If there is only one division (or none from the user's point of view), then this control is not displayed. If the division selection is changed, then the page is refreshed to reflect the newly selected division. Various explanatory text can be displayed (in context) to help the user through the process.

Assigning a member means that a contact association is created between the individual and the team or league. If that individual has a valid user Id stored, then assigning a member also creates a security relationship with the team or league. Unless the "assign as admin" checkbox is selected, the security relationship created is always at Participant-level access. If the "assign as admin" checkbox is selected, then the security relationship is admin-level access. If a player is assigned to a team, and that player has contacts listed, and those contacts have valid user Ids, then the contact users should also be added with participant level security access to the team.

Referring now to Figure 43, certain representative elements are shown comprising a web page 4300 for displaying a league member's detailed information in the "read" mode. If the user has edit access to the individual's record, then an edit button is displayed on the page. The page can be accessed from: the league profile screen (by clicking on an officer); the league member's screen (by clicking on a player or volunteer); the team roster (by clicking on a player or volunteer); or another individual's detail screen (by clicking on a contact). No cancel functionality is provided from this screen. User's should typically use their browser's "back button" to go back to the previous screen. This page represents the "deepest" level of the pages through which a user can progress (in this example hierarchy).

The player information 4302 is shown with various fields, including name, address, email, gender, birthdate, and comments (i.e. allergic reactions). The player contact list 4304 includes the name, phone number, email, and relation of a plurality of persons. A remove checkbox is provided with each name. The user actions 4306 allow for further manipulation of the displayed data (including edit, add contact, assign contacts, or removed checked).

Figure 44 shows certain representative elements of a web page 4400 for displaying (or changing) Officer information. The Officer information fields are displayed in 4402. The officer contact list 4404 is similar to that of Figure 43. The user actions 4406 allow for further manipulation of the displayed data (same as above).

Figure 45 shows certain representative elements of a web page 4500, which permits editing of an existing individual in the league. The page is accessed from the individual's "read" view. If the user has write access to the individual's record, then an edit link on the page brings the user to this page. The editing layout includes the vital statistics 4502 for the individual. In general, the birthdate will not be shown for volunteers or officers. Certain required fields would include first name and last name. The birthdate would be required for players, and a phone number would be required for contacts. Communications information is shown in 4504, which includes the person's myteam-id. The individual's role (including title/job, and access level) are shown in 4506. The access level might include a dropdown menu of valid choices for this individual. The address is shown in 4508 with standard fields.

When the myteam-id is set or changed on a player or volunteer, then a security relationship is created between the named user-id and the entities to which the individual is connected. If a user-id is being replaced, then the old user's security connections that relate to the individual need to be removed. For volunteers or officers, the access level set for the named user-id matches the access level control on the screen (by default all volunteers and officers are given Participant level access). For players, the access level set is always Participant level access automatically.

When using this screen to add a contact to a player, the contact association is set between the two individuals as appropriate (either Contact or Parent). Once the contact association is set, the contact should be set up with all the security relationships that the player has. When an individual's security relationships are set up with a team or a league, the

individual's contacts should also be set up (if those contacts have valid user-ids). When the individual's security relationship is severed (because the user-id has been replaced), then those contact's relationships should also be severed.

SECTION 12 -- SCOREBOARD (See Appendix 12 materials)

SECTION 13 -- REGISTRATION & MY PROFILE (See Appendix 13 materials)

15 SECTION 14 -- RE-DIRECTING PRE-4.0 BROWSERS (See Appendix 14 materials)

SECTION 15 -- GENERALIZED COMPUTER SYSTEM EMBODIMENT

FIGS. 46A and 46B illustrate a computer system 4600 suitable for implementing
embodiments of the present invention. A website or webpage can be hosted on computers and
servers generally conforming to the description below. Users will also use similar computers
20 to access such websites and webpages.

FIGURE 46A shows one possible physical form of the computer system. Of course,
the computer system may have many physical forms ranging from an integrated circuit, a
printed circuit board and a small handheld device up to a huge super computer. Computer
system 4600 includes a monitor 4602, a display 4604, a housing 4606, a disk drive 4608, a

keyboard 4610 and a mouse 4612. Disk 4614 is a computer-readable medium used to transfer data to and from computer system 4600.

FIGURE 46B is an example of a block diagram for computer system 4600. Attached to system bus 4620 are a wide variety of subsystems. Processor(s) 4622 (also referred to as central processing units, or CPUs) are coupled to storage devices including memory 4624. Memory 4624 includes random access memory (RAM) and read-only memory (ROM). As is well known in the art, ROM acts to transfer data and instructions uni-directionally to the CPU and RAM is used typically to transfer data and instructions in a bi-directional manner. Both of these types of memories may include any suitable of the computer-readable media described below. A fixed disk 4626 is also coupled bi-directionally to CPU 4622; it provides additional data storage capacity and may also include any of the computer-readable media described below. Fixed disk 4626 may be used to store programs, data and the like and is typically a secondary storage medium (such as a hard disk) that is slower than primary storage. It will be appreciated that the information retained within fixed disk 4626, may, in appropriate cases, be incorporated in standard fashion as virtual memory in memory 4624. Removable disk 4614 may take the form of any of the computer-readable media described below.

CPU 4622 is also coupled to a variety of input/output devices such as display 4604, keyboard 4610, mouse 4612 and speakers 4630. In general, an input/output device may be any of: video displays, track balls, mice, keyboards, microphones, touch-sensitive displays, transducer card readers, magnetic or paper tape readers, tablets, styluses, voice or handwriting recognizers, biometrics readers, or other computers. CPU 4622 optionally may be coupled to another computer or telecommunications network using network interface 4640. With such a network interface, it is contemplated that the CPU might receive information from the network, or might output information to the network in the course of performing the above-described method steps. Furthermore, method embodiments of the present invention may execute solely upon CPU 4622 or may execute over a network such as the Internet in conjunction with a remote CPU that shares a portion of the processing.

In addition, embodiments of the present invention further relate to computer storage products with a computer-readable medium that have computer code thereon for performing various computer-implemented operations. The media and computer code may be those

5 specially designed and constructed for the purposes of the present invention, or they may be of the kind well known and available to those having skill in the computer software arts.

Examples of computer-readable media include, but are not limited to: magnetic media such as hard disks, floppy disks, and magnetic tape; optical media such as CD-ROMs and holographic devices; magneto-optical media such as floptical disks; and hardware devices that are specially configured to store and execute program code, such as application-specific integrated circuits (ASICs), programmable logic devices (PLDs) and ROM and RAM devices. Examples of computer code include machine code, such as produced by a compiler, and files containing higher level code that are executed by a computer using an interpreter.

10 Although the foregoing invention has been described in some detail for purposes of clarity of understanding, it will be apparent that certain changes and modifications may be practiced within the scope of the appended claims. Therefore, the described embodiments should be taken as illustrative and not restrictive, and the invention should not be limited to the details given herein but should be defined by the following claims and their full scope of
15 equivalents.

APPENDIX 1 -- COMMUNITIES

Case 1:25-cv-01124 Document 1-1 Filed 07/25/25 Page 51 of 282

Communities

Product Functional Specification

for December, 1999 release

Document Version 3.0
11.03.99

Note:

Individual pages in this document are given letter and date *revisions*, while the document as a whole is given number and date *releases*. This is because individual pages may undergo several *revisions* between each *release* of the whole document.

What are Communities?

This section combines the concepts of security access control and "bookmarking" of the teams one plays on and follows, and the individuals who are friends and team-members.

There are 3 types of Communities. Each is accessible only by the owner of the respective Home pages.

- My Communities through the My Home page
- Team Communities through the Team Home page
- League Communities through the League Home page

Other versions of the content in some Communities may be viewable from a different context and by visitors and members other than own the page. The Communities version of these pages, such as League Officers in the Team Communities area, allow a different type of access and control, such as the ability to invite and grant access to the Team Home page as a Fan or administrator.

Communities - *PROPOSED* User Model

Site		Individual	Team / League
Visitor		-	Spectators
Member	<i>NO invite/grant</i>	-	Spectators
	<i>Invited</i>	Friends	Fans
	<i>Granted</i>	Team-members	Team-members

- Friends & Fans were known as Invited Guests
- Spectators were known as Visitors
- Team-members were known as Participants

Individual -> myteam.com Site

- Visitor** is not a myteam.com member, or is viewing the site without being logged in.
- Member** is part of the myteam.com and is currently logged-in.

Individual -> Individual (“My Home” personal pages)

Visitors *CANNOT* see any “My Home” personal pages. To do so they must be invited by the individual and will become a myteam.com member in the process of accepting the invitation.

- Friends** - other Members who must be invited by the individual to see their personal home page (this includes extended family).
- Team-members** - a private relationship that is created by the team and/or league admin. This relationship includes pre-granted access to other Team-members personal home pages.

Individual -> specific Team / League Home page

- Spectators** - a site Visitor or Member who has not been granted Fan access to the home page.
- Fans** - a trusted relationship that must be granted or provided through invitation by the team admin. Invited Fans must become a myteam.com member if they are not already. Fans include trusted friends and family who do not directly participate in the running of the team.
- Team-members** - a private relationship granted by a league or team admin only to those who play on or directly participate in the running of the team and/or its parent league.

My Friends

Note: terminology used is a placeholder and not considered final.

My Friends - Spec

- **Description**

Shows a list of all myteam members with whom you have some sort of relationship of sharing a My Home page. These "friends" are people for whom they can see the users My Home page, the user can see their My Home page, or they see each others My Home page.

- **Viewable**

Owner only

- **If Unpopulated**

If unpopulated, where the table would go put instructions on how to add friends and do invitations.

- **Tables**

Sort by:

- Last Name
- First Name

- **Table columns are:**

Name

- hyperlinked to the members My Home page if the owner has been granted Friend access

User ID / Email

- "[myteam.com user ID]" hyperlinked to open a pre-addressed blank message in the Message Center
- "[Email address]" if not a member
- "(n/a)" if no address available

Access

- "Yes" if the person has become a myteam.com member
- "invited" if the person has been invited but has not yet accepted

Select

- checkbox

- **"Invite A Friend..." button**

to the Invitations page.

- **"Delete Selected" button**

Goes to the Delete Confirmation page and upon confirmation, returns the user to the My Friends page, with the people that were selected removed from the table.

- **"Cancel" button**

Returns the user to the page from which they came.

My Teams

Note: terminology used is a placeholder and not considered final.

Displays [Team Name] or [League Name] followed by "home page"
- **User Name**
[First Name] [Last Name]
- **myteam.com User ID**
- **Access level drop-down**
 - member
 - admin
- **"Cancel" button**
takes no action and returns the user to the page that they came from.
- **"Submit" button**
Sends the data to the server and if submission is successful, returns the user to the page they arrived here from.
If the submission to the server is unsuccessful, an Error Message page is displayed.

APPENDIX 2 -- LEAGUE TOOLS

CONFIDENTIAL

League Tools Specification

For December, 1999 Release

Version 3.03

Change History

3.03 (11/12/99) – A few minor changes to the “Add” and Edit screens regarding security and required fields.

3.02 (11/10/99) – Expanded spec and changed a few items:

- Added League Division Add/Edit, League Teams, Team Add/Edit, Player/Volunteer Detail, Player/Volunteer Edit, Choose Contact
- Added security model “business rules” to adding, assigning, removing and editing user ids in the system.
- Made “sport” column dynamic on League Division display page
- Careful: numbering change in section 4! Added League Members main page—which changes the numbering for Add and Assign Players/Volunteers/Officers sections. Numbering will not change again.

3.01 (11/6/99) – Added a page and fixed some things up:

- Added League Teams - Team Roster (also accessible from team sidebar as Team Roster)
- Fixed references in page access tables to individual access levels when it should have been referring to Read/Write/None

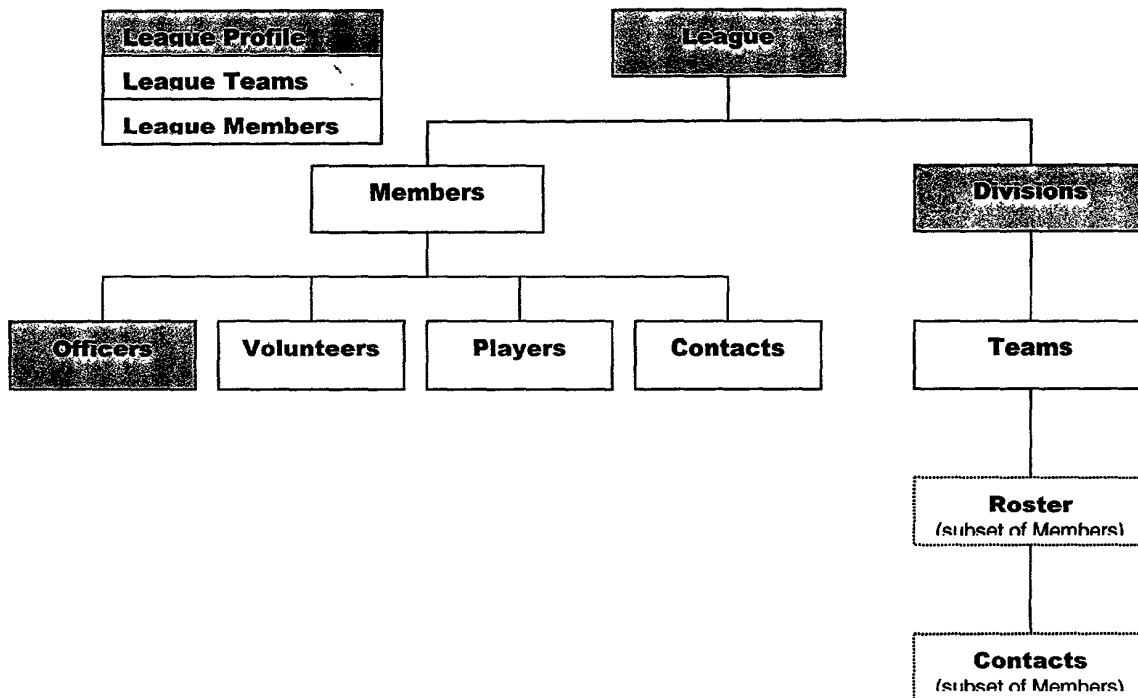

3.00 (11/4/99) – Initial release created from League Tools Specification version 2.61. Many concepts, mockups and ideas cut and pasted into this document. Added lots of implementation details. Includes:

- League Tools Overview
- League Profile – Page Flow
- League Profile – Overview Page
- League Profile – Edit Profile Page
- League Divisions Page
- League Divisions – Add/Edit Divisions Page
- League Members – Add Players, Volunteers or Officers
- League Members – Assign Players, Volunteers or Officers

1. Overview

The league tools interface provides the user access to detailed information about a league, its structure and its members. The information managed is arranged into a loose hierarchy.

The first branch of the hierarchy manages the individuals associated with the league. These individuals are categorized into groups based on their role in the league. The interface provides access to four groups: Officers, Volunteers, Players and Contacts.

The other branch of data managed for a league related to the organization within the league. For the purposes of this interface¹, a league is organized into divisions. Each division, in turn, has a number of teams. The conceptual hierarchy could be overlapped with the first branch to drill down to each team's roster, and the contacts within that roster.

Three sidebar items: League Profile, League Teams and League Members provide access to this information. In a nutshell:

League Profile	provides access to league contact information, league division information, and the list of league officers.
League Teams	provides access to the teams in the league and their rosters and contacts.
League Members	provides access to the players and volunteers in the league.

When reading this spec, a few things to keep in mind:

¹ There are plans to change the rigid insertion of divisions into the hierarchy that is described in this specification. This is needed to support certain league/association configurations for Pop Warner, AAU and tournament play—where the teams that play one another do not necessarily all reside within the same league. For that reason, the underlying database structure doesn't enforce the placement of divisions into the hierarchy as rigidly as it is described in this interface.

Mock-Ups

Mock-up pages are normally displayed with as much detail as possible. Usually this means showing the page as it would appear to a user with write-level-access to the page. Read the page's detailed specification to see what elements are not displayed to users with less access.

Also, note that mock-ups are not the spec—the spec is in the words. We have marked each mock-up with the deltas from the words. If the picture doesn't match the words, then use the words.

Open Issues

Open Issues are marked with red text. Details of any red-text can be cross referenced with the list of open issues marked at the end of each page section. An open issue should be implemented as the specification reads—but is marked as such so we can close these items down as quickly as possible.

2. League Profile

This sidebar item provides access to data that tends to be set up once at the beginning of a season: the high-level information about the league. This includes:

General League Data

such as the league name, location (state, zip), primary contact person, and national affiliation (if any).

League Officers

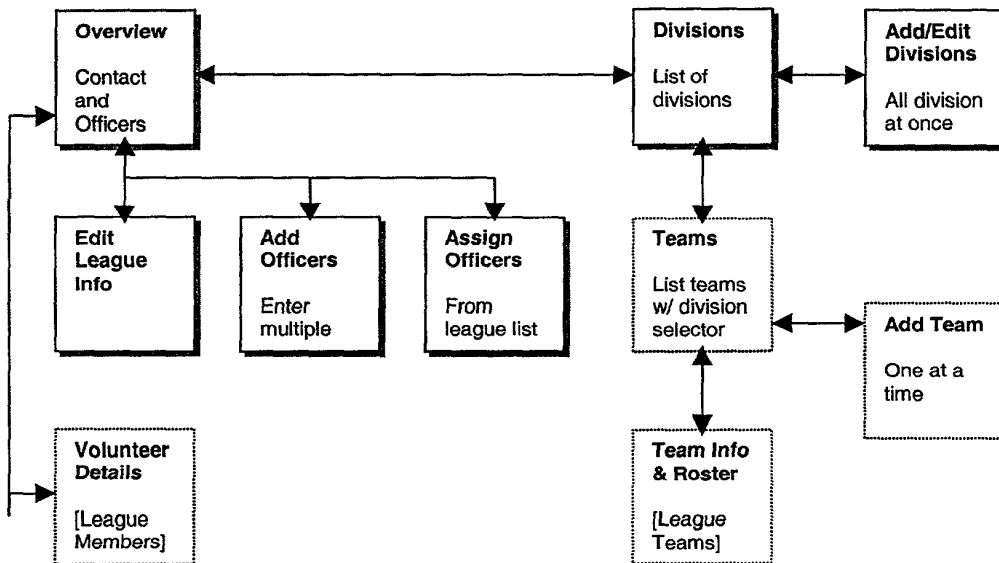

which usually consist of a president, treasurer, secretary, etc.

League Divisions

to manage the sets of similar (in age and sport) teams that play one another and compete in standings.

The diagram below identifies the 8 screens that make up this section. Note that **Team Info and Roster** and **Volunteer Details** (the boxes with the dotted lines below) represent jumps into other sections of the site so are not considered part of this area.

Also, note that two of the screens have shared implementations. Add Officers shares an implementation (and a spec) with Add Players and Add Volunteers. Assign Officers shares an implementation (and a spec) with Assign Players and Assign Volunteers.

2.1 League Profile - Overview

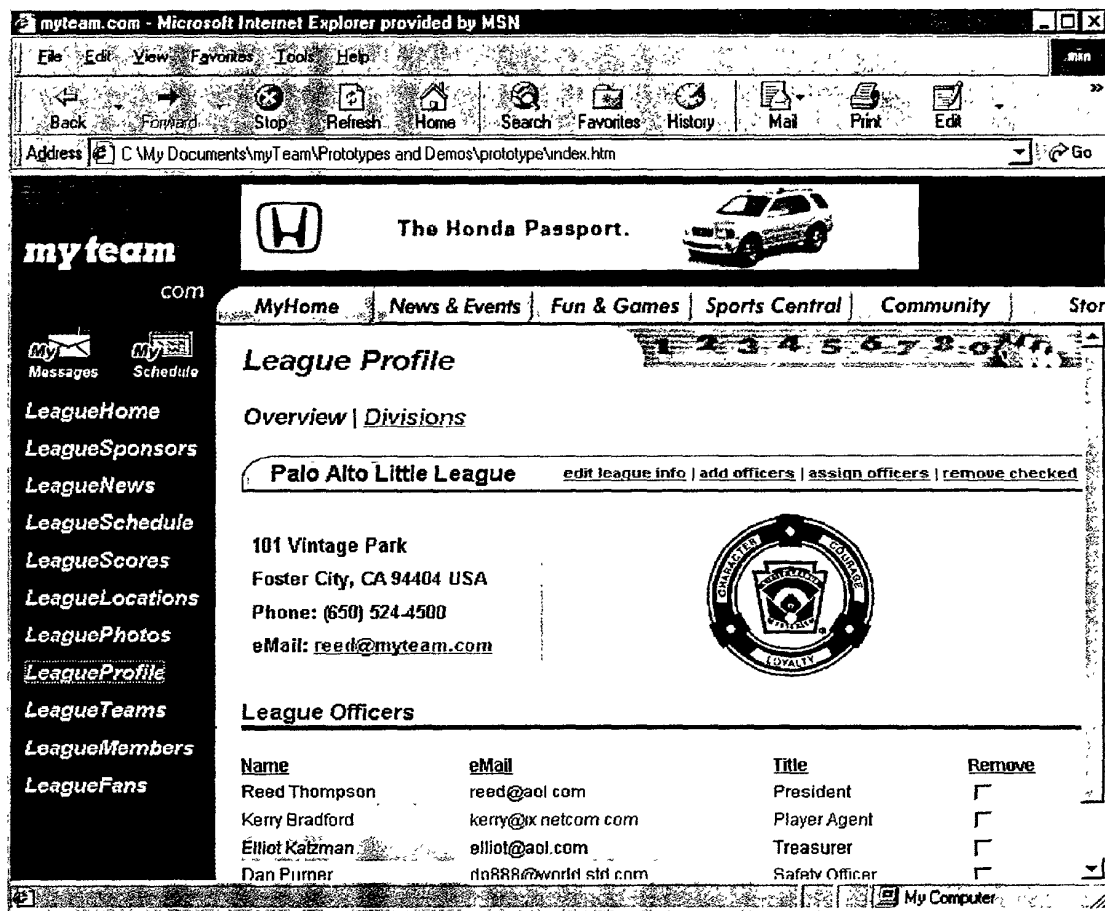

This screen provides read access to two sets of information:

- basic league contact information, and
- the list of league officers.

