

DECLARATION OF DR. PAULO SHAKARIAN

I, Paulo Shakarian, hereby declare under penalty of perjury that the facts set forth herein are true and correct to the best of my knowledge and belief. If called as a witness, I can testify accurately to the matters discussed in this declaration.

1. My name is Paulo Shakarian and I have prepared this declaration at the request of Skysong Innovations, LLC (“Skysong”). I am the K.G. Tan Endowed Professor of Artificial Intelligence at Syracuse University where I direct the Leibniz Lab. I am a named inventor of U.S. Patent No. 11,275,900 (“’900 Patent”). My CV is attached as Appendix A.

2. My education and experience in Artificial Intelligence and Cybersecurity trace back to my military service. I am a graduate of the United States Military Academy at West Point, where I earned a Bachelor of Science degree in Computer Science with a Depth of Study in Information Assurance, and where I was commissioned as a Military Intelligence officer. I spent most of my military career stationed overseas and in Iraq, where I served two combat tours and earned the Bronze Star, an Army Commendation Medal for valor, and a Combat Action Badge, in addition to a foreign award for valor by the Iraqi National Police. Afterwards, I was selected to serve as a Military Fellow to the Defense Advanced Research Project Agency (“DARPA”), where the DARPA Director, Dr. Anthony

Tether, awarded me a Certificate of Achievement for my work in Artificial Intelligence. The Army then sent me to the University of Maryland, where I earned Master of Science and Doctor of Philosophy degrees in Computer Science under Prof. V.S. Subramanian, who has since held endowed chairs at Dartmouth University and Northwestern University. After my graduate education, I served as an Assistant Professor of Computer Science at the United States Military Academy at West Point, where I earned my second Meritorious Service Medal and was promoted to the rank of Major. By the time I completed my active duty as an Army officer, I had also earned several additional military awards, including a Presidential Unit Citation Award, a Meritorious Unit Citation Award, a National Defense Service Medal, an Iraq Campaign Medal (two stars), and a Global War on Terrorism Expeditionary Medal and Service Medals.

3. After leaving active duty, I served as Research Director at the School of Computing and AI at Arizona State University where I was also a tenured faculty member. My academic accomplishments include four best-paper awards, over 100 peer-reviewed articles, 13 issued patents, and 8 published books. My books include *Introduction to Cyber Warfare a Multidisciplinary Approach* which is utilized as required reading in and is still frequently cited by military cyber

warfare schools across the U.S. armed forces, including the Naval Postgraduate School.¹

4. I am also the former CEO and co-founder of Cyber Reconnaissance, Inc., a cyber security startup which raised over \$8 million in venture capital, obtained 80 paying customers, and was successfully acquired in 2022.

5. During my career, I have secured over \$7 million in grant funding from a wide range of government and industry sponsors that included highly competitive grants such as the AFOSR Young Investigator Award and multiple awards from DARPA, IARPA, ARPA-H, ARO, and ONR. My cyber security research work was sponsored by the Office of the Director of National Intelligence, **Intelligence Advanced Research Projects Activity (IARPA)**, and specifically, the **Cyber-Attack Automated Unconventional Sensor Environment (CAUSE)** program.² I secured a grant of approximately \$1 million for this work in the 2016–2019 time frame, for which I was the principal investigator. Closely technologically related, I was also the principal investigator for several projects sponsored by **Naval Enterprise Partnership Teaming with Universities for National Excellence (NEPTUNE)** program in the **Office of Naval Research (ONR)**.³ The relevant projects were “NEPTUNE,” ONR, from 2015–2018, and “Next

¹ https://faculty.nps.edu/ncrowe/natodistinct_final.htm (current exemplary cite to my work).

² <https://www.iarpa.gov/research-programs/cause>.

³ <https://www.onr.navy.mil/organization/departments/code-33/division-333/neptune>.

Generation Energy Technologies and Systems for Civilian and Military Applications,” ONR, from 2016–2019. These projects heavily focus on technology that is deemed mission critical to national cyber-security efforts.

6. The ’900 Patent relates to my research on automatically classifying criminal activities arising from cyber environments. In particular, it discloses systems and methods that use real-world data from dark-web/deep-web forums to assign hierarchical tags to discussion topics so that defenders can organize and understand underground activity at scale. *See, e.g.*, EX1001, 1:24-2:19, 3:3-35.

7. In approximately late 2018 or early 2019, I attended the RSA Conference⁴ in San Francisco, California, which is a prominent cybersecurity event. At the conference, I met with representatives from CrowdStrike, Inc., including Dmitri Alperovich (Co-Founder and Chief Technology Officer), Justin Weissert (Director of Proactive Services), and Mike Sullivan (Vice President of Global Financial Services). During this meeting, I briefed the CrowdStrike representatives on my cybersecurity technologies, including those later claimed in the ’900 Patent (and related work such as the ’385 Patent and ’897 Patent), and disclosed technical details of my research on AI-driven, market-informed threat mitigation and darknet/deep-web analytics. At that time, related applications

⁴ For RSA Conference USA 2019 *See* <https://www.rsaconference.com/library/blog/welcome-to-rsa-conference-usa-2019>

(the '385 patent application⁵) had already been publicly published and were patent-pending.

8. At the request of CrowdStrike, I discussed application of my inventions, including those of the '900 Patent, with Mr. Dmitri Alperovich, Mr. Justin Weissert, and Mr. Mike Sullivan. We specifically discussed the relevance of my technology to CrowdStrike's Falcon platform and services, including proactive offerings (e.g., pre-breach exposure/vulnerability-focused activities) and use cases in financial services.

9. I disclosed to Mr. Dmitri Alperovich, Mr. Justin Weissert, and Mr. Mike Sullivan that these disclosures included confidential and patent-pending subject matter, and I explicitly informed CrowdStrike of efforts to patent my inventions. During the meeting, I used the same slide materials that I typically employ when briefing companies, including CrowdStrike. Representative examples of these slides are included in Appendix B. The CrowdStrike representatives knew me personally and were familiar with my company, Cyber Reconnaissance, Inc., which commercializes cybersecurity technologies derived from my research at Arizona State University, including those related to the

⁵ U.S. Patent Application No. 15/362,730, published as US20170155677A1 on June 1, 2017, claiming priority to Provisional Application No. 62/261,200 filed November 30, 2015.

inventions claimed in the '900 Patent. Thus, CrowdStrike was aware of the inventions claimed in the '900 Patent since at least early 2019.

10. Although I offered, CrowdStrike did not pursue licensing or collaboration discussions. CrowdStrike did not indicate at any time that it intended to challenge the patentability of my inventions or the validity of the patents covering my inventions.

11. My research focuses on proactive cybersecurity measures, such as the '900 Patent's automated classification framework for organizing underground-forum content. This technology is new and state-of-the-art in a field that is very rapidly evolving. Focusing time, attention, and resources on repetitive reexamination or review proceedings is detrimental to further important research and development efforts in this area, which, in my opinion, is of extreme importance to U.S. national security and military defense strategies. The institution of such proceedings alone, even if eventually unsuccessful, greatly deters investment in these ASU-derived critical national defense technologies.

12. In addition to its technical and national security significance, the inventions disclosed in the '900 Patent have achieved meaningful commercial success that, in my view, is directly attributable to the patented technology. In January 2016, I co-founded IntelliSpyre Inc., which was renamed Cyber Reconnaissance, Inc. (d/b/a "CYR3CON") in 2017. CYR3CON was formed to

commercialize technologies from the asserted cybersecurity patent portfolio, including the '900 Patent as well as inventions claimed in U.S. Patent Nos. 10,599,897 and 10,313,385. These technologies were implemented together in CYR3CON's PR1ORITY platform and its supporting backend. PR1ORITY was deployed through multiple interfaces, including a web-based dashboard ("SCR33N"), a direct API, and secure data feeds through Amazon S3, to deliver predictive cyber-threat intelligence to enterprise and OEM customers.

13. CYR3CON's customer base included major enterprise organizations such as [REDACTED]

[REDACTED] In addition, CYR3CON technology was licensed to numerous original-equipment-manufacturer (OEM) and service partners, including [REDACTED]

[REDACTED]. These companies used CYR3CON's software components as integral parts of their own cybersecurity offerings, reflecting widespread industry adoption of the patented technology.

