Redirect By MR. HANBA	969

1 THE COURT: Be seated, please.

2 Are the parties prepared to read into the record those
3 items from the list of pre-admitted exhibits used during
4 yesterday's portion of the trial?

5 MR. DaMARIO: We are, Your Honor.

6 THE COURT: Please proceed.

7 MR. DaMARIO: Defendants seek to admit JX 51, DX 20,
8 JX 24, JX 25, DX 5, DX 14, and DX 18.

9 THE COURT: Any objection from the opposing party?

10 MR. THANE: No objection, Your Honor.

11 THE COURT: Does Plaintiff have anything additional
12 to add?

13 MR. THANE: We do not, Your Honor.

14 THE COURT: Then those exhibits having been used
15 during yesterday's portion of the trial are considered
16 admitted exhibits and not merely pre-admitted exhibits.

17 Counsel, is there anything you can think of that needs to
18 be raised with the Court before we bring in the jury and
19 continue with Dr. Ugone?

20 MR. HANBA: No, Your Honor.

21 MR. McMAHON: No, Your Honor.

22 THE COURT: All right. Dr. Ugone, if you'll return
23 to the witness stand. I remind you, you remain under oath.

24 And, Ms. Pellegrino, you may go to the podium to prepare
25 for cross examination.

1 MS. PELLEGRINO: Thank you, Your Honor. May we also
2 distribute binders.

3 THE COURT: You may.

4 MS. PELLEGRINO: Thank you.

5 THE COURT: All right. Let's bring in the jury.

6 (Whereupon, the jury entered the courtroom.)

7 THE COURT: Good morning, ladies and gentlemen.
8 Welcome back. Please have a seat.

9 Thank you for being on time. And just so you'll know,
10 I've seen several of you come in with heavier and heavier
11 clothing this week. I want you to know that I have no control
12 over the temperature in this courtroom. The temperature for
13 the 43 counties that comprise the Eastern District of Texas
14 are all determined out of central control in Tyler, Texas, so
15 we don't have any local control over the thermostats.

16 All right. We left off yesterday with the Defendant
17 having completed its direct examination of Dr. Keith Ugone,
18 and we'll now transition to cross examination by Plaintiff's
19 counsel.

20 Ms. Pellegrino, you may proceed with cross.

21 MS. PELLEGRINO: Thank you, Your Honor.

22 CROSS EXAMINATION

23 BY MS. PELLEGRINO:

24 Q. Good morning, Dr. Ugone. How are you?

25 A. I'm doing all right. Thank you.

1 Q. You testified a number of times yesterday on your direct
2 examination that Mr. Lamotta has offered what you called,
3 quote, primary and alternative opinions. Right?

4 A. Yes. That was based on his reports that he issued in
5 this case.

6 Q. Now, during his direct testimony yesterday, Mr. Lamotta
7 actually only testified to a single amount of damages that he
8 believes is appropriate in this case. Right?

9 A. I'll agree with that.

10 Q. Okay. And he testified that it's his opinion that the
11 appropriate amount of damages in this case is \$20.1 million.
12 Right?

13 A. That's what he testified to the jury, yes.

14 Q. Okay. Now, Mr. Underwood asked some questions about
15 other analyses Mr. Lamotta performed. Correct?

16 A. Are you referring to on cross examination of Mr. Lamotta?

17 Q. That's right.

18 A. Yes.

19 Q. You understand that what Mr. Underwood says is not
20 evidence. Right?

21 A. I understand that -- guess the short answer is yes.

22 Q. And you understand that Mr. Lamotta's report is not
23 evidence. Correct?

24 A. I can't speak to that. I don't -- that seems like a
25 legal issue to me.

1 Q. You understand that your report is not evidence.

2 Correct?

3 A. I understand that evidence is what's presented at trial
4 and what's accepted by the Court as evidence. We've issued
5 reports that are the foundation for evidence, but I can't
6 speak to the legalities of what's technically what evidence
7 is.