The screen also provides links or actions to

- access the divisional hierarchy
- edit all general league data
- manage the list of league officers

2.1.1 Page Mock-Up

Screen shot deltas:

- Officers should be listed in alphabetical order by last name.
- Name and email columns should be displayed with underlines (links) under each item.

2.1.2 Page Access Tables

This page is available to all visitors, but is editable only by league administrators. There are data groups on this page: **League Info** and **League Officers**. These data groups are displayed separately based on the security access level (Read, Write, None) the user has for each.

Security	AV	IG	P	A
League Info	R	R	R	W
League Officers	-	-	R	W

Obviously, data to which the user does not have read rights should not be displayed to that user. Therefore, the page is dynamic. If there is no access to League Info, then that data is not displayed. If there is no access to League Officers, then that table is not displayed.

Access to actions is also more complicated, in that some actions refer to the Team Info data group, and others refer to the Team Roster data group. The following table summarizes actions and breaks them up into those groups:

per League Info level	R	W
Edit league info		✓
per League Officers level	R	W
Add officers		✓
Assign officers		✓
Remove checked		✓

Hide the list of officers from both anonymous visitors and from invited guests. All visitors to the page see the contact information. Column data in the list of officers is standard: the only difference between read-users and write-users is that write-users see the "Remove" checkbox column.

Access to actions is all standard in that actions are available only to users with **write** access to the page:

Security – Actions	R	W
Edit league info		✓
Add officers		✓
Assign officers		✓
Remove checked		✓

2.1.3 League Contact Page Section

This section is laid out as follows (see style guide for exact formatting):

<League Name>
<Address>
<City/Town>, <State/Province> <Postal Code>
<Country>
League Contact: <Primary contact name>
<Primary contact phone>
<Primary contact email (as mailto link)>

For example:

Sudbury Little League

5 Martin Drive
Sudbury, MA 01776

USA

League Contact: David Block

(978) 440-8858

dblock@world.std.com

If any field is empty, then it is left out of the formatting without leaving a blank space for it in the display. For example, here there is no postal code, contact phone number or contact name supplied:

Sudbury Little League

5 Martin Drive

Sudbury, MA

USA

dblock@world.std.com

All of this information is accessed directly from the league's record in the database—even for the primary contact information (i.e. – the primary contact's name, email and phone number are not looked up off of some individual record; rather, a separate copy of this information is stored in the league record). See discussion of primary contact information in "League Profile Edit" section for more information as to why.

In addition, if a league logo is available, it is displayed to the right of the contact information—still above the League Officers table. If no league logo is available, then leave this space blank.

2.1.4 League Officers Table

Sort Order: Last name, first name of the officers.

Column Details:

Column	Link (if any)	Notes	Sample
Name	To Volunteer Detail screen for this person.	Display as "First Last" even though sort order is by last name.	Kerry Bradford
Email	mailto: link	Leave blank if not available	dblock@aol.com
Title		From freeform "title" field if filled in, but use "role" (from league association) if no title supplied.	Treasurer
Remove		Standard behavior	

Database Info: The league officers are all individuals with an association to the league who have their "role" set to "Officer."

2.1.5 Page Links/Actions

Link/Action	Destination/Behavior
Divisions	League Profile – Divisions
Edit league info	League Profile – Edit Profile
Add officers	League Profile – Add officers
Assign officers	League Profile – Assign Officers
Remove checked	Standard behavior

2.1.6 Open Issues

Are we clear on the difference between removing an officer and “unassigning” an officer. My understanding here is that removing the officer will remove him/her from the league entirely. Do we need an interface to “unassign” the officer to put him/her back into the league “pool” of individuals? Is that interface (or should it be) somewhere in the editing of an individual officer?

2.2 League Profile - Edit Profile

This page permits the user to edit data associated with the league itself (as opposed to data deeper in the league's hierarchy of information).

2.2.1 Page Mock Up

The screenshot shows a web browser window titled 'myteam.com - Microsoft Internet Explorer provided by MSN'. The address bar shows 'C:\My Documents\myTeam\Prototypes and Demos\prototype\index.htm'. The page features a navigation bar with links: MyHome, News & Events, Fun & Games, Sports Central, Community, and Store. A sidebar on the left lists various league-related links. The main content area is titled 'Editing League Profile' and contains two sections: 'League Basics' and 'Welcome Messages'. The 'League Basics' section includes fields for League name, City/Town, State, Postal Code, Country, and Primary League Contact (First name, Last name, eMail, Phone). The 'Welcome Messages' section includes a 'Welcome Message' text area, a 'League logo' field, and checkboxes for 'Delete existing logo' and 'Allow teams to create themselves'. The page also includes a 'cancel | submit' button at the bottom right.

myteam.com

MyHome News & Events Fun & Games Sports Central Community Store

Editing League Profile

Palo Alto Little League cancel | submit

League Basics

League name* Palo Alto Little League

City/Town Foster City

State* CA

Postal Code 94404

Country USA

Primary League Contact (assign)

First name Reed

Last name Thompson

eMail reed@myteam.com

Phone (650) 524-4500

Welcome Messages

Welcome Message

League logo

Delete existing logo ☐

Allow teams to create themselves ☐

cancel | submit

Screen shot deltas:

- If there is an existing logo, it should be displayed on the screen.
- Checkboxes should appear to the left of their labels.
- Need final text for "allow teams to create themselves"

2.2.2 Page Access Tables

This page is only available to league administrators. There are no changes to the inner workings of the page based on access level.

Security - Page	AV	IG	P	A
League Profile - Edit	-	-	-	W

Access to actions is all standard in that actions are available only to users with **write** access to the page:

Security – Actions	R	W
Cancel		✓
Submit		✓

Do not display “allow teams” checkbox for Little League Baseball leagues.

2.2.3 Form Display

The form inputs are broken into 3 sections. The sections are labeled: **Identification**, **Primary Contact** and **Message**.

Form Fields:

Section	Label	Input	Defaults/Limits/Notes	Req.
Identification	Name	Edit	Need limit	✓
	Address1	Edit	Need limit	
	Address2	Edit	Need limit	
	City	Edit	Need limit	
	State	Menu	50 2-letter state abbr. in alphabetical order.	✓
	Postal Code	Edit	Need limit	
	Country	Edit	Need limit	
Primary Contact	Name	Edit	Need limit	
	Email	Edit	Need limit, validate for an @ sign	
	Phone	Edit	Need limit	
Welcome	Message	TextArea	2000	
	League Logo	Upload	Current image—if any—is displayed on the screen. A new upload will overwrite it.	
	Delete	checkbox	If checked on submit, remove the current league logo. If checked at same time a new upload is done, then new upload wins and the user gets the new logo.	
	Allow teams	checkbox	Not visible for LLB (setting OFF by default). Visible for others (setting ON by default)	

We know we are not properly handling international addresses if we force the user to choose a state. We will attempt to address this in a future release.

Database Info: All information on this page should be stored in a single record: the league’s main record.

This includes the 3 primary contact fields. Although it is likely that the primary contact for the league will be listed in the individual table, making this a freeform field allows for someone to change this information independently.

As should be noted in the Security spec, when the first league administrator is assigned (or becomes active) on this league, his or her name and contact information is automatically copied into these 3 fields. This makes sure that this critical information gets filled in—at least the first time.

Validation and Error Display:

Error	Message
<i>Required name or state fields unspecified</i>	Need exact error text.
<i>@-sign missing from an entered email address.</i>	The email address you entered did not contain an @ sign, which is required for email to be properly delivered. Please re-enter the information and try again.

2.2.4 Choosing a Contact

In the header for the “Primary Contact” section, a link is included that allows the user to select a primary contact from a list of existing league contacts. This link leads to the “Choose Contact” screen, described below.

2.2.5 Message and Logo

The message and logo allow the league to customize their home page with their league logo and a short message welcoming people to the league site.

The message is a text-only message entered right into this profile and is viewable only from the league home page.

The logo follows the standard restrictions of all of our uploaded photos (100K). Only one logo may be uploaded and dropped into the “league logo” slot. This logo is displayed at the top of the League Profile page, in addition to being displayed on the league home page.

Note that on the League Profile - Edit page, a preview is done of any current logo stored.

2.2.6 Allow Teams

The allow teams checkbox controls whether or not teams can be added “bottom up” to a league. In the strict security model all teams inside a league must be created by a league administrator—doling out access as he goes. This checkbox overrides that control, so anyone can create a team and “put” it into the league. This makes it easier for the coach to add teams into currently inactive leagues.

Little League Baseball requires that the security remain tight—therefore, the “Allow teams” setting is turned OFF for all Little League teams, and the checkbox to control it is not displayed for Little Leagues.

All other organizations have this under their control and the “Allow teams” setting is turned ON by default.

2.2.7 Page Links/Actions

Link/Action	Destination/Behavior
<i>Submit</i>	League Profile – Overview (with save)
<i>Cancel</i>	League Profile – Overview (without saving changes)
<i>Choose (contact)</i>	Choose Contact

2.2.8 Page Open Issues

We need to supply the limits for the sizes of the various edit fields. Limits need to be checked against what the database will accept for those fields.

How can we require the state field? What if there is an international address? Re-check with spec team on this.

We need the exact text of error messages that can appear on this page.

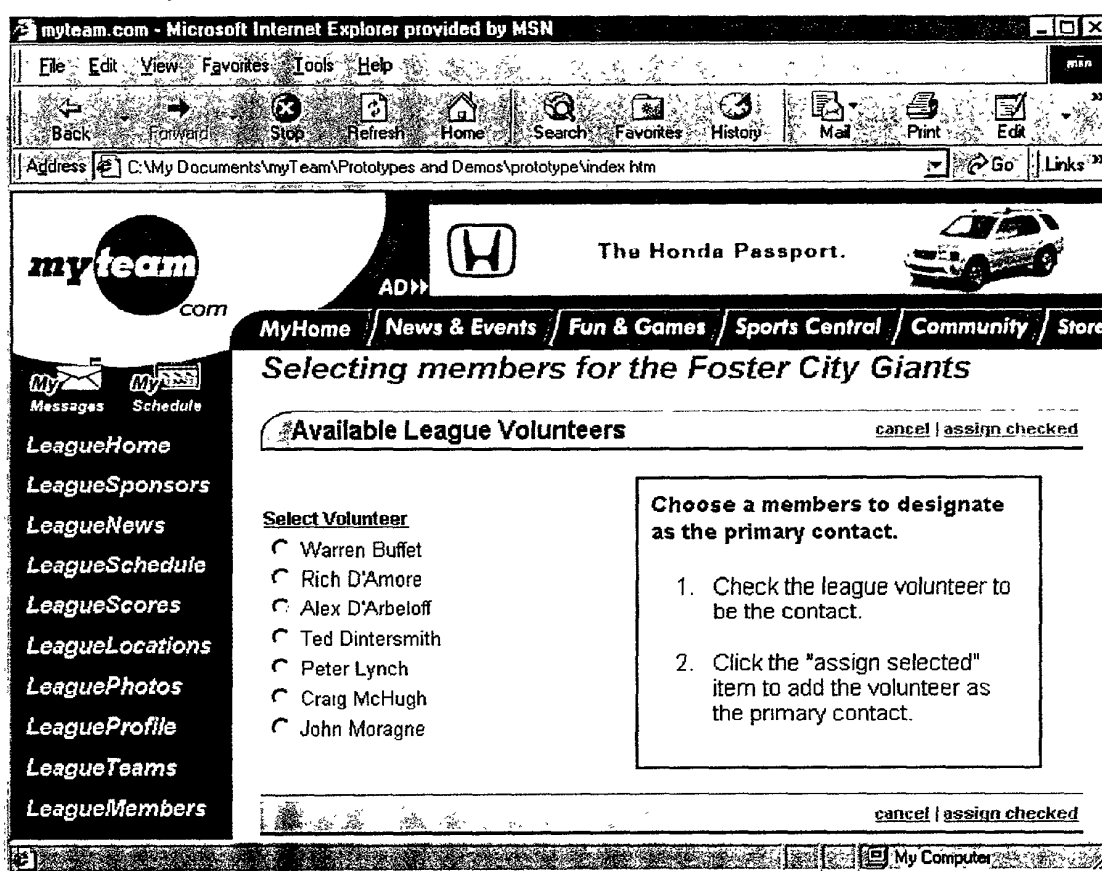

For a future release we need to handle international addresses better by allowing the user to enter a state/province instead of selecting from a list of 50 states.

2.3 Choose Contact

This screen is used from the team and league profile edit screens. It is used to select a contact as the primary contact for the team or league. For both the team or league, a list of available contacts is displayed: all non-players listed in the league. The user selects one by clicking on the radio button next to a name, and then chooses "assign selected."

The selected individual's contact information (name, phone, email) is then copied into the team or league profile information.

2.3.1 Mock Up

Mock up deltas:

- The title of the page should change to hold the league name if in the league context
- "Assign checked" action should read "choose selected"

2.3.2 Access Tables

Access to this page depends on the context: whether the team or league profile information is being edited.

Security - Page	AV	IG	P	A
Team Info	-	-	-	W

League Info	-	-	-	W
-------------	---	---	---	---

All actions are accessible by individuals that can get to the page:

Security – Actions	R	W
Cancel		✓
Assign selected		✓

2.3.3 “Available Volunteers” Listing

All available volunteers in the league are listed with radio buttons to the left of each name (for selection). Selections on this page are mutually exclusive: if one radio button gets selected, then all others are turned off.

If the paging of screen information kicks in, then the prev/next buttons will appear on the screen. Handling of the submit on these buttons is slightly different than the standards elsewhere: clicking these buttons does not “confirm” the selection as the primary contact. Rather, it cancels the user’s selection (if any).

If the user chooses to submit without selecting a radio button, no error is displayed. The user is simply returned to the profile edit screen and the contact information remains unchanged.

2.3.4 Help Text Block

The help text block reads as follows:

Choose a member to designate as the primary contact.

1. Check the league volunteer to be the contact.
2. Click the “assign selected” item to add the volunteer as the primary contact.

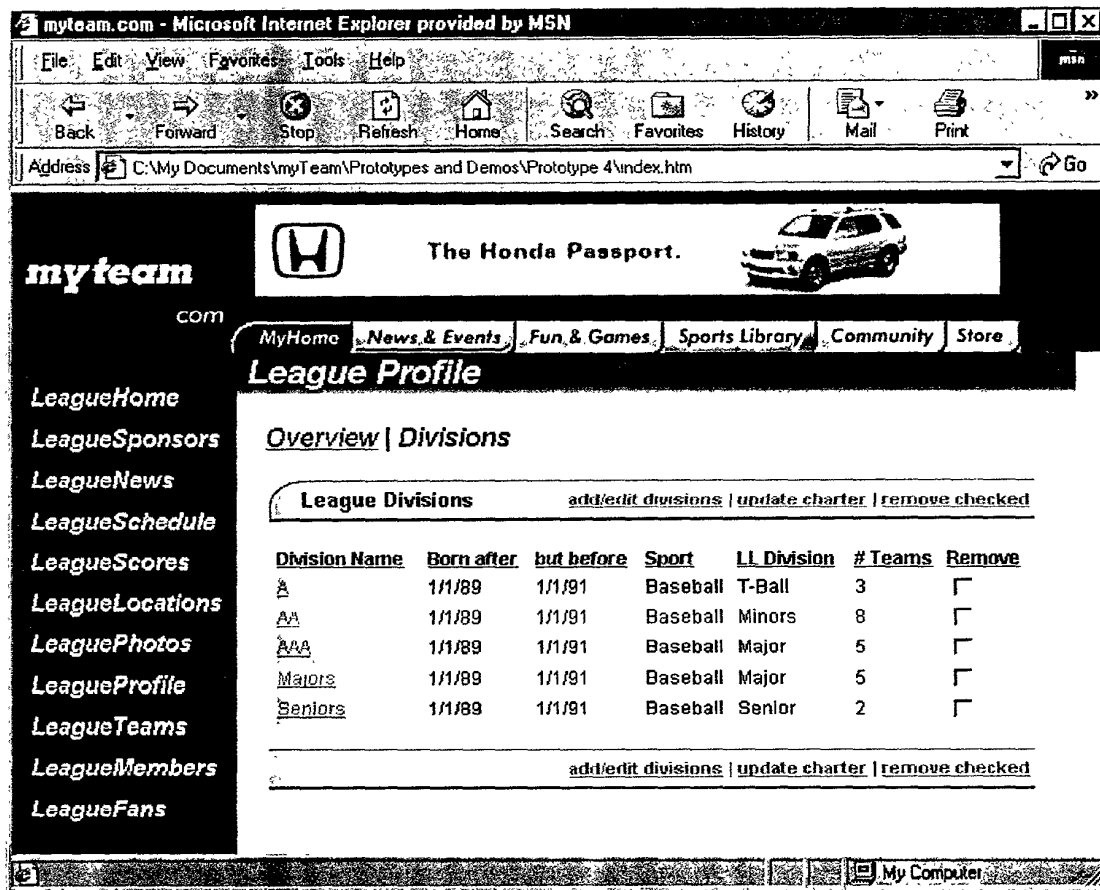

2.3.5 Links/Actions

Link/Action	Destination/Behavior
Cancel	Team/League Profile Edit
Assign selected	Team/League Profile Edit

2.4 League Divisions

This page allows the user to view and delete division information for the league. Note that this page changes significantly for Little League Baseball.

2.4.1 Page Mock Up

2.4.2 Page Access Tables

This page is may be read by the public and may be edited only by league administrators.

Security - Page	AV	IG	P	A
League Divisions	R	R	R	W

Access to actions is all standard in that actions are available only to users with **write** access to the page:

Security - Actions	R	W
Add/edit divisions		✓
Update charter (LLB only!)		✓
Remove checked		✓

Certain columns appear only to individuals with edit access to the page. Note the dynamic Little League column below. This one should appear only if the user has edit access **and** the division is in a Little League.

Column Visibility	R	W
Division name	✓	✓
Born after	✓	✓
But before	✓	✓
Sport	✓	✓
LL Division (LLB only!)		✓*
# Teams		✓
Remove		✓

2.4.3 League Divisions Table

Sort Order: Sport, Born-After date.

Column Details:

Column	Link (if any)	Notes	Sample
Division Name	to League Teams page with clicked division selected.	Name as entered by user.	AAA
Born after		Formatted date	11/1/90
But before		Formatted date	11/1/91
Sport		Hidden if only 1 sport in the national organization.	Baseball
LL Division			Majors
# teams		For just the "internal" division.	5
Remove		Standard behavior	

The "sport" column is hidden if the national organization with which this league is affiliated is associated with only one sport. See the table below (section 2.4.3.1) for details on sports available to each national organization.

Database Info: Most info is right on the division record. However, the # of teams must be calculated with a query to see how many teams are in each division. Also, Little League division information is stored in separate record (though in the same table—see below).

2.4.4 Update Charter Button (Little League only)

This button is visible only to league administrators of Little League Baseball leagues.

The button sets the field for the "officially chartered" number of teams for each little league division to match the number of teams actually created in the system for those divisions.

Basically, the button is saying "sync up my charter information with the teams listed in myteam.com." Once it has been set, the charter information is sent to Little League on the next hourly update.

The button warns the user before performing its operation—however it does so with a simple message box. The message box warning reads:

Clicking OK will send an electronic request to Little League Baseball International Headquarters to have your league's official Little League Charter updated to match the number of teams you have listed in each division in this program. Are you sure you want to continue?

2.4.5 Page Links/Actions

Link/Action	Destination/Behavior
Overview	League Profile – Overview
Add/edit divisions	League Divisions – Edit
Update charter	Stays on this page. See description above for behavior.
Remove checked	Standard behavior
Division	League Teams – with clicked division pre-selected in menu

2.4.6 Open Issues

Little League has requested a new feature that he feels is extremely important. This is to make it a bit more “formal” to send charter updates to LLB. The worry is that making it as simple and easy to “sync” with a lower number of teams invites people to cheat the system. LLB would prefer the update charter button to bring the user to a page, where LLB division team counts need to be manually updated in one place. Product development should continue as specified above—but it is likely that a new page will be added to the spec (linked off the “update charter” link specified above) that permits a Little League president to modify the specific charter information. This page will likely look exactly like the Divisions page from the November 1 deliverable!

[illegible]

2.5.1 Page Mock Up

Mock Up Deltas:

- myteam.com confidential**

2.5.2 Security Access Tables

This page is accessible only to league administrators. The page should implement this by checking for the "League Divisions" data-group, and only permitting access to users with at least "edit" access.

Security - Page	AV	IG	P	A
League Divisions	R	R	R	W

Once the user gets to the page, all actions are accessible. Of course, since a "read" user cannot even get this page, "read" users cannot see the actions either.

