RE: ImberaTek Patent Portfolio

Dear Mr. Tseng:

ImberaTek LLC (“ImberaTek”) is the owner of a semiconductor packaging patent portfolio focused on embedded electronics. The intellectual property was developed by Imbera Electronics Oy, a pioneering Finnish company which started to develop embedded electronics packaging technology and manufacturing solutions decades ago. The portfolio includes more than 175 worldwide issued patents and applications and has generated millions of dollars in licensing revenue from multiple licensees.

Based upon our knowledge of the industry, ImberaTek believes that your company is likely utilizing and causing its customers and users to utilize the following U.S. patents: U.S. Patent No. 8,034,658, U.S. Patent No. 8,351, 214, U.S. Patent No. 7,294,529, U.S. Patent No. 7,732,909, U.S. Patent No. 7,989,944, and U.S. Patent No. 8,368,201. As such, your company should explore taking a license from ImberaTek to cover both its past and future utilization of these patents.

An exemplary listing of our patents is set forth in Exhibit A. While the exhibit only includes U.S. patents, the portfolio also includes numerous foreign counterpart patents and pending U.S. and foreign patent applications. In addition to the patents specifically identified above, ImberaTek expects that you may currently be using, or will in the future be using, additional patented inventions from this portfolio.

We are pleased to inform you that ImberaTek is willing to immediately negotiate a license under its patent portfolio. To that end, we would like to explore an amicable business resolution at your earliest convenience. We respectfully request that you acknowledge receipt of this letter via email (nkee@imberatek.com) - and let us know how you would like to proceed.

Thank you for your consideration.

Sincerely,

A handwritten signature in blue ink, appearing to read "Nelson M. Kee". The signature is fluid and cursive, with the first name "Nelson" being the most prominent.

Nelson M. Kee, Esq.
General Counsel
