

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198                                                                                                      | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>[1.pre] A digital image recording and reproducing apparatus connectable to a display module, said apparatus comprising:</p> | <p>Each of the Accused Samsung '198 Products<sup>1</sup> is a digital image recording and reproducing apparatus connectable to a display module. <i>See</i> User Guide and Technical Specifications of each of the Accused Samsung '198 Products available at Samsung's website showing that each device is a digital image recording and reproducing apparatus connectable to a display module.</p> <p>For example, each of the Accused Samsung '198 Products is a digital image recording and reproducing apparatus connectable to a display module. The device is configured to record digital images, for example, by taking photos and videos with its integrated cameras. The device is also configured to reproduce digital images, for example, by displaying photos and videos based on connection of the camera and processor with its own display and/or with an external display via mirroring or casting (e.g., Smart View). The apparatus's functions for recording and reproducing images are utilized when running the Gallery, Netflix, or Samsung TV Plus applications.</p> <p><b><u>Galaxy S25</u></b></p> |

<sup>1</sup> The Accused Samsung '198 Products include the Galaxy A Quantum, Galaxy A03s, Galaxy A04s, Galaxy A10s, Galaxy A11, Galaxy A12, Galaxy A12s (aka Nacho), Galaxy A13, Galaxy A13 5G, Galaxy A14, Galaxy A14 5G, Galaxy A20, Galaxy A20e, Galaxy A20s, Galaxy A21, Galaxy A21s, Galaxy A22, Galaxy A22s 5G, Galaxy A23, Galaxy A23 5G, Galaxy A24 4G, Galaxy A30, Galaxy A30s, Galaxy A32, Galaxy A32 5G, Galaxy A33 5G, Galaxy A34, Galaxy A36 5G, Galaxy A40, Galaxy A42 5G, Galaxy A50, Galaxy A50s, Galaxy A51, Galaxy A51 5G, Galaxy A51 5G UW, Galaxy A52, Galaxy A52 5G, Galaxy A53 5G, Galaxy A54 5G, Galaxy A60, Galaxy A70, Galaxy A70s, Galaxy A71, Galaxy A71 5G, Galaxy A71 5G UW, Galaxy A72, Galaxy A73 5G, Galaxy A8, Galaxy A8+, Galaxy A80, Galaxy A90 5G, Galaxy Fold, Galaxy Fold 5G, Galaxy Note10, Galaxy Note10 5G, Galaxy Note10 Lite, Galaxy Note10+, Galaxy Note10+ 5G, Galaxy Note20, Galaxy Note20 5G, Galaxy Note20 Ultra, Galaxy Note20 Ultra 5G, Galaxy Note9, Galaxy S10, Galaxy S10 5G, Galaxy S10 Lite, Galaxy S10+, Galaxy S10e, Galaxy S20, Galaxy S20 5G, Galaxy S205G UW, Galaxy S20 FE, Galaxy S20 FE 5G, Galaxy S20 Ultra, Galaxy S20 Ultra 5G, Galaxy S20+, Galaxy S20+ 5G, Galaxy S21 5G, Galaxy S21 FE 5G, Galaxy S21 Ultra 5G, Galaxy S21+ 5G, Galaxy S22 5G, Galaxy S22 Ultra 5G, Galaxy S22+ 5G, Galaxy S23, Galaxy S23 FE, Galaxy S23 Ultra, Galaxy S23+, Galaxy S24, Galaxy S24+, Galaxy S24 Ultra, Galaxy S25, Galaxy S25+, Galaxy S25 Ultra, Galaxy S9, Galaxy S9+, Galaxy Xcover FieldPro, Galaxy Xcover Pro, Galaxy Xcover6 Pro, Galaxy Z Flip, Galaxy Z Flip 5G, Galaxy Z Flip3 5G, Galaxy Z Flip4, Galaxy Z Flip5, Galaxy Z Flip6, Galaxy Z Fold2 5G, Galaxy Z Fold3 5G, Galaxy Z Fold4, Galaxy Z Fold5, Galaxy Z Fold6, Galaxy A15 5G, Galaxy A25 5G, Galaxy A35 5G, Galaxy Z Fold7, Galaxy Z Flip7, Galaxy Z Flip7 FE, Galaxy Tab Active Pro, Galaxy Tab Active3, Galaxy Tab Active4 Pro, Galaxy Tab S5e, Galaxy Tab S6, Galaxy Tab S6 5G, Galaxy Tab S7, Galaxy Tab S7+, Galaxy Tab S8, Galaxy Tab S8 Ultra, Galaxy Tab S8+, Galaxy Tab S9, Galaxy Tab S9 FE, Galaxy Tab S9 FE+, Galaxy Tab S9 Ultra, Galaxy Tab S9+, Galaxy Tab A9+ 5G, Galaxy Tab Active5 5G, Galaxy Tab S10 Ultra, Galaxy Tab S10+, Galaxy Tab S10 FE+, Galaxy Tab S10 FE. Maxell reserves the right to accuse additional products as discovery proceeds in this investigation.

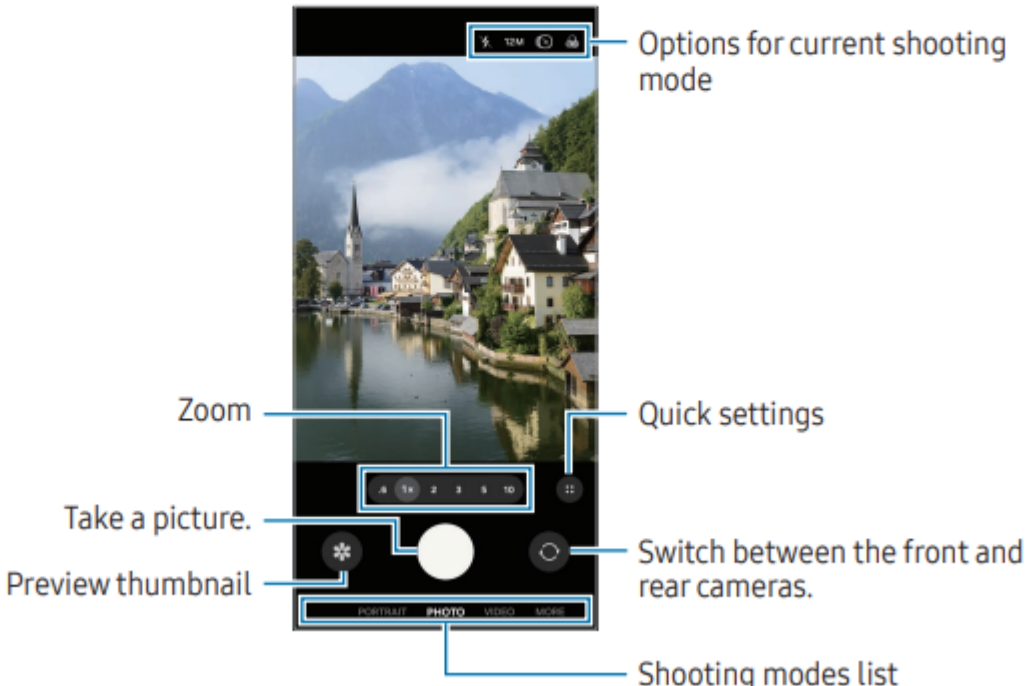

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|                           |  <p>The screenshot displays the Samsung Galaxy Z Flip4 product page. At the top, it shows the phone's name and a release date of August 25, 2022. Key specifications listed include a weight of 187g, a thickness of 6.9mm, and support for Android 12 up to Android 13. Storage options are shown as 128GB, 256GB, or 512GB. Performance metrics include 11% battery life improvement, 1,540,988 hits, and 230 fan ratings. Technical details such as a 6.7-inch 1080x2640 pixel display, a 12MP camera, 8GB RAM, and a 3700mAh battery are also provided. Below the specifications, there are tabs for REVIEW, OPINIONS, COMPARE, PICTURES, and PRICES. A section for carrier offers is visible, mentioning a \$100 off on select T-Mobile Galaxy Z Flip4 and a \$1,000 bill credit from AT&amp;T. At the bottom, there is a gallery of images showing the phone in various colors and folded states.</p> <p>Galaxy Z Flip4 technical specifications; <a href="https://www.samsung.com/us/smartphones/galaxy-z-flip4/buy/galaxy-z-flip4-256gb-t-mobile-sm-f721uzdexau/">https://www.samsung.com/us/smartphones/galaxy-z-flip4/buy/galaxy-z-flip4-256gb-t-mobile-sm-f721uzdexau/</a>;<br/> <a href="https://www.gsmarena.com/samsung_galaxy_z_flip4-11538.php">https://www.gsmarena.com/samsung_galaxy_z_flip4-11538.php</a></p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| <p>[1.a] an output module which displays a plurality of digital images and a plurality of related information concerning said digital images recorded in a recording medium on the display module, each digital image corresponding to one of said plurality of related information; and</p> | <p>Each of the Accused Samsung '198 Products includes an output module which displays a plurality of digital images and a plurality of related information concerning said digital images recorded in a recording medium on the display module, each digital image corresponding to one of said plurality of related information. <i>See</i> User Guide and Technical Specifications of the Accused Samsung '198 Products available at Samsung’s website showing that each of the devices include an output module which displays a plurality of digital images and a plurality of related information concerning said digital images recorded in a recording medium on the display module, each digital image corresponding to one of said plurality of related information.</p> <p>For example, each of the Accused Samsung '198 Products, working in conjunction with the software interface of an active application (whether Gallery, Netflix, or TV Plus), acts as the output module. The device’s output module displays multiple digital images—such as photo thumbnails in the Gallery or video and show thumbnails in Netflix and TV Plus. Along with the digital images, the output module presents</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                      |                                                      |                                                      |           |               |             |                                  |     |     |       |    |     |                                      |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|------------------------------------------------------|------------------------------------------------------|-----------|---------------|-------------|----------------------------------|-----|-----|-------|----|-----|--------------------------------------|
|                           | <p>their associated related information—for example, recognized faces linked to photos, or genres and descriptions linked to videos. The related information is sourced from the phone’s storage or is streamed, and each image is presented with its corresponding data on the device’s display. Further, upon information and belief related information is based on one or more of location information of the photos, certain date ranges, people, pets, and/or additional information that is used to associate pictures/videos together.</p> <p>Each of the Accused Samsung ’198 Products include an output module such as software and hardware (e.g., graphical signal processor, display circuitry, display drivers etc) outputting digital images on the display and/or Wi-Fi circuitry for outputting digital images to an external display via Smart View.</p> <p>For example, the Samsung Galaxy S25 includes hardware and software that constitute the claimed wireless communication interface. The wireless communication interface is configured to perform Wi-Fi communication, which is a type of communication over a wireless local area network.</p> <table><tr><td rowspan="6">COMMS</td><td>WLAN</td><td>Wi-Fi 802.11 a/b/g/n/ac/6e/7, tri-band, Wi-Fi Direct</td></tr><tr><td>Bluetooth</td><td>5.4, A2DP, LE</td></tr><tr><td>Positioning</td><td>GPS, GLONASS, BDS, GALILEO, QZSS</td></tr><tr><td>NFC</td><td>Yes</td></tr><tr><td>Radio</td><td>No</td></tr><tr><td>USB</td><td>USB Type-C 3.2, DisplayPort 1.2, OTG</td></tr></table> <p><a href="https://www.gsmarena.com/samsung_galaxy_s25-13610.php">https://www.gsmarena.com/samsung_galaxy_s25-13610.php</a></p> | COMMS                                | WLAN                                                 | Wi-Fi 802.11 a/b/g/n/ac/6e/7, tri-band, Wi-Fi Direct | Bluetooth | 5.4, A2DP, LE | Positioning | GPS, GLONASS, BDS, GALILEO, QZSS | NFC | Yes | Radio | No | USB | USB Type-C 3.2, DisplayPort 1.2, OTG |