8 Q. Okay. You understand that what's presented at trial is
9 what's evidence. That's what you just said?

10 A. Or that would be my layman's understanding. I'm not an
11 attorney.

12 Q. Okay.

13 MS. PELLEGRINO: Mr. Doyle, if I could please have
14 Mr. Ugone's slide 4.

15 Q. (BY MS. PELLEGRINO) These were slides that you used in
16 your testimony yesterday. Right, Mr. Ugone?

17 A. Yes.

18 Q. And this slide is titled Summary of Opinions. Correct?

19 A. That's correct, yes.

20 Q. And in the middle there, it describes what you've called
21 Mr. Lamotta's, quote, primary royalty approach. Right?

22 A. Yes.

23 Q. But on his direct testimony yesterday, Mr. Lamotta did
24 not testify that that's his opinion about the appropriate
25 amount of damages in this case. Correct?

1 A. Correct. He did not present that to the jury. It was in
2 his report.

3 MS. PELLEGRINO: Your Honor, object. Move to strike
4 that last portion as non-responsive.

5 THE COURT: The witness answered the question when
6 he responded correct. The balance of what the Defendant
7 offered goes beyond the question asked. I'll sustain the
8 objection and order his response struck except as to the first
9 word "Correct."

10 Let's continue.

11 MS. PELLEGRINO: And let's go to the next slide,
12 please, Mr. Doyle.

13 Q. (BY MS. PELLEGRINO) Now, on this slide you have again
14 identified various royalty rates at the top there under what
15 you've called the, quote, primary royalty approach. Right?

16 A. Yes.

17 Q. And, again, that was not Mr. Lamotta's testimony on
18 direct examination yesterday. Correct?

19 A. I'll agree with that.

20 Q. Okay.

21 MS. PELLEGRINO: If I could have slide 10, please,
22 Mr. Doyle.

23 Q. (BY MS. PELLEGRINO) On this bar chart on that bar on the
24 right, you describe what you call Mr. Lamotta's high-end at
25 7.7 billion MOSFETs. Right?

1 A. Yes.

2 Q. And, again, Mr. Lamotta didn't actually offer that
3 opinion to the jury yesterday. Correct?

4 A. I don't believe that was in his testimony yesterday.

5 Q. Okay.

6 MS. PELLEGRINO: Mr. Doyle, could I please have JX
7 7?

8 Q. (BY MS. PELLEGRINO) You recognize this document,
9 Dr. Ugone?

10 A. I'm sorry. I didn't quite hear the question.

11 Q. You recognize this document?

12 A. Yes.

13 Q. Okay. Your testimony yesterday was that the appropriate
14 amount of damages in this case is approximately \$615,000.
15 Correct?

16 A. Correct.

17 Q. And that opinion relies on the maximum quantity data in
18 JX 7. Correct?

19 A. I would agree with that.

20 Q. ASUS's lawyers in Taiwan combined various data to create
21 this file. Correct?

22 A. I understand that they helped with the presentation of
23 it, so if that's what you mean by combining, I'll agree with
24 that. But I think the underlying counts were not done by the
25 attorneys. But if what you mean is they helped assemble it,

1 I'll agree with that.

2 Q. Dr. Ugone, you were present for the testimony of ASUS's
3 representative, Mr. Fu. Right?

4 A. Yes.

5 MS. PELLEGRINO: Mr. Doyle, if I could have the
6 trial transcript at 589:23 to 25.

7 Q. (BY MS. PELLEGRINO) Mr. Fu was asked whether ASUS's
8 lawyers had combined certain data into JX 7, and he said that
9 was correct. Right?

10 A. Yes. I'm not disagreeing with that testimony.

11 Q. Okay. Now, during your direct examination yesterday, Mr.
12 Chen asked you what you thought about, and I'm going to quote
13 here, "Force MOS's approach of criticizing ASUSTeK's data
14 without testing that criticism." You remember that?

15 A. Is it -- is that -- was that an exact question or is that
16 paraphrasing? I may need to hear it again. I may not be
17 disagreeing with what you're saying. I just need to hear your
18 question again.

19 Q. Sure. The question was what you thought about Force
20 MOS's approach of criticizing ASUSTeK's data without testing
21 that criticism?

22 A. I don't remember the exact question, but I think I
23 remember something very similar to that, sure.

24 Q. Okay. Force MOS did try to investigate ASUS's data in JX
25 7, didn't it?

1 A. You're going to have to refresh my memory. I'm not sure
2 what you're referring.

3 Q. Force MOS deposed ASUS's corporate representatives about
4 that data?

5 A. Oh, sure, I'll agree with that.

6 Q. Okay. It asked Mr. Fu about the underlying sources of
7 that data. Right?

8 A. I believe so, yes.

9 Q. Force MOS asked Mr. Fu if he had ever verified the data.
10 Right?

11 A. You would have to show me -- I'll accept your
12 representation. You'd have to show me the exact question in
13 the deposition.