Security - Actions	R	W
Cancel		✓
Submit		✓

The Little League Division column is displayed only if the league is a member of the Little League organization. The Sport column is not displayed if the national organization is affiliated with only one sport (see details below). Of course, since a "read" user cannot even get this page, "read" users cannot see the columns either.

Column Visibility	R	W
Division name		✓
Born after		✓
But before		✓
Sport		✓
LL Division (LLB only!)		✓*

2.5.3 Form Display

This page utilizes the standard style-sheet for multiple-entry forms. Up to 30 rows of entry are supported. The interface should support the user "skipping" rows, and only add divisions for the rows in which data is found.

Label	Input	Defaults/Limits/Notes	Req.
Division Name	Edit	Need limit	✓
Born After	Date		
But Before	Date		
Sport	Menu	Details available below. Do not display at all if only one sport is available for a national org.	✓
LL Division*	Menu	Visible only within for Little League local leagues. See details on control below.	✓

2.5.3.1 "Sport" Menu

This control is filled with different values depending on the national organization with which the league is affiliated. The details of the sports to show for each are in the table below.

If a national organization is affiliated with only *one* sport, then this column of drop-down menus is hidden, and the division is automatically created with the appropriate sport.

Sport	Pony	Dixie	LLB	AAU	NABF	ASA	YBOA	PAL	PopW	Unaff.
Baseball	✓	✓	✓	✓	✓					✓
Softball	✓	✓	✓	✓	✓	✓				✓
Soccer				✓						✓
Basketball				✓			✓			✓
Hockey				✓						✓
Football				✓					✓	✓
Lacrosse				✓						✓
Wrestling				✓						✓
Swimming				✓						✓
Taekwondo				✓						✓
Baton Twirling				✓						✓
Surfing				✓						✓
Aerobics				✓						✓
Cheerleading				✓						✓
Track & Field				✓						✓
Cross Country				✓						✓
Trampoline				✓						✓
Volleyball				✓						✓
Inline Hockey				✓						✓
Karate				✓						✓
Golf				✓						✓
Gymnastics				✓						✓
Jump Rope				✓						✓
Tennis				✓						✓
Field Hockey				✓						✓

Lookup functions allow the code to find the available sports within each national organization.

2.5.3.2 "Little League Division" Menu

Each control in this column holds a drop-down list of possible little league divisions. These are:

- T-Ball
- Minors
- Majors
- Junior League
- Senior League
- Big League
- Challenger
- Training and Development (TAD)

Certain combinations of sports and Little League division are not permitted and should result in validation errors. The permitted combinations are checked in the table below. Others will get the error listed in the error table below.

Division	Baseball	Softball
T-Ball	✓	Error

<i>Minors</i>	✓	✓
<i>Majors</i>	✓	✓
<i>Junior</i>	✓	✓
<i>Senior</i>	✓	✓
<i>Big</i>	✓	✓
<i>Challenger</i>	✓	Error
<i>TAD</i>	✓	Error

2.5.3.3 Validation and Error Display:

In this multiple entry form, it is especially important that information entered is not lost on errors. Display the error page, and a “try again” link brings the user back to the edit screen, with all existing entries intact (except—perhaps—the invalid data that caused the error).

Error	Message
<i>All required fields not entered</i>	Need exact error text.
<i>Born after date later than but before date.</i>	Please make sure that the “born after” date is earlier than the “but before” date.
<i>Bad date entered</i>	Need exact error text.
<i>Invalid Little League division for sport</i>	Little League does not have a designation for softball in the age-bracket you have selected. Please try again.

2.5.4 Links/Actions

Link/Action	Destination/Behavior
<i>Submit</i>	League Divisions
<i>Cancel</i>	League Divisions

2.5.5 Open Issues

We need to supply the limits for the sizes of the various edit fields. Limits need to be checked against what the database will accept for those fields.

We need the exact text of error messages that can appear on this page.

We need to enhance the database to store each national organization’s available sports. We also need to provide access functions to that data. This issue affects this page and the League Divisions main page, which needs to decide whether or not to even display the sports column. Until this function is available, always display a sport on the League Divisions page, and always allow the user to select from **any** sport.

2.6 Assign Officers to League

5/1*

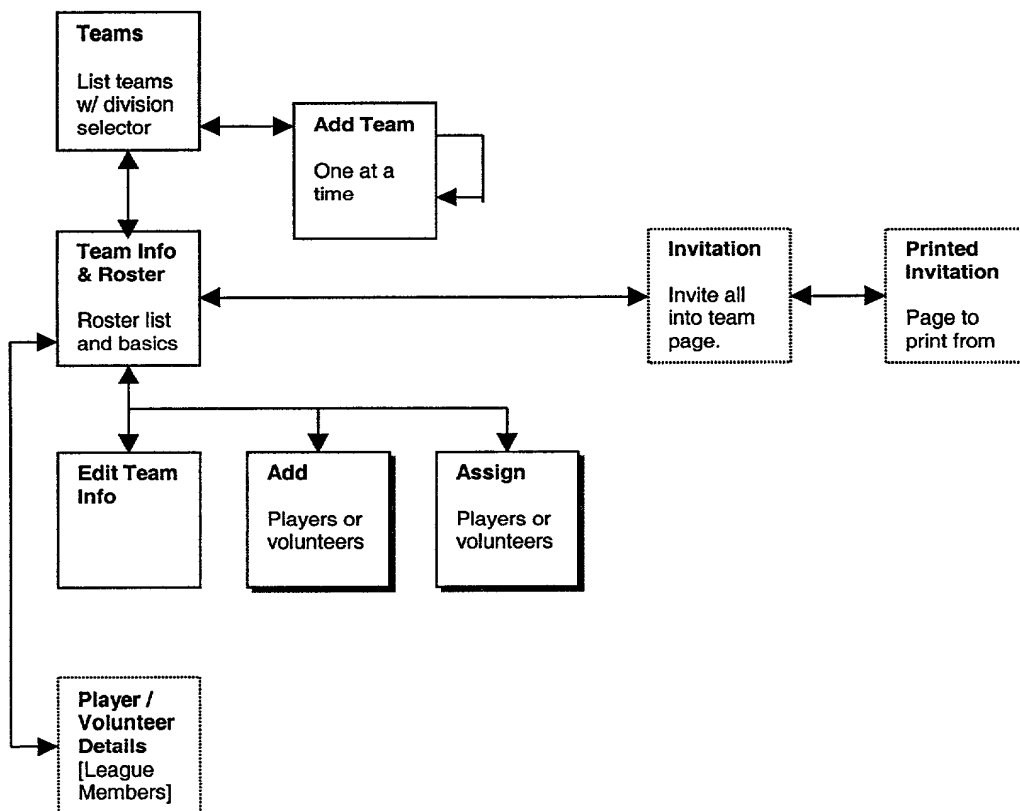

3. League Teams

This sidebar item provides access to team information at the league level. This includes:

- Lists of Teams** which can be filtered by available division.
- Lists of Rosters** to add, delete and modify the players and volunteers associated with each team.

The diagram below identifies the 6 screens that make up this section. Note that **Invitations** and **Player/Volunteer Details** (the boxes with the dotted lines below) represent jumps into other sections of the site so are not considered part of this area.

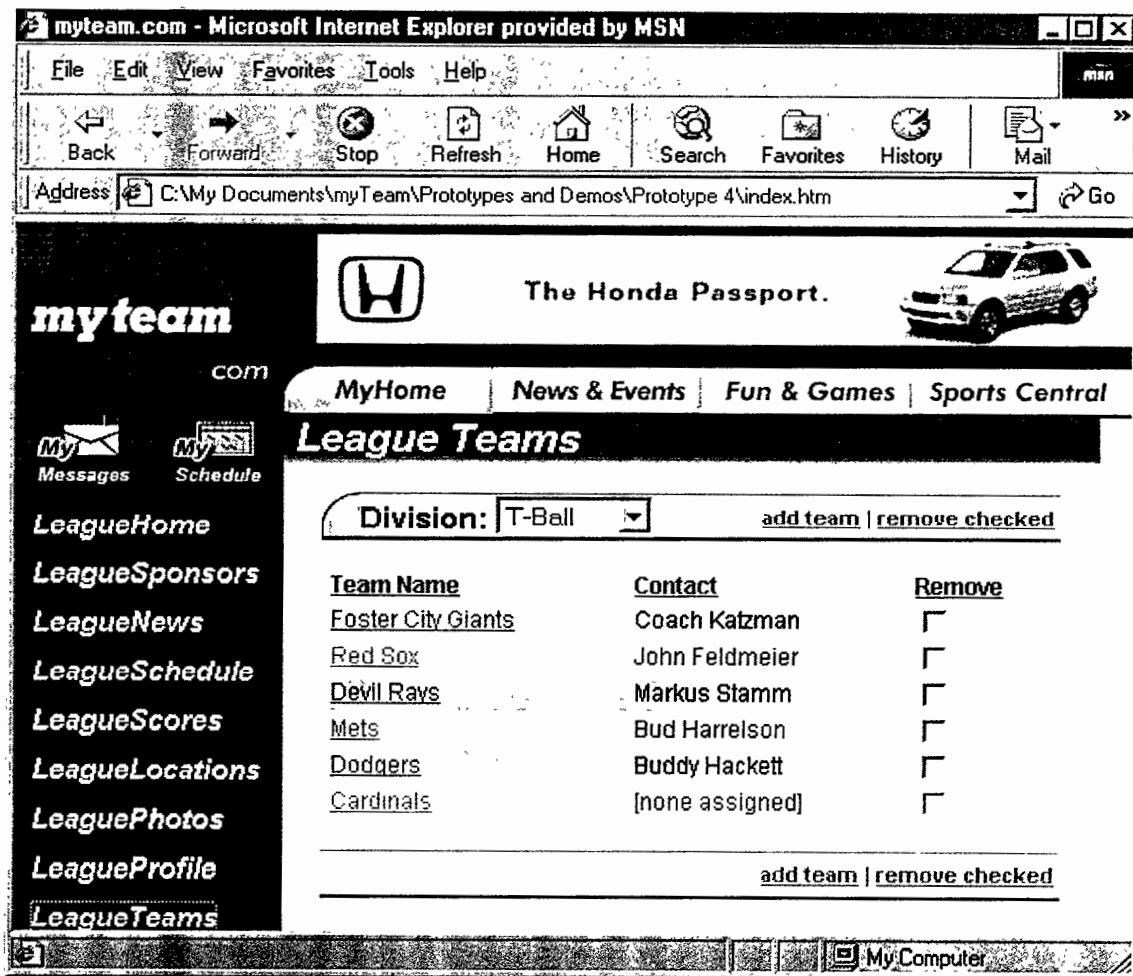

Also, note that two of the screens have shared implementations. Add Officers shares an implementation (and a spec) with Add Players and Add Volunteers. Assign Officers shares and implementation (and a spec) with Assign Players and Assign Volunteers.

3.1 League Teams – Main Page

List the teams in a league, filtered by division. No matter how this page is reached, the “League Teams” sidebar item should become selected when this page is displayed. Certainly this is obvious if the user selected “League Teams” from the sidebar. However, the sidebar should become selected even if this page is reached by clicking on a division from the “League Profile” section.

3.1.1 Mock Up

Mock Up Deltas:

- Contact column should be shown underlined, to send a message to the contact person.

3.1.2 Security Access Tables

This page is accessible to the public.

Security – Page	AV	IG	P	A
League Teams	R	R	R	W

Actions are available only to page “editors.”

Security – Actions	R	W
Add team		✓
Remove checked		✓

All columns (except Remove) are visible to readers. Remove column is shown only to editors.

Column Visibility	R	W
Team name	✓	✓
Contact	✓	✓
Remove		✓

3.1.3 “Division” Menu

This control permits the user to select which list of teams is displayed in the main table of the page.

The list of divisions from which to choose from is the list of all divisions associated with the league. The list is sorted by sport (alphabetical), then born-after age.

The default division may be specified by the caller of the page (a URL parameter is needed). This is necessary so that a user may click on a division from the League Divisions page (this spec, section 2.3) to “drill down” to this page.

If not default division is specified, then select the first division listed.

3.1.4 “Teams” Table

Sort Order: Alphabetical

Column Details:

Column	Link (if any)	Notes	Sample
Team Name	Depends on access. If “read” access provides a link to the team-page. If “write” access provides a link to the roster (3.3)		<u>Devil Rays</u>
Contact	<u>mailto:contact</u> email		<u>coach@aol.com</u>
Remove		Standard behavior	

3.1.5 Links/Actions

Link/Action	Destination/Behavior
Add team	League Teams – Add
Remove checked	Standard remove function

3.1.6 Open Issues

A highly desired feature of this page would be to have the session or database “remember” which division this user was operating on last time the user was here. Users tend to operate on one division at a time. Is this something we could implement easily?

272

CONFIDENTIAL

3.2 League Teams – Add/Edit

This page allows editing of basic team information—for the purposes of adding a new team, or editing an existing team.

The page can be accessed from:

- Add team action on the “League Teams” page.
- Edit team info action on the “Team Roster and Info” page.

The page must receive state information (presumably on the URL) indicating either:

- What team is being edited, or
- If a new team is being created, the division in which to create the team.

3.2.1 Mock Up

The screenshot shows a Microsoft Internet Explorer browser window displaying the myteam.com website. The address bar shows the path C:\My Documents\myTeam\Prototypes and Demos\Prototype 4\index.htm. The website has a navigation bar with links: MyHome, News & Events, Fun & Games, Sports Central, Community, and Store. The main content area is titled 'League Teams' and features a list of team numbers (1-10). The 'Foster City Giants' team is selected, and its details are shown in a form. The form has two sections: 'Team Basics' and 'Contact Info'. The 'Team Basics' section includes fields for Team name*, City/Town, Postal Code*, and Country. The 'Contact Info' section includes fields for Team manager and Team manager eMail. There are 'cancel' and 'submit' buttons at the bottom of each section. The left sidebar contains links for LeagueHome, LeagueSponsors, LeagueNews, LeagueSchedule, LeagueScores, LeagueLocations, LeaguePhotos, LeagueProfile, LeagueTeams, and LeagueMembers.

Mock Up Deltas:

- Title bar will change to reflect how user arrived at the page (it is shown correctly for arriving via League pages).

3.2.2 Security Access Tables

This page is accessible only to coaches or league administrators. Check the access to level against the entity (team or league) through which the user entered the page.

Security – Data Group	AV	IG	P	A
Team Info	R	R	R	W

Actions are available only to page “editors.”

Security – Actions	R	W
Cancel		✓
Submit		✓

3.2.3 Form Details

For display purposes, the form is broken into 2 sections, labeled: **Team Basics** and **Contact Info**.

Section	Label	Input	Defaults/Limits/Notes	Req.
Team Basics	Team Name	Edit	Need limit	✓
	City/Town	Edit	Need limit, use league’s city/town for default in “New” mode	
	Postal Code	Edit	Need limit, use league’s postal code for default in “New” mode	✓
	Country	Edit	Need limit, use league’s country for default in “New” mode	
Contact Info	Team Manager	Edit	Need limit	
	Team Manager eMail	Edit	Need limit	
	Welcome Message	TextArea	2000 character limit	

3.2.3.1 Defaults

As noted in the table above, when created a new team the league’s city, postal code and country should be used as defaults in these fields. Of course, if editing an existing team, the default should be the existing values for those items.

3.2.3.2 “Choose a Contact” Link

The “choose a contact” link permits the user to select an existing league contact to use as the primary team contact. The interface uses the “Assign Volunteers” page to select a contact for use.

If this operation is performed at the “team” level, then the list of available volunteers would be the team’s volunteers. If this operation is performed at the “league” level, then the list of available volunteers would be all league volunteers.

Note that the result of the selection does not create an “association” between the individual and the contact. Rather, the selected contact’s name and email information are copied into the team’s “primary contact” information fields. This information is maintained separately. This link simply provides a convenient way of copying information into those fields.

3.2.3.3 Validation and Error Display:

Error	Message
All required fields not	Need exact error text.

<i>entered</i>	
<i>Invalid email address (no @ sign)</i>	Need exact error text.
<i>Bad date entered</i>	Need exact error text.

3.2.4 Links/Actions

Link/Action	Destination/Behavior
<i>Cancel</i>	Back to the page we came from
<i>Submit</i>	Back to the page we came from
<i>Choose a Contact</i>	Assign Volunteers page

3.2.5 Open Issues

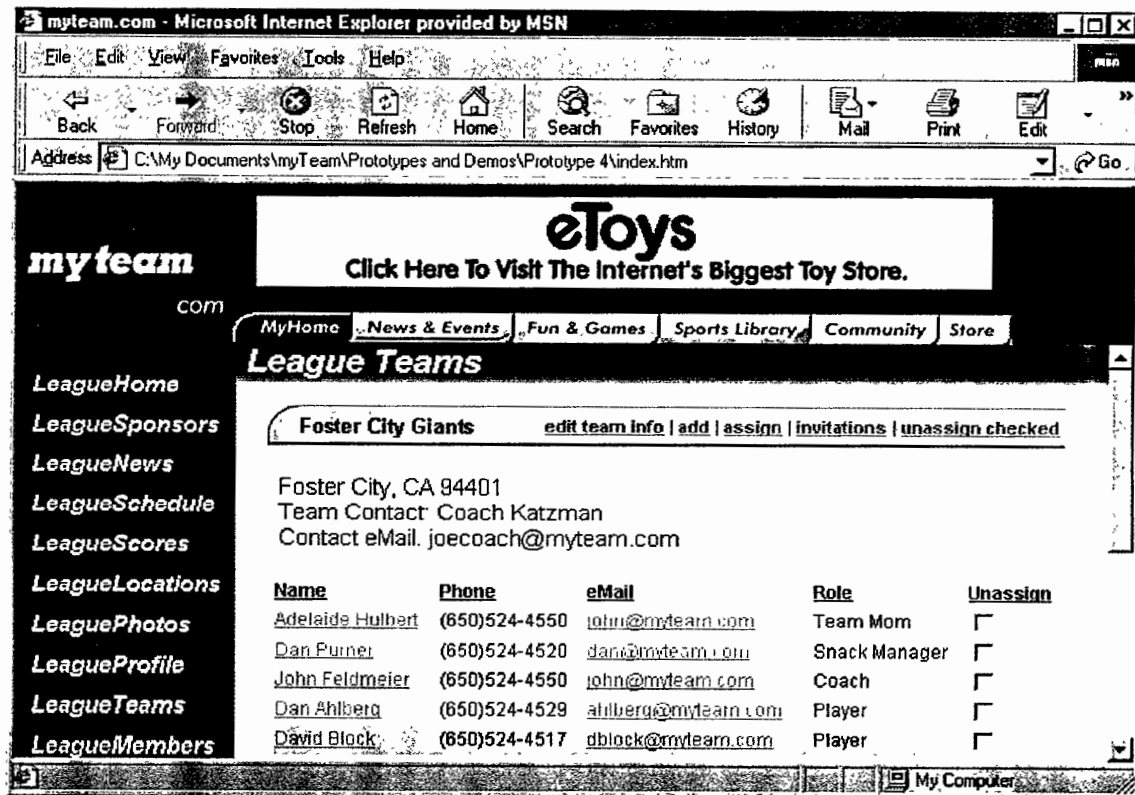

We need to supply the limits for the sizes of the various edit fields. Limits need to be checked against what the database will accept for those fields.

3.3 League Teams – Team Roster

This page is used to display the roster (players and volunteers) of a team. It is accessed from two places in the UI:

- From League Sidebar: League Teams (after clicking on a team), and
- From Team Sidebar: Team Roster
- From clicking on Team Info capsule from Team Home page

3.3.1 Page Mock Up

Screen shot deltas:

- As always, page is shown with maximum population—in this case for a user with edit access to both the contact and roster information.
- Title bar should reflect the way the user arrived at the page. See details below.

3.3.2 Page Access Tables

This page contains two “data groups”: the **Team Info** and **Team Roster** data groups. The page is constructed so that it responds properly and handles any access right (Write, Read or None) for either data group.

Security	AV	IG	P	A
Team Info	R	R	R	W
Team Roster	-	-	R	W

Access to actions is slightly more complicated, in that some actions refer to the Team Info data group, and others refer to the Team Roster data group. The following table summarizes actions and breaks them up into those groups:

per Team Info level	R	W
Edit team info		✓
per Team Roster level	R	W
Add		✓
Assign		✓
Invitations		✓
Unassign checked		✓

The name column is visible to anyone with read rights, but has an underlined link only if the user has “write” access to the page. The “unassign” column appears only to individuals with edit access to the Roster information.

Columns – per Roster level	R	W
Name	✓*	✓
Phone	✓	✓
Email	✓	✓
Role	✓	✓
Unassign		✓

3.3.3 Page Title

The page title is dynamic based on how the user arrived on the page. The table below summarizes how the page title should read:

Access Path	Title
Team Info - Capsule	Team Information
Team Roster – Sidebar	Team Roster
League Teams (then select team)	League Teams

3.3.4 Team Contact Information

The team name should appear in the page-data header bar (the bar that also holds page actions).

Directly below it, team contact information is displayed. This section is laid out as follows (see style guide for exact formatting):

<Address>
 <City/Town>, <State/Province> <Postal Code>
 <Country>
 Team Contact: <Primary contact name>
 <Primary contact phone>
 <Primary contact email (as mailto link)>.

For example:

5 Martin Drive
 Sudbury, MA 01776
 USA
 League Contact: David Block

(978) 440-8858
dblock@world.std.com

If any field is empty, then it is left out of the formatting without leaving a blank space for it in the display. For example, here there is no postal code, contact phone number or contact name supplied:

5 Martin Drive
Sudbury, MA
USA
dblock@world.std.com

3.3.5 Team Roster Table

Sort Order: Non-player/Player (non-players first), Alphabetical by first name.