14. From 2018 through 2021, CYR3CON generated approximately [REDACTED] [REDACTED] prior to its acquisition. The company raised over [REDACTED] [REDACTED] CYR3CON's assets and technology—including the PR1ORITY platform built on the '900 Patent—

were ultimately acquired by Cyber Security Works (now Securin Inc.) in a private sale. These facts demonstrate not only commercial traction but also independent industry recognition of the value of the patented technology.

15. The commercial success of PR1ORITY and related CYR3CON products is directly tied to the patented features of the '900 Patent. The hierarchical tagging and automated classification of underground-forum content were critical to the system's ability to identify emerging threats and inform predictive cyber-risk assessments. To my knowledge, no comparable commercial product offered equivalent functionality at the time.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct, and that all statements made of my own knowledge are true and that all statements made on information and belief are believed to be true. I understand that willful false statements are punishable by fine or imprisonment or both under Section 1001 of Title 18 of the U.S. Code.

Paulo Shakarian is the K.G. Tan Endowed Professor of Artificial Intelligence at Syracuse University where he directs the Leibniz Lab. Shakarian has made notable contributions in the areas of logic programming, neurosymbolic AI, security, and data mining. His academic accomplishments include four best-paper awards, over 100 peer-reviewed articles, 12 issued patents, and 8 published books. Shakarian has secured over \$7 million in grant funding from a wide range of government and industry sponsors that included highly competitive grants such as the AFOSR Young Investigator Award and multiple awards from DARPA, IARPA, ARO, and ONR. Paulo's work on the use of AI methods to predict software vulnerabilities was commercialized in a startup that raised over \$8 million in venture capital, obtained 80 paying customers, and was acquired in 2022. Previously, Shakarian held fellowships with DARPA and the New America Foundation, a faculty position at the U.S. Military Academy (West Point), and served as Research Director at the School of Computing and AI at Arizona State University where he was also tenured faculty. Prior to his academic career, he was a field-grade officer in the U.S. Army where he served two combat tours in Iraq earning the Bronze Star and Army Commendation Medal with Valor Device. He holds a Ph.D. and M.S. in computer science from the University of Maryland (College Park) and a B.S. in computer science from the U.S. Military Academy (West Point).

Shakarian is also an educator and has taught numerous courses across all modalities (in-person, online, and hybrid) and of all sizes (from courses consisting of less than 10 students to courses with over 200 hundred). Courses taught include Introduction to AI (both undergraduate and graduate), Data Mining (graduate), Machine Learning (undergraduate), Introduction to Programming (undergraduate), and range of special topics at all levels. Shakarian serve as Course Director for undergraduate AI and Machine Learning courses at ASU where he redesigned both courses from scratch to support learning across multiple modalities, and he oversees other faculty that have adopted the course. He has personally taught over 700 undergraduate students machine learning since 2022, and both courses have maintained high ratings from students since inception. Shakarian has also made many of his lectures available along with those of his colleagues on the Neuro Symbolic Channel (YouTube) that he founded in 2022 and has over 4,400 subscribers.

Shakarian's graduate research students have gained significant attention. He has graduated six Ph.D. students, two of which now have academic positions. The others have taken positions as some of the top technology firms focused on AI, including Google DeepMind, Amazon AGI, Palantir, and Microsoft. Many of Shakarian's undergraduate researchers have achieved great success – with two undergraduates earning NSF Graduate Research Fellowships and two undergraduates who did research with Shakarian eventually taking faculty positions.

PROFESSIONAL EXPERIENCE:

- 2025-Present **K.G. Tan Endowed Professor of Artificial Intelligence**,
Syracuse University, Syracuse NY
- 2025-Present **Full Professor (w. tenure)**, Syracuse University, Syracuse NY
- 2025-Present **Adjutant Professor**, Arizona State University, Tempe AZ
- 2024-2025 **Research Director**, School for Computing and Augmented Intelligence,
Arizona State University, Tempe, AZ
- Also represented the School for Computing and Augmented Intelligence on the Dean's Research advisory council from 2022-2023 before the role was elevated to a director-level position.
- 2020-2025 **Associate Professor (w. tenure)**, Arizona State University, Tempe AZ
- Course director, CSE475 (Machine Learning) 2022-2025
 - Course director, CSE471 (Artificial Intelligence) 2023-2025
- 2016-2022 **CEO and Co-Founder**, Cyber Reconnaissance, Inc.
- Raised \$8 million in venture capital
 - Obtained over 80 paying customers
 - Acquired in 2022 by Cyber Security Works
- 2014-2020 **Assistant Professor**, Arizona State University, Tempe AZ
- Served as rotating Fulton Entrepreneurial Professor (2016-2018)
 - Served as a rotating Fellow at New America Foundation (2017)
 - Selected for ASU Leadership Academy (2016)
- 2011-2014 **Assistant Professor**, U.S. Military Academy, West Point NY
- 2008-2011 **Graduate Research Assistant**, University of Maryland,
College Park, MD, 2008-2011
- 2007 **DARPA Military Fellow**, DARPA Service Chiefs' Fellows Program
- 2002-2014 **Commissioned Officer**, U.S. Army (with service in Germany, Iraq,
Arizona, Maryland, and New York)
- Combat tour with First Infantry Division to Baghdad, Iraq (13 months), (2006-2007)
 - Combat tour with First Armor Division to Baghdad, Iraq (14 months), (2003-2004)
 - Anti-Terrorism Force Protection Level 2 course (2007)
 - Military Intelligence Career and Basic courses (2002, 2008)

EDUCATION:

University of Maryland College Park, Computer Science, Ph.D., 2011
University of Maryland College Park, Computer Science, Master of Science, 2009
U.S. Military Academy, Computer Science, Bachelor of Science, 2002

PROFESSIONAL ADVISORY BOARDS:

- Advisor, Cuse AI (Syracuse student group) (2025-Present)
- Member, Arizona Technology Council Artificial Intelligence Committee (2023-2025)
- Member, Arizona Cyber Team, Emerging Technologies subgroup (2018-2021)
- Member, Arizona Technology Council Committee of Cybersecurity (2018-2021)
- Advisor, Fulton Student Veterans Organization (ASU) (2016-2021)

AWARDS AND ACCOLADES:

- Editor's Choice Article (Cover article), Big Data and Cognitive Computing (Q1 Journal), "Argumentation-based Query Answering under Uncertainty with Application to Cybersecurity," 2022.
- Best Presentation, IEEE CCWC 2020 for "Inductive and Deductive Reasoning to Assist in Cyber-Attack Prediction"
- Best Paper, IEEE ICDIS-2019 for "An End-to-End Framework to Identify Pathogenic Social Media Accounts on Twitter"
- Best Paper, IEEE ICDIS-2018 for "Mining Key-Hackers on Darkweb Forums"
- Best Paper, IEEE ASONAM-2016 (FOSINT-SI track) for "Argumentation Models for Cyber Attribution"
- One of 100 scientists selected for DARPA AI Forward 2023
- Paper "Darknet and deepnet mining for proactive cybersecurity threat intelligence" was the second most cited article of the IEEE ISI conference in its 14 year history (2023)
- Paper "A review of evolutionary graph theory with applications to game theory" was the most cited article of the Elsevier journal *BioSystems* (2017)
- MIT Technology Review "[Best of 2013](#)" (2013) for "A Scalable Heuristic for Viral Marketing Under the Tipping Model"
 - selected as one of 12 academic papers uploaded to arXiv in 2013 - selected from across all scientific disciplines
- Best paper nomination, KDD 2015 for "Early Identification of Violent Criminal Gang Members"
- Best paper nomination, ASONAM 2012 for "Large Social Networks can be Targeted for Viral Marketing with Small Seed Sets"
- AFOSR [Young Investigator Award](#) (2015)
 - One of 59 funded proposals (over 200 proposals submitted)
- Co-Principal Investigator for a DoD Minerva award (2015)
 - One of 11 teams awarded the grant (297 proposals submitted)
- Defense University Research Instrumentation Program (DURIP) award (2024 and 2016)
 - 2024: [one of 112 funded proposals](#)
 - 2016: one of 176 funded proposals (622 submitted)
- Finalist, Skysong Venture Challenge, 2023 (\$25,000 investment award for company BAT, LLC)
- State of Arizona EmergeAZ grant 2021 (\$50K prize for Cyber Reconnaissance, Inc.)
- Winner, Trumpf Venture Challenge, 2019 (\$1M investment for Cyber Reconnaissance, Inc.)