14 MS. PELLEGRINO: Mr. Doyle, can we please have the
15 trial transcript at 590, lines 11 to 12?

16 Q. (BY MS. PELLEGRINO) You see here, Dr. Ugone, Mr. Fu was
17 asked whether he personally verified this data. Correct?

18 A. Yes.

19 Q. And he said he didn't. Right?

20 A. Yes. I'm assuming -- is this a trial transcript? It
21 doesn't say what it is. Is this the deposition or trial?

22 Q. This is the trial transcript.

23 A. Yes. I'll accept its representation.

24 Q. And Force MOS asked Mr. Fu the same question at his
25 deposition in this case, didn't it?

1 A. You would have to show me.

2 Q. You don't recall sitting here today?

3 A. Well, I remember that I used the deposition transcripts
4 for support in my report, so there was enough information
5 there that I was able to use the spreadsheet. And so I had
6 support from the deposition testimony to help me understand
7 the spreadsheet that was produced, and that's referenced in my
8 report.

9 But if you want to have me comment on certain questions,
10 I would need to see those questions, but I do remember the
11 subject matter in the depositions. I will agree to that.

12 MS. PELLEGRINO: Objection, Your Honor. Move to
13 strike as non-responsive.

14 THE COURT: Overruled. He's responding to your
15 questions.

16 Q. (BY MS. PELLEGRINO) Mr. Fu testified that he didn't
17 recall whether anyone had verified this day attachment.
18 Right?

19 A. You would have to show me.

20 MS. PELLEGRINO: Mr. Doyle, can I please have 590 at
21 13 to 15?

22 Q. (BY MS. PELLEGRINO) You see that Mr. Fu was asked
23 whether anyone had verified this data, and he testified that
24 he didn't know?

25 A. I'll accept that representation, sure.

1 Q. It's not a representation. It's on your screen.

2 Correct?

3 A. Yeah. But is that deposition or is that trial?

4 Q. That's at trial, as I said, Dr. Ugone.

5 A. Okay. I'll agree with it then.

6 Q. Now, Force MOS also deposed Mr. Hung. Right?

7 A. Yes.

8 Q. Mr. Hung is ASUS's director of research and development.

9 Right?

10 A. I believe so, yes.

11 Q. You would agree that that would be a good person to ask
12 questions to about JX 7?

13 A. Yeah, I wouldn't disagree with that, sure, and he
14 testified to that at trial, if I recall properly.

15 Q. Well, let's talk about what he testified to at trial.

16 Were you here on Friday, Dr. Ugone?

17 A. I'm sorry?

18 Q. Were you here on Friday?

19 A. Yes.

20 Q. Okay. You know that Mr. Hung has testified twice in this
21 case. Correct?

22 A. Yes.

23 Q. Once by deposition on Friday?

24 A. If I recall properly, yes.

25 Q. Okay. And when he was asked about this data the first

1 time he testified about it which was played in the trial on
2 Friday, he testified it was the first time he'd ever seen JX
3 7. Right?

4 A. I believe so.

5 Q. And he testified that he hadn't seen any document like JX
6 7 at ASUS. Right?

7 A. I'm not sure if I remember that exactly, but I don't
8 disagree with what you're saying. I think there was other
9 aspects which I won't get into, but, I'm not disagreeing with
10 you.

11 Q. Now, when Mr. Hung testified for the second time in this
12 trial, which I believe was yesterday, you were here. Correct?

13 A. Yes.

14 Q. When he testified for the second time, he admitted that
15 this trial is the first time he's attempted to explain JX 7.
16 Correct?

17 A. You would have to show me. I don't remember those exact
18 words. He -- I'll just stop there.

19 MS. PELLEGRINO: Mr. Doyle, can I please have 747,
20 lines 15 through 17?

21 Q. (BY MS. PELLEGRINO) Mr. Hung was asked, This is the
22 first time you've attempted to explain the data in JX 7, isn't
23 it?

24 And he answered, that's correct. Right, Dr. Ugone?

25 A. If this is the trial transcript, I'm not going to

1 disagree what's in the transcript.

2 THE COURT: Counsel, approach the bench, please.

3 (The following was had outside the hearing of the
4 jury.)