|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           |  <p>The figure consists of three sequential screenshots of a mobile application interface, specifically the 'Create a story' screen. The first screenshot shows the 'Create a story' header with a heart icon, a search icon, and a menu icon. Below the header is a large, rounded rectangular input field labeled 'Describe a story' with a microphone icon on the right. The second screenshot shows the same screen with a 'Create story manually' dialog box open at the top right, containing the options 'Create story manually' and 'Hide content'. The third screenshot shows the 'Create story manually' dialog box with the text 'Story 1' entered into a text field, and 'Cancel' and 'Create' buttons at the bottom. A keyboard is visible at the bottom of the third screenshot.</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <div data-bbox="613 277 1417 1101"> </div> <p>The user swipes down from the top of the display to get to the first screen where “Smart View” icon is displayed. Upon selecting “Smart View” (an exemplary first user operation), the external devices that can be used for “Smart View” appears. User selects a specific device (“Samsung QN85BA 55”) as an external device to mirror the screen through “Smart View.”</p> <p>Once the pairing of the Galaxy A54 5G to the TV through “Smart View” has been established, the screen on the phone gets displayed on the TV, while the display on the phone indicates that the screen is being mirrored.</p> |

# APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <div data-bbox="615 280 1837 889"> </div> <p data-bbox="615 966 919 998"><u>Doctrine of Equivalents</u></p> <p data-bbox="615 1015 2003 1421">To the extent Samsung argues that this limitation is not literally met in any Accused Samsung '198 Products, Maxell asserts that this limitation is met under the doctrine of equivalents because the identified structure matches the function, way, and result of the claimed element and, to the extent there is a difference, the difference is insubstantial. For example, to the extent that Samsung argues that the combination of a general-purpose processor and application software does not constitute a singular “output module”, the combination of the device’s processor, graphics processor, and application software is an equivalent structure. Using this combined structure performs substantially the same function, which is to display multiple images and their corresponding related information on a display module. It does so in substantially the same way, by processing image and metadata files and rendering them for the user on the display. This achieves substantially the same result: presenting an organized visual interface where multiple images are shown with their associated context.</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198                                                                                                                                                               | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                           |           |           |                |          |    |                                                      |         |                                              |     |                                                                           |     |            |

| [1.b] a control module which selects a digital image to add in a playlist, based on one of the plurality of information concerning the digital image recorded in said recording medium; | <p>Each of the Accused Samsung '198 Products includes a control module which selects a digital image to add in a playlist, based on one of the plurality of information concerning the digital image recorded in said recording medium. <i>See</i> User Guide and Technical Specifications of the Accused Samsung '198 Products available at Samsung's website showing that each of the devices includes a control module which selects a digital image to add in a playlist, based on one of the plurality of information concerning the digital image recorded in said recording medium.</p> <p>The processor within each of the Accused Samsung '198 Products, when executing the instructions of an active application (whether Gallery, Netflix, or TV Plus), acts as the control module. The device's control module performs the function of selecting digital images for inclusion in various forms of playlists. On information and belief, such a selection is based on specific related information; for instance, the control module selects photos for a People Album based on facial recognition data, or it selects videos for "My List" and recommendations based on criteria like genre or viewing history.</p> <p><u>Galaxy S25</u></p> <p>Processor</p> <table><tr><th>CPU Type</th><th>CPU Speed</th></tr><tr><td>Octa-Core</td><td>4.47GHz,3.5GHz</td></tr></table> <p>Samsung Galaxy S25 Technical Specification: <a href="https://www.samsung.com/us/smartphones/galaxy-s25/buy/galaxy-s25-128gb-unlocked-sm-s931uzkaxaa">https://www.samsung.com/us/smartphones/galaxy-s25/buy/galaxy-s25-128gb-unlocked-sm-s931uzkaxaa</a></p> <table><tr><td rowspan="4">PLATFORM</td><td>OS</td><td>Android 15, up to 7 major Android upgrades, One UI 7</td></tr><tr><td>Chipset</td><td>Qualcomm SM8750-AB Snapdragon 8 Elite (3 nm)</td></tr><tr><td>CPU</td><td>Octa-core (2x4.47 GHz Oryon V2 Phoenix L + 6x3.53 GHz Oryon V2 Phoenix M)</td></tr><tr><td>GPU</td><td>Adreno 830</td></tr></table> | CPU Type                                                                  | CPU Speed | Octa-Core | 4.47GHz,3.5GHz | PLATFORM | OS | Android 15, up to 7 major Android upgrades, One UI 7 | Chipset | Qualcomm SM8750-AB Snapdragon 8 Elite (3 nm) | CPU | Octa-core (2x4.47 GHz Oryon V2 Phoenix L + 6x3.53 GHz Oryon V2 Phoenix M) | GPU | Adreno 830 |

|                           | <div data-bbox="611 277 1772 1068"> </div> <p><b>First</b>, the screenshot of the Gallery application on an Samsung Galaxy S23 Ultra demonstrates the selection process. The application’s software acts as the control module. On information and belief, the control module selects digital images to add to a playlist. In this context, the “People Album” (the collection of photos for a recognized and registered specific person, such as “COURTNEY” shown in the screenshots) itself functions as the playlist. The recorded image information for this registered specific person can be selectively reproduced by selecting options such as “Movie,” or “Slideshow” from menus accessible within Courtney’s album. The selection of images by the control module for this People Album (playlist) is based on related information, specifically the shared recognized face of “COURTNEY,” as detailed in element [1.a]. The formation of this curated album, which is explicitly usable for generating such movies or</p> |

APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           |  <p>The figure consists of three side-by-side screenshots of a mobile application interface, likely a video creation or social media app. The first screenshot on the left shows a profile page for 'Me' with a circular profile picture and a 'Create' button at the bottom. The 'Create' button has three options: 'GIF', 'Collage', and 'Movie', with the 'Movie' option highlighted by a red rectangle. Below the 'Create' button is a 'Go to Studio' button. The second screenshot in the middle shows a 'Select items' screen with a 'Cancel' button at the top right. It displays a grid of video thumbnails organized by date: 'Today', 'Yesterday New York', 'Jun 16 New York', and 'Jun 9 - 14'. The third screenshot on the right shows a '2/60' screen with a 'Cancel' button at the top right. It displays a grid of video thumbnails, with the first two rows showing multiple thumbnails and the third row showing a single thumbnail labeled 'Movie'.</p> |

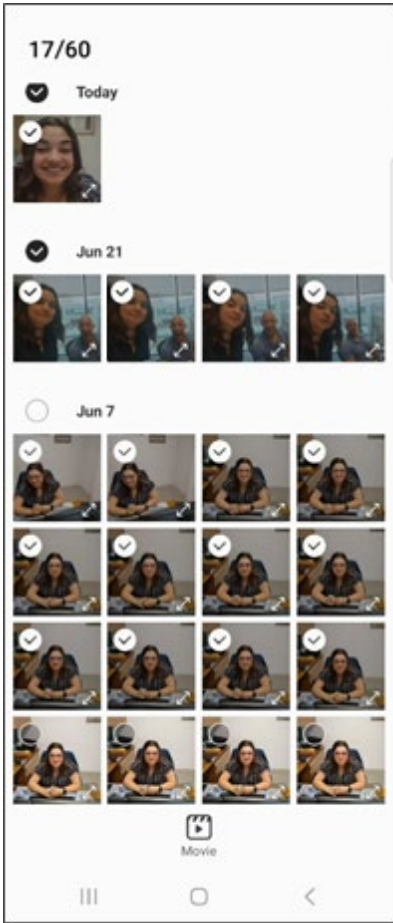

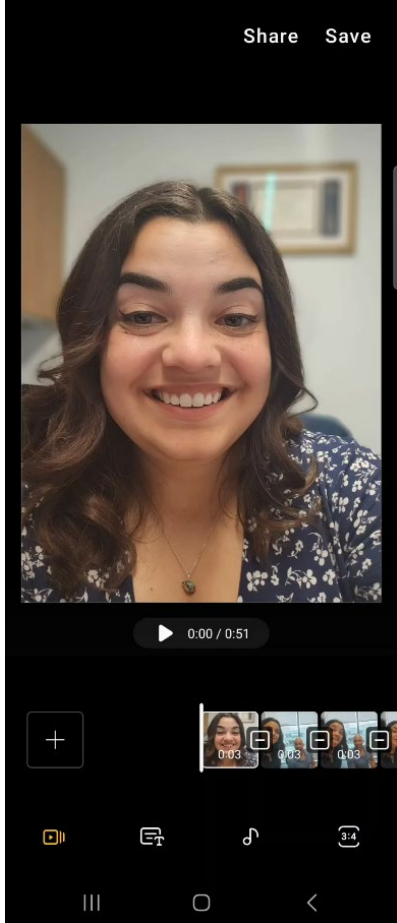

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           |  <p>The image displays two side-by-side screenshots of a social media profile for a user named 'COURTNEY'. The profile shows a circular profile picture, the name 'COURTNEY', and a count of '50 items'. Below the profile information, there are three photo posts: one labeled 'Today', one labeled 'Jun 21' showing four people, and one labeled 'Jun 7' showing a group of people. The left screenshot shows a menu with options: 'Edit', 'Edit name', 'Delete name', 'Merge people', 'Create', 'Start slideshow', and 'Remove from results'. The right screenshot shows a 'Create new' overlay with four options: 'Highlight reel' (Automatically create clips of the best parts), 'Movie' (Add images, videos, and music), 'GIF' (Make picture sequences move), and 'Collage' (Combine up to 6 images and videos). The bottom of both screenshots shows a standard mobile OS dock with various app icons.</p> |

|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <div data-bbox="611 277 1392 1112"> </div> <p><b>Third</b>, on the “Search” tab, the control module pre-selects images into playlists like “People” and “Locations” based on their recorded metadata (facial data and geotags).</p> |