- Finalist, CISO choice awards (2020)
- [Finalist for the Arizona Technology Council's "Best Startup" award](#) (2017)
- Finalist [for PwC's Most Promising Company award](#) (2017)
- Winner, [Defense Innovation Technology Challenge](#) (2017)
- Semi-Finalist, [Cisco Innovation Grand Challenge](#) (2016)
- I-Corps grant award (2016)
- Named a [KDD Rising Stars](#) by Microsoft Research Asia (2016)
- DARPA Service Chiefs' Fellowship (2007)
 - selected as one of four military officers from FORCECOM
- ASU Leadership Academy (2016)
 - Selected through a nomination process
- Winner, Lorenz e-Science 2019 (co-author with Vincent Lengkeek, Roy Lindelauf, Arnout van de Rijt, and V.S. Subrahmanian)
- Selected for Innovation Showcase at [TechConnect 2016](#) for invention "Improved Malware Detection Technology".
- Military Awards
 - Several awards for military service not related to scientific or academic contributions including the Bronze Star (2007), the Army Commendation Medal for Valor (2007), and the Combat Action Badge (2005)
 - Meritorious Service Medal (2014)
 - awarded by West Point "For exceptionally meritorious service as an Assistant Professor in the Dept. of Electrical Engineering and Computer Science."

CURRENT GRANT AWARDS:

- Principle Investigator for Syracuse subcontract of "MINDSET: Modeling Intelligent Detection System using Expert Thoughts," ARPA-H (UPGRADE program), Phase 1 for the Syracuse subaward is \$517K).
- Principle Investigator for "Reasoning about Machine Learning," ARO, \$500K (single investigator), 2023-2026.
- Co-PI for CONNECT, DARPA, \$180K of a \$684K award, (Prime: Arizona State)2025.
- Principle Investigator for DURIP "Computational Infrastructure for DoD-Focused Metacognitive and Neurosymbolic Artificial Intelligence Research," ARO, \$245K, 2025.
 - [Public announcement from the DoD](#)

PREVIOUS GRANT AWARDS:

- Large grant (\$100K+) as PI:
 - Principle Investigator for MCAI (Metacognitive Composable AI), DARPA \$238K, 2024-2025.
 - Principle Investigator for "Reasoning about Global Supply Networks," ONR, \$559K (single investigator), 2023-2025.
 - Principle Investigator for "AI Enabled Emergency Management and Preparedness," State of Arizona, \$1.7M, 2025-2028. (Led proposal team to win

- award, turned over PI leadership due to departure from ASU; remained involved as a consultant/advisor)
- Principle Investigator for “AI Pilot Assist – New Technology Exploration,” Honeywell, \$135K, 2025 (includes \$60K in matching funds from ASU). (Led proposal team to win award, turned over PI leadership due to departure from ASU; remained involved as a consultant/advisor)
 - Principle Investigator for “Transferable Agent Learning using Neuro Symbolic Methods,” MADE Science and Technology Center, co-funded by the Arizona New Economic Initiative and SSCI, \$156K (2 years), 2023-2025.
 - Principle Investigator for “Seeding System1-System2 Strengthening of AI with Application to Disaster Decision Support,” ASU internal funding, \$150K (1 year), 2024-2025.
 - Principle Investigator (ASU team, sub to Leidos) for “Hidden Activity Signal and Trajectory Anomaly Characterization (HAYSTAC),” IARPA, \$238K, 2023-2024.
 - Principle Investigator (of sub-prime to both USC ISI and Leidos) for IARPA CAUSE Phase II program, \$472K (portion for sub), 2018-2019.
 - Principle Investigator (of sub-prime to USC ISI) for IARPA CAUSE Phase I program, \$623K (portion to sub), 2016-2018.
 - Principal Investigator for “Understanding Social Influence without Markov Assumptions,” ARO Single Investigator Program, \$469K, 2015-2018.
 - Principal Investigator for “Reasoning about Cyber-Attribution,” ONR, \$400K, 2015-2018.
 - Principal Investigator for “Toward Anti-Inhibitory Influence of Online Social Networks,” USAFOSR (**Young Investigator Award**) \$354K, 2015-2018.
 - Principal Investigator for “Viral Marketing for Social Networks” USAF A2II, \$100K, 2013-2014
 - Principal Investigator for “Combinatorial and Scalable Initiation in Complex Networks,” ARO Single Investigator Program, project 2GDATXR042, \$249K, 2012-2014.
- Large grants as Co-PI or senior personnel:
 - Co-Principal Investigator for “New Analytics for Measuring and Countering Social Influence and Persuasion of Extremist Groups” DoD (**Minerva**), \$1.2M (total, over multiple investigators), 2015-2018.
 - Senior Personnel, “Crisis and Collective Problem-Solving on the Darkweb: Understanding Crisis Inform,” ARO, \$121K, 2019-2023.
 - Senior Personnel, “Next Generation Energy Technologies and Systems for Civilian and Military Applications,” ONR, \$260K, 2016-2019.
 - Senior Personnel “NEPTUNE,” ONR, \$210K, 2015-2018.
 - Small Grants and Gifts:
 - Received \$40K in donated EPYC processors from AMD (2025).
 - Principle Investigator for “Perceptual Introspection,” Cox Communications, \$50K, (1 year) 2023-2024.
 - Principle Investigator for “Workshop on Metacognitive Prediction of AI Behavior,” Army Research Office, \$30K (2023).

- Principle Investigator (ASU team, sub to Charles River Analytics) for “Explainable AI for Complex Decision Making for Command and Control in MDO (STTR),” Army Research Office, \$73K (Phase I, ASU portion, 2023).
- Principle Investigator, State of Arizona [EmergeAZ](#) grant \$50K, 2021.
- Senior Personnel, “Ideological Techniques and Operational Procedures: Analyzing the Tactics of Propaganda and Disinformation,” \$49K (total award \$497K), DoS, 2018-2019.
- Principle Investigator for “Commercialization of Social Influence Algorithms for Information Operations”, DoD @ I-Corps grant, \$70K, 2016-2017.
- Principle Investigator for “High-memory workstations in support of cyber-socio research,” ARO DURIP, \$52K, 2016.
- Principle Investigator for “Undergraduate and High School Network Science Education,” ARO, \$6K, 2016.
- Principal Investigator for “Arabic-Language Extremist Darknet Study,” ASU Global Security Initiative (GSI), \$80K, 2016.
- Principal Investigator for “Behavioral Analysis of Hacking Groups,” ASU Global Security Initiative (GSI), \$74K, 2015.
- Principal Investigator, DARPA UROP program, R.0004972.001, \$21K, 2013-2014
- Consultant (to the Program Manager), “Integrated Cognitive-Neuroscience Architectures for Understanding Sensemaking (ICArUS)” IARPA, 2012-2014.
- Principal Investigator for “Landowner-Red (LOR),” DoD project N4175613MP50287, \$50K, 2013.
- Principal Investigator for “Searching Huge Attribute and Relational Knowledgebases (SHARK),” DoD project N4175613MP50285, \$50K, 2013.
- Principal Investigator for “Allocation of Special Forces Resources in a COIN Environment,” DoD project F1AF262025G001, \$23K, 2012.

KEYNOTE AND PLENARY PRESENTATIONS:

- 2025 P. Shakarian, *Toward Hybrid AI for Bot Detection*, **Keynote** talk at *Amazon Bot Busters Summit*, Aug. 22, 2025.
- 2023 P. Shakarian, *The New Challenges of Artificial Intelligence*, **Keynote** talk at *Cactuscon-11*, Mesa, AZ, Jan. 27, 2023.
- 2020 P. Shakarian, *Getting Ahead Of Hackers: Predicting The Next Exploit And Ramifications For The Software Supply Chain*, **Keynote** talk at SIP-CPS Symposium 2020 on Cross-Ministerial Strategic Innovation Promotion Program (SIP), Japan, Nov. 2020.
- 2019 P. Shakarian, *Proactive Cybersecurity*, IEEE ICDIS-2019, **Keynote** speaker
- 2017 P. Shakarian, *Leveraging Actionable Cyber Threat Intelligence from the Darkweb using Machine Learning*, StateFarm #doITdifferently, Dec. 2017, invited **keynote**.

