S60 Platform: Camera Example with AutoFocus Support

description: This C++ application implements the basic features of the built-in camera using the On-board Camera API classes MCameraObserver and CCamera (supported from S60 2nd Edition onwards). Also auto focus is supported via an AF extension library provided in the package (supported in S60 3rd Edition, FP1).

type: Example

intended audience: Intermediate

S60 Platform: Camera Example with AutoFocus Support v2.2 Info

This C++ application implements the basic features of the built-in camera using the On-board Camera API classes MCameraObserver and CCamera (supported from S60 2nd Edition onwards). The example demonstrates view finding, zooming, shooting a still image, and saving it. Images are either captured in bitmap format and then converted to JPEG format, or directly in EXIF JPEG format (if supported by camera hardware).