Column Details:

Column	Link (if any)	Notes	Sample
Name	Link exists only if user has write access to the page. If link exists it links to individual's detail page (either player profile or volunteer profile pages).	Name formatted "First Last"	<u>Glen Frank</u>
Phone		Formatted phone	(781) 483-3700
Email	Email case: mailto: link Userid case: message center link	If the individual is listed with a user id, then list that in this column. Otherwise, list the email address.	<u>dan@aol.com</u> <u>dblock</u>
Role		For players, always "Player." For volunteers, use "Title" if available. If not available then use the type of the "association" to the team (see db info below).	Player
Unassign		Standard behavior	

Database Details

The roster table is actually the sum of records from two queries. The volunteers are retrieved from the contact table by asking for all contacts associated with the team. Each contact association includes an **association type** (enum) and a **title** (freeform text). Display of the **Role** column on the screen uses the **title** if available, and the **association type** if not.

The players are listed in the player table and are extracted for the team.

In either case, name, phone and email are taken from the related **individual** record for each person.

3.3.6 Security Model Connections

When a player or volunteer that has a valid user id in their individual record is unassigned off the roster, their security access to the team is removed as well.

If the individual is a player, and that player has contacts, then the player's contacts also have their security access to the team removed.

3.3.7 Page Links/Actions

Link/Action	Destination/Behavior
<i>Edit team info</i>	Team Profile Edit - edit team profile information
<i>Add</i>	Add Players – create new players into league and add to team
<i>Assign</i>	Assign Players – “draft” players onto team from league pool
<i>Invitations</i>	Team Invitations – invite players to become myteam members
<i>Unassign checked</i>	Standard behavior

3.3.8 Open Issues

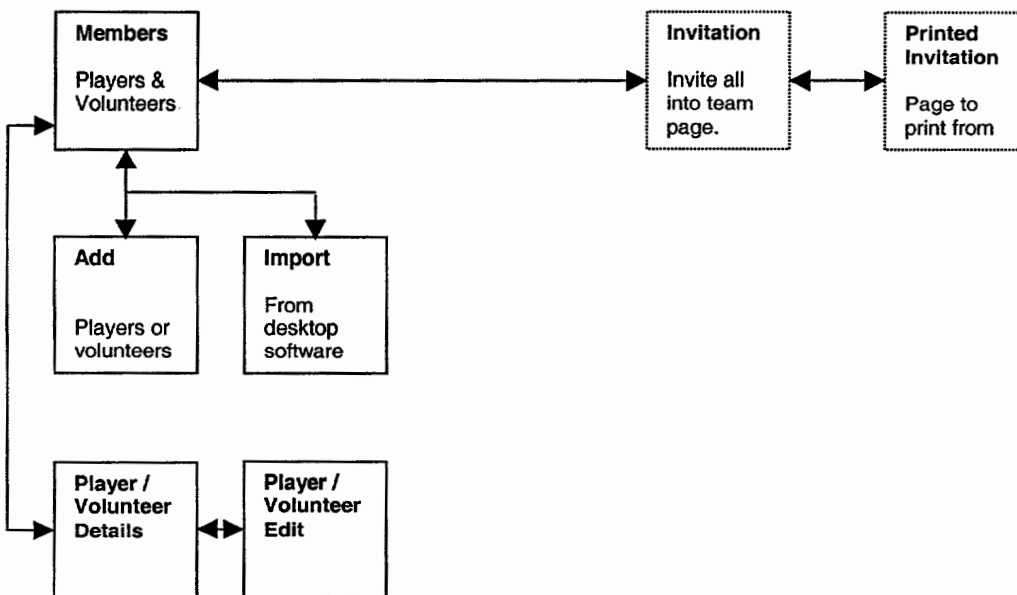

- Should we label the column and action “remove” or “unassign,” given that user is really just placing a team-member back into the league pool here. Related, we should all be explicitly aware that there is no way to completely remove a person from the system in this interface. Although this is fine for affiliated leagues, this may be problematic for the unaffiliated league.
- This page has a dependency on the message center interface. Message center needs an interface where you can invoke the user's personal message center with the “To:” field filled in. This interface is called from the “email” column on this page.

4. League Members

This sidebar item provides access to information about the people that make up the league: the players, volunteers and officers. Since we have chosen to provide access to the officers back in the League Profile (section 2 of this document), this section of the specification basically provides access to:

- League Players** tracking players in the league, regardless of their affiliation with an individual team.
- League Volunteers** tracking the volunteers of the league: coaches and other individuals that help run the league.

The diagram below identifies the 5 screens that make up this section. Note that **Invitations** (the boxes with the dotted lines below) represent jumps into other sections of the site so are not considered part of this area.

4.1 League Members – Players/Volunteers

Display all league members and permit the user to decide whether to view players or volunteers. This page is reached through the league sidebar.

On the volunteer side, all non-players (all individuals with a contact association type not equal to 'player') are listed. On the player side, only players are listed.

4.2 Add Players, Volunteers or Officers

This page permits the user to add up to 15 players, volunteers or officers to the league at once. Since all information about an league member cannot be entered on this multiple-entry screen, the user may later click on the member and edit him/her to fill in any more details not captured here.

4.2.1 Mock Up

myteam.com - Microsoft Internet Explorer provided by MSN

File Edit View Favorites Tools Help

AD The Honda Passport.

MyHome News & Events Fun & Games Sports Central Community Store

Adding new members to the Palo Alto Little League

New members cancel submit

First	Last	myteam id	eMail	Phone	Title

My Computer

Mock up deltas:

- The title at the top of the screen would reflect the operation the user is performing (ie – Add Players, Add Volunteers or Add Officers). It should never read “Add Members.”
- There should be another action labeled: “Submit and add more”
- Required fields (as defined below) should be labeled in red and with asterisks.

4.2.2 Access Tables

This page is only available to team or league administrators. Check the proper data group (depending on whether arriving to add players, volunteers or officers to team or league) and permit access to this page only if “write” access is permitted to the data group.

Security – Data Group	AV	IG	P	A
League Officers	R	R	R	W
League Volunteers	R	R	R	W

Team Players	R	R	R	W
Team Volunteers	R	R	R	W

There are no changes to the inner workings of the page based on access level. However, the title and some of the columns do change based on whether the page is being used to add players, volunteers or officers. See column descriptions below for more detail.

Access to actions is all standard in that actions are available only to users with **write** access to the page:

Security – Actions	R	W
Cancel		✓
Submit		✓
Submit and add more		✓

4.2.3 Form Display

This page utilizes the standard style-sheet for multiple-entry forms. Up to 15 rows of entry are supported. The interface should support the user “skipping” rows, and only add officers for the rows in which data is found.

Label	Input	Defaults/Limits/Notes	Req.
First Name	Edit	Need limit	✓
Last Name	Edit	Need limit	✓
myteam userId	Edit	Need limit	
Email	Edit	Need limit, validate for @sign	
Phone	Edit	Need limit	Required only for “contacts”
Date of Birth	Edit	Shows up (and thus is required) only for Players. Need limit, validate for less than 120 years old, not a date in the future.	✓
Title	Edit	Shows up only for Officers and Volunteers. Need limit	

Database Info: Most information on this page (all but “title”) should be stored in a single record: the individual record. The title field is actually stored in the contact association. The user id is stored in the individual record as the user’s BV_USER account number—therefore we must perform a lookup on the user id to get the number. This also serves to validate that a known id has been provided.

When this page operates at the “team” level (i.e. – when an player or volunteer is being added to a team), a contact association is created to both the team **and** the league. The type of the association with the league matches the type of the association with the team (player or volunteer).

Validation and Error Display:

Error	Message
-------	---------

<i>Required name fields, birthday (where applicable) or phone fields unspecified</i>	Need exact error text.
<i>@-sign missing from an entered email address.</i>	The email address you entered did not contain an @ sign, which is required for email to be properly delivered. Please re-enter the information and try again.
<i>Bad birthdate entered</i>	Need exact error text.
<i>Unknown user id entered</i>	The myteam user id you entered for this person cannot be found. If the user is not a myteam.com member, you may invite the person to become one. You may either: - <u>add the member</u> without any user id for now - <u>add the member and invite</u> the member to become a user - <u>go back and edit</u> the user id

4.2.4 Security Model Connection

If a user id is specified for individuals added, then the submit operation has security implications. From this screen, new individuals with valid user-ids are always added as participants to the entity they are being added to.

In addition, if an individual is being added to a team, then a participant level league relationship is automatically created for them.

For example, if adding a volunteer to a team, and a valid user id is provided for that new volunteer, then the new individual's user should be given **participant** level access to the team and to the league.

4.2.5 Links/Actions

Link/Action	Destination/Behavior
<i>Submit and add more</i>	Submit and refresh current page
<i>Submit</i>	Screen we came from. Either: League Profile (for officers), League Members – Players (for players) or League Members – Volunteers (for volunteers).
<i>Cancel</i>	Screen we came from. Either: League Profile (for officers), League Members – Players (for players) or League Members – Volunteers (for volunteers).

Summary of actions on submit. For each member being added, create the following database entries:

- create and fill in an individual record with most fields
- contact association of individual to league
- contact association of individual to team (if being added to the team)
- lookup of user id to fill in numeric BV_USER id in individual record
- if valid user id: security association to league
- if valid user id: security association to team (if being added to the team)

4.2.6 Open Issues

We need to supply the limits for the sizes of the various edit fields. Limits need to be checked against what the database will accept for those fields.

We need the exact text of error messages that can appear on this page.

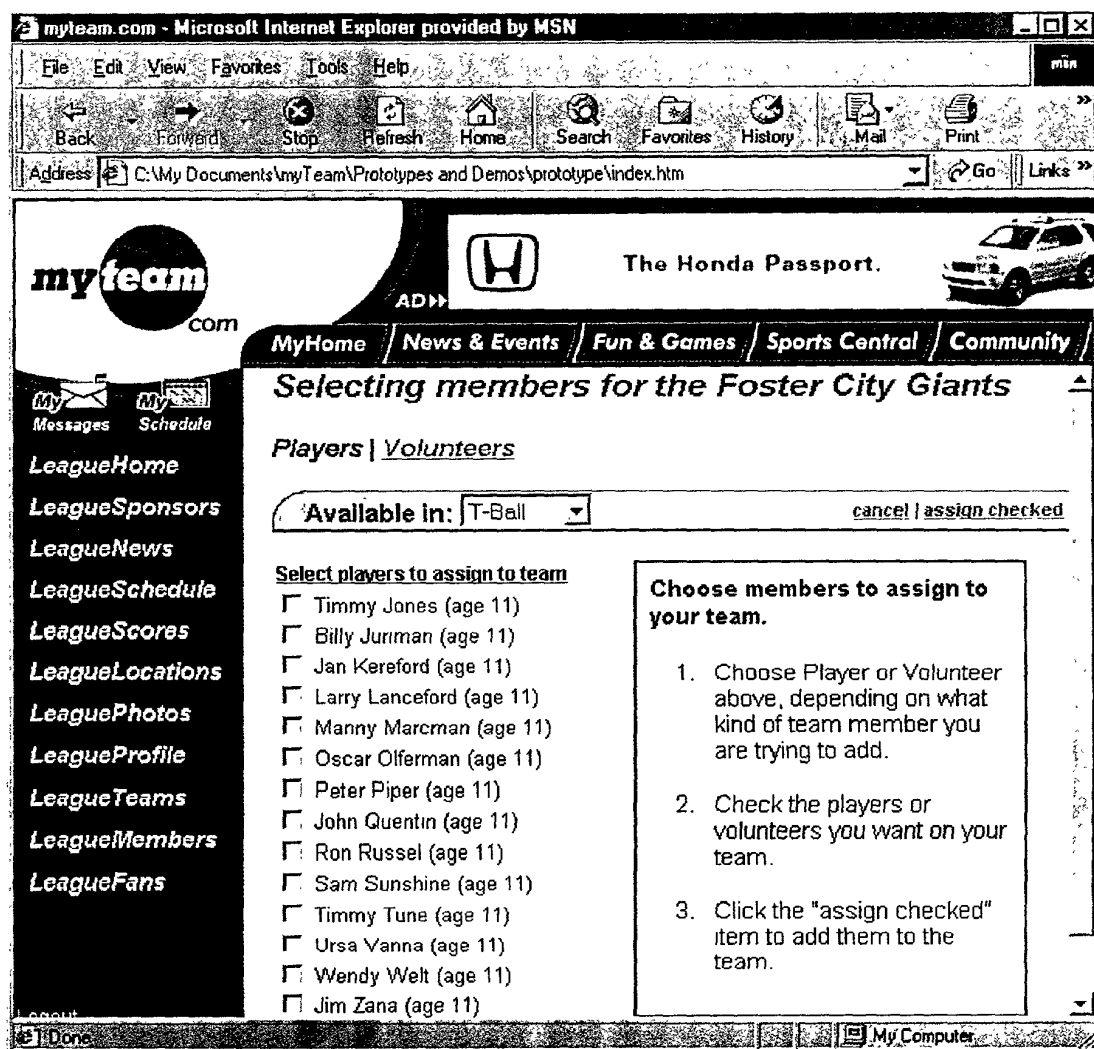

CONFIDENTIAL

4.3 Assign Players, Volunteers or Officers

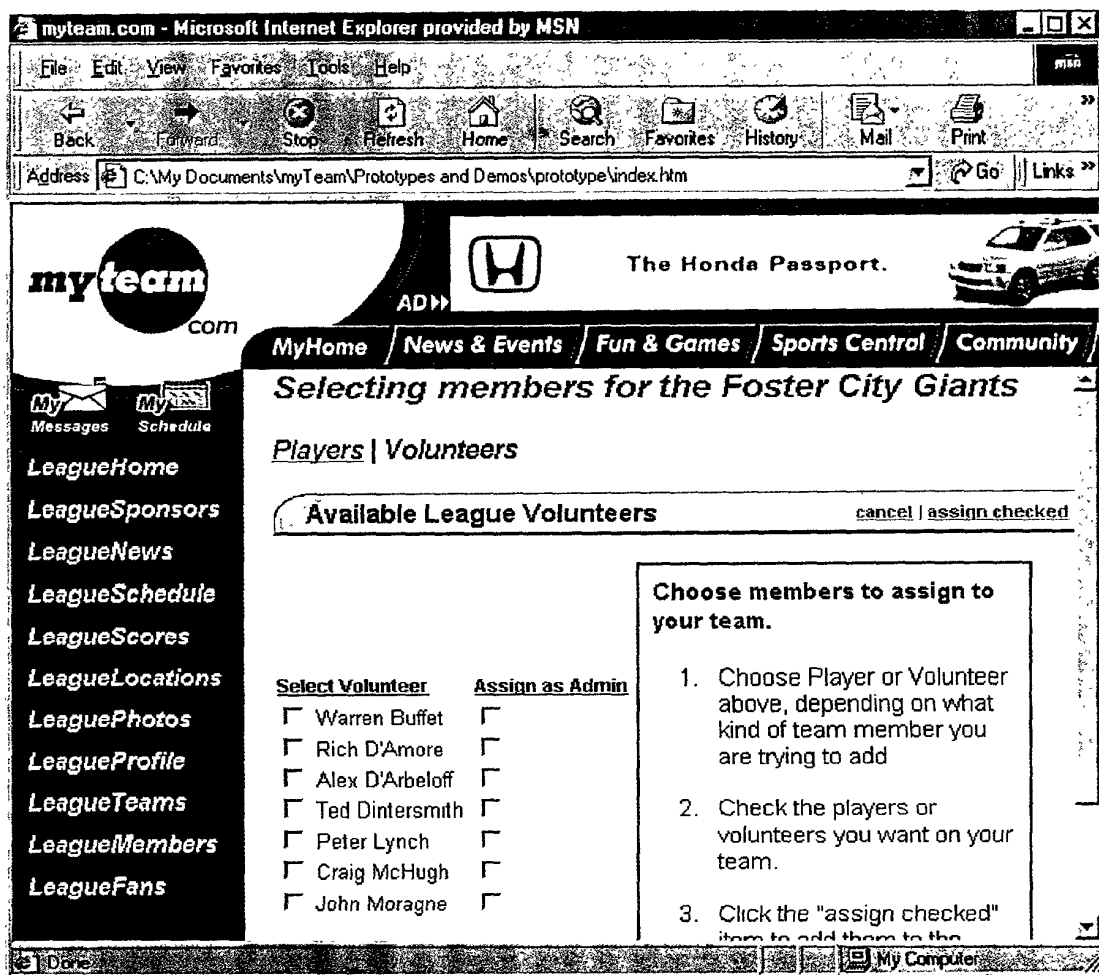

This page permits the user to assign players or volunteers to teams, or officers to be designated as such in the league. It displays a list of available volunteers to become officers and allows the user to select which ones he/she wants.

Interesting note: the only way to assign admin access to the league is through the Assign Officers interface. Therefore you must be a league officer in order to get admin access to the league.

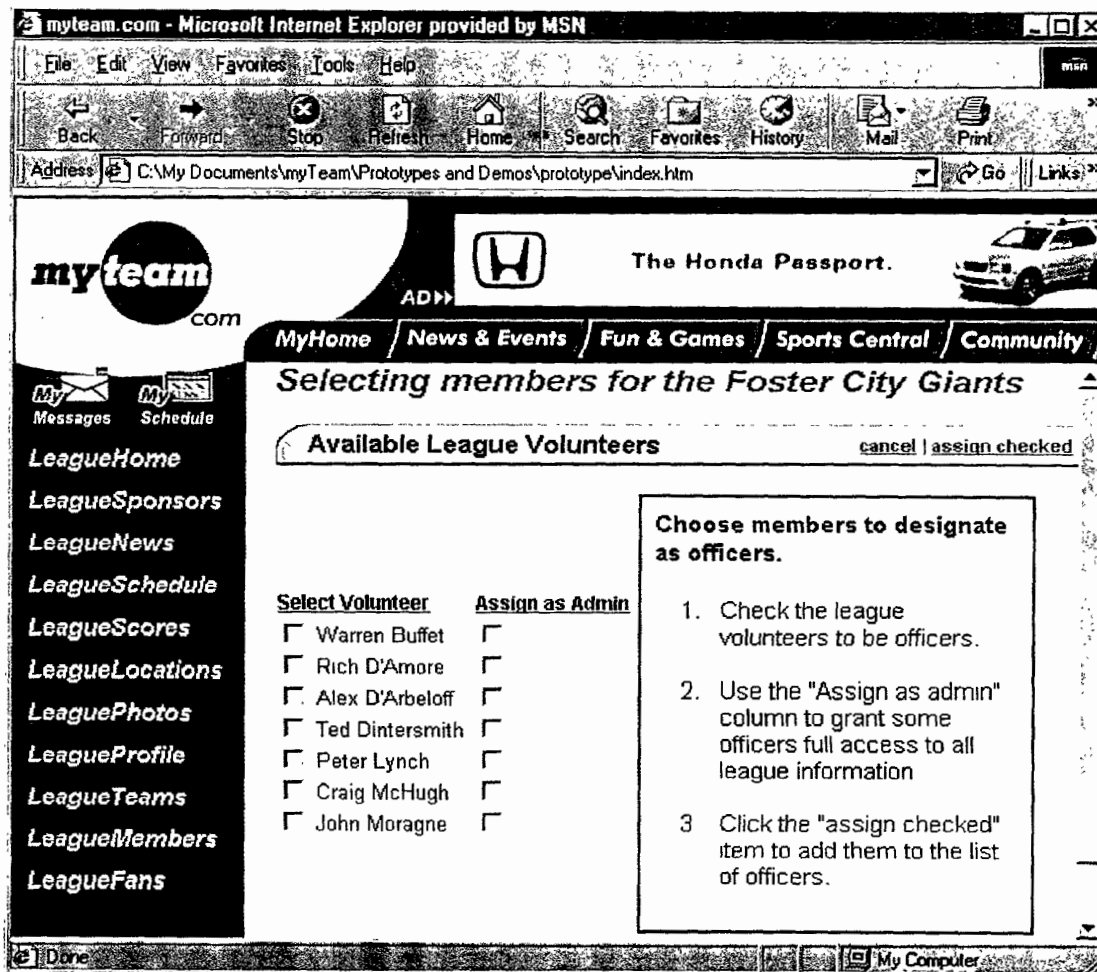

4.3.1 Page Mock Up - Players

4.3.2 Page Mock Up - Volunteers

4.3.3 Mock up - Officers

4.3.4 Access Tables

When accessed as part of a league entity, this page is available only to league administrators.
When accessed as part of a team entity, this page is available only to team administrators.

Security - Page	AV	IG	P	A
League - Assign Officers	-	-	-	W
League - Assign Volunteers	-	-	-	W
League - Assign Players	-	-	-	W
Team - Assign Volunteers	-	-	-	W
Team - Assign Players	-	-	-	W

There are no changes to the inner workings of the page based on access level. However, the title and the "section switch" control do change based on whether the page is being used to assign players, volunteers or officers. Also, the "assign as admin" column is displayed only in Volunteer mode. See descriptions below for more detail.

Access to actions is all standard in that actions are available only to users with **write** access to the page:

Security – Actions	R	W
Cancel		✓
Assign checked		✓
Previous		✓
Next		✓

4.3.5 Dynamic Nature of Page

Since this page is invoked from a number of contexts, the behavior of the controls on the page change based on that context. The following table sums up the behavior of these controls.