- 2018 P. Shakarian, *Countering Cyber Threats with Machine Learning and Darkweb Threat Intelligence*, Future of Global Aerospace Market, 2018
- 2018 P. Shakarian, *Panel on DoD Research*, ASU Fulton Schools of Engineering, Jan. 2018.
- 2017 S. Geftic, R. Ayoub, P. Shakarian, Cutting Through the FUD Factor – the Reality of Machine Learning, ISC(2) ThinkTank (sponsored by Sophos), webinar, November 2017. 271 viewers. (invited panel)
- 2017 M. Almukaynizi, P. Shakarian, *Online Vulnerabilities and Exploits*, CactusCon, September, 2017.
- 2017 P. Shakarian (invited panelist for panel moderated by Rep. Tom O'Halleran), ASU Congressional Conference on Cybersecurity, August 2017.
- 2017 P. Shakarian, *Threat Intelligence*, ISC(2) Phoenix chapter meeting, August 2017.
- 2017 S. Merchant, P. Shakarian, [Scaling Up Network Security - Shifting Control Back to the Defenders](#), ISC(2) ThinkTank (sponsored by Gigamon), webinar, August 2017. 285 viewers. (invited panel)
- 2017 R. Leong, R. Los, P. Shakarian, [Machine Learning and Malware: What You Need to Know](#), ISC(2) ThinkTank (sponsored by McAfee), webinar, April 2017. 448 viewers. (invited panel)
- 2016 P. Shakarian, *Scaling to the Adversary: Machine Learning Driven Mining of Threat Intel from the Darkweb*, POC Security Conference, Seoul, Korea, Nov., 2016 (invited talk).
- 2016 P. Shakarian, *Toward a Threat-Centric Paradigm*, Army Cyber Talks, New York, NY, Sep. 2016.
- 2016 P. Shakarian, *Data-Driven Modeling and Reasoning About Cyber Adversaries*, Invited talk at Kings College, London, UK, June 2016.
- 2016 P. Shakarian, *Influence and Inhibition in Information Cascades*, EU RISE Workshop, Prague, Czech Republic, June 2016.
- 2016 P. Shakarian, *Cybersecurity Initiative Business – Policy Roundtable #11: The Darkweb with New America Fellow Dr. Paulo Shakarian*, New America Foundation, Washington D.C., June 2016.
- 2016 P. Shakarian, *Leveraging Game Theory and Machine Learning for Proactive Cyber Threat Intelligence*, CactusCon, May, 2016
- 2016 P. Shakarian, *Contemporary Cyber Threat Intelligence From the Deep and Dark Web*. Invited lecture to Microsoft IT Security, Apr. 2016.
- 2016 P. Shakarian, *Pre-reconnaissance Cyber Security Understanding Cyber Threats Before They Strike*. SERENE-RISC, Vancouver, Canada, Apr. 2016 (Invited lecture).
- 2016 P. Shakarian, *Diffusion in Social Networks*. NIMBioS, Knoxville, TN, Apr. 2016 (Invited lecture).
- 2015 P. Shakarian, *The Cyber Battlefield: Now and the Near Future*. Invited talks, ISC2, Phoenix Chapter, Phoenix, AZ, Oct. 2015
- 2015 P. Shakarian, *New Analytics for Cyber Security*. Invited Presentation for the Information Systems Security Association (ISSA) Phoenix Chapter, Tempe, Arizona, July 2015.
- 2015 P. Shakarian, *Malware Task Identification: A Data Driven Approach*. Invited Presentation to Microsoft, Redmond, Washington, June 2015.

- 2015 P. Shakarian, Predictive Mining in Social Systems. Invited Presentation at the University of Southern California (Information Sciences Institute), Marina Del Rey, California, June 2015.
- 2015 P. Shakarian, The Cyber Battlefield: Now and the Near Future. Invited Presentation DHS/START/MINERVA/SMA Technical Lecture Series, June 2015.
- 2015 P. Shakarian, The Cyber Battlefield: Now and the Near Future. Invited Presentation to the Danish Defense College, Copenhagen, Denmark, May 2015.
- 2015 P. Shakarian, Malware Task Identification. *CyberWest*, Phoenix, AZ, March, 2015.
- 2015 P. Shakarian, E. Nunes, Automatic identification of malware tasks. *CactusCon-15*, Tempe, AZ, March, 2015.
- 2014 P. Shakarian, Preparing for the New Threat Environment. Presentation to the U.S. Army Intelligence Center of Excellence, Ft. Huachuca, AZ, Dec. 2014.
- 2014 P. Shakarian, Cyber-Warfare. *ASU 4th Annual International Humanitarian Law Workshop*, Oct. 2014.
- 2014 P. Shakarian, Cascades in Complex Networks. Invited Presentation at the University of Notre Dame, Feb. 2014.
- 2014 P. Shakarian, Cyber-Warfare: A Primer. Presentation to the Danish Defense College, Copenhagen, Denmark May 2014.
- 2014 P. Shakarian, Mining Complex Networks to Leverage Cascading Processes. *AAAI Spring Symposium 2014* (invited lecture), Stanford, CA, March 2014.
- 2014 P. Shakarian, The “Science of Cyber” and the Next Generation of Security Tools. *ShmooCon 2014*, Washington, D.C., Jan. 2014 (19.23% acceptance rate).
- 2013 P. Shakarian, Understanding the Cyber Adversary. *Cyber Security Finance Forum*, Washington, D.C., Oct. 2013.

BOOKS AUTHORED (STUDENT CO-AUTHORS ARE IN ITALICS):

- 2023 **P. Shakarian**, G.I. Simari, C. Baral, B. Xi, L. Pokala, Neuro Symbolic Reasoning and Learning, Springer-Nature.
- 2021 E. Marin, M. Almukaynizi, S. Sarkar, E. Nunes, J. Shakarian, **P. Shakarian**, Exploring Malicious Hacker Communities: Toward Proactive Cyber Defence, Cambridge University Press (April 2021).
- 2021 H. Alvari, E. Shabani, **P. Shakarian**, Identification of Pathogenic Social Media Accounts: From Data to Intelligence to Prediction, Springer (Feb, 2021).
- 2018 E. Nunes, **P. Shakarian**, G. I. Simari, A. Ruef, Artificial Intelligence Tools for Cyber Attribution, Springer (Feb., 2018).
- 2017 J. Robertson, A. Diab, E. Marin, E. Nunes, V. Paliath, J. Shakarian, **P. Shakarian**, Darkweb Cyber Threat Intelligence Mining, Cambridge University Press (March, 2017). **Translated into Kazakh.**
- 2015 **P. Shakarian**, A. Aleali, A. Bhatnagar, R. Guo, E. Shaabani, Diffusion in Social Networks, Springer (Sep., 2015).
- 2013 **P. Shakarian**, J. Shakarian, A. Ruef, Introduction to Cyber Warfare: A Multidisciplinary Approach, Elsevier/Syngress, June 2013. **9 out of 10 rating on Slashdot. Translated into Chinese.**
- 2011 **P. Shakarian**, V.S. Subrahmanian, Geospatial Abduction: Principles and Practice, hardcover, Springer, November 2011.

BOOKS EDITED:

- 2025 **P. Shakarian**, H. Wei (eds.), [*Metacognitive Artificial Intelligence*](#). Cambridge University Press (in press) 2025.
- 2015 S. Jajodia, **P. Shakarian**, V.S. Subrahmanian, V. Swarup, C. Wang (eds.), [*Cyber Warfare: Building the Scientific Foundation*](#), Springer, May 2015. **Translated into Chinese.**

BOOK CHAPTERS (STUDENT CO-AUTHORS ARE IN ITALICS):