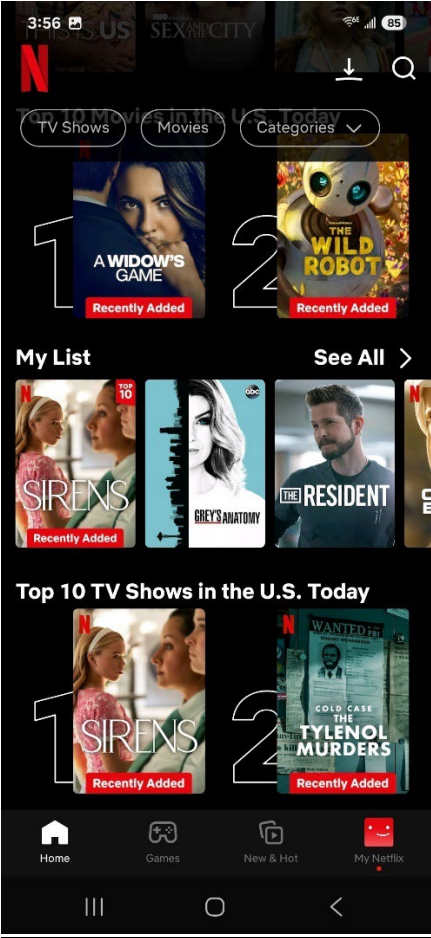

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           |  <p>The screenshot displays a mobile application interface on a dark background. At the top, there is a navigation bar with a back arrow on the left and a vertical ellipsis menu on the right. Below this, the 'People' section is titled 'People 1' and features a circular profile picture of a man, with the label 'Me' underneath. The 'Locations' section, titled 'Locations 1', shows two location cards: one with a map icon and the text 'View all', and another with a profile picture and the text 'New York'. The 'Activity' section follows, containing two icons: a star labeled 'AI-edited' and a pencil labeled 'Edited'. The 'Shot types' section is titled 'Shot types 1' and includes a search bar with the placeholder text 'What are you looking for?' and a microphone icon. At the bottom of the screen, there is a standard Android navigation bar with three icons: a square, a circle, and a triangle.</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p><b>Fourth</b>, when a user taps the heart icon on a photo or selects “Add to Favorites” from a menu, the control module selects that image to add to the “Favorites” playlist based on that user command.</p> <div data-bbox="611 365 1486 1308"> </div> <p><b>Netflix</b></p> |

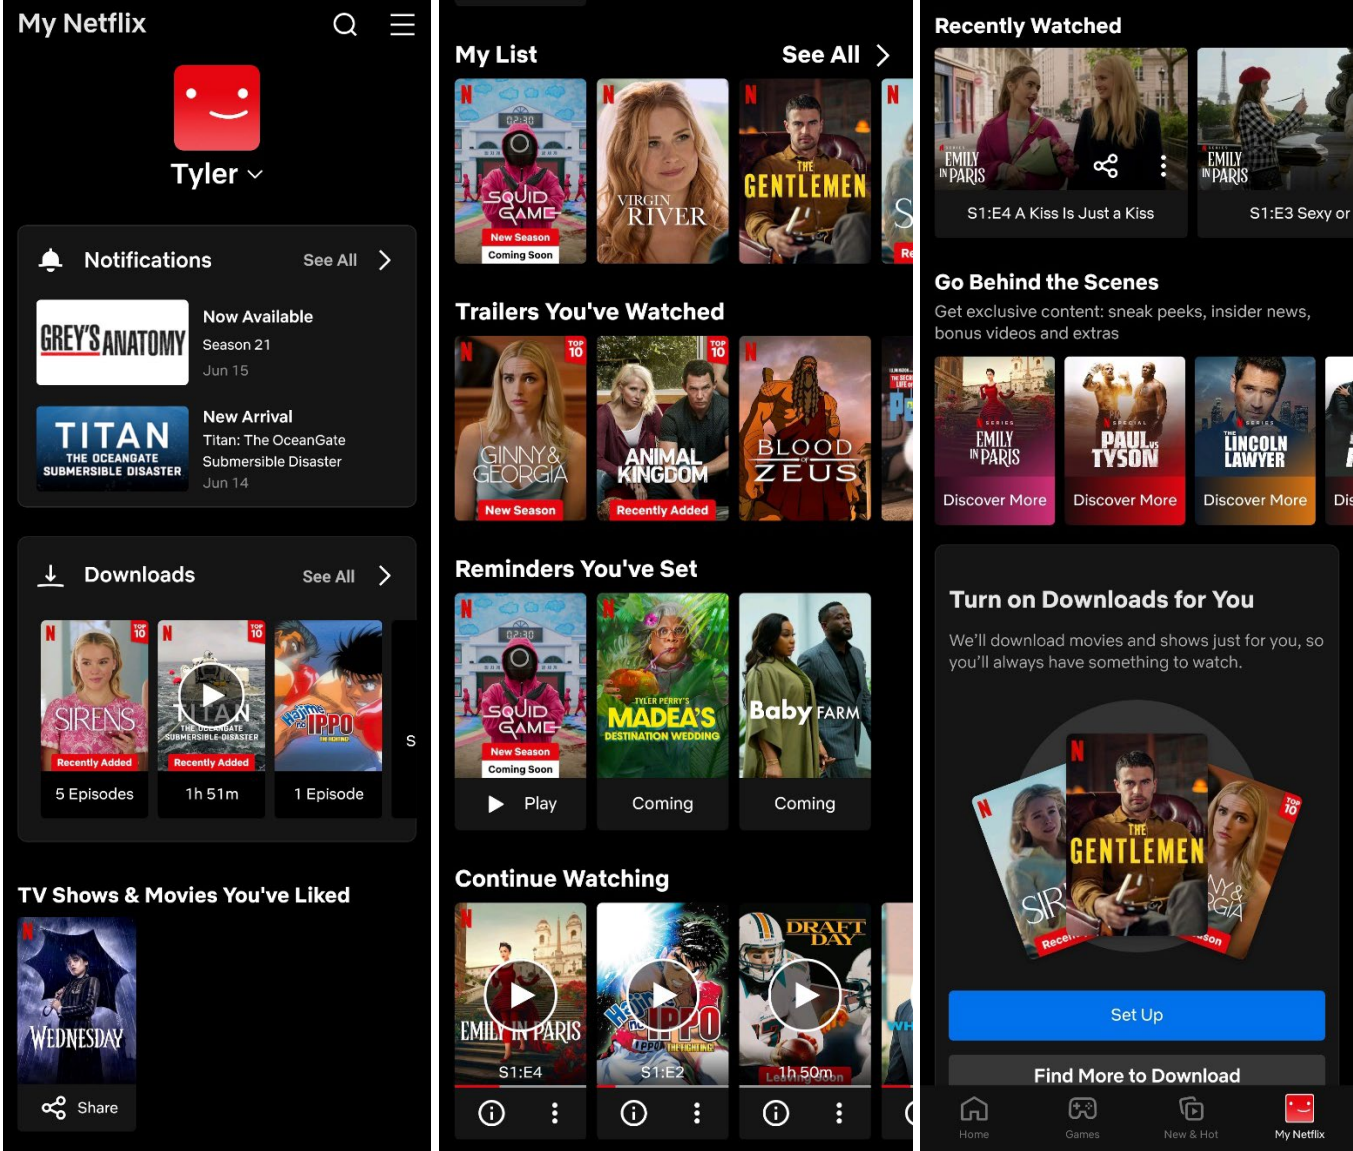

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p>The screenshot of the Netflix application on a Samsung Galaxy S25 demonstrates the selection process. The application's software acts as the control module. On information and belief, the control module selects digital images in multiple ways.</p>  <p><b>First</b>, the control module selects videos to populate the “My List” row based on the user’s explicit commands to add those specific items. In this case, the related information is the user’s direct input. Additionally, the control module selects different videos to populate the “Top 10 TV Shows in the U.S.</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT  
NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                        |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | Today” row. On information and belief, this second selection is based on related information concerning system-wide viewership and popularity data. The presence of these curated rows demonstrates that the control module selects digital images for different playlists based on various types of related information. |