Page Element	Players	Volunteers	Officers
<i>Title</i>	Team Roster or League Teams	Team Roster or League Teams	League Profile
<i>Section Switch</i>	Players Volunteers	Players Volunteers	Not displayed
<i>Division Menu</i>	Visible	Not displayed	Not displayed
<i>Admin Column</i>	Not displayed	Visible	Visible

In addition, the lists of names themselves are generated differently based on the context of the page.

Operation	List Generation Rule
<i>Assign Players</i>	All players in specified division that are not assigned to any team.
<i>Assign Volunteers</i>	All league members that are not players and have not already been assigned to the team.
<i>Assign Officers</i>	All league members that are not already officers.

4.3.6 Overall Display

This page utilizes the standard style-sheet for modal selection from a list. This means that the previous/next controls may show up if more than 100 names are available.

The **division control** appears only in the “Assign Player” context. It contains a list of all divisions in the league, and the last item is “All.” More details:

- The default is the division of which the team being assigned to is a member
- If there is only one (or none from the user’s point of view) divisions, then this control is not displayed.
- On selection changed in the control, the page is refreshed to reflect the newly selected division.

The page includes the following **explanatory text** to help guide the user through the process of assigning someone to an entity:

Select the names you would like to include and click “Assign checked” to add them..

If the list generation rules above result in no listing at all, then one of the following message is displayed:

For Players:

There are no league players available to be added. All available players have been assigned to other teams, or the player you are looking for has not been entered into the league roster. Click Cancel to return to the team roster.

For Volunteers:

All existing league members have already been assigned to your team. Click Cancel to return to the team roster.

For Officers:

All existing league members are already listed as officers. Click Cancel to return to the Team Profile.

Individuals are **sorted** by last name, first name and age (oldest first). Each item in the row is formatted as follows for volunteers and officers...

[] First Last

...and like this for players:

[] First Last (Age: age)

Assign As Admin: For Volunteer and Officer modes only, each displayed entry includes a second checkbox in a column labeled "Assign as admin." The following table describes the behavior for each individual user, based on which boxes are checked when the "Assign checked" (or a prev/next) link is invoked:

Checkbox States	Resulting Action on Assign
<i>Neither</i>	Member is not assigned
<i>Just name checked</i>	Member is assigned
<i>Just admin checked</i>	Member is assigned as an admin
<i>Both checked</i>	Member is assigned as an admin

Validation and Error Display:

If no checkboxes are selected but the user clicks "Assign checked" there is no error generated. The operation simply results in no action taken. No other validation errors are anticipated.

4.3.7 Security Model Connections

Assigning a member means that a contact association is created between the individual and the team or league. If that individual has a valid user id stored, then assigning a member also creates a security relationship with the team or league.

Unless the "assign as admin" checkbox is selected, the security relationship created is always at **participant** level access. If the "assign as admin" checkbox is selected, then the security relationship is **admin** level access.

If a player is assigned to a team, and that player has contacts listed, and those contacts have valid user ids, then the contact users should also be added with participant level security access to the team.

4.3.8 Links/Actions

Link/Action	Destination/Behavior
<i>Assign checked</i>	Assign checked members and return to the screen we came from. Either: League Profile, League Teams or Team Roster.
<i>Cancel</i>	Screen we came from. Either: League Profile, League Teams or Team Roster.
<i>Previous</i>	Assign checked members to the team and view the previous (alphabetically) list of members.
<i>Next</i>	Assign checked members to the team and view the next (alphabetically) list of members.

4.3.9 Open Issues

We need to supply the limits for the sizes of the various edit fields. Limits need to be checked against what the database will accept for those fields.

Is this the screen we decided to sort players by first name? Check into this with the spec team.

When assigning volunteers, should we be listing the players in the league?

If the only way to grant admin access to the league is by assigning a league member to be an officer and remembering to click "Assign admin" – then how do I grant admin access to an officer I've previously added without admin access? Do I have to un-officer them and re-assign them as an officer? Perhaps the "assign" rule for officers should list people who are already officers—so I can give them admin rights.

4.4 League Import

TBD.

2/28

CONFIDENTIAL

4.5 Player/Volunteer Details

This screen displays a league member's detailed information in "read" mode. If the user has edit access to the individual's record, then an **edit** button is displayed on the page. The page can be accessed from:

- The league profile screen (by clicking on an officer)
- The league member's screen (by clicking on a player or volunteer)
- The team roster (by clicking on a player or volunteer)
- Another individual's detail screen (by clicking on a contact)

No cancel functionality is provided from this screen. Users should use their browser's **back** button to go back to the previous screen. In effect, the member is the "dead-end" of the league drill-down. Once reached, there is no deeper to go.

Done My Computer

Mock up deltas:

- The headings of the rows should line up for better layout. For example, Address and Communications should be on the same line.
- Birth date should not appear for volunteers or officers.
- Access level should be a drop-down menu.
- Should have a field for comments
- Players should have a checkbox for "birth certificate verified"
- Contacts should have a checkbox for "parent/guardian"
- Required fields are wrong. Should be only: First name, Last name and Birth date in this picture.

4.6.2 Security Model Connections

When the myteam-id is set or changed on a player or volunteer, then a security relationship is created between the named user-id and the entities to which the individual is connected. If a user-id is being replaced, then the old user's security connections that relate to the individual need to be removed.

For volunteers or officers, the access level set for the named user id matches the access level control on the screen (by default all volunteers and officers are given **participant** level access). For players, the access level set is always **participant** level access automatically.

When using this screen to add a contact to a player, certainly the contact association is set between the two individuals as appropriate (either Contact or Parent). Once the contact association is set, the contact should be set up with all the security relationships that the player has.

When an individual's security relationships are set up with a team or a league, the individual's contacts should also be set up (if those contacts have valid user ids). When the individual's security relationship is severed (because the userid has been replaced) then those contact's relationships should also be severed.

4.6.3 Required Fields

Required fields are:

- First name
- Last name
- Birth date (required for players only)
- Phone (required for contacts only)

[illegible]

Product Functional Specification

for December, 1999 release

Document Version 3.01
11.16.99

Note:

Individual pages in this document are given letter and date *revisions*, while the document as a whole is given number and date *releases*. This is because individual pages may undergo several *revisions* between each *release* of the whole document.

Document History

3.01 (11.16.99)

Clarification and detail on the Photo capsule and thumbnail functionality.

Updated Security tables to match what is implemented in the DCC

No other functional changes

3.0 (11.06.99)

The first published version of the spec. Broken out of the My Home spec.

Photo Tools Overview

The photo tools pages enable the users to view and collect personal, team and league photos for display. While the functionality of the photo tool pages are identical for the personal, Team and League Home pages, no sharing of photos between them is allowed.

The Photo capsule displays a reduced-size image and an optional caption inside of a borderless, fixed size capsule. It appears on the top of a column on the My Home, Team Home and League Home pages. Invited Guests and above can see the Photo capsule and click on it to go to the Photos page.

Viewing Photos

On the Photos page page up to 6 photos are displayed as reduced size images, including the one that was in the photo capsule. The size of the reduced size image placeholder and the image area of the Photo capsule are the same.

Clicking on a reduced size image brings up the photo at 100% size in the Photo Full Size page. From here they can page through to all 6 stored images in full size. On Photo Full Size pages the administrator of the page (My Home owner, team admin league admin) can see and click on the Replace and Delete hyperlinks.

Replacing a Photo

Replace goes to the New Photo page from which a photo can be uploaded to replace the current photo being viewed. When submitting a new photo, an alert is displayed to confirm that the photo should be displayed, even though any Fan of the team, not just team members can view the photo.

Site Flow Map

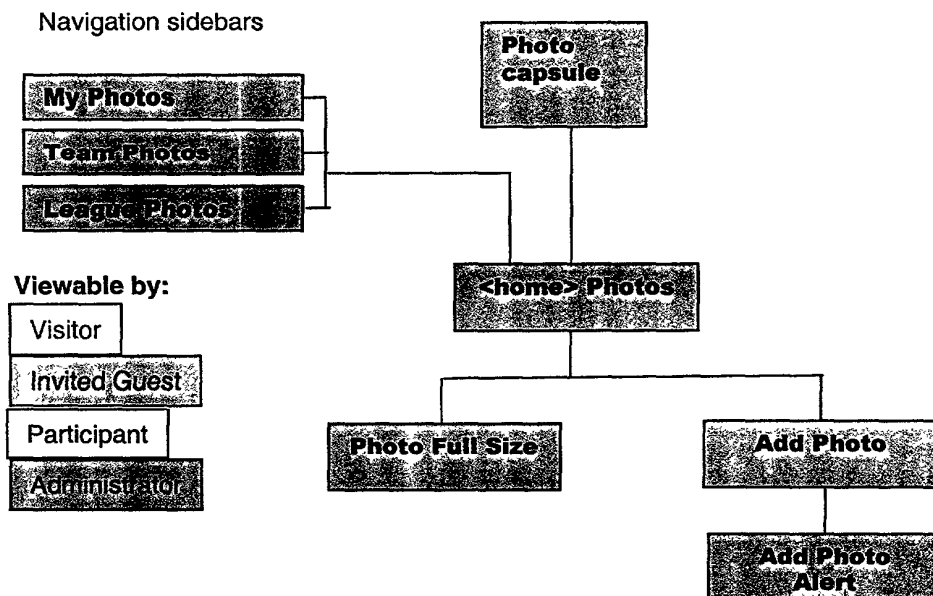

Photo Capsule

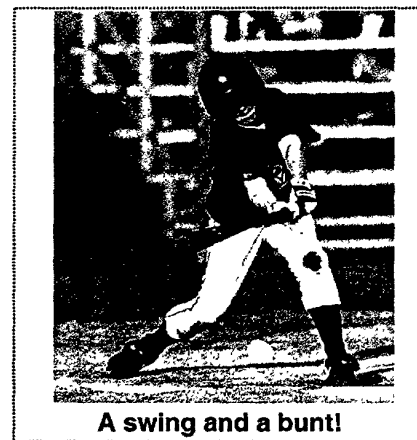

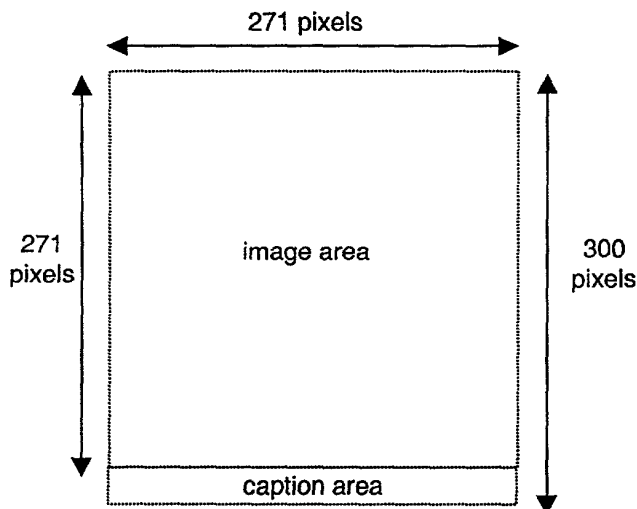

The Photo capsule displays a reduced-size image and an optional caption inside of a borderless, fixed size capsule. It appears on the top of a column on the My Home, Team Home and League Home pages. Invited Guests and above can see the Photo capsule and click on it to go to the Photos page.

Image Resizing

An image is centered and resized to fit the capsule image display area, while maintaining its aspect ratio. This means a perfectly square photo will completely fill the image area of the capsule, while a portrait-sized photo will display equal blank area on both the left and right of the photo. A landscape-size photo will display equal blank area on both the top and bottom of the photo. The blank area displayed in the capsule is the same color as the background of the page.

Capsule Size

The image display area of the capsule is square in its dimensions, keeping the same height for the image as the width of the column it is in. Underneath the square image area is where the caption is displayed, aligned to the center of the capsule. The width of the photo capsule is based upon the current specified pixel width for a column on the site, 271 pixels.

More on Photos

Photo Storage & Display

All photos are stored on the myteam server. We will display images in JPEG and GIF formats, recommending files under 100 Kb. When displaying them on the Photos page, we will resize the photo to fit within the placeholder size.

User will be notified on this page that we reserve the right to remove any photos that are deemed offensive and resize and compress photos to reduce file size and maximize page view performance. Note: We WILL NOT perform these tasks at this time.

Security Access

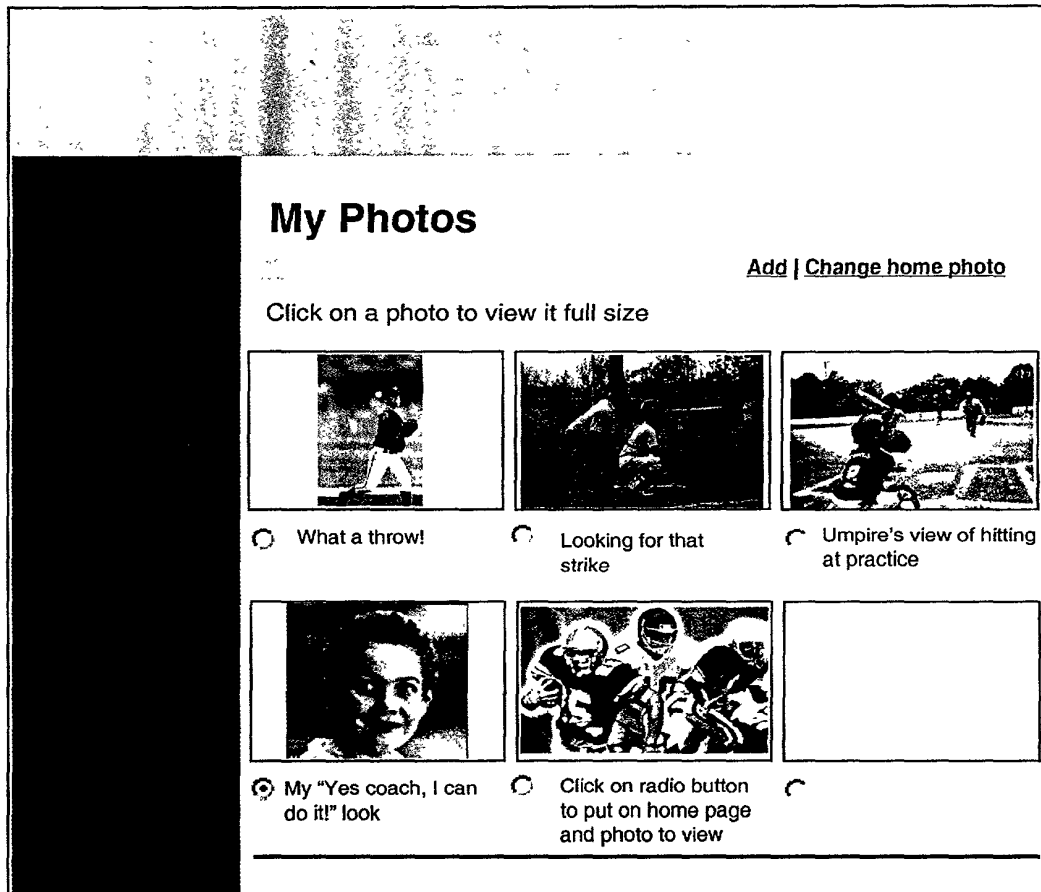

Access to view the Photo capsule and pages depends on the user's access rights to the home page from which the photos are linked. Any Fan or above can view the photos, but only the Admin can make changes to the photos displayed, including access to the Add Photo's pages.

Security Feature	AV (guest)	IG (fan)	P (player)	A (Admin)
My Photos	-	R	R	W

Photos

The name of the Photos page depends on what type of home page it is linked to.

Home Page	Page Name
From My Home page	My Photos
From Team Home page	Team Photos
From League Home page	League Photos

Unresolved Issues

- determine max pixel size for reduced images -recommend making them same as home pages.

My Photos Spec

This page provides an album view of 6 photos as reduced size images and optional captions beneath. If the user clicks on a photo thumbnail, they will go to that photo's Photo Full Size page.

First Time View

The Photo page will be initially pre-populated with 4 sample photos and a caption that is a help prompt relevant to user access level, such as "Click to change". The photos and message may vary for individuals on the My Home and the team and league admins on the Team and League home pages.

"Thumbnail" Display

The reduced image thumbnails are displayed 3 across and two rows down. They are populated upper left to bottom right. Empty placeholders display nothing. When any photo is deleted, the thumbnails are reflowed so that only placeholders at the end are empty. The image area for each thumbnail is 175 pixels high by 175 pixels wide. The caption is 25 pixels high.

Choosing Photo For Home Page

The page administrator can see radio buttons next to each photo. One of the 6 photos is the one currently displayed on the respective home page. That photo's radio button is enabled. Enabling the radio button of a different photo and clicking Change Home Photo hyperlink will change the photo displayed in the capsule on the home page to the new selection.

Adding Photos

Add Photo appears on the Photos page to administrators when at least one of the 6 placeholders is empty. When Add Photo is accessed from the Add hyperlink and a photo is submitted, it is added in the first open placeholder. If Add Photo page is accessed from the Replace hyperlink on Photo Full size page, the new photo is placed in the location of the previously viewed photo.

Page Access

This page is available to all who have access rights to the Photos page.

Page Access / Links / Actions

Link/Action	AV	IG	P	A	Destination/Behavior
Reduced size image	-	✓	✓	✓	Photo Full Size page for selected image.
Add hyperlink	-	-	-	✓	Add Photo page. Visible only if at least one placeholder is empty.
Captions	-	✓	✓	✓	Display under each reduced size image
Radio buttons	-	-	-	✓	Selects photo next to it. Will display on home page if Change Home Photo hyperlink is clicked on.
Change Home Photo hyperlink	-	-	-	✓	Changes the photo on the home page to the one currently selected by the radio button

Photo Full Size

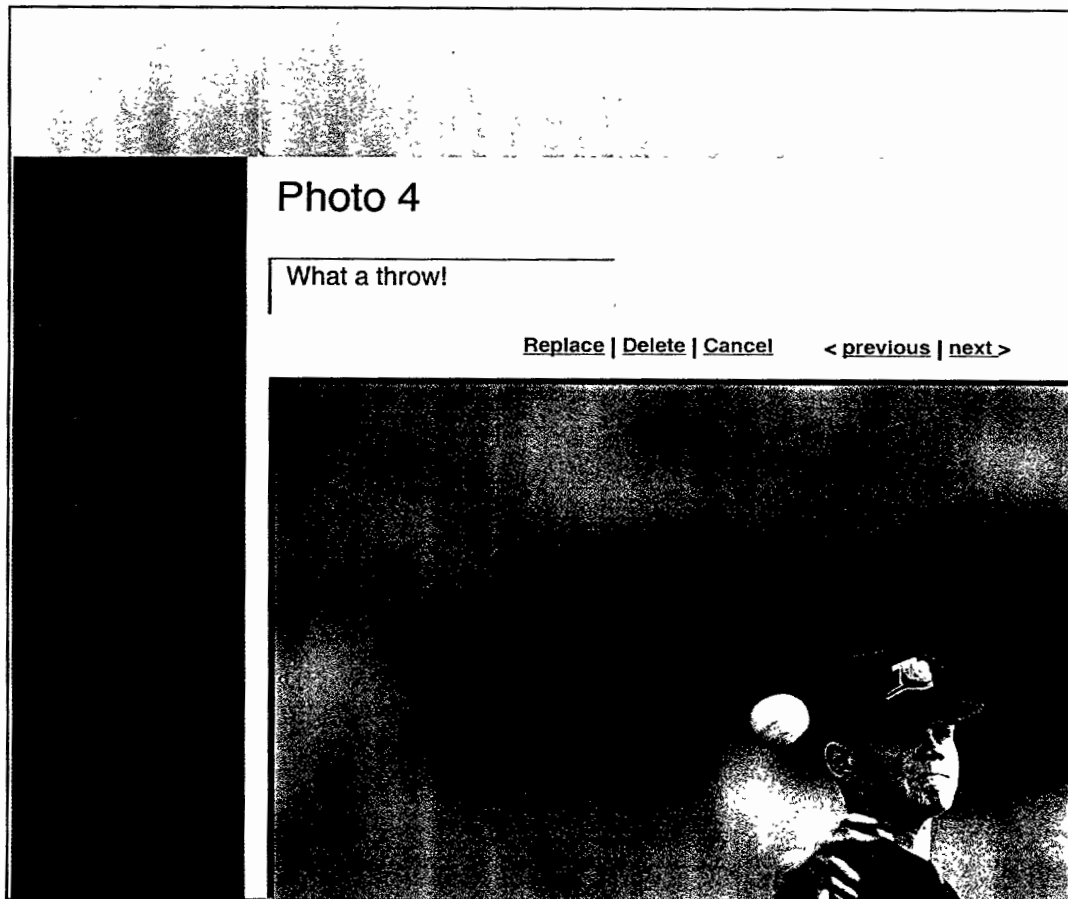

Photo Full Size - Spec

This page displays the photo in full size with the caption above it. This page is reached by clicking on the thumbnail of the photo in the Photos page. This page also shows administrators the editable caption field, and links to delete and replace the photo.

Page Access Tables

This page is accessible to all who have access to the Photo page.

Page Access / Links / Actions

Link/Action	AV	IG	P	A	Destination/Behavior
Replace	-	-	-	ü	Add Photo page
Delete	-	-	-	ü	Removes current photo and goes to Photos page
Cancel	-	-	-	ü	Photos page
Editable caption field	-			ü	Editable caption field accepts up to (ISSUE limit on number of characters)
Next	-	ü	ü	ü	Goes to Photo Full view page for the next photo. Hidden if current photo is last in sequence.
Previous	-	ü	ü	ü	Goes to Photo Full view page for the previous photo. Hidden if current photo is first in sequence.