- 2025 *B. Xi*, **P. Shakarian**, [*Metacognitive AI through Error Detection and Correction Rules*](#), *Metacognitive Artificial Intelligence*, ed. H. Wei, P. Shakarian, Cambridge University Press.
- 2025 *N. Ngu*, **P. Shakarian**, *A. Koyyalamudi*, *L. Mareedu*, [*Metacognitive Insights into ChatGPT's Arithmetic Reasoning*](#), *Metacognitive Artificial Intelligence*, ed. H. Wei, P. Shakarian, Cambridge University Press.
- 2020 *M. Almukaynizi*, *E. Marin*, *M. Shah*, *E. Nunes*, G. I. Simari, **P. Shakarian**, [*A Logic Programming Approach to Predict Enterprise-Targeted Cyberattack*](#), *Data Science in Cybersecurity and Cyberthreat Intelligence*, eds. L. F. Sikos, K.K. R. Choo, Springer.
- 2020 *E. Nunes*, *C. Buto*, **P. Shakarian**, *C. Lebiere*, *S. Bennati*, *R. Thomson*, [*Cognitively-Inspired Inference for Malware Task Identification*](#), in *Open Source Intelligence and Cyber Crime*, Springer.
- 2018 *V. Paliath*, **P. Shakarian**, [*Defending Against Chained Cyber-Attacks by Adversarial Agents*](#), in *Guide to Vulnerability Analysis for Computer Networks and Systems*, eds. S. Parkinson, A. Crampton, R. Hill, Springer.
- 2018 *M. Almukaynizi*, *E. Nunes*, *K. Dharaia*, *M. Senguttuvan*, J. Shakarian, **P. Shakarian**, [*Patch Before Exploited: An Approach to Identify Targeted Software Vulnerabilities*](#), in *Intelligent Systems Reference Library: AI in Cybersecurity*, ed. L. F. Sikos, Springer.
- 2016 J. Shakarian, A. Gunn, **P. Shakarian**, [*Exploring Malicious Hacker Forums*](#), in *Cyber Deception: Building the Scientific Foundation*, eds. S. Jajodia, V.S. Subrahmanian, V. Swarup, C. Wang, Springer.
- 2016 *E. Nunes*, *N. Kulkarni*, **P. Shakarian**, A Ruef, J. Little, [*Cyber-Deception and Attribution in Capture-the-Flag Exercises*](#), (extended version) in *Cyber Deception: Building the Scientific Foundation*, eds. S. Jajodia, V.S. Subrahmanian, V. Swarup, C. Wang, Springer.
- 2015 **P. Shakarian**, *N. Kulkarni*, *M. Albanese*, *S. Jajodia*, [*Keeping Intruders at Bay: A Graph-Theoretic Approach to Reducing the Probability of Successful Network Intrusions*](#), in *E-Business and Telecommunications*, eds. M. S. Obaidat, A. Holzinger, J. Filipe, Springer.
- 2015 **P. Shakarian**, *M. Martin*, *J. Bertetto*, *B. Fischl*, *J. Hannigan*, *G. Hernandez*, *E. Kenney*, *J. Lademan*, *D. Paulo*, *C. Young*. [*Criminal Social Network Intelligence Analysis with the GANG Software*](#). In *Illuminating Dark Networks: The Study of Clandestine Groups and Organizations*, ed. L. M. Gerdes, Cambridge University Press.
- 2015 **P. Shakarian**, G. I. Simari, *G. Moores*, *S. Parsons*. [*Cyber Attribution: An Argumentation-Based Approach*](#). In *Cyber Warfare: Building the Scientific Foundation*, eds. Sushil Jajodia et al, Springer.

- 2011 **P. Shakarian**, V.S. Subrahmanian. [Region-based Geospatial Abduction with Counter-IED Applications](#). In *Counterterrorism and Open Source Intelligence*, ed. U. Kock Wiil, Springer.

PATENTS ISSUED:

1. US12436827 (Oct. 7, 2025) Systems and Methods for Predicting Which Software Vulnerabilities Will be Exploited by Malicious Hackers to Prioritize for Patching (second patent)
2. [US12235969B2](#) (Feb. 25, 2025) System and method for calculating and understanding aggregation risk and systemic risk across a population of organizations

- a. Invention owned by Securin, Inc.
 - b. Also published as PCT: [WO2020236960A1](#) (Nov. 26, 2020)
3. [US12170684B2](#) (Dec. 17, 2024) Systems and methods for predicting the likelihood of cyber-threats leveraging intelligence associated with hacker communities
 - a. ASU invention M18-234P
 - b. Currently licensed
4. [US11892897](#) (Feb. 6, 2024) Systems and methods for prioritizing software vulnerabilities for patching
 - a. ASU invention M18-009P
 - b. Published in [US](#), [EU](#), and [Israel](#)
5. [US11693972B2](#) (Jul. 4, 2023) Systems and methods for an at-risk system identification via analysis of online hacker community discussions
 - a. ASU invention M19-268P
6. [US11552976B2](#) (Jan. 10, 2023) Systems and methods for social network analysis on dark web forums to predict enterprise cyber incidents
 - a. ASU invention M19-002P
7. [US11520900B2](#) (Dec. 6, 2022) Systems and Methods for a Text Mining Approach for the Prediction of Exploited Software Vulnerabilities
 - a. ASU invention M18-247P
 - b. Currently licensed
8. [US11336673B2](#) (May 17, 2022) Systems and Methods for Third Party Risk Assessment
 - a. ASU invention M18-175P
9. [US11275900B2](#) (Mar. 15, 2022) Systems and methods for automatically assigning one or more labels to discussion topics shown in online forums on the dark web
 - a. ASU invention M18-191P
10. [US11126679B2](#) (Sep. 21, 2021) Systems and methods for detecting pathogenic social media accounts without content or network structure
 - a. PCT application [WO2019157335A1](#)
 - b. ASU invention M18-147P
11. [US10437945B2](#) (Oct. 8, 2019) Systems and methods for order-of-magnitude viral cascade prediction in social networks
 - a. ASU invention M15-222P
12. [US10313385B2](#) (Jun. 4, 2019) Systems and methods for data driven game theoretic cyber threat mitigation
 - a. ASU invention M16-040P
13. [US10176438B2](#) (Jan. 8, 2019) Systems and Methods for Data Driven Malware Task Identification
 - a. ASU invention M15-167P

PUBLISHED PATENT APPLICATIONS (NOT YET ISSUED):

1. [US20240427986A1](#) (Dec. 26, 2024) Large language model screening system and methods thereof

- a. ASU invention M23-184P
2. [US20250252328A1](#) (Aug. 7, 2025) Systems and Methods for Open World Temporal Logic

REGISTERED COPYRIGHT

1. Intelligent darkweb crawling infrastructure for cyber threat intelligence collection (2016)
 - a. ASU invention M16-090P
 - b. Software copyright

INVENTION DISCLOSURES NOT ASSOCIATED WITH A PUBLISHED PATENT OR COPYRIGHT.

1. ASU Invention M25-190P: Systems and methods for predicting future locations of maritime vessels based on partial trajectory information (Jan. 3, 2025)
U.S. Provisional patent 63/745,753 (Jan. 15, 2025)
2. ASU Invention M23-101: Systems and methods for identification of trade indicators
 - U.S. Provisional patent 63/511,149 (June 29, 2023) “Systems and Methods for Identification of Trade Indicators”
 - Also submitted for copyright registration of source code
 - Currently under exclusive option to license

CURRENT DOCTORAL STUDENTS (PRIMARY ADVISOR)

- Divyagna Bavikadi (Ph.D., Computer and Information Systems Engineering, Syracuse University) (Fall 2022- present)
- Kaustuv Mukherji (Ph.D., Electrical and Computer Engineering, Syracuse University) (Fall 2022- present)
- Joshua Shay Kricheli (Ph.D., Electrical and Computer Engineering, Syracuse University) (Fall 2023 - present)
- Jaikrishna Patil (Ph.D., Electrical and Computer Engineering, Syracuse University) (Fall 2023 - present)

CURRENT DOCTORAL STUDENTS (COMMITTEE MEMBER)

- Shwetha Koushik (Ph.D., Computer and Information Systems Engineering, Syracuse University) (ongoing)
- A. M. Sadaat Chowdhury (Ph.D., Computer Science, Arizona State University) (ongoing)

GRADUATED DOCTORAL STUDENTS (AS PRIMARY ADVISOR)

- Eric Nunes (Ph.D., Computer Engineering, ASU, successfully defended in 2018, graduated in 2019, now at Palantir)
 - *Reasoning about Cyber Threat Actors*
- Elham Shaabani (Ph.D., Computer Science, ASU, successfully defended in 2019, graduated in 2019, now at Microsoft (LinkedIn))
 - *Data Driven Inference in Populations of Agents*

- Mohammed Almukaynizi (Ph.D., Computer Science, successfully defended in 2019, graduated in 2019, now an Assistant Professor King Saud University)
 - *Proactive Identification of Cybersecurity Threats using Online Sources*
- Hamid Alvari (Ph.D., Computer Science, successfully defended in 2020, graduated in 2020, currently researcher at Google DeepMind)
 - *Understanding Propagation of Malicious Information Online*
- Soumajyoti Sarkar (Ph.D., Computer Science, successfully defended in 2020, graduated in 2020, currently a scientist at Amazon AWS)
 - *Measuring the Impact of Social Network Interactions*
- Ericsson Marin (Ph.D., Computer Science, ASU, successfully defended in 2020, graduated in 2020, currently an Assistant Professor at CalPoly Pomona)
 - *A Hacker-Centric Perspective to Empower Cyber Defense*