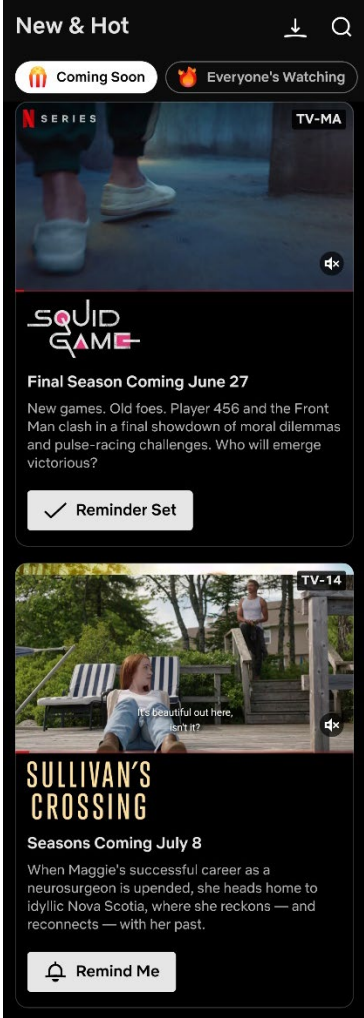

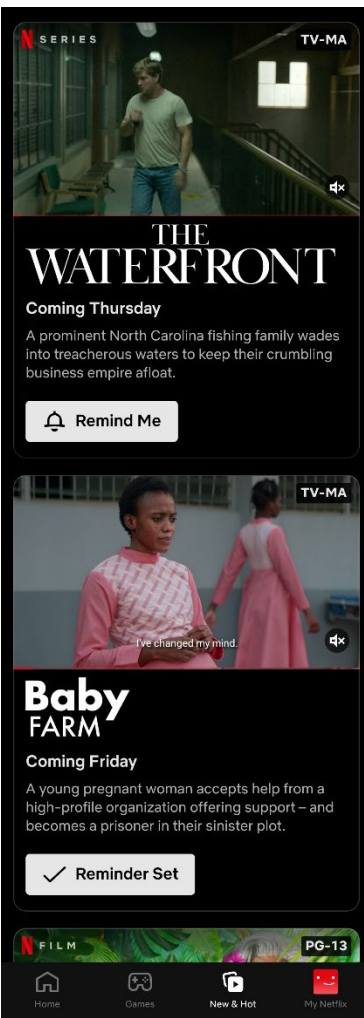

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           |  <p>The screenshot displays the Netflix mobile app interface for a user named Tyler. The interface is divided into several sections:</p> <ul style="list-style-type: none"> <li><b>My Netflix:</b> Shows the user's profile (Tyler) and a list of notifications, including "GREY'S ANATOMY" (Season 21, Jun 15) and "TITAN" (New Arrival, Jun 14).</li> <li><b>Downloads:</b> A section for downloaded content, showing "SIRENS" (5 Episodes, Recently Added), "TITAN" (1h 51m, Recently Added), and "IPPON" (1 Episode, Recently Added).</li> <li><b>TV Shows &amp; Movies You've Liked:</b> A section for content the user has liked, featuring "WEDNESDAY".</li> <li><b>My List:</b> A section for the user's list of content, including "SQUID GAME" (New Season, Coming Soon), "VIRGIN RIVER", and "THE GENTLEMEN".</li> <li><b>Trailers You've Watched:</b> A section for trailers the user has watched, including "GINNY &amp; GEORGIA", "ANIMAL KINGDOM", and "BLOOD ZEUS".</li> <li><b>Reminders You've Set:</b> A section for reminders the user has set, including "SQUID GAME" (New Season, Coming Soon), "MADEA'S DESTINATION WEDDING", and "Baby FARM".</li> <li><b>Continue Watching:</b> A section for content the user has started watching, including "EMILY IN PARIS" (S1:E4), "IPPON" (S1:E2), and "DRAFT DAY" (1h 50m).</li> <li><b>Recently Watched:</b> A section for content the user has recently watched, including "EMILY IN PARIS" (S1:E4 A Kiss Is Just a Kiss) and "EMILY IN PARIS" (S1:E3 Sexy or).</li> <li><b>Go Behind the Scenes:</b> A section for exclusive content, including "EMILY IN PARIS", "PAUL TYSO", and "LINCOLN LAWYER".</li> <li><b>Turn on Downloads for You:</b> A section for a recommendation to turn on downloads, with a "Set Up" button.</li> </ul> <p>The bottom navigation bar includes icons for Home, Games, New &amp; Hot, and My Netflix.</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT  
NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p><b>Second</b>, on the “My Netflix” tab, the control module selects images for multiple playlists based on different types of related information. It selects images for the “My List” playlist based on the user’s explicit commands to add those titles. It selects images for the “Downloads” playlist based on the user’s command to download the content. It selects images for the “Continue Watching” playlist based on the user’s viewing history.</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <div data-bbox="611 277 972 1289">  <p>The screenshot shows the 'New &amp; Hot' section of the Netflix app. It features two promotional cards. The top card is for 'Squid Game', labeled 'N SERIES' and 'TV-MA', with the text 'Final Season Coming June 27' and a 'Reminder Set' button. The bottom card is for 'Sullivan's Crossing', labeled 'TV-14', with the text 'Seasons Coming July 8' and a 'Remind Me' button.</p> </div> <div data-bbox="989 277 1350 1289">  <p>The screenshot shows the 'New &amp; Hot' section of the Netflix app. It features two promotional cards. The top card is for 'The Waterfront', labeled 'N SERIES' and 'TV-MA', with the text 'Coming Thursday' and a 'Remind Me' button. The bottom card is for 'Baby Farm', labeled 'TV-MA', with the text 'Coming Friday' and a 'Reminder Set' button.</p> </div> <p><b>Third</b>, on the “New &amp; Hot” tab, when a user taps “Remind Me,” the control module selects that show to add to a personal "reminders" playlist based on the user's command.</p> <p>Further, the Accused Samsung '198 Products include a control module (e.g., CPU executing Netflix application) that selects a digital image to add in a playlist based on recommendation engine:</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|                           | <p align="center"><b>Recommendations and Results Organization in<br/>Netflix Search</b></p> <p><b>Abstract</b></p> <p>"Personalized recommendations on the Netflix Homepage are based on a user's viewing habits and the behavior of similar users. These recommendations, organized for efficient browsing, enable users to discover the next great video to watch and enjoy without additional input or an explicit expression of their intents or goals. The Netflix Search experience, on the other hand, allows users to take active control of discovering new videos by explicitly expressing their entertainment needs via search queries.</p> <p><a href="https://help.netflix.com/en/node/100639">https://help.netflix.com/en/node/100639</a></p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT  
NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

|                           | <h2 data-bbox="625 289 1911 435">How Netflix’s Recommendations System Works</h2> <p data-bbox="625 506 1990 617">Our business is a subscription service model that offers personalized recommendations, to help you find shows, movies, and games we think you might enjoy. To do this we have created an innovative recommendations system. This article provides a high level description of our recommendations system in plain language.</p> <h3 data-bbox="625 695 777 727">The basics</h3> <p data-bbox="625 753 1990 863">Whenever you access the Netflix service, our recommendations system strives to help you find a show, movie, or game to enjoy with ease. We estimate the likelihood that you will enjoy a particular title in our catalog based on a number of factors including:</p> <ul data-bbox="638 915 1810 1052" style="list-style-type: none"><li>• your interactions with our service (such as your viewing history and how you rated other titles),</li><li>• other members with similar tastes and preferences on our service, and</li><li>• information about the titles, such as their genre, categories, actors, release year, etc.</li></ul> |

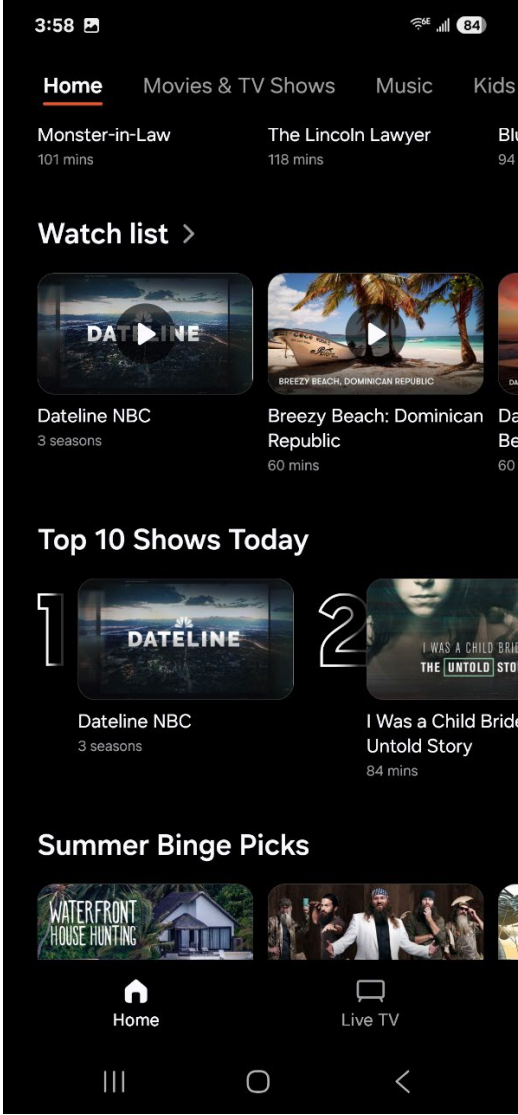

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p>In addition to knowing what you have watched on Netflix, to best personalize the recommendations we also consider factors including:</p> <ul style="list-style-type: none"><li>• the time of day you're enjoying Netflix,</li><li>• the languages you prefer</li><li>• the devices you are enjoying Netflix on, and</li><li>• how long you enjoyed a Netflix title.</li></ul> <p>All of these signals are used as some of the inputs that we process in our algorithms. (An algorithm is a process or set of rules followed in a problem solving operation.) The recommendations system does not include demographic information (such as age or gender) as part of the decision making process.</p> <p>If you're not seeing something you want to watch, you can always search the entire catalog available to you. We try to make searching as easy and quick as possible. When you enter a search query, the top results we return are based on a number of factors, including the actions of other members who have entered the same or similar queries, our prediction of what you'd like to enjoy on Netflix, and others.</p> <p>Below is a description of how the system works over time, and how these pieces of information influence what we present to you.</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p><b>“Jump starting” the recommendations system</b></p> <p>When you create your Netflix account, or add a <b>new profile</b> in your account, we ask you to choose a few titles that you like. We use these titles to “jump start” your recommendations. Choosing a few titles you like is optional. If you choose to forego this step then we will start you off with a diverse and popular set of titles to get you going.</p> <p>Once you start engaging with titles on the service, this will “supersede” any initial preferences you provided us. As you continue to enjoy Netflix over time, the titles you engage with more recently will outweigh titles you engaged with in the past in terms of driving our recommendations system.</p> <p><b>Rows, rankings and title representation</b></p> <p>When you look at your Netflix homepage, our systems have ranked titles and positioned them in a way that is designed to present the best possible ordering of titles that you may enjoy.</p> <p>On each page, there are multiple layers of personalization. For example, in a row, we may personalize the following:</p> <ul style="list-style-type: none"><li>• the choice of row (such as Continue Watching)</li><li>• which titles appear in the row, and</li><li>• the order of those titles.</li></ul> <p><a href="https://help.netflix.com/en/node/100639">https://help.netflix.com/en/node/100639</a></p> <p><b><u>Samsung TV Plus</u></b></p> |

|                           |  <p>The screenshot of the Samsung TV Plus application on a Samsung Galaxy S25 demonstrates the selection process. The application's software acts as the control module. On information and belief, the control</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p>module selects digital images in multiple ways. The control module selects videos to populate the “Watch list” row based on the user’s explicit commands to add those specific items. In this instance, the related information is the user’s direct input. Additionally, the control module selects different videos to populate the “Top 10 Shows Today” row. On information and belief, this second selection is based on related information concerning system-wide viewership and popularity data. The presence of these curated rows proves that the control module selects digital images for different playlists based on various types of related information.</p> <p>Further, the Accused Samsung '198 Products include a control module (e.g., CPU executing Samsung TV application) that selects a digital image to add in a playlist based on recommendation engine:</p> <p><u>Recommendations and Customised Content</u></p> <p>The SmartTV is designed to enable you to easily find and access video programming and other content. For example, you may access information about live television programs distributed to you by your cable or satellite operator and on-demand video content offerings distributed by third-party content providers through searchable guides displayed on your SmartTV.</p> <p>In the case of live television programs, we determine what content is available to you based in part on your zip code. In addition, the SmartTV helps make the searchable guides and other SmartTV content more relevant to you by highlighting programming and content that is likely to interest you, such as episodes of programs that you may have missed and new programs, applications and other content that we believe you will find of interest. We base these recommendations on:</p> <p>Information about content that you have watched, purchased, downloaded, or streamed through Samsung applications on your SmartTV or other devices;</p> |