Unresolved Issues

- What is the maximum number of characters accepted into Caption field?

Add Photo

Add Photo [submit](#) | [cancel](#)

Upload Photos

Point to the location of the photo that you want to add to your Album.

Either type in the file path or click the Browse... button to locate it on your computer.

[Browse...](#)

IMPORTANT: Once you click Browse, click the "Files of type" drop-down menu and select "All files [*.]."

Please Read:

Guidelines for uploading photos:

- photo file sizes limited to a maximum of 100k
- photo file formats supported are JPEG and GIF

Cautions:

- We reserve the right to remove photos that are deemed offensive or inappropriate.
- Do not depend on this site to archive your photos. We reserve the right to compress and resize photos to maximize web page performance.

Suggestions on ways of [digitizing photos](#)

[submit](#) | [cancel](#)

Unresolved Issues

- What is the maximum number of characters accepted into File Path field?

Add Photo - Spec

This page enables the administrator to upload a new photo.

Placement of uploaded photo

Where the uploaded photo placed in the 6 placeholder depends on the page that Add Photo was linked from.

From Page	Action
Photos page	Populated the first open placeholder on the Photos page
Photo Full Size page	replace the photo that was previously shown and keep its place in placeholder order.

Page Access Tables

This page is accessible to those only with write privileges on the Photo pages.

Page Links/Actions

Link/Action	AV	IG	P	A	Destination/Behavior
Browse hyperlink	-	-	-	✓	Browser's File Open dialog
Submit hyperlink	-	-	-	✓	Submits to the server the photo located in the local path in the File Path field. Validates that the file has a ".GIF" or ">JPG" extension. Goes to Add Photo Alert page.
Cancel hyperlink	-	-	-	✓	To the previous page – either Photos or Photo Full Size page. No action taken.
File Path field	-	-	-	✓	Populates from results of the file open through Browse button. Can also be hand entered and edited.
Digitizing Photos hyperlink	-	-	-	✓	Goes to an informative content page on how to get photos digitized

Error Messages

Error	Message
Not ".GIF" or ">JPG" extension.	Please submit only .GIF and .JPG files.
Not valid local disk file path	Please re-enter the path to the image file that you are uploading.
Submission failed.	Your submitted changes were not successfully received. Please try again.

Add Photo Alert

WARNING: This photo can be viewed by all invited Fans of the <home page>, not just Team Members.

[submit](#) | [cancel](#)

Please Read:

- Do not submit any photos that you or someone else would not want viewed.
- Only invited Fans of this page who must also be myteam members can see these photos.
- The general public cannot view these.

[submit](#) | [cancel](#)

Add Photo Alert - Spec

Displays when a photo has been submitted for upload from the Add Photos page. This page informs them of how widely viewable the photos posted here will be.

If the admin clicks on Submit, the submission is completed. If the admin clicks on Cancel, the submission is terminated and the user is returned to the page previous to the Add Photo page.

Page Access Tables

This page is accessible by only those with write access to the Photo pages.

Page Access / Links / Actions

Link/Action	AV	IG	P	A	Destination/Behavior
Submit				✓	Completes Submission started on Add Photos page. Goes to Photos page repopulated with the new photo submitted.
Cancel				✓	Terminates the submission and returns to the page previous to Add Photo.

APPENDIX 4 -- NEWS

6/24/2025 10:00 AM

News Overview

Any functionality that is not addressed in this document but is in the current news tools should be left as is. An example of this is the news submittal/publish process.

News can be published at all entity levels in the myteam.com site. The news publishing tool is controlled by the entity that the user is currently acting on and the users association to that entity. Example: a user that is on a league page and has an administrator entry in the security table for that league will get access to publishing tools for league administrators.

A special case exists for users that are currently acting on the myteam.com national entity with an administrator entry for the root myteam id. These users will see a unique version of the news publishing tool that is designed for the myteam.com news publishing group.

News is made up of three components , headlines, lists and detail pages.

The News headline function is used in capsules on personal, team and league home pages, outside of capsules on organization home pages and on the news & events page.

The headline function takes inputs for organizational entity, news type or types and the number of headlines to display

Lists of news stories are generated from many places in the site including, More News Links, Archives and Sidebar links. News Lists take organizational entity and news type or types as inputs.

News Detail pages display the complete contents of a news story. The news detail page takes the story id as input.

The headline function is used in three areas on the site.

1. Organizational home pages

Display headlines based on the following rules.

Display four most recent stories based on publish date. Sort the stories with the most recent date on top

type = headlines

entity = organization root id

If more than four stories are available add a "more" link on the line after the last headline that links to the newsList using the same filter criteria.

2. Capsule News on home pages

Display headlines based on the following rules :

Display three most recent stories based on publish date. Sort the stories with the most recent date on top

For teams (type = headlines and entity = entity id) or type = team

For leagues (type = headlines and entity = entity id) or type= league

For all other organization entities type = headlines and entity =entity id

For Personal Home Pages display stories based on the following rules:

myteam.com: Type = headlines, Target = myteam national ID + relevance matching

Personal Home Page (pony, dixie, nabf): Type = headlines, Target = organization root ID

If more than three stories are available add a "more" link on the line after the last headline that links to the newsList using the same filter criteria.

3. News & Events page

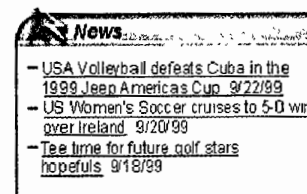

Display headlines based on the following rules.

Display ten most recent stories based on publish date. Sort the stories with the most recent date on top

type = headlines

entity = myteam. root id

If more than ten stories are available add a "more" link on the line after the last headline that links to the newsList using the same filter criteria

News Capsule

News

News & Events page

News Capsule

News Capsules for personal, team, league and other entities.

Display three story headlines

Sort the stories in date order with the most recent publish date first for team and league home pages. For personal home pages sort the stories based on relevance with the most relevant stories shown first.

If the number of stories available is greater than three display a "more" link in the bottom right corner of the news capsule which links to the newsList using the same filter criteria used in the capsule

Personal Home Page myteam.com: Type = headlines, Target = myteam root ID + relevance matching

Personal Home Page for organization equal to pony, dixie, or nabf: Type = headlines, Target = organization root ID

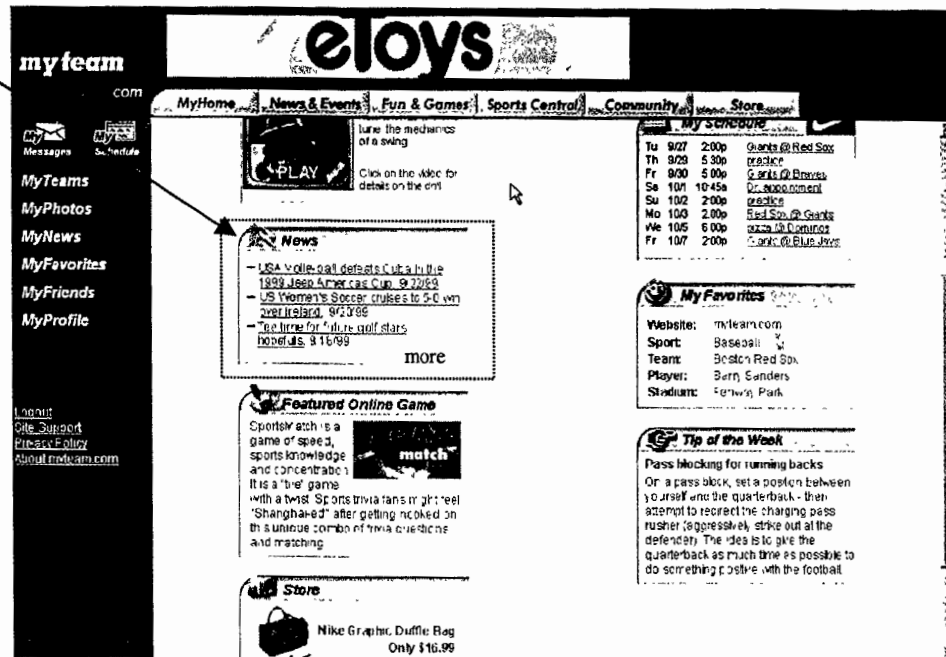

Team Home Page:
(Type = headlines and Target = Team ID) or Type = team,

League Home Pages:
(Type = headlines and Target = League ID) or Type = league,

All levels above league will use:
Type = headlines and Target = entity ID

Clicking on the capsule header or "more" takes the user to /news/newsList.jsp (formerly /L2/news/newsMore.jsp) which will use the same filter criteria

Clicking on a headline takes the user to the story detail /news/newsDetail.jsp

News Capsule Access

Page	AV	IG	P	A
Personal Home		R		R
Team Home		R	R	R
League Home	R	R	R	R

Organization Home Page Headline News

Headline news function is used on organization home pages without the capsule functions

Display four most recent stories

If the number of stories available is greater than four display a "more" link in the bottom right corner of the headline news table which links to the newsList using the same filter criteria

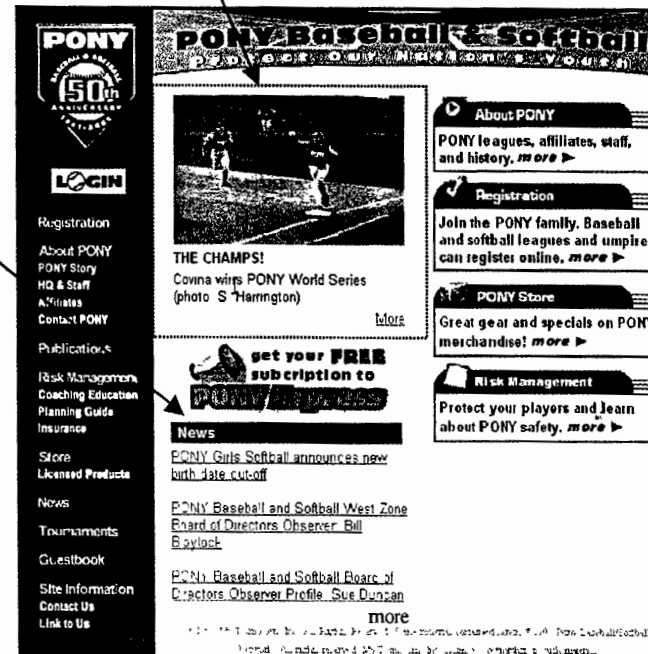

Organization Home Page: Type = news, Target = organization root ID

Clicking on the news header takes the user to /news/newsList.jsp (formerly /L2/news/newsMore.jsp) using the same filter criteria

Clicking on a headline takes the user to the story detail /news/newsDetail.jsp

For myteam.com display as paragraph 1 include

Page	AV	IG	P	A
Org Home	R	R	R	R

News & Events Headline News

Headline news function is used on news and events page without the capsule functions

Display 10 most recent stories

If the number of stories available is greater than ten display a "more" link in the bottom right corner of the headline news table which links to the newsList using the same filter criteria

Organization Home Page: Type = headlines, Target = myteam root ID

Clicking on the news header takes the user to /news/newsList.jsp (formerly /L2/news/newsMore.jsp) using the same filter criteria

Clicking on a headline takes the user to the story detail /news/newsDetail.jsp

News List

Type and entity id are passed into the News List page News List allows passing of type as a url argument to create custom lists. Examples: List of Type = Feature, List of Type = Press Release, can either be called as jumpRef or from sidebar.

News List displays a list of stories based on the news type or types passed into it.

News Type is displayed as the table header. If multiple types are passed the header will always display "News"

All news stories with a current publish date are shown.

News stories are sorted with the most recent story first or based on relevance if relevance is part of the filter criteria.

Display headline and story teaser. If story teaser is null then the complete story sub-headline should be displayed in this field.

The story publish date is displayed as shown but leading zeros should be removed from the date

After 20 stories the page should break and a Next link should appear on the bottom right of the page. If the user clicks Next and there are more than 20 additional stories a Previous and Next link should appear otherwise just a Previous link should appear on the bottom right of the page.

Lying down on the job
Olympic bronze medalist Brian Martin takes us down the sliding adventures of luge
Byline
And it's a good thing he does, because if he tried standing he'd probably fall flat on around his neck
And it's a good thing he does, because if he tried standing he'd probably fall flat on his face with all those medals hanging around his neck
Martin is in a USA Luge doubles team. He's the back driver- the guy who pushes the sled off and hops in back. He and his teammate Mark Gimmelle are the hottest luge pair in the country, having won 13 international medals in the last three years. The duo took a bronze in the 1999 Olympics in Nagano, Japan and another bronze in the 1999 World Championships. They recently snatched their second straight World Cup title in 1999-1999 after becoming just the second U.S. sled team to win the title the previous season. Martin and Gimmelle now hold the USA Luge all-time record with five individual World Cup victories.

Edit News Detail

(myteam national admin)

Myteam national admin Edit News Detail is only seen by users with admin association to the myteam root id.

Organization includes a list of organization entries with root id's. Selected organization is the target organization for the story.

News types displayed depend on the organization selected. It is not shown for teams. Teams can only publish type = News

Publish date is the date the story will first be shown.

End date is the date that the story will no longer be shown.

Images 1, Image 2 and Image 3 are upload images that are displayed with the story.

Captions allow inputting of a 40 character caption for each photo

Story Teaser allows 400 characters including html formatting characters

Headline allows 80 characters and does not allow html formatting characters

Sub headline allows 400 characters including html formatting characters

Byline allows 80 character including html formatting.

Paragraphs 1, 2 and 3 allow 4,000 characters including html formatting. The paragraphs are referenced by storing a base file name in the database and appending a suffix to the actual file name. Use File is only available to myteam national administrators. If use file is checked only allow entering a file name in paragraph 1 and then append a suffix on to it for the three files.

Relevance rating sets the stories relevance. A date relevance field is automatically set to a value of 5 when a story is created. The date relevance for all stories will be reduced each day by a kron job that compares the publish date to a reference list.

Days since publish	Relevance rati
2	4
4	3
10	1
15	-1

APPENDIX 5 -- MY/TEAM/LEAGUE HOME PAGES

CONFIDENTIAL

My / Team / League Home Pages

Product Functional Specification

for December, 1999 release

Document Version 3.00
11.09.99

Note:

Individual pages in this document are given letter and date *revisions*, while the document as a whole is given number and date *releases*. This is because individual pages may undergo several *revisions* between each *release* of the whole document.

Home Pages

First Page After Log-in

For all myteam members who are not league administrators, the first page viewed upon successful log-in is the My Home page. To satisfy requirements for Little League, any user with a league administrator access level or above will instead be taken to the League Home page of that league upon completion of log-in.

Capsules

The My Home, Team and League Home pages all share common elements and have similar behaviors, but each in their own community's context. All pages contain two columns of capsules. A capsule displays a summary of the data that can be seen on the capsule destination page by clicking through the capsule. In some capsules, individual items are hyperlinked to their respective detail pages, bypassing the main destination page that is reached by clicking on the capsule's header.

Similar Capsules Across Home Pages

Several of the capsules are found across all three types of home pages - personal, team and league. In some cases, such as the Schedule capsule, data is shared between the personal, team and league versions of the capsules on their home pages. The personal My Schedule pages and capsule contain a combination of personal events with team events for all of the teams the individual is a participant of. In others, the information displayed is unique to that capsule and not shared with others. The News and Photos pages and capsules do not share any information between them unless copied and published by each page's administrators uniquely.

Getting Started Capsules

This capsule appears at the top of the home page column that does not have the page photo. This capsule describes what the admin should do to fill out the content on the home and linked pages. This capsule appears on the personal, team and league home pages. The admin can dismiss this capsule by de-selecting the "Don't show me again" checkbox and it will not show up again.

Getting Started Capsule Mock-up

Getting Started:

Some easy steps to personalize this home page.

1. Choose a photo and caption
2. Input your schedule.
3. Choose a sport of interest in your My Profile.

☒ Don't show me again

Security For Home Pages

The personal My Home, Team Home and League Home pages serve as entry points to the mini-site of pages behind them. Access to those pages sitting behind the home page is only through capsules and elements on the navigation side bar. The user's access level in relation to the home page determines their access to those elements and the ability to get to the pages. A personal My Home page can only be viewed by its owner and an Invited Guest. A Team or League Home page is viewable without being a member of the team or league, but only Invited Guests and Participants can see certain capsules and navigation sidebar items.

Administrator Access

The ability for the home page's administrator to edit content is enabled through hyperlinks to editing pages. These links appear to admins on read-only pages that are viewable by others.

My Friends & My Teams

A personal My Home page can only be viewed by other myteam members who have been invited to view it by the page owner. This viewing relationship is two-way. Each individual can view the others My Home page when the recipient responds to an invitation. Any myteam members with whom My Home pages are shared appear in the My Friends page. The Team Home and League Home pages to which the user has been granted Invited Guest or Participant status appear in the My Teams page. In addition the top 9 also show up in the My Teams & Leagues capsule on the My Home page.

Team Fans & League Fans

A Team or League Home page is viewable without being granted Invited Guest status, but some links and capsules will be hidden from their view. All Invited Guests for a Team Home page are listed in on the Team Fans page. The Team Fans page can be viewed by and invitations to the home page can be sent by all Participants on that team. The League Fans page lists all Invited Guests to the League Home page but it can only be viewed by and invitations sent by League Admins.

For more detail on the user experience for security access and bookmarking, see the Communities spec.

Tip of the Week

Catching a Flyball
 Run to the spot you think ball will come down. Raise your hands up and out in front of your face, and keep your thumbs together. Look over top of glove. Don't allow the ball to get over your head. Square your shoulders to flight of the ball. Keep your feet slightly staggered.

My Home - Spec

The My Home page is always accessible by clicking on the My Home tab.

Deltas to Page Mock-up

The following elements are different than depicted on the page mock-up on the previous page.

- Getting Started capsule is added at the top of the right column, above the league logo and link.
- Navigation sidebar is not final. See Navigation Sidebar table for exact order.

Title bar

The title bar on the My Home page displays the users first and last name as entered in My Profile. If the user has entered a nickname in My Profile, it replaces the first and last name in the title bar. Additionally the user can enter a message of up to x characters (determine max text size) that is added to the right of their name in quotes. The format is

Jimmy Johnson: "Team Clown"

First Time Experience

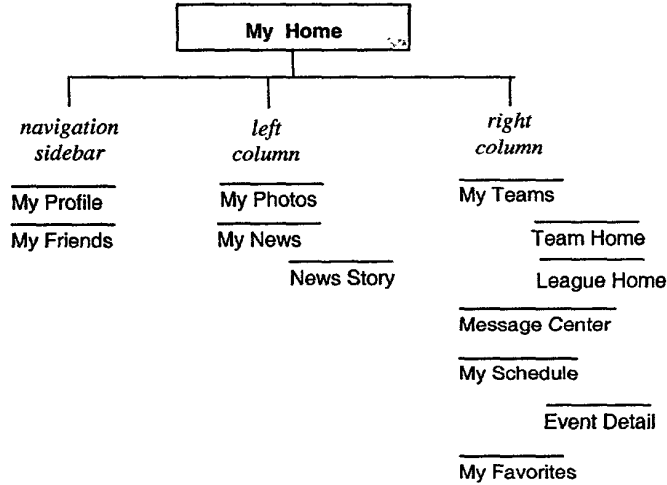

When the myteam member has first joined myteam or setup a team or league online, the population of those home pages will be scant. Several capsules on each will be initially populated with call to actions and help messages to encourage the new user to input information and personalize the page. The following is a summary of the state of the page the first time it is viewed.

- Page header - no nick name in or custom text in quotes.
- Photo capsule - call to action over photo background to customize the photo
- My News capsule - "Welcome to myteam.com" news item at top of list of general news as seen on myteam.com home page.
- Followed in left column by non-targeted content capsules.
- My Teams capsule - "Bring Your Team Online" call to action
- My Messages - New: 1 message, Old: 0 (welcome to myteam email message)
- My Schedule - call to action "click to input your schedule"
- My Favorites - call to action to customize (over default entries displayed beneath.)
- Content capsule- a generic fitness tip with call to action "Click here (to My Profile) to update your profile with your sports interests so that we can make these capsules sport-specific for you"

Other content capsules may populated the bottom of the two columns. They will be non-targeted content and will not have a call to action.

Team Home - Spec

The Team Home is available as soon as it has been created by the league admin when generating the league structure or if a league structure is pre-populated by myteam.com. The Getting Started capsule and the Team Info capsule encourage the pages to be customized and populated so that there is relevant content for team members and fans to view. There is no provision for a Team Home page to be deactivated.

Deltas to Page Mock-up

- Team Info capsule is added under Team Photo capsule and above Team News capsule.
- Getting Started capsule is added at the top of the right column, above the league logo and link.
- Navigation sidebar is not final. See Navigation Sidebar table for exact order.

First Time Experience

- Photo capsule - call to action over photo background to customize the photo
- Team Info capsule - displays existing name and contact information and a default greeting
- Team News capsule - "Welcome to myteam.com" news item at top of list and a generic team sport story
- "Getting Started" capsule - at the top of the right column, describes how to get the Team Home page set up
- League icon - displays a generic league graphic (unless Little League)
- Team Schedule - call to action "click to input your schedule"
- Team Scoreboard - call to action to input scores

Team Info capsules

This capsule displays basic identity and contact information and a default (but editable) welcome message. This capsule appears below the Photo capsule and above the News capsule. The welcome message can be a maximum of 2000 characters and the capsule will stretch to accommodate all of the text.

