A decade of reliable manufacturing solutions in the automotive industry

Flex today announced that its site in Guadalajara, Mexico, has maintained Ford's Q1 Certification for 10 consecutive years.

The award — the automaker's highest quality honor for suppliers — has been maintained by Flex's automotive team for consistently meeting and exceeding the automaker's stringent set of quality and performance requirements.

“

This 10-year milestone illustrates the success of our longstanding relationship with Ford to advance the promise of next-generation mobility and support Ford in its purpose to build a better world.

We appreciate the continued trust that Ford has placed in Flex to apply our advanced manufacturing expertise and discipline to enable them to deliver vehicles to market with the highest quality and resiliency required for the rapid technological advancements reshaping mobility.

— **Mike Thoeny, President, Automotive Business Group, Flex**

”

Ford's Q1 certification is awarded to suppliers who demonstrate excellence beyond ISO and TS certification requirements in critical areas including capable systems, continuous improvement, ongoing performance, and customer satisfaction.
