v.

TELCOM VENTURES LLC,
Patent Owner

Inter Partes Review Case No. IPR2025-01232
U.S. Patent No. 9,462,411

**MOTION TO DISMISS
PETITION FOR *INTER PARTES* REVIEW**

I. INTRODUCTION

Pursuant to 37 C.F.R. §§ 42.71(a) and 42.72 and the Board’s authorization by email dated November 20, 2025, Petitioner Apple Inc. (“Petitioner”) moves to withdraw its Petition for *Inter Partes* Review (“IPR”) concerning U.S. Patent No. 9,462,411 (“the ’411 Patent”) and thereby dismiss IPR2025-01232 pre-institution. Good cause exists to dismiss this Petition for IPR, including that it will preserve the resources of the Board and the Parties.

II. STATEMENT OF FACTS

On October 4, 2024, Telcom Ventures LLC asserted the ’411 Patent against Petitioner in an action entitled *Telcom Ventures LLC v. Apple Inc.*, No. 1:24-cv-23837-JEM (S.D. FL. October 4, 2024). That case was transferred to the Northern District of California on June 13, 2025, as *Telcom Ventures LLC v. Apple Inc.*, No. 5:25-cv-05041-RFL (N.D. Cal. June 13, 2025) (the “Litigation”). Petitioner subsequently filed the instant Petition for IPR challenging Claims 1-4 of the ’411 Patent, which was accorded a filing date of August 5, 2025. *Apple Inc. v. Telcom Ventures LLC*, IPR2025-01232, Paper 3 (PTAB Aug. 6, 2025). The Board has not rendered a decision on institution.

On September 23, 2025, Patent Owner dismissed the '411 Patent (and three related patents) with prejudice from the parallel litigation. Four related patents remain asserted in the Litigation.

Petitioner has also filed motions to dismiss the following three Petitions for IPR: *Inter Partes* Review Nos. IPR2025-01233 for U.S. Patent No. 9,832,708, IPR2025-01236 for U.S. Patent No. 11,770,756, and IPR2025-01239 for U.S. Patent No. 12,028,793. These patents were also originally asserted in the Litigation but have since been dismissed with prejudice from the Litigation.

The following four Petitions for IPR challenge patents that have not been dismissed from the Litigation: *Inter Partes* Review Nos. IPR2025-01234 for U.S. Patent No. 10,219,199, IPR2025-01235 for U.S. Patent No. 10,674,432, and IPR2025-01237 for U.S. Patent No. 11,924,743, and IPR2025-01238 for U.S. Patent No. 11,937,172. Petitioner is *not* moving to dismiss these Petitions challenging patents that remain asserted in the Litigation.

III. ARGUMENT

Good cause exists to grant Petitioner's Motion pursuant to 37 C.F.R. §§ 42.71(a) and 42.72. IPR2025-01232 remains at the early procedural stage as the Board has not reached a decision on institution. Granting the instant motion preserves the resources of the Board and the Parties, allowing those resources to be applied to the four Petitions for IPR challenging patents that remain asserted in the

Litigation.

IV. CONCLUSION

For at least these reasons, Petitioners respectfully request that the Board grant this Motion to Dismiss the above-captioned IPR proceeding.

Respectfully submitted,

BY: /s/ Paul R. Hart