APPENDIX 6 -- MY FAVORITES

CONFIDENTIAL

My Favorites

Product Functional Specification

for December, 1999 release

Document Version 3.01
11.16.99

Note:

Individual pages in this document are given letter and date *revisions*, while the document as a whole is given number and date *releases*. This is because individual pages may undergo several *revisions* between each *release* of the whole document.

My Favorites Overview

The experience of using My Favorites starts with the My Favorites capsule. This capsule displays on the My Home page up to 5 pairs of user favorites. Each pair consists of a My Favorite "thing" on the left side, and a My Favorite "pick" on the right side.

Clicking on the capsule goes to the My Favorites page which shows those 5 favorites plus 5 additional for a total of 10.

First Time View

The first 5 favorite "things" are pre-populated with "Web site, Sport, Team, Player, and Number" to encourage the user to personalize the content. Only the "Web site" pick gets an initial value "myteam.com". To edit the content, click on the capsule to go to the My Favorites page. The page administrator can see the Edit button which links to Edit My Favorites which is an editable version of the 10 value pairs.

Team / League Finder

Product Functional Specification

for December, 1999 release

Document Version 3.04
11.17.99

Note:

Individual pages in this document are given letter and date *revisions*, while the document as a whole is given number and date *releases*. This is because individual pages may undergo several *revisions* between each *release* of the whole document.

The Team / League Finder

The teams and leagues that the user has bookmarked or has been granted access to are displayed in the My Teams & Leagues capsule on the top of their My Home page. Clicking on their names will take the user directly to their respective home pages.

In contrast, the Team / League Finder is a general tool that enables all users to browse through lists of leagues and teams to find their Team and League Home pages on myteam.com.

Adding Leagues and Teams

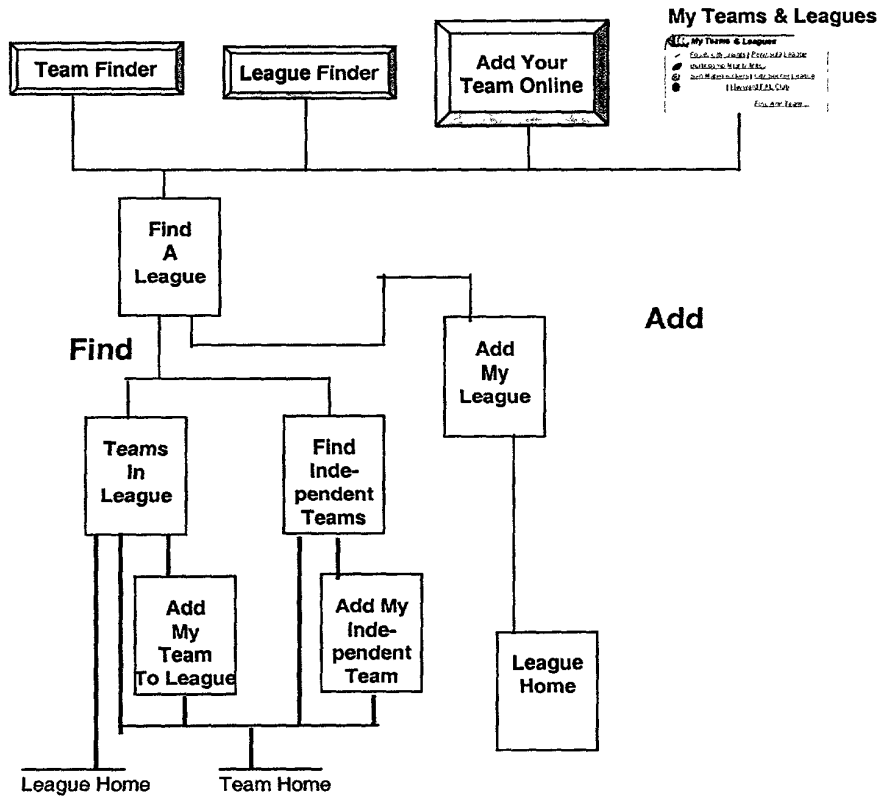

If the team that a member is looking for cannot be found, then the myteam.com members can add this team online. A team can be independent and not linked to any parent organization. If it is part of a parent organization, they can choose to affiliate with that organization

By Default Team and League Admin

The myteam member who first adds a team and league online is by default the administrator for those. Their name and email in their My Profile will be displayed in the Team Info and League Info capsules on the respective home pages. To enable contact, all members who add teams and leagues must have an external email address in their My Profile.

My Teams capsule

The My Teams & Leagues capsule is displayed on the My Home page. It lists the top 9 teams and leagues you are a Participant in or an Invited Guest of. Clicking on the team or league name will go to its home page. You must be added to the team or league roster by the respective admin, have accepted an invitation from them for the team or league or have bookmarked the team or league to show up in this capsule.

The sort order of the teams in the capsule are:

- 1st sort is by security level
- 2nd sort is by

Example: League Admin, Team Admin, Team Participant, Team Visitor

Display

The entity name is displayed in the capsule. If it does not fit on one line characters should be clipped from the end of the string to make it fit on one line.

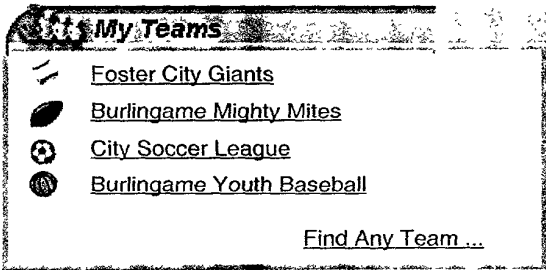

Security Access

The My Teams capsule is viewable by anyone with at least read access to the My Home page it is on.

My league is listed above! <Just click on your league's name to select it>

Find A League - Spec

Displays leagues that are part of the myteam.com family. Leagues shown in list is based on the session org id. If the session org id equals myt the list includes all leagues except pony, dixie and nabf. For all other org id's the list only includes leagues in that organization. Optionally one or more org id's can be passed in the url. This option will take precedent over the session org id and all leagues that match the org id's passed will be shown in the list.

The initial population of the page is the first N (determined by page break routine) leagues state. The state default is based on the Postal Code in the My Profile. If the user does not have a postal code or the postal code is not recognized the system defaults to country = United States and state = choose

Table columns

League Name = entity name

Org = root organization name that the league is a member of. If the root organization name is myteam the org column should be left blank.

City = city that is stored as part of league address

contact = first name plus last name of the primary contact stored with the league

Table Sort

The League Table is sorted alphabetically on League Names

Add My Team to a League - Spec

This page adds a team to the current league that is already online on myteam.com. This team cannot be linked in as an official team in a parent organization since it was not created by the league administrator. The person adding this team will assume the role of team admin and their name and email will be displayed on the Team Home page in the Team Info capsule.

The current user will become the team administrator of the new team by default

Security Access

Product Functional Specification

for December, 1999 release

Document Version 1.03
11.17.99

Note:

Individual pages in this document are given letter and date *revisions*, while the document as a whole is given number and date *releases*. This is because individual pages may undergo several *revisions* between each *release* of the whole document.

Document History

1.03 (11.17.99)

Updated to reflect new decisions on nav sidebar items for the About myteam.com section.

1.02 (11.16.99)

Fixed a couple omissions on the default nav sidebar items at the bottom.

1.01 (11.15.99)

Incorporated decisions on News & Events and About myteam.com sidebar items

1.0

First version, complete only for those content areas in which decisions have been made.

Navigation Guidelines

Providing navigational context to the user is important to let them know where they are in the site. The primary indicator of context is achieved by the highlighting of the top 2 levels of site hierarchy - the section tab and the navigation sidebar item.

Tabs

The tabs at the top of the page are the primary indicator of context to the user. Only one tab can be highlighted at a time. The respective tab is highlighted if the user is either in a My Home page or in one of the five main content sections. If the user is in a About myteam.com page or on a Team Home or League Home page, no tabs are highlighted.

Navigation Sidebar

The navigation sidebar is unique to each home page or content section and each section is accessible from a tab across the top of the page (with the exception of a Team Home or a League Home page. For all pages in within a content section, the navigation sidebar remains the same, except for highlights. Highlights should be placed on the sidebar item to give site context to the user.

Highlighting

The navigation sidebar can display one, and only one highlighted item. The item highlighted is either the name of the current page or its closest parent. If all of the sidebar items are children to the current page, no side bar item is highlighted. If the both the parent and the grand-parent items of the current page are displayed on the sidebar, only the parent item is highlighted.

For example, if you are on the My Home page, no sidebar item is highlighted, but the My Home tab is. If in the Sports Central section, on a baseball skill page, then the Baseball item on the navigation sidebar is highlighted as well as the Sports Central tab.

My Messages & My Schedule Buttons

For all members, the My Messages & My Schedule buttons will always be at the top of the navigation sidebar, no matter what page they are on. When either of those buttons is clicked on, the navigation sidebar will change to be that of the My Home page since they are being taken to a page linked from the My Home page.

About myteam.com

When clicking on any of the About myteam.com links, the navigation sidebar will change to display all of the links in the About myteam.com section. No tab will be highlighted.

More Navigation

Parent Navigation

Parent navigation will only be necessary for deep instructional content in the Sports Central section of the site. The parent navigation starts with the first level of the parent hierarchy that is not highlighted on the navigation sidebar. For example, .

Skills & Drills > Hitting > Batting Tee Drills

skips the Sports Central > Instruction > Baseball part of the parent hierarchy because they are already represented on the tabs and navigation side bar.

Peer Navigation

Peer navigation will only be necessary in content pages that require the ability to switch between different pages that are on the same level, and that do not have summary pages that list all of the page's peers. The only pages identified at this time with that need are the pages with individual backyard games and individual skills and drills. The peer navigation will function as currently (intended) on the YSN site for BackYard Games and Instruction.

Default Nav Sidebar Items

visitor

member

Members Enter Here

My Messages My Schedule

Main body of navigation sidebar is based upon the section of the site the visitor or member is in. See the following pages for sidebar elements for the content areas. See the My Team League Home spec for the sidebar elements for the home pages and the pages that sit behind them.

APPENDIX 9 -- MESSAGE CENTER

Case 1:25-cv-01124 Document 1-1 Filed 07/15/25 Page 1 of 1

Message Center Design Specification

November 11, 1999

Introduction

The message center is the user's nerve center for communications within myteam.com and to the outside world. The vision of the area combines all kinds of messaging capabilities, including internal team messaging, external email, "message blasting" and instant messaging. Also included are access and management of communications "groups."

This specification, however, defines the message center in the shorter timeframe, which has significantly fewer features. The basic "features" available in the Baseball 2000 release of the Message Center are:

- Send/receive of messages between myteam members.
- System function to automatically place "league related" messages into league-specific folders.
- Ability to send messages via email to the rest of the Internet.
- Access to certain groups to send a single message (either normal messages or urgent messages) to a group of individuals.

Integrating with External Provider

All integration with an external message provider has the following requirements and preferences:

Requirements:

- If externally hosted, the external provider must allow myteam.com to frame the message list, reading and composition interfaces. Framing is necessary because of the dynamic nature of our product's sidebar.
- Unified registration and login must be available.

Preferences:

- An immediate path (or upgrade path) exists to allow myteam.com to host the user interface in the future. This would require an API that provides access to all mail information: lists of messages, attachments, etc.
- All synchronization and API communications operate through a standard interchange format such as XML via http or ftp.

Decisions for Baseball 2000 Release:

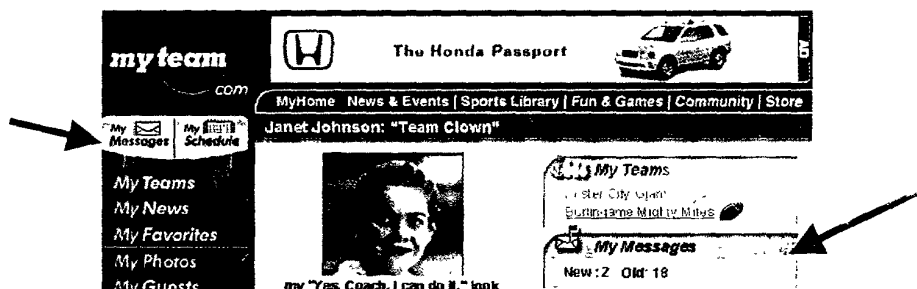

- We will **not** use an external email provider for basic internal messaging. We will implement basic messaging using records in the database. We will evaluate **Chek.com** or another provider for the next release.
- We will use **MessageBlaster**, however, we will communicate all messages via their API so framing, external hosting of templates and sharing of user data will not be

necessary.

Accessing the Message Center

There are two ways to open a user's message center:

- Click the "My Messages" icon above the sidebar from anywhere else in the site, or
- Click the "My Messages" capsule from the member's home page.

Either of these actions opens the Message Center's Inbox screen.

Message Center Inbox

The inbox screen shows a list of all messages that the user (or the system) has not placed into another message center folder. The information is displayed in a table. The table has the following columns:

- **From:** Displays the name of the message sender.
- **Date:** Displays the date/time of the message.
- **Subject:** Displays the subject of the message (underlined as a link to read)
- **Delete:** Displays a checkbox next to each message (see "Delete on or more messages" below).

Inbox				
New	From	Date	Subject	
!	Paul Anderson	05.22.99	Vacation	☐
!	Blaine Buck	05.23.99	Sore Arm	☐
	Bob Sweeney	05.21.99	Grimmerster	☐
	Johnnie Buck	05.20.99	Lost Hat	☐
	Phil Perry	05.20.99	Fielding Drill	☐
Delete Checked Messages				

In addition to listing all available messages in a table, the screen provides access to:

- **Read a Message** – click on the subject of a message to read the message.
- **Delete one or more messages** – check the checkboxes in the "delete" column, and click "Delete Checked" to delete messages.
- **Compose a Message** – click the "Compose" button to start a new message.
- **View another folder** – click on the folder name to view the contents of that folder.

Message Center Folder

If the user selects another folder from the Inbox, then the user sees that folder's contents. Except for the labeling of the page with the folder name (and the actual contents of the folder), the interface is identical to the Inbox in terms of both the columns and the available controls.

Read a Message

Message	
To: Martin Smith (msmith@myteam.com)	Subject: Grillmeister
From: Bob Sweeney (bsweeney@aol.com)	Date: 05.21.99
Martin,	
Thanks for hosting the Team BBQ last week. Next time you should inform the Fire Dept. in advance. Just kidding.	
Bob	
Reply	Reply All Forward Delete Previous Next

Clicking the subject of the message displays the message full screen. The message displays the following information, none of it editable. It is fine for this screen to scroll if the length of the message dictates it.

- **From:** Sender's name
- **Date:** Display both date and time on one line
- **Subject:** Subject of the message
- **Body of message** – appears unlabeled right onto the page.

Actions available on this page include:

- **Delete** – removes this message (after confirmation)
- **Reply** – links to compose UI (see below) with the To: field automatically filled in with the sender's email address and the content of the original message already in the body.
- **Compose a Message** – click the "Compose" button to start a new message.
- **View another folder** – click on the folder name to view the contents of that folder.

Compose a Message

This screen can be reached by clicking Compose or Reply from any other screen in the message center.

It permits the entry of the following fields.

- **To:** allow user to enter one or more myteam.com user ids, separated by commas
- **Subject:** allow user to enter a text subject up to 256 characters
- **Body:** allow user to enter a simple text message (no rich text or HTML).

Actions and options available include:

- **Select Recipients** – links to the "Select Recipients" page that allows the user to choose from a list of closely associated members and groups.

- **Send** – causes the message to be sent. Links back to the page from which the Compose screen was initiated.
- **Cancel** – After confirmation, links back to the page from which the Compose screen was initiated, abandoning all edits.
- **Urgent** – a checkbox that permits users to mark the outgoing message as urgent. If checked, the when the user clicks Send, the message is sent via “MessageBlaster” instead of through normal message processing. This will cause the “MessageBlaster Send Options” screen to be displayed. (see *MessageBlaster Issues* below).

Select Recipients

This screen permits the user to choose who should receive their message from a set list of “known” user ids. The screen displays:

- An “organization” selector. This lists all “organizations” with which a user is connected in a single drop-down menu. The menu contains:
 - **Personal** – Access to friends found through home page relationships
 - **Teams** – one entry exists for each team to which the user has a security relationship of Participant¹ or Admin.
 - **Leagues** – one entry exists for each league to which the user has a security relationship of Participant or Admin.

Note that changing organizations by choosing a new one from the menu implicitly “accepts” the current state of all checked and unchecked member and group ids—unless Cancel is later chosen.

- The list of members and groups available for the currently selected organization. Each member has a checkbox next to it to select the recipient for inclusion. If the recipient was already listed in the field being edited, then that checkbox is already checked. It is fine for this page to scroll if the list gets large.

Details on the lists of individuals and groups available can be found in the table below.

Actions available on this page include:

- **Add to TO field** – confirms the selection of the selected recipients.
- **Cancel** – leave without accepting any of the selections made, returning to the compose screen with the recipient field being edited unchanged.

¹ Participant level access is currently being called “Player” level access in the database. In this case, the label in the database is “wrong.” It should be labeled “Participant” in the enum of access levels. The spec uses the proper term “participant.”

The following table details exactly which groups and individuals should be displayed based on the user's choice in the "organization" selector. A group listed in the "individuals listed" column indicates that the various group members should be expanded and listed separately.

Menu Selection	Security Relationship of User to Team / League	Groups Listed	Individuals Listed
Personal	-	My Friends	My Friends
Team	Participant	Team Players Team Coaches	Team Players Team Coaches
	Admin	Team Players Team Parents Team Coaches Team Volunteers Entire Team	Team Players Team Volunteers
League League	Participant	League Officers	League Officers
	Admin	League Players League Parents League Coaches League Volunteers League Officers Entire League	League Coaches League Volunteers League Officers

The following table lists the details of how each group specified in the table above is constructed.

Group Name	Group Members	Tables Involved
My Friends	All users with "invited guest" level access (or more) to the user's home page.	Security
Team Players	All members of the team listed in the roster as players.	ROSTER
Team Parents	March Release. All individuals with a contact association type of "parent" in relation to an <i>individual</i> that is listed in the team roster. (i.e. – parents of players)	ROSTER and CONTACT_ASSOC
Team Coaches	All members of the team with a contact association type of "coach" in relation to the team.	CONTACT_ASSOC
Team Volunteers	All members of the team with a contact association type of "Coach" or "Volunteer".	CONTACT_ASSOC
Team Fans	All team fans—individuals with a security level access of "invited guest" in relation to the team.	Security
Entire Team	The union of <i>some of the previously</i> defined team groups: Team Players, Team Volunteers and Team Parents.	ROSTER and CONTACT_ASSOC
League Officers	All members of the league with a contact association type of "officer."	CONTACT_ASSOC
League Coaches	All members of the league that are also listed as members of a team where the contact association type with the <i>team</i> is "coach."	CONTACT_ASSOC (doubled up)
League Players	All members of the league with a contact association type of "player."	CONTACT_ASSOC
League Volunteers	All members of the league with a contact association type of "volunteer."	CONTACT_ASSOC
League Parents	March Release. All individuals with a contact association type of "parent" in relation to any individual in the league that has a contact association type of "player."	CONTACT_ASSOC (doubled up)
League Fans	All league fans—individuals with a security level access of "invited guest" in relation to the team.	Security
Entire League	The union of <i>some of the previously</i> defined team groups: Team Players, Team Volunteers and Team Parents.	CONTACT_ASSOC

MessageBlaster Send Options

Details TBD. Configure any options required to send a message blaster message. Confirm price if applicable. Ideally, the coach would not select "how" a user is notified of an urgent message—rather the desired media would be selected by the user

League Sponsor - Spec

- **Description**

Provide a page on which each local league sponsor has an opportunity to be recognized. This includes a graphic, a short description and a link to the sponsor's own web page (if any).

All sponsors are displayed together on the page. This feature now only allows league visitors to see the sponsors, but also allows league administrators to easily build this page.

Displays each sponsor as a capsule - all sponsors organized evenly in two columns. If an uneven number of sponsors, place one more capsule in left column than in right. Ordering of capsules based on order of entry by authorized administrator.

- **Viewable**

Public

- **Capsule Contents**

the sponsor's name

- hyper linked to
- (for all but admin) sponsor's site--if any
- (for admin) Sponsor Detail page

- **"Delete" hyperlink**
 - Deletes this Sponsor from the League Sponsor page and returns the admin to the League Sponsor page with this sponsor's capsule removed.

APPENDIX 11 -- SCHEDULE & LOCATIONS

5/1/24

CONFIDENTIAL

Schedule & Locations

Product Functional Specification

for December, 1999 release

Document Version 3.01
11.16.99

Note:

Individual pages in this document are given letter and date *revisions*, while the document as a whole is given number and date *releases*. This is because individual pages may undergo several *revisions* between each *release* of the whole document.

Document History

Version 3.01 (11.16.99)

Only functional change was to add the Multi-Practice Scheduler which was already planned for inclusion.

Revised security tables to match what is implemented in DCC.

Fixed three errors in the Page Access/Links/Actions tables for League and Team schedules.

Version 3 (11.08.99)

First unified spec of all schedule functionality gathered from My Home, Team Home and League Home specs.