5 THE COURT: I can't stop you from using the trial
6 transcript, Ms. Pellegrino, but I told the jury in my
7 preliminary instructions the transcript would not be available
8 to them to consider during deliberations. And as this
9 continues to get flashed in front of them, I'm worried I'm
10 going to get a note that the lawyers got to see the
11 transcript, why can't we.

12 And also I don't know how proper it is to use this
13 witness to just walk down memory lane of what all these other
14 witnesses said. If you want to cross him on what's in his
15 report, I think that's fine, but we seem to be getting a
16 little far afield.

17 MS. PELLEGRINO: You'd be happy to know that's the
18 last time.

19 THE COURT: Let's proceed then.

20 MS. PELLEGRINO: Okay. Thank you, Your Honor.

21 (The following was had in the presence and hearing
22 of the jury.)

23 THE COURT: Let's proceed.

24 MS. PELLEGRINO: Thank you, Your Honor.

25 Q. (BY MS. PELLEGRINO) You agree, Dr. Ugone, that JX 7 does

1 not tell us which accused MOSFETs actually go into which
2 accused ASUS products. Right?

3 A. Correct.

4 Q. And ASUS does not know the mix or combination of MOSFETs
5 in the accused products?

6 A. I will agree with that.

7 Q. Okay. You would agree that it's important in your work
8 to rely on data that is, in fact, reliable.

9 A. Sure. I'll agree with that.

10 Q. And the damages opinion that you've offered in this case
11 is based on the belief that JX 7 is reliable. Correct?

12 A. Correct.

13 Q. And if the jury determines that that data is unreliable,
14 you have not offered a damages opinion based on the unreliable
15 records approach set forth by Mr. Lamotta. Correct?

16 A. I have not provided a number that uses the same
17 methodology that Mr. Lamotta presented to the jury. If that's
18 what you're asking, I'll agree with that.

19 Q. Okay.

20 MR. PELLEGRINO: No further questions. I pass the
21 witness. Thank you, Your Honor.

22 THE COURT: All right. Is there redirect, Mr. Chen?

23 MR. CHEN: Yes, Your Honor.

24 THE COURT: Proceed with redirect examination.

25 MR. CHEN: Thank you, Your Honor.

REDIRECT EXAMINATION

By Mr. Chen:

Q. Dr. Ugone, Microtech tore down six products and made 15 separate MOSFET counts in its tear-down analysis?

A. Yes.

Q. And ASUSTeK provided its slot counts, JX 7, without knowing that Microtech was performing any tear-downs. Right?

A. That's my understanding.

Q. ASUSTeK provided its slot counts without knowing what products Microtech tore down. Correct?

A. Correct.

Q. For each slot counts in the ASUSTeK data, it could be either consistent or inconsistent with the Microtech count if -- in the abstract. Those are the two possible results. Right--consistent or inconsistent?

A. Yeah, I'm taking your question to be if you took Microtech count and the ASUSTeK data, they're either similar or they're not. They're either consistent or not consistent. If that's what you're asking, I'll agree with you.

Q. That's 50/50.

A. I'm not quite sure how to answer that, but if you were just flipping a coin ahead of time, I suppose you could talk about those probabilities.

Q. And a coin flip expressed in decimal terms, that would be 0.5?

1 A. Yes.

2 Q. Sir, what are the chances that a person can correctly
3 predict the results of 15 consecutive coin tosses?

4 A. It would be pretty low. You would have to go 0.5, .5,
5 0.5 .5 15 times, and that's a small number.

6 Q. That's 0.5 times .5 14 times. Right?

7 A. More times, yes.

8 Q. Yes. Or, mathematically, it's 0.5 to the 15th power?

9 A. I think that would be accurate, yes.

10 Q. Let's try to show the Court what that number would look
11 like.

12 MR. CHEN: Mr. Bupp, can you pull up a blank Excel
13 spreadsheet? Could you fill the first 15 rows with the value
14 0.5 in each cell.

15 THE COURT: Mr. Chen, I'm happy for you to show the
16 Court, but it's the jury you need to show this to.

17 MR. CHEN: Thank you, Your Honor.

18 THE COURT: I'll certainly look.

19 MR. CHEN: Appreciate it, Your Honor.

20 And, Mr. Bupp, can you multiply the values in rows A1
21 through A15, and could you display a greater number of decimal
22 places? And why don't we convert that to percentage terms?

