The terms and constructions set forth below are based on information currently available to the Parties. The Parties' investigation and analysis of prior art is ongoing, expert disclosures and expert discovery have not yet occurred, and fact discovery has not yet been completed. Accordingly, the Parties reserve the right to revise, amend, withdraw, and/or supplement the proposed constructions, including through claim construction briefing and/or to the extent further information becomes available through discovery, in light of Court rulings, and/or in view of clarified positions advanced by the Parties. To the extent that any Party has previously identified any claim limitations as indefinite or as having a construction but has not expressly identified them below, the Parties reserve the right to assert such arguments or constructions at an appropriate later stage of this proceeding.

To the extent that a Party has previously identified any of the below claim limitations as lacking written description, any citation to intrinsic evidence is provided solely for the limited purpose of demonstrating what the claim language would mean if the Court determines that written description exists. These citations do not waive, concede, or detract from the Party's written-description arguments, and the Parties reserve the right to assert such arguments at an appropriate later stage in the proceeding.

The Parties' identification of intrinsic and extrinsic evidence is preliminary. The Parties reserve their respective rights to supplement and/or amend their portions of the chart and to rebut any evidence cited by the other.