FORMER STUDENTS HOLDING ACADEMIC POSITIONS

- Mohammed Almukaynizi, King Saud University (Assistant Professor)
- Ericsson Marin, CalPoly (Assistant Professor)
- Geoffrey Moores, West Point (Lecturer)
- Joseph Salmento, West Point (Lecturer)

GRADUATED STUDENTS (MS THESIS ADVISOR)

- Brian Vincent (M.S., Computer Science) graduated in 2018
 - *Understanding Hacking-as-a-Service Markets*
- Krishna Dharaiya (M.S., Computer Science) graduated in 2018
 - *Identifying Financial Fraud on the Darkweb*
- Revanth Patil (MS, Computer Science) graduated in 2018
 - *Multi-class and Multi-label classification of Darkweb Data*
- Nikhil Kumar (MS, Computer Science) graduated in the summer of 2016
 - *An Empirical Evaluation of Social Influence Metrics*

OTHER ASU UNDERGRADUATE AND GRADUATE MENTORSHIP:

- UNDERGRADUATE HONORS THESIS:
 - Roman Smith (B.S., Computer Science, graduated in 2023)
 - Colton Payne (B.S., Computer Science, graduated in 2023)
 - Iden Alba (B.S., Computer Science, ASU, graduated in 2018)
 - Andrew Polican (B.S., Computer Science, ASU, graduated in 2018)
 - James Hutchins (B.S., Computer Science, ASU, graduated in 2017)
 - John Robertson (B.S., Computer Science, ASU, graduated in 2016)
- ASU Master's Opportunity for Research in Engineering (MORE)
 - Aniruddha Datta (MS, Computer Science)
- Master's Capstone Project
 - Gilles-armel Aye (MS, Systems Engineering, Robotics and Autonomous Systems)
- ASU Fulton Undergraduate Research Initiative (FURI):
 - Noel Ngu, Fall 2023
 - Bryan Lee, Summer 2022

- Cody Iwertz, Fall 2017
- Nidhal Selmi, Spring 2017
- John Robertson, Fall 2015, Spring 2016
- James Hutchins, Fall 2016
- Riyan Setiadji, Spring 2015
- Amanda Thart, Fall 2015
- Adam Tse, Spring 2015, Fall 2015
- Spencer Offenberger, Spring 2015, Fall 2015
- ASU Grand Challenge Scholar Program (GCSP) Research Stipend
 - Rohan Nair, Spring 2023
 - Cody Iwertz, Fall 2016
- Army Research Office Undergraduate Research Program
 - John Robertson (2016)
- ASU Barrett Honors contract
 - Sai Punit Arani (2023)
 - Taehoon Kwon (2023)
 - Harikrishna Kommineni (2023)

EDITORIAL BOARD MEMBERSHIPS:

- Lead Guest Editor, *IEEE Intelligent Systems* (Special Issue on Metacognitive Prediction of AI Behavior) (2025).
- Editorial board member, *Springer Social Network Analysis and Mining* (2021-2022)
- Editorial board member, *Cyber Defense Review* (2017-2022)
- Guest editor, *Neurosymbolic Artificial Intelligence* (Special Issue on Neuro-Symbolic AI and Domain Specific Conceptual Modelling) (2024).
- Guest editor, *Information* (special issue “Social Influence”) (2020)
- Guest editor, *Information* (special issue “Darkweb Cyber Threat Intelligence Mining”) (2018)
- Guest editor, Springer *Social Network Analysis and Mining* (special issue “Diffusion of Influence and Information in Social Networks”) (2016)

CONFERENCE ORGANIZING ACTIVITY:

- Chair and Founder, “Workshop on Metacognitive Prediction of AI Behavior”
 - May, 2025: Second edition, sponsored by SSCI, part of SDM-2025, to be held in Alexandria, VA
 - Nov., 2023: First edition, sponsored by Army Research Office, Scottsdale, AZ.
- Organizing committee, AAI-MAKE series (AAAI Spring Symposium)
 - 2025: “Machine Learning and Knowledge Engineering for Trustworthy Multimodal and Generative AI (AAAI-MAKE)”
 - 2024: “Empowering Machine Learning and Large Language Models with Domain and Commonsense Knowledge (AAAI-MAKE)”
- Co-Chair and Co-Founder, *Workshop on Social Influence (SI)* (held in conjunction with ASONAM) (I was involved in the first seven iterations: 2014, 2016-2021; though I am no longer involved, this workshop is still held annually as of 2024)

- Co-Chair, “International Workshop on Hybrid AI Machine Learning Systems (AIMS),” co-located at CAISE, 2024 (CAISE is an A-rated conference).
- General Chair, FOSINT-SI 2021-2022
- Co-Chair, FOSINT-SI, 2019-2020
- Program Committee Co-Chair, IEEE *International Conference on Data Intelligence and Security (ICDIS)*, 2020.
- Co-Chair, *Artificial Intelligence and Cybersecurity* (Lorenz eScience winner), 2019
- Co-Chair, *ARO Workshop on Cyber Warfare: Building the Scientific Foundation*, 2014

PROFESSIONAL MEMBERSHIPS:

- Member, American Association for the Advancement of Science (AAAS)
- Member, Association for the Advancement of Artificial Intelligence (AAAI)
- Member, IEEE Computer Society
- Member, Society for Industrial and Applied Mathematics (SIAM)
- Member, Association for Computing Machinery (ACM)
- Member, National Academy of Inventors (NAI), ASU Chapter

OTHER EXTERNAL SERVICE:

- PC member, NeSy 2024, 2025 (Int’l. Conf. on Neural-Symbolic Learning and Reasoning)
- PC member KDD doctoral consortium (2025)
- PC member, KDD (2015, 2016)
- AAAI Senior Program Committee 2026
- PC member, AAAI-2016, 2023, 2024, 2025
- PC member, KR 2024, 2025
- Springer book reviewer for “Applications of Neuro-Symbolic Artificial Intelligence,” 2023
- Cambridge University Press book reviewer for “Knowledge-infused Learning: Knowledge-powered NeuroSymbolic AI for Explainability, Interpretability, and Safety,” 2023
- PC Member for KDD Workshop on Artificial Intelligence-Enabled Cybersecurity Analytics (2024)
- PC member for European Conference on Logics in Artificial Intelligence (JELIA) 2023
- PC member for Knowledge-Guided Machine Learning at ECML/PKDD 2023
- Reviewer for book “Neuro-Symbolic AI” (Packt Publishing) 2023
- AAMAS Senior Program Committee, AAMAS (2018-2019)
- PC member, ASONAM (2019)
- PC member, IJCAI (2018, 2019)
- PC member, FOSINT-SI (co-located with ASONAM) (2014-2017)
- PC member, AAMAS (2015, 2016)
- Journal Reviewer Duties
 - Reviewer for Computer Science Review (2025) (Q1)
 - Reviewer for Intl. Journal of Approximate Reasoning (2023) (Q1)
 - Reviewer for Neurosymbolic Artificial Intelligence (2023)
 - Reviewer for ACM Digital Threats (2022)
 - Reviewer for Elsevier Computers and Security (2021) (Q1)

- Reviewer for Springer-Nature Scientific Reports (2018) (Q1)
- Reviewer for journal IEEE Transaction on Big Data (2017) (Q1)
- Reviewer for Cambridge *Knowledge Engineering Review* (2016) (Q1)
- Reviewer for *Proceedings of the Royal Society A* (PRSA) (2013, 2015) (Q1)
- Reviewer for ACM journal *Transactions of Knowledge Discovery from Data* (TKDD) (2012) (Q1)
- Funding Agency Reviewer Duties
 - Reviewer for Department of Energy (DOE) grant proposals (2024)
 - Reviewer for Army Research Office (ARO) grant proposals (2012-2013, 2015-2018, 2023, 2025)
 - Reviewer for National Science Foundation (NSF) grant proposals (2022)
 - Reviewer for Air Force Office of Scientific Research (AFOSR) grant proposals (2017)
 - Reviewer for DARPA proposals (2014)

UNIVERSITY SERVICE:

- DEPARTMENT/SCHOOL-LEVEL:
 - Co-Chair, AI Curriculum Committee (Syracuse, EECS), 2025-Present
 - Committee Member, Personnel Committee, (SCAI, ASU) 2023-2025
 - Committee Member, Smart Data Engineering Search, (SCAI, ASU) 2022-2023
 - Committee Member, Admissions Committee, CIDSE (ASU) 2014-2016
 - Faculty Advisor, West Point UPE (Computer Science Honor Society) Chapter, 2011-2014
 - Faculty Advisor, Department Scholarship Program, West Point, 2011-2014
 - Department Academic Counselor (Computer Science), West Point, 2011-2014
- COLLEGE-LEVEL:
 - SCAI Representative for the FSE Dean's Research Advisory Council (RAC, ASU), 2022-2023
 - Reviewer for GCSP scholarship applications (ASU) 2023, 2024
 - Reviewer for FURI scholarship applications, ASU, 2023
 - Judge for the Fulton Entrepreneurial Professorship, ASU 2023
 - Judge for the New Economic Initiative entrepreneurial post doc position, ASU 2022
 - Mentor, Fulton Undergraduate Research Initiative (FURI) (ASU) 2015-2025
 - Head Faculty Advisor, Fulton Student Veterans Organization (ASU) 2019-2021
 - Faculty Advisor, Fulton Student Veterans Organization (ASU) 2016-2019

- UNIVERSITY-LEVEL:
 - Member, Provost's AI Working Group, Syracuse University, 2025-Present
 - Voting Committee Member, Financial Conflict of Interest Committee (FCOI), Syracuse University, 2025-Present
 - Reviewer, limited submission grant proposals for Knowledge Enterprise (KE) (ASU) (2023-2025)
 - Interviewer for applicants for senior position at ASURE including director (ASU) (2023)
 - Honors Faculty, Barrett, The Honors College (ASU), 2015-2025
 - Affiliate Faculty, Institute for Social Science Research (ASU), 2017-2025
 - Affiliate Faculty, Center for Cybersecurity and Digital Forensics (ASU), 2015-2025
 - Affiliate Faculty, Center for Assured and Scalable Data Engineering (ASU), 2015-2025
 - Affiliate Faculty, Center for the Future of War (ASU), 2014-2025
 - Affiliate Faculty, West Point Network Science Center, 2011-2014

SAMPLE LECTURES:

- Various lectures on the “Neuro Symbolic” YouTube channel we created (2022-present)
<https://www.youtube.com/@neurosymbolic>
- ASU KED Talk: Staying ahead of cyber attacks (2018)
<https://www.youtube.com/watch?v=B-H2kaQNVNw&t=335s>
- ISC2/McAfee: Malware and Machine Learning: What you need to know (2017)
<https://www.brighttalk.com/webcast/5385/254753>
- Army Cyber Talks: Toward a Threat-Centric Paradigm (2016)
https://www.youtube.com/watch?v=TFeFR_Jldcw
- New America Panel: Understanding the Future of Cyber Threat Intelligence (2016)
<http://www.ustream.tv/recorded/88353440>
- Mining for Causal Relationships: A Data-Driven Study of the Islamic State (KDD 2015)
<https://www.youtube.com/watch?v=CNU5Ovs-L-g>
- The “Science of Cyber” and the Next Generation of Security Tools (ShmooCon 2014)
https://archive.org/details/ShmooCon2014_Science_of_Cyber_and_Next_Gen_Security_Tools
<https://www.youtube.com/watch?v=btvwhY-eMEw>

COURSES TAUGHT:

- **Syracuse University (Fall 2025-Present):**
 - CIS700: Hybrid Artificial Intelligence
- **Arizona State (Fall 2014-Spring 2025):**
 - Undergraduate:
 - CSE 475: Foundations of Machine Learning
 - Spring, 2024 (195 undergraduates), ASU I-Course (online)
 - Fall, 2023 (205 undergraduates), ASU I-Course (online)
 - Fall, 2023 (25 undergraduates), ASU Online
 - Spring, 2023 (175 undergraduates), hybrid version

- Fall, 2022 (132 undergraduate), hybrid version
 - Roll-out of redesigned online version of CSE475
 - CSE471: Introduction to Artificial Intelligence
 - Spring, 2025 (70 undergraduates), hybrid version of course
 - Fall, 2024 (49 undergraduates), ASU Online
 - Fall, 2024 (168 undergraduates), ASU I-Course (online)
 - Roll-out of redesigned online version of CSE471
 - Spring, 2015 (43 undergraduate)
 - CSE 494: Artificial Intelligence for Cybersecurity
 - Spring, 2019 (15 undergraduate)
 - ASU 101: The ASU Experience
 - Multiple semesters from 2022-2025
 - Graduate:
 - CSE 598: Perceptual Reasoning and Symbol Grounding
 - Fall, 2023 (40 graduate)
 - CSE 591: Neuro Symbolic Reasoning
 - Fall, 2022 (22 graduate)
 - CSE 591: Security Informatics
 - Spring, 2016 (14 graduate)
 - CSE 598: Introduction to Artificial Intelligence (Graduate version)
 - Spring 2015 (7 graduate)
 - CSE 573: Semantic Web Mining
 - Fall, 2015 (57 graduate)
 - CSE 591: Diffusion in Social Networks
 - Fall 2014, 25 total students (all graduate)
- **West Point Fall 2011 – Spring 2014:**
(all undergraduate, West Point lectures are limited to 18 students per section, though multiple sections are often taught – each section is provided its own lecture for each lesson, **West Point provides no TA/GA support for any courses**)
 - IT300: Fundamentals of Programming
(taught to non-computer science majors as all students at West Point are required to take an “engineering sequence” if not majoring in an engineering)
 - Fall, 2012 - 36 total students, 2 sections
 - CS486: Artificial Intelligence
 - Fall 2013, 6 students
 - Fall 2012, 5 students
 - IT305: Theory and Practice of Military IT Systems
(mandatory course for all non-computer science majors)
 - Spring 2014, 36 students, 2 sections
 - Spring 2013, 54 students, 3 sections
 - Spring 2012, 54 students, 3 sections
 - Fall 2011, 54 students, 3 sections
 - CS489: Hard Problems in Complex Networks (pilot course)

- Spring 2013, 3 students
- Fall, 2012, 1 student
- CS401/IT401: Software Systems Design I (capstone course)
 - Fall 2013, 6 students
- XE402: Software Systems Design II (capstone course)
 - Spring 2014, 6 students

OTHER AWARDS WON BY MY STUDENTS:

- ARLIS RISC Internship Plenary Session – Pilar Glaser, Cailyn MacLellan, Sydney Rothstein (2025)
- Army Research Office High School Research Apprenticeship Program – Anay Gupta (2016/2017)
- NSF Graduate Research Fellowship Award – Geoffrey Moores 2014 (West Point)
- NSF Graduate Research Fellowship Award – Damon Paulo 2014 (West Point)
- NSF Graduate Research Fellowship Honorable Mention – Joseph Hannigan 2014 (West Point)
- 2014 DARPA Innovation Challenge Finalist Team (Guillermo Hernandez, Joseph Hannigan, Bradley Fischl, Christian Young, Evan Kenney, Jacob Lademan)
- Letter of Commendation from the Superintendent of the Chicago Police – Guillermo Hernandez 2014 (West Point)
- Best Student Poster – 2014 ACM Tapia Conference – Joseph Hannigan 2014 (West Point)
- Society of American Military Engineers (SAME) Fellowship – Geoffrey Moores 2013 (West Point)

GRADUATED STUDENTS FOR WHICH DR. SHAKARIAN IS ON A DISSERTATION OR THESIS COMMITTEE (NOT PRIMARY ADVISOR):

- Doctorate
 - Anique Tahir (Ph.D., Computer Science, ASU; Thesis Chair: Huan Liu, graduated in spring 2025) “Towards Safe and Efficient AI”
 - Vivin Paliath (Ph.D., Computer Science, ASU; Thesis Chairs: Adam Doupe and Yan Shoshitaishvili, graduated fall 2023) “Modeling State to Improve Defensive Cyberattack Strategies.”
 - Saadet Betul Ceran (Ph.D., Computer Science, ASU; Thesis Chair: Hasan Davulcu, graduated spring 2016) “Semantic Feature Extraction for Narrative Analysis.”
 - Feng Wang (Ph.D., Computer Science, ASU; Thesis Chair: Ross Maciejewski, graduated spring, 2016) “Visual Analytics Methods for Exploring Geographically Networked Phenomena.”
 - Jessica Bodford (Ph.D., Psychology, ASU; Thesis Chair: Virginia Kwan, graduated spring, 2016) “Blurring Safety Between Online and Offline Worlds: Archival, Correlational, and Experimental Evidence of Generalized Threat in the Digital Age.”
 - Kai Zhu (Ph.D., Electrical Engineering, ASU; Thesis Chair: Lei Ying, graduated fall, 2015) “Social Network Analysis: Detection of the Information Source,” currently at Google.