23 Q. (BY MR. CHEN) Dr. Ugone, can you share with the jury
24 what's the percentage -- what's the probability percentage of
25 correctly predicting the results of 15 consecutive coin

1 tosses?

2 A. Yes. If I understand the numbers, so that 0 to the left
3 of the decimal point would be like a whole percentage number,
4 like if a 1 there, that would be 1 percent. So as we start
5 moving to the right of the decimal, you've got a 10th, you've
6 got a hundredth, and you've got thousandths. So I think
7 that's 3 one-thousandths of a percent if I'm reading it
8 properly.

9 Q. And if we apply that percentage to the ASUSTeK data that
10 is in JX 07, what does that tell you about the reliability of
11 the ASUSTeK data?

12 A. Well, I would interpret it from an economic perspective
13 which is ASUSTeK turned over the data, Microtech had done
14 their analysis, and the chances that they just randomly
15 matched like you were asking about is very, very low; that
16 there's a higher inference that these were counting the
17 accused components and we're getting similar answers because
18 of the underlying data.

19 Q. Sir, you understand Mr. Lamotta submitted his latest
20 supplemental report on February 8th?

21 A. Yes.

22 Q. This past Saturday.

23 A. Yes.

24 Q. And did you use the word 'alternative' approach or was it
25 Mr. Lamotta who used the word 'alternative' approach --

1 A. Those are Mr. Lamotta's terms. I did not make those
2 terms up. He called it his alternative approach.

3 Q. And you were in the courtroom when Mr. Hung testified?

4 A. Yes.

5 Q. Do you understand, sir, when Mr. Hung previously
6 testified at his deposition, that was May of 2024?

7 A. Yes, I do remember that actually.

8 Q. And when he testified in this courtroom, that was
9 obviously February of 2025.

10 A. Correct.

11 Q. By my count, that's about nine months. Is that right?

12 A. Sure.

13 Q. And did you hear Mr. Hung when he testified that over the
14 past few months, he did verify the information in JX 7 against
15 the information in the bill of materials?

16 A. Yes. He seemed very knowledgeable of the spreadsheet.

17 MR. CHEN: We pass the witness.

18 THE COURT: All right. Is there further cross
19 examination?

20 MS. PELLEGRINO: There is not, Your Honor. Thank
21 you.

22 THE COURT: You may step down, Dr. Ugone.
23 Defendant, call your next witness.

24 MR. McMAHON: Your Honor, Defendant rests.

25 THE COURT: All right. The Defendant has rested its

1 case in chief.

2 Does the Plaintiff have a rebuttal case to present to the
3 jury?

4 MR. HANBA: Yes, Your Honor.

5 THE COURT: Call your first rebuttal witness.

6 MR. THANE: Your Honor, Plaintiffs call by video
7 deposition Chia-Chun Pan, the chief financial officer of
8 Inergy Technology, Incorporated. Plaintiff's time is 7
9 minutes, 14 seconds. Defendant's time is 1 minute, 38
10 seconds.

11 THE COURT: Proceed with this witness by deposition,
12 please.

13 CHIA-CHUN PAN,

14 BY VIDEO DEPOSITION

15 Q. Good morning, Ms. Pan. Thank you for your time this
16 morning. Could you please state and then spell your name in
17 English, if possible, for the record?

18 A. Chia C-H-I-A, Chun C-H-U-N, Pan P-A-N.

19 Q. And where are you right now, Ms. Pan?

20 A. Taipei of Taiwan.

21 Q. Are you currently an employee of Inergy Technology, Inc.?

22 A. Yes.

23 Q. And what is your job title?

24 A. Chief financial officer.

25 Q. Can you explain to me your understanding of this lawsuit?

Shawn M. McRoberts, RMR, CRR
Federal Official Court Reporter

1 A. As I said previously, these two products perhaps are
2 potentially infringing, but as for other products, I don't
3 have -- I don't really know.

4 Q. Does Inergy sell any MOSFETs or products containing
5 MOSFETs to ASUSTeK directly?

6 A. No. No.

7 Q. Does Inergy provide any MOSFETs or products containing
8 MOSFETs indirectly to ASUSTeK through Panjit International,
9 Inc.

10 A. Yes.

11 Q. Does Inergy have an interest in the outcome of this
12 litigation between Force MOS and ASUSTeK?

13 A. No.

14 Q. Are you aware that Inergy itself is challenging the
15 validity of multiple of Force MOS's patents that are involved
16 in this litigation through another action at the United States
17 Patent and Trademark Office?