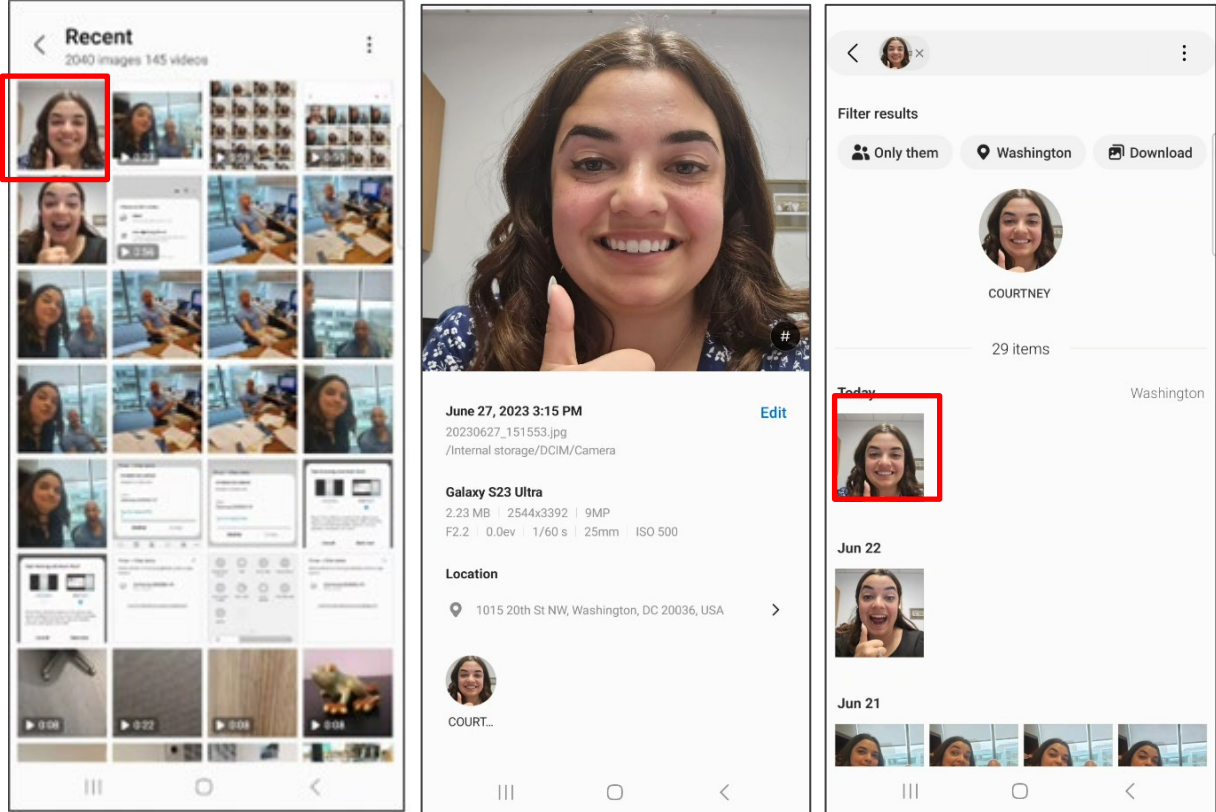

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

For example, to the extent that Samsung argues that a general-purpose processor executing an application's instructions does not constitute a singular “control module”,</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198                                                                                                                                                                                                                                               | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                                                                                                                                                                                         | <p>the processor executing the software instructions of an active application is an equivalent structure. Using this structure performs substantially the same function, which is to select digital images for inclusion in a playlist based on related information. It does so in substantially the same way, by computationally processing metadata and user inputs to identify and designate images for a playlist. This achieves substantially the same result: the curation of images into a specific playlist according to a certain criterion.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <p>[1.c] wherein for a selected digital image selected by the user, said control module; retrieves other digital images whose related information is the same as the selected digital image, the other digital images being candidates for adding in said playlist,</p> | <p>In each of the Accused Samsung '198 Products, for a selected digital image selected by the user, said control module retrieves other digital images whose related information is the same as the selected digital image, the other digital images being candidates for adding in said playlist. <i>See</i> User Guide and Technical Specifications of the Accused Samsung '198 Products available at Samsung's website showing that in each of the devices, for a selected digital image selected by the user, the control module retrieves other digital images whose related information is the same as the selected digital image, the other digital images being candidates for adding in said playlist.</p> <p><b><u>People Album</u></b></p> <p><b>First</b>, through its general face recognition, grouping, and tagging functionality, after a user selects a specific recognized person or an existing "People Album"(e.g., by tapping on an album named for a recognized person or a system-identified face group), the control module (the Gallery's software), on information and belief, then retrieves other digital images from the device's storage. This occurs not only during initial album formation but also on an ongoing basis. For instance, when new photos are added to the Gallery, the system's facial recognition automatically processes these images including for making "stories," "movies," and/or "slideshows" based on related information (<i>e.g.</i>, same face, location, date, and/or other information associating the pictures in a relationship).</p> |

# APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <div data-bbox="606 277 1814 1084">  </div> <p data-bbox="606 1109 1986 1252">Screenshots from Galaxy S23 Ultra illustrates this limitation. If a new photo of “Courtney” is identified, that new photo is effectively retrieved by the control module based on the same related information (Courtney’s unique facial signature). Such newly identified photos of Courtney then serve as candidates for adding in said playlist (Courtney’s existing standard album).</p> <p data-bbox="606 1325 1965 1463"><b>Second</b>, through the “Auto-Update Album” feature, when a user initiates the creation of an “Auto-Update Album” by selecting a specific person, this constitutes the user selection. The control module, on information and belief, then retrieves all current digital images of that person from storage, based on the same related information (the selected person’s identity), to initially populate the album (the playlist),</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

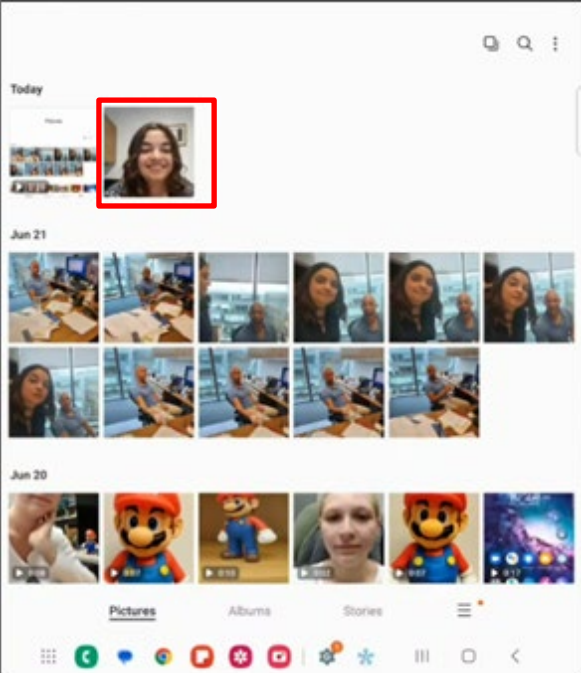

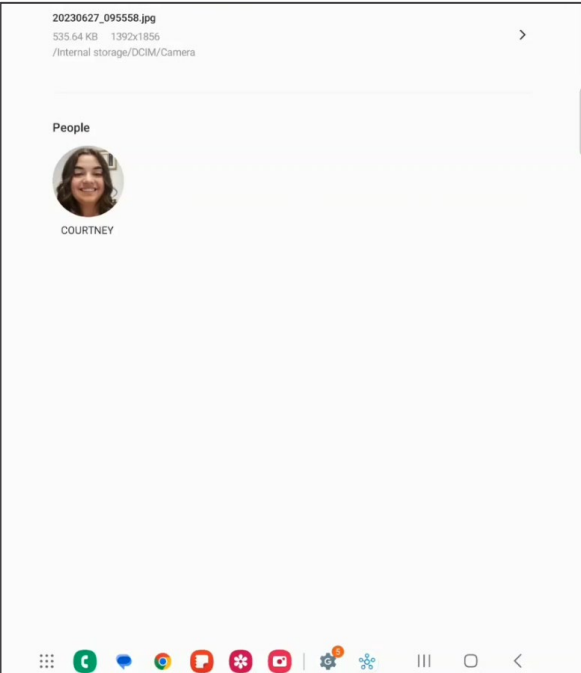

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p>treating these as initial candidates. Furthermore, when new photos of that person are added to the Gallery, the control module's facial recognition automatically identifies them; these new images are retrieved as ongoing candidates and, on information and belief, are automatically added to the auto-update album (the playlist).</p> <div data-bbox="611 440 1068 1360"> <p>The screenshot shows a mobile gallery interface with a 'Recent' album. The album contains 2039 images and 141 videos. A photo of a woman is highlighted with a red box. The interface includes a back arrow, a title bar, and a grid of image thumbnails. Below the grid, there are video thumbnails with play icons and durations.</p> </div> <div data-bbox="1094 440 1545 1360"> <p>The screenshot shows a mobile gallery interface with a 'COURTNEY' album. |---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <div data-bbox="611 277 894 1130"> </div> <p>For example, the screenshot of the Netflix application on a Samsung Galaxy S25 demonstrates this limitation. After a user selects a specific video, in this instance by navigating to the detail page for “Squid Game”, the control module (Netflix’s recommendation engine), on information and belief, retrieves other digital images (other videos). These retrieved videos are displayed under the “More Like This” tab, as shown in the screenshot, and include titles such as “Alice in Borderland” and “3%.” Such retrieval under the “More Like This” label is based on the same related information as “Squid Game” (e.g., genre, themes, or viewing patterns of similar users). These newly retrieved videos are presented as candidates for adding in said playlist (“My List”).</p> |

|                           | <p data-bbox="646 326 816 378"><b>About</b></p> <p data-bbox="646 456 1961 589">Welcome to the Netflix information hub for Personalization, Recommendations and Search research. This page showcases our journey in enhancing member experiences through the research and application of state-of-the-art technologies.</p> <p data-bbox="646 683 1923 868">Recommendation and Search algorithms are at the heart of Netflix's services. They are pivotal in providing our members around the world with personalized entertainment suggestions that align with their preferences at any given moment. Recognizing the critical role these recommendations play, we are committed to continuous improvement and advancement in this field.</p> <p data-bbox="638 930 1990 1287">While our research has made many significant improvements to recommendation systems over the years, there is still a long way to go until every member is given the perfect recommendation at the top of their page while understanding why it will be great for them. Thus, we continue to improve our algorithms while looking for new areas we can personalize. We conduct research in areas of machine learning with the goal to make member experience better. Our work on recommender systems, contextual bandits, reinforcement learning, natural language processing, foundational models, and causal inference is published at leading conferences.</p> <p data-bbox="613 1323 1373 1356"><a href="https://research.netflix.com/research-area/recommendations">https://research.netflix.com/research-area/recommendations</a></p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT  
NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