- Masters
 - Sravan Kumar Garipalli (M.S., Computer Science, ASU; Thesis Advisor: Hasan Davulcu, graduated fall, 2015) “Visualization Tool for Islamic Radical and Counter Radical Movements and their online followers”
 - Jessica Bodford (M.S., Psychology, ASU; Thesis Advisor: Virginia Kwan, graduated spring, 2015) “We are Legion: Hacktivism as a Product of Deindividuation, Power, and Social Injustice,” currently a Ph.D. student at ASU

SELECTED MEDIA APPEARANCES:

- July, 2025: Coverage on joining Syracuse University as the KG Tan Endowed Professor of AI: <https://ecs.syracuse.edu/about/news/paulo-shakarian-joins-department-of-electrical-engineering-and-computer-science-as-k-g-tan-professor-of-artificial-intelligence>
- Feb. 2025: Further local coverage on ABOR grant for emergency management by KTAR (Phoenix-area radio and media): <https://ktar.com/arizona-news/abor-grant-ai-disaster-response/5665455/>, ABC15 <https://www.abc15.com/news/state/artificial-intelligence-could-be-the-future-of-arizona-disaster-response>, and ASU News: <https://news.asu.edu/20250227-science-and-technology-ai-az-abor-funds-new-tools-state-emergency-response>
- Feb. 2025: Coverage by the Arizona Board of Regents (ABOR) for funding of AI-empowered emergency management. <https://www.azregents.edu/news-releases/abor-regents-grant-boosts-ai-powered-disaster-response-efforts-help-keep-arizona>
- Feb. 2024: Wall Street Journal <https://www.wsj.com/tech/ai/ai-is-tutoring-students-but-still-struggles-with-basic-math-694e76d3> (quoted on the topic of ChatGPT’s ability to solve math word problems)
- Nov. 2023: Daily Independent <https://www.yourvalley.net/stories/inaugural-asu-artificial-intelligence-day-scheduled-for-tempe.460271> (quoted on SCAI’s AI day)
- Oct. 2023: ZDNet <https://www.zdnet.com/article/using-chatgpt-for-accounting-you-may-want-to-think-again/> (quoted on work relating to evaluation of LLMs on math problems)
- Oct. 2023: ASU News <https://news.asu.edu/20231020-government-calling-tech-leaders-help-crafting-artificial-intelligence-legislation>
- Aug. 2023: ASU Full Circle <https://fullcircle.asu.edu/fulton-schools/asu-researchers-bridge-security-and-ai/> (regarding participation in DARPA AI Forward)
- Jul. 2023: AI Magazine <https://onlinelibrary-wiley-com.ezproxy1.lib.asu.edu/doi/full/10.1002/aaai.12094> (regarding work on LLM performance on math problems)
- Feb. 2023: ASU News <https://news.asu.edu/20230221-discoveries-do-math-chatgpt-sometimes-cant-expert-says>
- Mar. 2022: CYR3CON acquisition by CSW covered in [HelpNetSecurity](#) and [New Mexico Inno](#)
- Aug. 2018: Pathogenic social media research featured in the [Wall Street Journal](#)
- May 2017: Coverage in [Slate](#), [The Economist](#), quoted by [CNN](#) and interviewed on [CBC](#).
- Aug. 2016: Darkweb scraping technology featured on [Forbes](#), [Cisco Continuum](#), and [MIT Technology Review](#).

- Jan. 2016: Featured in the print edition of [The Economist](#).
- Nov. 2015: Featured in [Business Insider](#) as part of a Veteran's day series. The major Chinese news outlet [Sohu](#) published a similar article.
- Sep./Oct., 2015: Our work on information cascades featured in [TechCrunch](#), [ExtremeTech](#), and the [Irish Times](#).
- Aug., 2015: My KDD-2015 paper on causal learning to understand Islamic State military actions was featured as [BBC Technology's](#) lead story and also featured in the [Huffington Post](#), [Business Insider](#) (with a follow-up) and [Australian news media](#).
- Jan. 2014: [MIT Technology Review](#) included my research on viral marketing (as published in the paper [A Scalable Heuristic for Viral Marketing Under the Tipping Model](#)) as one of the "Best of 2013." Also, in the same month, my work on protecting the power grid was featured in [Foreign Policy's Complex Blog](#).
- Jan. 2014: My ORCA software package was featured in the print edition of [Popular Science](#). The story was also carried by [Focus.it](#) – a major Italian technology blog/magazine.
- 6 Dec. 2012: [WIRED \(online\)](#) featured my research on attacking robust terror networks.
- 21 Apr. 2012: [The Economist](#) featured my work on the SCARE counter-IED software

Backend platform highlights

Robust data collection

- Self-monitoring
- Stealthy crawling

High value information

- Primarily deepweb and darkweb
- Covers protocols beyond Tor
- Focus on sites with access restrictions

Designed for scale

- Technology stack inherently scalable
- Big-data solutions on backend such as Mongo-DB designed for scale

Designed for multiple uses

- Highly structured data
- Designed for machine learning
- Low-level cleaning tasks performed already
- Social structure information extracted
- REST-based API

Automatic Malware Sample Collection

CYR3CON collects obscure data external to the enterprise.

It makes predictions to enable proactive cybersecurity.

**DATA COLLECTION
INFRASTRUCTURE**

1,000+ data sources
Deep/dark/social/open

**PREDICTION
INFRASTRUCTURE**

18x AI/ML patent
submissions

**PROACTIVE
CYBERSECURITY**

Supports CISO and
container/dev-sec-ops

AI/ML applied to obscure data → Highly accurate prediction

External data → Easy deployment, high gross margin

SaaS based API and UI → Channel and OEM friendly

Predictive Artificial Intelligence

Fast time-to-value -

Frictionless trial -

Designed for integration -

Eliminate analyst -

Mining of malicious hacker discussions

- Automated

- Platform-centric

- Mature API

- Multi-sourced
(darkweb, deepweb, social
media, open)

CYR3CON: Artificial intelligence + threat data = Predictive cyber

Peer-Reviewed

*IEEE ISI, ACM CSS, IEEE ICDIS,
Cambridge University Press,
CyCon-US, IEEE SocialCom*

Provisional Patents

*U.S.: 62/581,123, 62/703,110,
62/668,871, 62/753,019
PCT: US2018/057812*

Award Winning

*Defense Innovation Award,
PwC Cybersecurity Finalist,
IEEE ICDIS Best Paper*

Predicting Chinese Government Hacks during the Pandemic

Example Head-to-Head

CVR3CON platform screenshot

(ranked medium in both V2 and V3 of CVSS)

CVR3CON predictions led NSA's advisory by 3-12+ months.

CVR3CON predicts hacker use of vulnerabilities

NSA publishes advisory on **Chinese government hacker activity** during the pandemic

62/859,940 (June 11, 2019) System and Method for Identifying Whether Software Vulnerabilities will be Discussed by Hacking Actors

PCT/US2018/057812 (Oct. 26, 2018) Systems and Methods for Predicting which Software Vulnerabilities will be Exploited by Malicious Hackers to Prioritize for Patching

62/832,219 (April 10, 2019) Systems and Method for Aggregating, Ranking, and Minimizing Threat to Computer Systems Based on External Vulnerability Intelligence

Science-Based Approach

Multiple Peer-Reviewed Case Studies

M. Almukaynizi, A. Grimm, E. Nunes, J. Shakarian, P. Shakarian, Predicting Cyber Threats through Hacker Social Networks in Darkweb and Deepweb Forums, *ACM Computational Social Science* (CSS-2017) (Oct. 2017).

M. Almukaynizi, E. Nunes, K. Dharaiya, M. Senguttuvan, J. Shakarian, P. Shakarian, Proactive Identification of Exploits in the Wild Through Vulnerability Mentions Online, *2017 International Conference on Cyber Conflict* (CyCon-US) (Nov. 2017).