Schedules

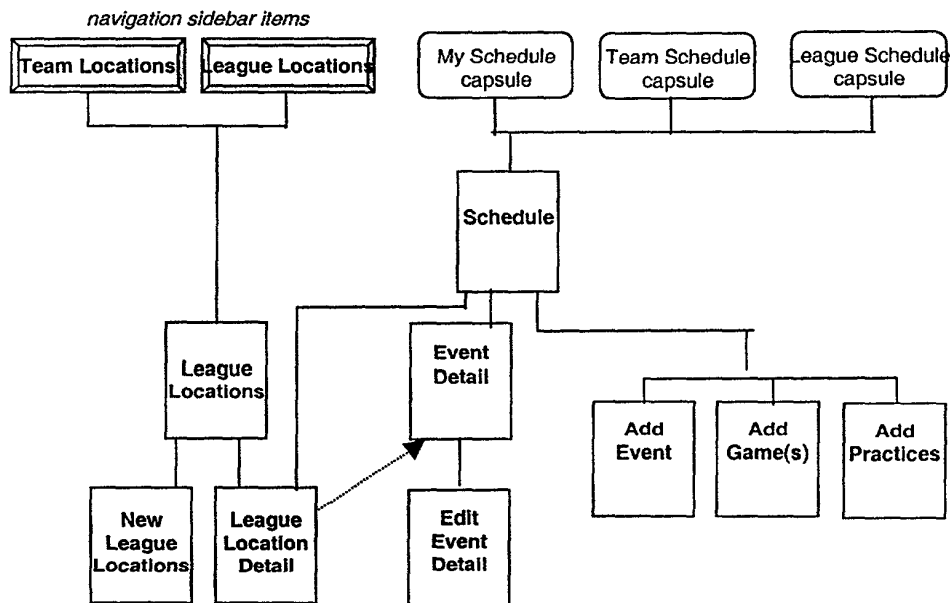

The Schedule functionality consists of capsules and their destination pages. A Schedule capsule is a summary of the upcoming events listed in the linked Schedule page. The Schedule capsule and destination page come in 3 varieties - one each for the personal My Home, Team Home and League Home pages. See the pages for My Schedule, Team Schedule and League Schedule for details of the different instances of the Schedule capsule and pages.

Viewing Events on Schedules

Some sharing of data between schedule occurs. A personal My Schedule will display a cumulation of all personal and all team schedules that they are a Participant on. The League Schedule includes all upcoming games for all teams in all divisions in addition to league events. Personal events do not show up on either the Team or League schedule. An Anonymous Visitor only sees games scheduled on the Team Schedule, but not practices or other team events. (1) An Anonymous Visitor on the League Home can see League events but cannot click-through to see the Event Detail page for League events.

Links/ Actions	My Schedule	Team Schedule (for Anonymous Visitors)	Team Schedule (for Participants)	League Schedule (for AV)	League Schedule (for Participants)
Personal events	X	-	-	-	-
Team games	X	X	X	X	X
Team practices	X	-	X	-	-
Team events	X	-	X		
League events	-	-	-	X 1	X

Site Flow Map

Schedule Page

The Schedule page is the main overview of events in the Schedule. The exact contents and actions vary widely depending on whether it is a personal My Schedule, Team Schedule or League Schedule that is being viewed.

Security Access

The user's access relationship to the page also greatly determines what they see. See the My Schedule, Team Schedule and League Schedule spec pages for access control specifics in relation to the Schedule page and the Schedule capsule.

Month Drop-down

Initial value is the current month. Population is the previous 3 months, the current month, and 11 subsequent months. Each value is formatted to be the full month name followed by a 4 digit year. For example, "September 1999"

League Schedule

Schedule Capsules

Security Access

The user's access relationship to the capsule greatly determines what they see. See the My Schedule, Team Schedule and League Schedule spec pages for access control specifics in relation to the Schedule capsule and the Schedule page.

Table

Displays all events for the month selected in the "Month" drop-down
Sorted by: date, time

Table Columns	Type	Format	Sample	Initial State / Values / Notes
(Day)	Text	ddd	Mon	Displays current value.
Date	Date	mm/dd	9/7	Displays current value.
Time	Time	hh:mmpm	5:00pm	Displays current value.
Event	Text	-	-	Value as entered in Event Detail page
Location	Text	-	-	Value as entered in League Location page
Remove	Check box	-	-	Deselected.

Capsule Columns Data Formats

Column	Formatting	Population	Format example
(Day)	2 letter abbreviation, left justified	Su = Sunday Mo = Monday Tu = Tuesday We = Wednesday Th = Thursday Fr = Friday Sa = Saturday	Mo We Tr Sa Tu
(Date)	Numerical date with "/" dividers. Right justified	mm/dd with first digit removed if a "0"	8/3 8/17 11/7 11/18
(Time)	12 hour time with AM/PM indicators. Right justified	hh:mm	8:15a 10:30p
(Event)	Text. Add " @ " between visiting and home teams for games		Giants @ Braves

My Schedule

Appears only on personal My Home pages. Displays the 8 most current upcoming events, sorted in order of those nearest to the current date at the top and those farthest out at the bottom. The capsule and the linked My Schedule page displays all events for the individual, including games, practices and other events entered by the admin for the team of which they are a team-member of. Also displays any personally entered "other events". If no events are scheduled to display, displays message "No events scheduled"

AAA Division		
	W	L
Pirates	5	1
White Sox	4	2
Giants	3	3
Reds	3	3
Red Sox	2	4
Marlins	1	5

Scoreboard Capsules - Spec

- **Description**

The scoreboard capsules on the Team Home and League home pages provide a summary of the information on their respective scoreboard pages.

- **Team Scoreboard capsule**

Displays the score of a game, with the games date in mm/dd format. The visiting team is on top and the home team is on the bottom. If a game summary has been entered for the game, the first sentence of the summary will be displayed in the bottom half of the capsule.

A spectator of the Team Home page cannot see the "More..." hyperlink in the bottom of the game summary because they do not have access rights to see game summaries. Clicking on the capsule header goes to the Scoreboard page.

Clicking on the "More.." hyperlink goes to the Game Summary page for the specific game displayed in the capsule, if a game summary has been entered.

- **Team Standings capsule**

Displays the standings of the entire league in which the team plays in. The division name is displayed under the capsule header.

Clicking on the capsule header goes to the Scoreboard page.

The order of the teams is based on their winning percentage (games won / games lost), from highest to lowest.

A team name is hyperlinked if a Team Home page exists for that team and will go to that page. The name and record of the team on whose home page this capsule is placed is displayed in bold, but is not hyperlinked since we are already on that page.

- **League Standings capsule**

Functionality is the same as that for the Team Standings capsule, except that the division name is a drop-down menu so that the page on which the capsule resides can be refreshed to show a different division of teams in that league.

Scoreboard (affiliated) - Spec

- **Description**
Displays a summary of game scores, standings and upcoming scheduled games for the current team(s) and division selected.
- **Viewable**
All, except Team and League Spectators do not see "Game Sumamry" hyperlinks.
- **"Team" drop-down**
From the Team Home page, the initial value is the team from whose page this scoreboard was linked.
From the League Home page, the initial value is "- All -"
- **"Division" drop-down**
From the Team Home page, the intial value is the division in which the current team is placed.
From the League Home page, the intial value is "- All -"
- **"10 Most Recent Games"**
Lists the 10 most recent games played in the context of the "Team" and "Division" drop-down menus. On the League Schedule, this would be the 10 most recent games played across all divisions.
Sorted by
 - date (most recent)
 - time game started (most recent)
 - alpha of visiting team
- **Game Score**
Displays visiting team on top, home team on bottom.
- **"Game Summary" hyperlink**
Appears under each Game Score for which a game summary has been entered
- **"Standings" capsule**
Same as "Standings" capsule as described earlier
- **"Schedule" capsule**
Same as "Schedule" capsule described in the Schedule specification, except that only games are listed, no practices or other events.

Sends the data to the server and if submission is successful, returns the user to the page they arrived here from.

If the submission to the server is unsuccessful, an Error Message page is displayed.

Registration & My Profile

Product Functional Specification

for December, 1999 release

Document Version 3.04
11.30.99

Note:

Individual pages in this document are given letter and date *revisions*, while the document as a whole is given number and date *releases*. This is because individual pages may undergo several *revisions* between each *release* of the whole document.

Document History

Version 3.04 (this version)

- Added address fields to My Profile not asked for in Registration
- Cleaned up required fields designations in My Profile.
- Resolve security for changing passwords in My Profile.

Version 3.03 (11.22.99)

- Revised the layout and requirements again for email addresses.

Version 3.02

- Changed the layout and requirements for email addresses.
- Updated to provide for organization-specific registration screens.

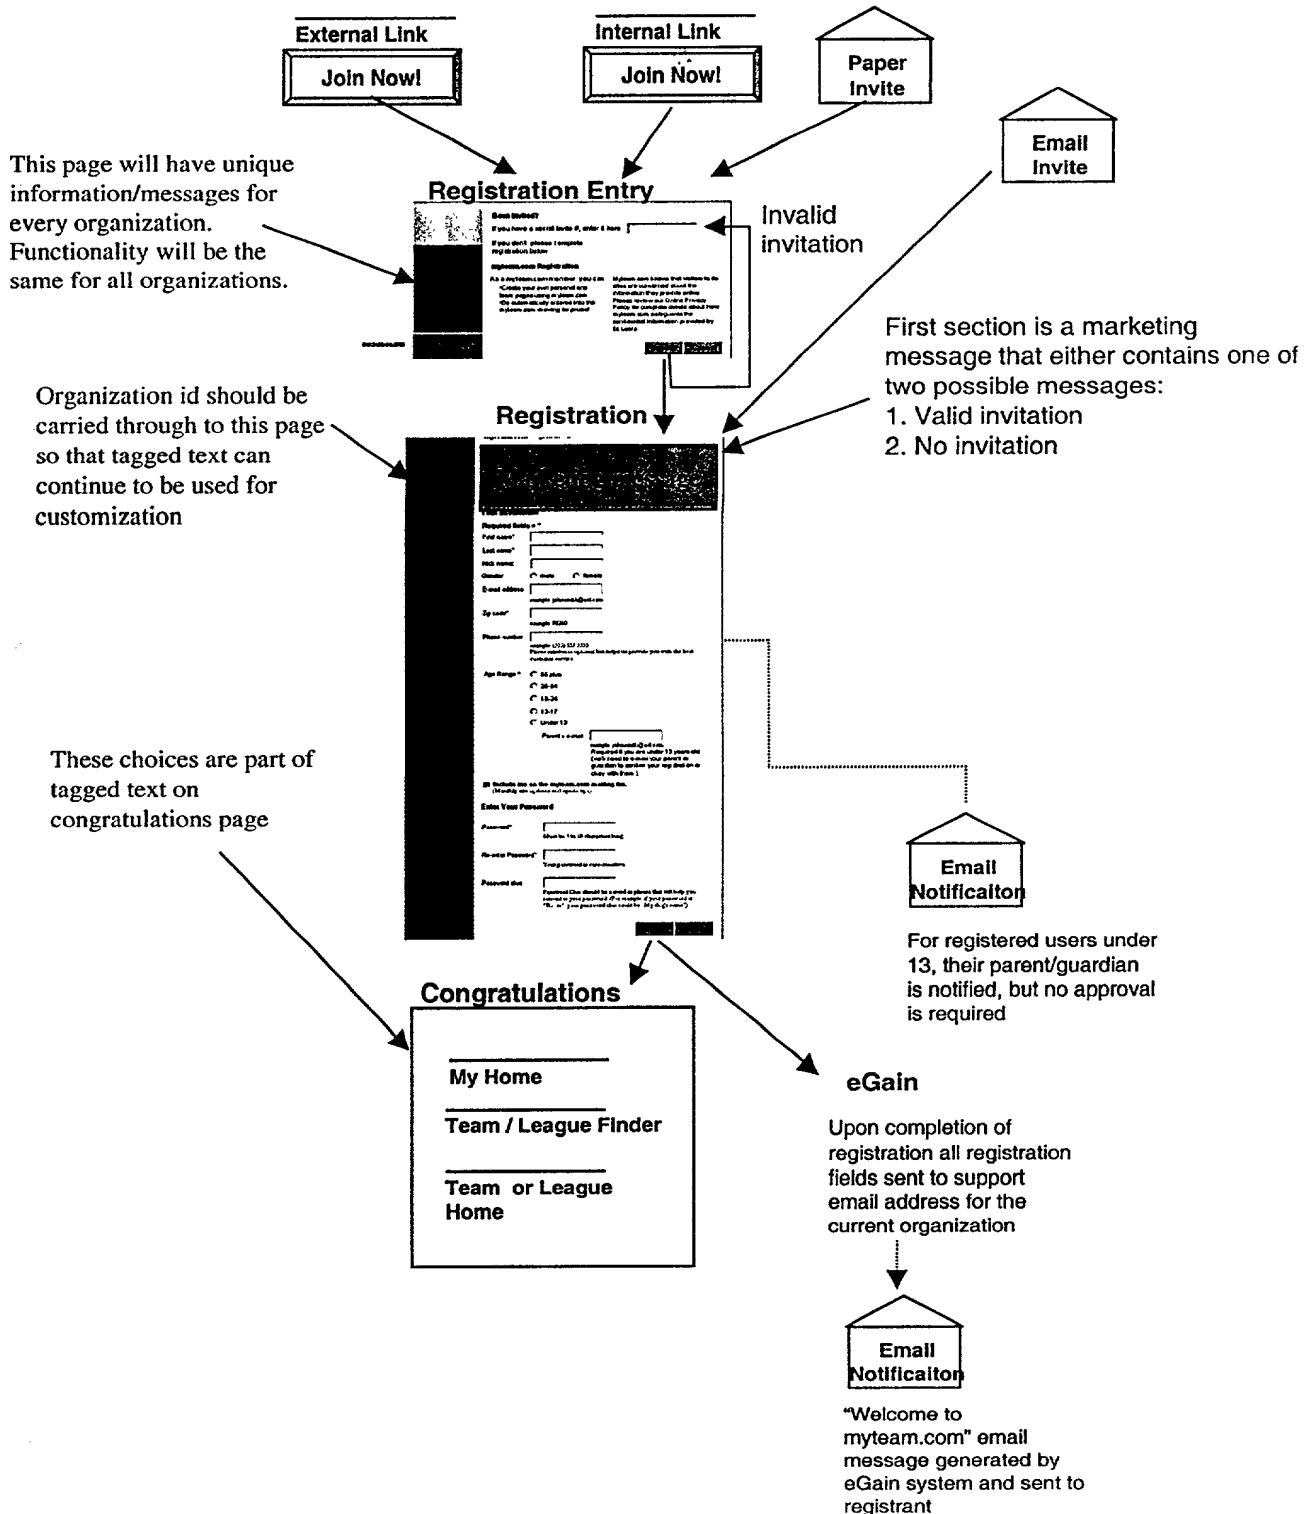

Version 3.01 (11.15.99)

- Fixed some errors in spec.

Version 3 (11.7.99)

- First complete version of spec.

Registration - Site Flow Map

Registration Entry

Uses the normal "not logged in" sidebar and top tabs for myteam, pony, dixie and nabf. The page should maintain an org id based on the domain name that was used to enter the page so that text can be customized by organization

(no ad banner)

If the user inputs an invalid invitation an error page will give them the choice of returning to this page to input the invitation again or continuing to the registration page

Welcome to myteam.com LLB's On-line partner

Been Invited?

If you have received an invitation to this site, you should have a personal invitation number. Please enter it here:

Submit **Cancel**

If not...Join Now!

If you don't have an invitation, just click submit to go to the [registration page](#).

On myteam.com you can:

- Create your own personal and team pages using myteam.com.
- Be automatically entered into the myteam.com drawing for prizes!

Registration - Spec

Two page registration for people to become members of myteam.com. Can be arrived at by either clicking a "Join Now" button or clicking on a URL that was provided in a invitation email.

Registration Entry Page

Entry point that can be customized per organization. Where people who have been given an invitation to join myteam.com enter their invitation. They can enter an invitation and click on the "Submit" button or just click the "Submit" button, in either case they are taken to the Registration page. The registration page will show one of three different messages

Valid invitation message

"Welcome to myteam.com"

Welcomes the user by their first and last name to the myteam.com site and confirms whom they were invited by, when invited and to what home page they were invited to be a fan of. It prompts them to please complete the registration fields below to accept the invitation.

In-valid invitation message

"Sorry, you do not have a valid personal invitation number. Please join myteam.com by filing out the registration information below."

No invitation

general welcome message

Requiring Email Addresses

The email address (that is labeled as such) is a required field and contains the registrant's email address. If the registrant is under 13, this email may contain their parent's email address. Either way, it is the primary email contact for this registrant.

If the Age Range selected is "Under 13", then the parent's email address field is also required. A message is sent to this address informing the parent/guardian that their child has joined myteam.com. Once the message has been generated, the email address in the parent's email address field is disposed of.

Security Access

My Profile - Spec

The My Profile page is linked from the My Profile item in the navigation sidebar for the owner of the My Home page. This page enables the values entered during registration to be updated and filled in.

New Choices Not In Registration

Additionally, some user content preferences can be set in Favorite Sport. Choices are the 6 sports for which we have instructional content to target to the individual.

The personal text on the My Home page header can also be customized after the person's name.

Initial Values

The values entered in registration are the initial values for the My Profile fields unless they have been subsequently updated.

Changing the Password

To change the user's password, the current one must be entered as well as the new one entered twice. If the password fields do not have valid entries, an error message is generated.

Re-directing Pre-4.0 Browsers

Product Functional Specification

for December, 1999 release

Document Version 1.00
12.02.99

Note:

Individual pages in this document are given letter and date *revisions*, while the document as a whole is given number and date *releases*. This is because individual pages may undergo several *revisions* between each *release* of the whole document.

Re-directing Pre-4.0 Browsers

In order to ensure that users will experience the myteam.com site without browser errors, we require that users be running 4.0 browsers or later, with Javascript enabled.

We will test for browser version on the pagestart script for each and every page. If the browser is prior to 4.0 or Javascript is not enabled, the user will be re-directed to a Browser Upgrade Required page. At this time we will not distinguish between browsers prior to 4.0 and those 4.0 or later that do not have Javascript runtime enabled. They will all be re-directed to the same Browser Upgrade Required page.

Browser Upgrade Required - Spec

The Browser Upgrade Required page is a static version of the front page, with the upgrade message clearly displayed in place of the Spotlight story. This static version of the front page has no active links except for those within the upgrade message.

The upgrade message will provide links to the respective web sites to upgrade Netscape, Internet Explorer and America Online. There will also be a link to the Browser Compatibility Help page to get additional help on browser issues such as enabling Javascript runtime on 4.0 browsers or later.

Links & Actions

Links/ Actions	Type	Links / Behavior

Browser Compatibility Help (1st half of page)

Browser Compatibility Help

[Go to myteam.com front page](#)

Much of the functionality on the myteam.com site requires Javascript and other browser features found only on 4.0 browsers and later.

You are probably here because we have determined that your browser is prior to 4.0 and have prevented you from fully experiencing the myteam.com site. We have done this to prevent you from having an unpleasant experience, including script errors.

If your browser is prior to 4.0, please upgrade by clicking on the appropriate link below

[Netscape](#)

[Internet Explorer](#)

[America Online](#)

If you do have a 4.0 browser, please review the material specific to your browser to determine what may be preventing you from entering the site.

America Online

To determine the version of Internet Explorer that is part of AOL, from within the AOL application, type "browser" in the keyword field. It will respond with the version of the AOL application and the browser that you are running.

Internet Explorer

To determine the version of IE you have, select About IE from the Help menu.....

To enable Javascript.....

Netscape

If you have Netscape Navigator 4.0 or later and received the error message, you may need to enable Javascript. To enable Javascript, do the following:

1. Select Preferences... from the Edit menu
2. On the left side of the Preferences dialog, select the "Advanced" category.
3. Make sure the "Enable Javascript" checkbox is enabled. If not, click on it to place a check box in it.
4. Click OK button to apply any changes

Browser Compatibility Help (2nd half of page)

Getting More Help

Submit this form if you are having problems with browser compatibility and the above information has not solved your problems

* denotes required items

1. If you know your User ID enter it here.

*2 Enter your email address here

*3 Please give a detailed description of the problem you experienced listing the steps you went through

You may also contact our customer support department during the hours of 8am to 8pm PST at (650) 524-4590.

You may also contact our customer support department during the hours of 8am to 8pm PST at (650) 524-4590.

Browser Compatibility Help - Spec

The Browser Compatibility Help page contains help to facilitate users to find out more information about why their browser has been detected as not compatible with the myteam.com site.

In addition to links to upgrade browsers, including the AOL application, information is provided to solve problems with browsers that users believe are compatible. This would include checking browser versions, and enabling Javascript.

At the bottom of the page is the ability for a user to send an email to myteam.com describing the problems they are having. A phone number for technical support is also displayed.

Links & Actions

Links/ Actions	Type	Links / Behavior
Netscape	Link	Opens http://home.netscape.com/download/ in the current browser window.
Internet Explorer	Link	Opens http://www.microsoft.com/windows/ie/ in the current browser window
America Online	Link	Opens http://www.aol.com/ in the current browser window
Go to myteam.com front page	Link	Goes to www.myteam.com in the current browser window.
Submit	Button	Do field validation for required fields and input values. Returns to the log-in page from which the user came if valid, or display error message with problems.
Cancel	Button	Returns to the log-in page without submitting entries. Clears the contents of the fields.
Tab	Key	Pressing "Tab" key on keyboard will step the cursor between the fields. When tabbed to, all of the contents of the destination field are highlighted for type-over.