These recommendations, organized for efficient browsing, enable users to discover the next great video to watch and enjoy without additional input or an explicit expression of their intents or goals. The Netflix Search experience, on the other hand, allows users to take active control of discovering new videos by explicitly expressing their entertainment needs via search queries.</p> <p data-bbox="615 906 1125 938"><a href="https://help.netflix.com/en/node/100639">https://help.netflix.com/en/node/100639</a></p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT  
NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <h2 data-bbox="625 289 1911 435">How Netflix’s Recommendations System Works</h2> <p data-bbox="625 506 1990 617">Our business is a subscription service model that offers personalized recommendations, to help you find shows, movies, and games we think you might enjoy. To do this we have created an innovative recommendations system. This article provides a high level description of our recommendations system in plain language.</p> <h3 data-bbox="625 695 777 727">The basics</h3> <p data-bbox="625 753 1990 863">Whenever you access the Netflix service, our recommendations system strives to help you find a show, movie, or game to enjoy with ease. We estimate the likelihood that you will enjoy a particular title in our catalog based on a number of factors including:</p> <ul data-bbox="638 915 1810 1052" style="list-style-type: none"><li>• your interactions with our service (such as your viewing history and how you rated other titles),</li><li>• other members with similar tastes and preferences on our service, and</li><li>• information about the titles, such as their genre, categories, actors, release year, etc.</li></ul> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p>In addition to knowing what you have watched on Netflix, to best personalize the recommendations we also consider factors including:</p> <ul style="list-style-type: none"><li>• the time of day you're enjoying Netflix,</li><li>• the languages you prefer</li><li>• the devices you are enjoying Netflix on, and</li><li>• how long you enjoyed a Netflix title.</li></ul> <p>All of these signals are used as some of the inputs that we process in our algorithms. (An algorithm is a process or set of rules followed in a problem solving operation.) The recommendations system does not include demographic information (such as age or gender) as part of the decision making process.</p> <p>If you're not seeing something you want to watch, you can always search the entire catalog available to you. We try to make searching as easy and quick as possible. When you enter a search query, the top results we return are based on a number of factors, including the actions of other members who have entered the same or similar queries, our prediction of what you'd like to enjoy on Netflix, and others.</p> <p>Below is a description of how the system works over time, and how these pieces of information influence what we present to you.</p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p><b>“Jump starting” the recommendations system</b></p> <p>When you create your Netflix account, or add a <b>new profile</b> in your account, we ask you to choose a few titles that you like. We use these titles to “jump start” your recommendations. Choosing a few titles you like is optional. If you choose to forego this step then we will start you off with a diverse and popular set of titles to get you going.</p> <p>Once you start engaging with titles on the service, this will “supersede” any initial preferences you provided us. As you continue to enjoy Netflix over time, the titles you engage with more recently will outweigh titles you engaged with in the past in terms of driving our recommendations system.</p> <p><b>Rows, rankings and title representation</b></p> <p>When you look at your Netflix homepage, our systems have ranked titles and positioned them in a way that is designed to present the best possible ordering of titles that you may enjoy.</p> <p>On each page, there are multiple layers of personalization. For example, in a row, we may personalize the following:</p> <ul style="list-style-type: none"><li>• the choice of row (such as Continue Watching)</li><li>• which titles appear in the row, and</li><li>• the order of those titles.</li></ul> <p><a href="https://help.netflix.com/en/node/100639">https://help.netflix.com/en/node/100639</a></p> <p><b><u>Samsung TV Plus</u></b></p> |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p>belief, retrieves other digital images (other movies or shows). These retrieved videos are displayed under the “More like this” section, as shown in the screenshot, and include titles such as “The Moon” and “Minotaur.” Such retrieval under the “More like this” label is based on the same related information as “Alienoid” (e.g., its listed genres of Action, Fantasy, Adventure, Science Fiction, or viewing patterns of similar users). These newly retrieved videos are presented as candidates for adding in said playlist (the “Watch list”)</p> <p>Further, the Accused Samsung '198 Products include a control module (e.g., CPU executing Samsung TV application) that provides candidate images based on recommendation engine:</p> <p><u>Recommendations and Customised Content</u></p> <p>The SmartTV is designed to enable you to easily find and access video programming and other content. For example, you may access information about live television programs distributed to you by your cable or satellite operator and on-demand video content offerings distributed by third-party content providers through searchable guides displayed on your SmartTV.</p> <p>In the case of live television programs, we determine what content is available to you based in part on your zip code. In addition, the SmartTV helps make the searchable guides and other SmartTV content more relevant to you by highlighting programming and content that is likely to interest you, such as episodes of programs that you may have missed and new programs, applications and other content that we believe you will find of interest. We base these recommendations on:</p> <p>Information about content that you have watched, purchased, downloaded, or streamed through Samsung applications on your SmartTV or other devices;</p> |

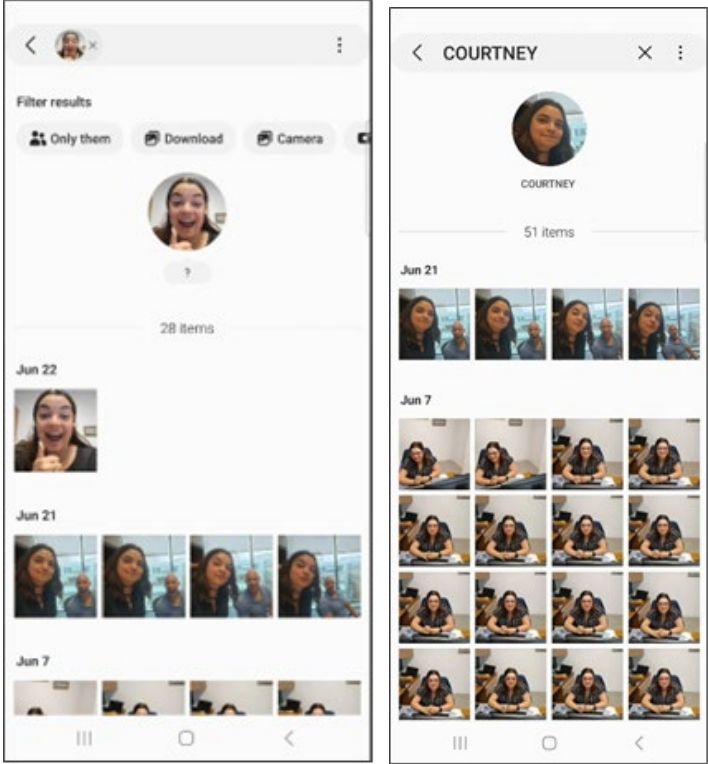

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|                                                                                                                                                                                                                                                                            | <p>not exactly the “same” as the user-selected image, the use of algorithmic similarity is an equivalent implementation. Using this method performs substantially the same function, which is to retrieve candidate images based on a common characteristic with a selected image. It does so in substantially the same way, by using shared metadata like genre, themes, or event type as the basis for retrieval. This achieves substantially the same result: presenting the user with a curated list of relevant candidate images for potential addition to a playlist.</p>                                                                                                                                                                                                                                                        |
| <p>[1.d] outputs a list identifying the other digital images retrieved based on their related information to select another digital image to add in said playlist when said another digital image is selected from other digital images as the candidates by the user,</p> | <p>Each of the Accused Samsung '198 Products includes a control module which outputs a list identifying the other digital images retrieved based on their related information to select another digital image to add in said playlist when said another digital image is selected from other digital images as the candidates by the user. <i>See</i> User Guide and Technical Specifications of the Accused Samsung '198 Products available at Samsung’s website showing that each of the devices includes a control module which outputs a list identifying the other digital images retrieved based on their related information to select another digital image to add in said playlist when said another digital image is selected from other digital images as the candidates by the user.</p> <p><b><u>People Album</u></b></p> |

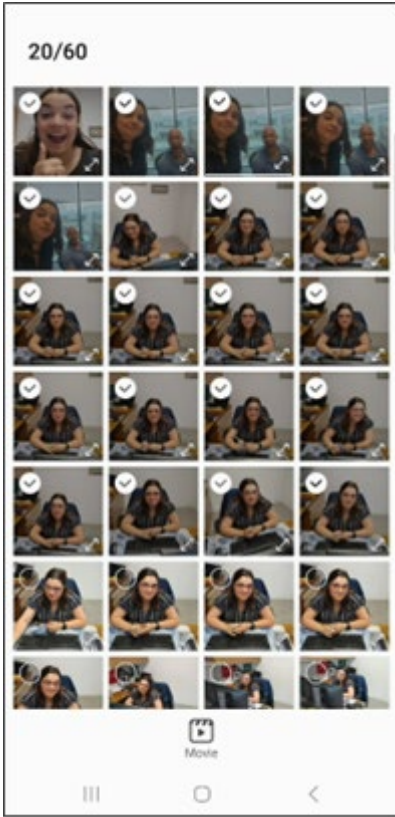

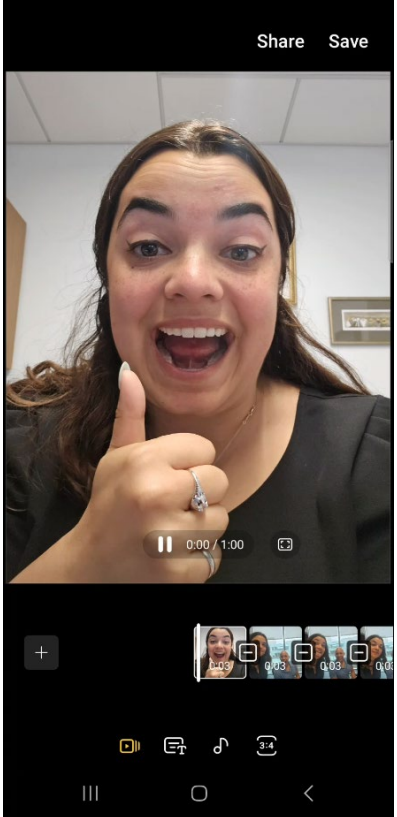

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <div data-bbox="611 277 1314 1036">  </div> <p data-bbox="611 1060 1969 1349">For example, a screenshot (shown on the left) from the Samsung Gallery app on a Samsung Galaxy S23 Ultra outputs a list identifying the other digital images retrieved (which were retrieved based on facial recognition as detailed in element [1.c]) by displaying a collection of photo thumbnails, specifically “28 items” associated with a recognized but unnamed person (represented by the large circular photo with a “?”). These “28 items” are presented as candidates for that person’s new album, which will function as the playlist. The user’s subsequent action from such a screen, typically naming or registering this person, selects these displayed candidates from the outputted list to be added to, and thereby form, said playlist (shown on the right)</p> <p data-bbox="611 1369 1969 1433">As an additional example, selecting “Courtney” results in displaying a list of digital images to generate a movie or slideshow:</p> |

|                           |  A screenshot of a mobile application interface. At the top, there is a back arrow and the name 'COURTNEY'. Below this is a circular profile picture. A white menu is overlaid on the right side of the screen, listing options: 'Edit', 'Edit name', 'Delete name', 'Merge people', 'Create', 'Start slideshow', and 'Remove from results'. Below the menu, there is a section titled 'Today' with a single photo of a woman. Further down, there is a section titled 'Jun 21' with a row of four photos of the same woman. At the bottom, there is a section titled 'Jun 7' with a grid of eight photos of the same woman. |  A screenshot of a mobile application interface. At the top, there is a back arrow, the name 'COURTNEY', a close button (X), and a menu icon (three dots). Below this is a circular profile picture. Under the profile picture, the name 'COURTNEY' is displayed, followed by '52 items'. Below this, there is a section titled 'Today' with a single photo of a woman. Further down, there is a section titled 'Jun 21' with a row of four photos of the same woman. A white overlay titled 'Create new' is positioned in the foreground, showing four options: 'Highlight reel' (with a play button icon), 'Movie' (with a film strip icon), 'GIF' (with a GIF icon), and 'Collage' (with a grid icon). Each option has a brief description below it. |

|                           | <p><u>Samsung TV Plus</u></p>  <p>The screenshot shows the Samsung TV Plus app interface. At the top, the status bar displays the time 10:11, signal strength, and battery level at 75%. The app header shows the 'Samsung TV Plus' logo and a menu icon. Below the header is a large dark area with the 'WELLBUSA ENTERTAINMENT' logo. The main content area features a movie poster for 'Alienoid' with the title 'Alienoid' to its right. Below the poster are buttons for '+ Watch list' and '&lt; Share'. The movie details section includes the year '2022', rating 'TV-14', duration '142 mins', and genres 'Action, Fantasy, Adventure, Science Fiction'. It also lists 'Subtitles: English' and a synopsis: 'Gurus in the late Goryeo dynasty try to obtain a fabled, holy sword, and humans in 2022 hunt down an alien prisoner that is locked in a human's body. The two parties cross paths when a time-traveling ...'. Below the synopsis is a 'More' link. The director is listed as 'Choi Dong-choon'. The cast includes 'Kim Tae-ri, Kim Woo-bin, So Ji-sub, So Ji-sup, Ryu Jun-yeol, Yum Jung-ah, Kim Eui-sung, Lee Ha-nee, Jo Woo-jin'. At the bottom, there is a 'More like this' section with three movie posters: 'The Moon', 'Minotaur', and 'Arahan'.</p> <p>For example, after the control module retrieves candidate shows or movies (as detailed in our analysis of [1.c]), the Samsung TV Plus application on a Samsung Galaxy S25 outputs a list identifying these other digital images retrieved. A screenshot, such as one showing the detail page for a selected movie like “Alienoid” which then displays a “More like this” section demonstrates this. The “More like this” section,</p> |

|                           | <p>The main “Home” screen provides an example of this functionality. On this screen, the <b>playlist</b> is the “My List” row, which contains content the user has personally selected. A separate recommendation row, such as “Top 10 TV Shows in the U.S. Today,” functions as the <b>list of candidates</b>. Both lists are shown on the same display along with a <b>plurality of digital images</b> (the video thumbnails) and a <b>plurality of related information</b> (the row titles).</p> <p><u>My Netflix Tab</u></p> |

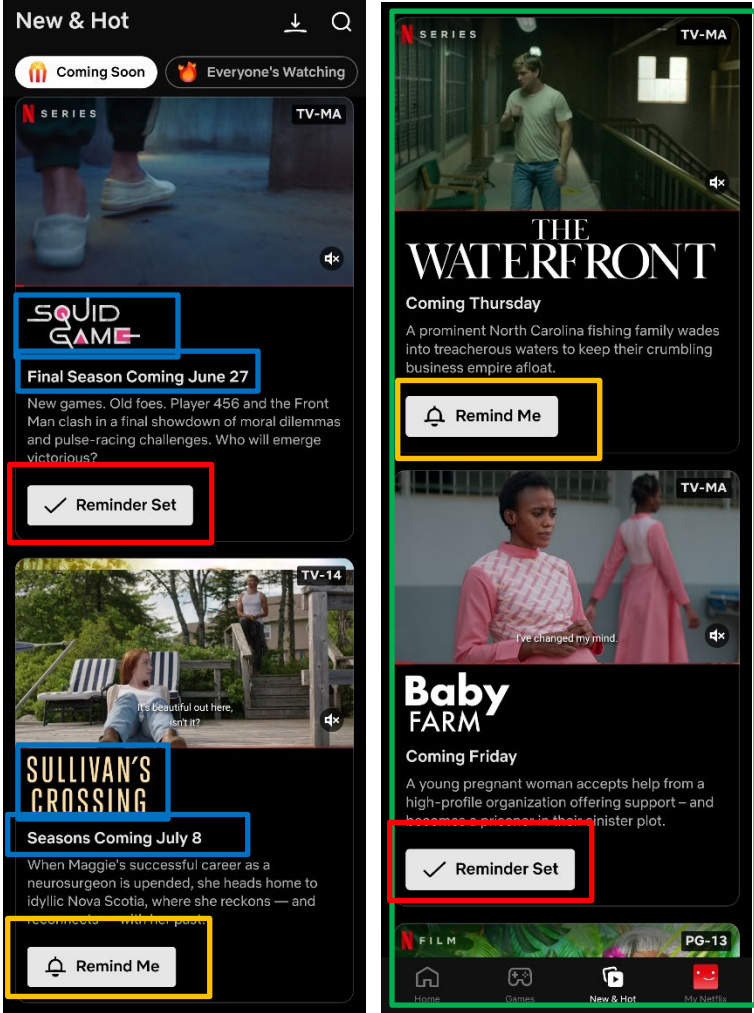

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           |  <p>The screenshot displays the Netflix mobile app interface for a user named Tyler. The interface is divided into several sections:</p> <ul style="list-style-type: none"> <li><b>My Netflix:</b> Shows the user's profile (Tyler) and a list of notifications, including "GREY'S ANATOMY" (Season 21, Jun 15) and "TITAN" (The OceanGate Submersible Disaster, Jun 14).</li> <li><b>Downloads:</b> A section highlighted with a red box, showing a list of downloaded content. It includes "SIRENS" (5 Episodes, Recently Added), "TITAN" (1h 51m, Recently Added), and "IPPON" (1 Episode, Recently Added).</li> <li><b>TV Shows &amp; Movies You've Liked:</b> Shows a list of liked content, including "WEDNESDAY".</li> <li><b>My List:</b> A section showing a list of movies and TV shows, including "SQUID GAME", "VIRGIN RIVER", and "THE GENTLEMEN".</li> <li><b>Trailers You've Watched:</b> A section showing a list of trailers, including "GINNY &amp; GEORGIA", "ANIMAL KINGDOM", and "BLOOD ZEUS".</li> <li><b>Reminders You've Set:</b> A section showing a list of reminders, including "SQUID GAME", "MADEA'S DESTINATION WEDDING", and "Baby FARM".</li> <li><b>Continue Watching:</b> A section highlighted with a green box, showing a list of content that the user has started watching but not finished. It includes "EMILY IN PARIS" (S1:E4), "IPPON" (S1:E2), and "DRAFT DAY" (1h 50m).</li> <li><b>Go Behind the Scenes:</b> A section highlighted with a yellow box, showing a list of exclusive content, including "EMILY IN PARIS", "PAUL TYSO", and "LINCOLN LAWYER".</li> <li><b>Turn on Downloads for You:</b> A section showing a promotional message about downloading content for offline viewing, with a "Set Up" button.</li> </ul> |

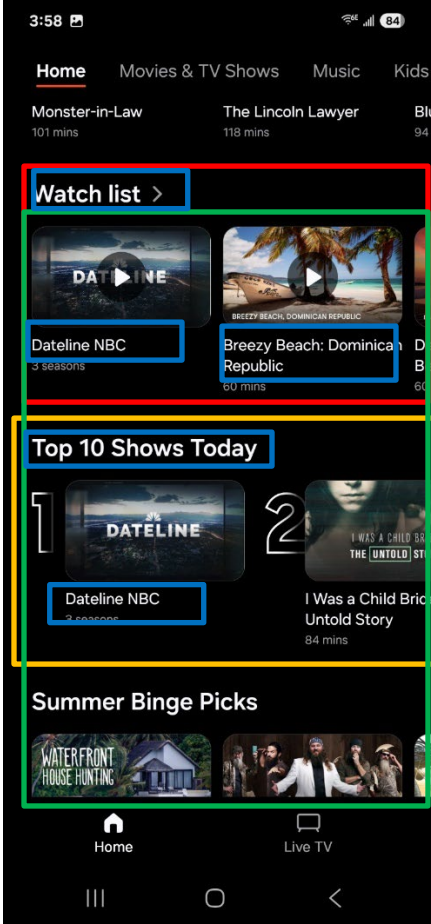

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT  
NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p>The “My Netflix” tab provides an example, where several different user-specific rows on the same screen can be defined as the playlist. For instance, the “Downloads” row can be considered the <b>playlist</b>, containing content the user chose to download. Another row on the same screen, such as the recommendation row “Go Behind The Scenes,” can be the <b>list of candidates</b>. As another example on the same screen, the “Continue Watching” row can be the <b>playlist</b>, with its content added based on viewing history, while another row again serves as the <b>list of candidates</b>. The numerous thumbnails provide the <b>plurality of images</b>, and the distinct row titles (“Downloads,” “Continue Watching”) provide the <b>plurality of related information</b>.</p> <p><u>New &amp; Hot Tab</u></p> |

# APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           |  <p>The “New &amp; Hot” tab also demonstrates all four components on a single screen. The <b>playlist</b> is the collection of shows for which a user has set a reminder, indicated by “Reminder Set.” The <b>list of candidates</b> is the group of other shows on the screen that still display a “Remind Me” button. The screen</p> |

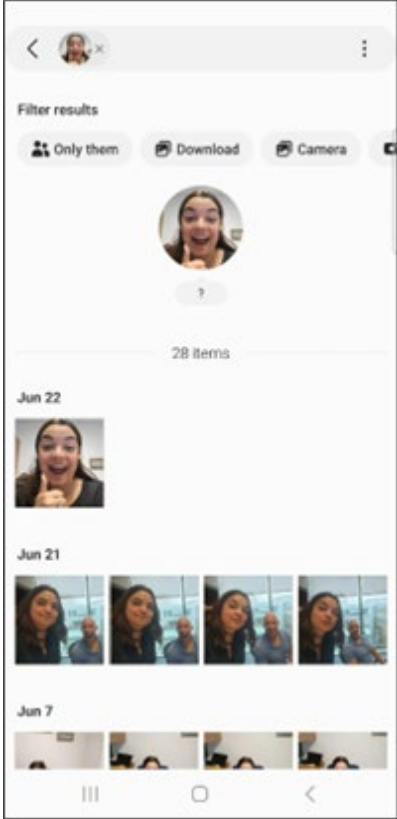

APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| U.S. Patent No. 8,180,198                                                                                                                                                | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                                                                                          | <p>“Breezy Beach: Dominican Republic”. It simultaneously outputs the <b>list of candidates</b>, which is another row such as the “Top 10 Shows Today”. The screen also contains a <b>plurality of digital images</b>, in the form of numerous video thumbnails, and a <b>plurality of related information</b>, shown through the video titles and the names of the category rows. All four components are present on the same display, with a show like “Dateline NBC” notably appearing in both the playlist and a candidate list.</p> <p><u>Doctrine of Equivalents</u></p> <p>To the extent Samsung argues that this limitation is not literally met in any Accused Samsung '198 Products, Maxell asserts that this limitation is met under the doctrine of equivalents because the identified functionality matches the function, way, and result of the claimed element and, to the extent there is a difference, the difference is insubstantial. For example, to the extent that Samsung argues these applications do not output a playlist and a list of candidates on the “same display” because a user may have to scroll to view both rows, the use of a single, scrollable interface is an equivalent implementation. Using this interface performs substantially the same function—outputting all necessary information for a user to manage a playlist—in substantially the same way—by presenting them together in a single, continuous screen space. This achieves substantially the same result: allowing the user to view and select from a list of candidates to add to a playlist within one unified interface.</p> |
| <p>[1.f] outputs one of the other digital images to be positioned next to another one of the other digital images in said list identifying the other digital images.</p> | <p>Each of the Accused Samsung '198 Products includes a control module which outputs one of the other digital images to be positioned next to another one of the other digital images in said list identifying the other digital images. <i>See</i> User Guide and Technical Specifications of the Accused Samsung '198 Products available at Samsung’s website showing that each of the devices includes a control module which outputs one of the other digital images to be positioned next to another one of the other digital images in said list identifying the other digital images.</p> <p><u>People Album</u></p> <p><u>Face Grouping</u></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                     |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <div data-bbox="611 277 972 1289"> </div> <div data-bbox="989 277 1350 1289"> </div> <p data-bbox="611 1312 1919 1382">The “New &amp; Hot” tab provides another example, where candidate shows are arranged in a vertical list, positioning one thumbnail directly above the next.</p> |

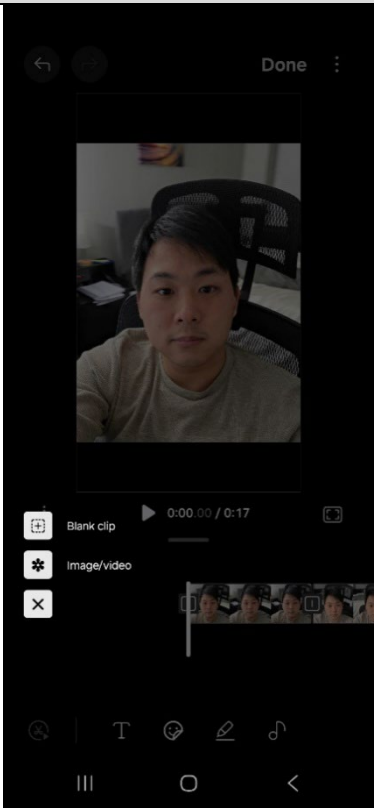

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p><b><u>Samsung TV Plus</u></b></p>  <p>For example, the Samsung TV Plus application on a Samsung Galaxy S25 demonstrates this element. When the application outputs a “list identifying the other digital images” (the candidates)—such as the “Top 10 Shows Today” row—it outputs one of the other digital images to be positioned next to another. Specifically, the thumbnails for the candidate shows or movies within these rows are arranged horizontally. For instance, in the “Top 10 Shows Today” row, the thumbnail for “Dateline NBC” is positioned directly next to the thumbnail for “I Was a Child Bride: The Untold Story.” This horizontal layout inherently places</p> |

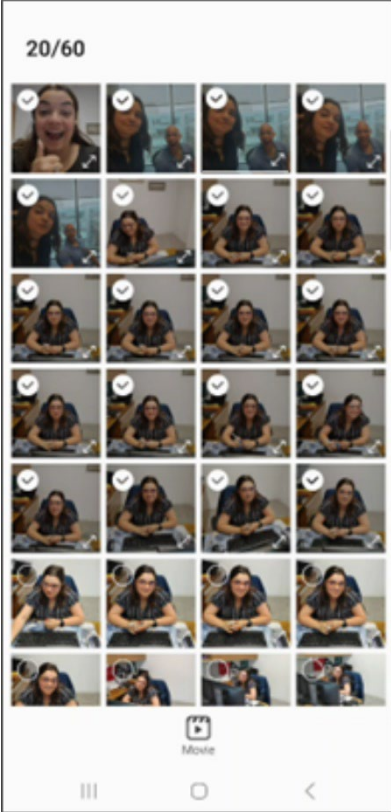

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198                                                                                                                                                                                                      | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                                                                                                                                                | <p>each candidate image directly adjacent to other candidate images within that list, satisfying the claimed spatial relationship.</p> <p><u>Doctrine of Equivalents</u></p> <p>To the extent Samsung argues that this limitation is not literally met in any Accused Samsung '198 Products, Maxell asserts that this limitation is met under the doctrine of equivalents because the identified functionality matches the function, way, and result of the claimed element and, to the extent there is a difference, the difference is insubstantial. For example, to the extent that Samsung argues that images in a list with spacing or in a vertical arrangement are not “positioned next to another”, the arrangement in a visually adjacent grid or row is an equivalent implementation. Using this arrangement performs substantially the same function, which is to display candidate images in an organized, adjacent manner. It does so in substantially the same way, by arranging them in a grid or row that indicates a clear spatial relationship for easy Browse. This achieves substantially the same result: presenting a list of candidates where images are positioned relative to each other for easy Browse and selection.</p> |
| <p>[4.] The digital image recording/reproduction apparatus according to claim 1, wherein a reduced image is displayed on said display module as the information showing the digital image selected by said control module.</p> | <p>Each of the Accused Samsung '198 Products is the digital image recording/reproduction apparatus according to claim 1, wherein a reduced image is displayed on said display module as the information showing the digital image selected by said control module. <i>See</i> User Guide and Technical Specifications of the Accused Samsung '198 Products available at Samsung’s website showing that each of the devices is the digital image recording/reproduction apparatus according to claim 1, wherein a reduced image is displayed on said display module as the information showing the digital image selected by said control module.</p> <p><u>People Album</u></p> <p>For example, the Gallery app displays a reduced image as the information showing a digital image selected by the control module. The movie editor screen displays a timeline of reduced images, where each thumbnail represents a video clip selected by the control module for the movie playlist.</p>                                                                                                                                                                                                                                                           |

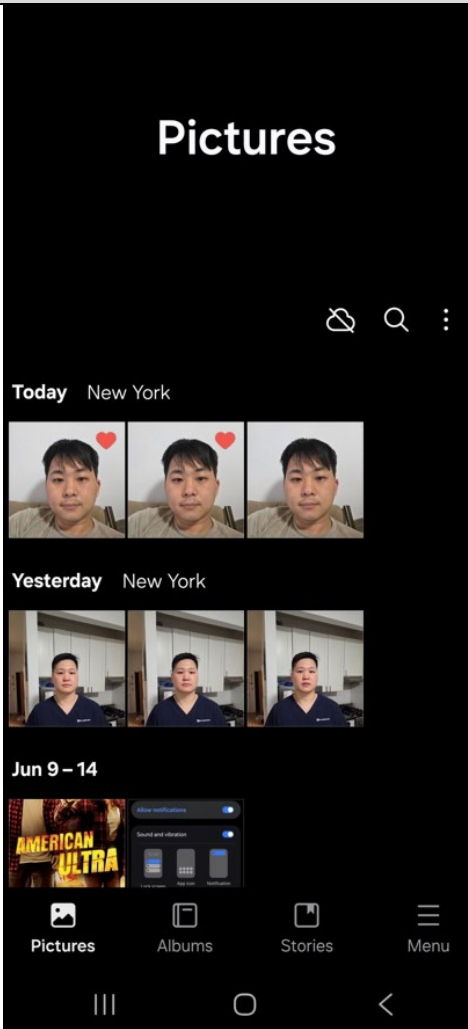

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                      |

**APPENDIX 4: AUGUST 12, 2025 INFRINGEMENT CONTENTIONS APPLYING CLAIMS 1 AND 4 OF U.S. PATENT NO. 8,180,198 TO ACCUSED SAMSUNG '198 PRODUCTS**

| U.S. Patent No. 8,180,198 | Exemplary Evidence of Infringement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | <p>For example, the Samsung TV Plus application displays reduced images to show videos selected by the control module. On its Home screen, the videos selected for both the “Watch list” (the playlist) and the “Top 10 Shows Today” (the candidate list) are displayed as reduced images in the form of video thumbnails.</p>  <p>The screenshot shows the Samsung TV Plus app interface. At the top, there are navigation tabs: Home, Movies &amp; TV Shows, Music, and Kids. Below these, there are sections for 'Watch list' and 'Top 10 Shows Today'. The 'Watch list' section displays two video thumbnails: 'Dateline NBC' (3 seasons) and 'Breezy Beach: Dominican Republic' (60 mins). The 'Top 10 Shows Today' section displays two video thumbnails: 'Dateline NBC' (3 seasons) and 'I Was a Child Bride Untold Story' (84 mins). At the bottom, there is a 'Summer Binge Picks' section with a video thumbnail for 'Waterfront House Hunting'. The bottom navigation bar shows 'Home' and 'Live TV' icons.</p> |