18 A. Yes.

19 Q. And did you execute it before a notary public in Taiwan
20 Taipei?

21 A. Yes.

22 Q. And was that the first time that you saw this document?

23 A. No.

24 Q. When was the first time that you saw this document?

25 A. A few days before my signing.

Shawn M. McRoberts, RMR, CRR
Federal Official Court Reporter

1 Q. And who sent it to you then?

2 A. Attorneys.

3 Q. And then could you tell me how many pages Exhibit 2 is?

4 A. I do not know.

5 Q. Okay. Let's turn to page 1, the very first page. Do you
6 see on page 1 at the top on left there is stapling on the
7 certification?

8 A. Yes.

9 Q. And would you please turn to page 7? It's the last page
10 of this document. And if you look on the top right, do you
11 also see stapling on the certification? Do you also see
12 stapling on page 7 on the back of the certification?

13 A. Yes.

14 Q. And could you explain to me how this document was
15 created?

16 A. This document was created by -- through calculations of
17 the data pulled from the company's EIP system.

18 Q. Okay. Could you please explain how it was created then?

19 A. It's not directly input, but, rather, it's populated by
20 use of a formula after the calculations are performed by the
21 system.

22 Q. Okay. As an example, could you explain to me -- if we
23 look at column 4 that talks about the gross profit margin, how
24 that is calculated?

25 A. The system will pull the -- the sales revenue and sales

1 gross profit margin of that particular product, and then we
2 would divide the sales profit margin by the sales revenue to
3 obtain the gross margin -- the sales -- sales profit margin.

4 Q. Okay. So the information such as the sales profit margin
5 or sales revenue, that's something that Inergy keeps in its
6 databases. Is that correct?

7 A. Correct.

8 Q. But these percent that we have, say, in the gross profit
9 margin, there's no separate database of just gross profit
10 margins, is there?

11 A. Basically all the data are derived from the same
12 accounting system, and they are calculated based on the data
13 in the accounting system.

14 Q. So this particular document, Exhibit 3 that you have up
15 on your screen, was this document something that Inergy had
16 before the start of the litigation between Force MOS and
17 ASUSTeK? Sorry.

18 A. Yes, in terms of the data source.

19 Q. And did you provide those independent data sources to
20 ASUSTeK as well?

21 A. No.

22 Q. I just want -- for clarity, when you say in your
23 affidavit that the record is from the electronic database of
24 Inergy Technology, Inc., you're not attesting that this
25 document, as it appears on your screen, is in the electronic

1 database; rather, that's a summary of the information that you
2 keep in those electronic databases. Is that correct?

3 A. The information is derived from information that has
4 existed in the system and is information that is directly
5 populated through a program.

6 Q. Okay. And could you explain to me the two components
7 that are listed in the columns, the IW8370 and IW8001, why
8 were those particular components chosen in this document?

9 A. Because according to the information that we receive at
10 the first time was that these two products may have -- may be
11 involving infringement issues. That's why we singled out
12 these two products and pulled data for analysis.

13 Q. And did you know that Force MOS had had letters rogatory,
14 discovery requests, issued from the court in the United States
15 to the courts in Taiwan that were requesting that Inergy
16 produce technical and financial information relating to the
17 MOSFETs that are mentioned in Exhibit 3?

18 A. No.

19 Q. And do you -- to your knowledge, Inergy has not turned
20 over any financial information to Force MOS?

21 A. Correct. It's not -- it has never been turned over.

22 Q. So at any point did Inergy produce to ASUSTeK, or Panjit,
23 or other outside counsel, the underlying printouts or
24 information from these electronic databases that were used to
25 create the summary in Exhibit 3?

1 A. No.

2 THE COURT: Does that complete this witness by
3 deposition?

4 MR. THANE: It does, Your Honor.

5 THE COURT: Call your next witness, please.

6 MR. THANE: Your Honor, Plaintiffs call by video
7 deposition Tso Ming Chen, the chief operating officer for
8 Panjit International, Incorporated. The Plaintiff's run time
9 is 7 minutes and 32 seconds and the defendant's is 1 minute
10 and 41 seconds.

11 THE COURT: Proceed with this witness by deposition.

12 TSO MING CHEN,

13 BY VIDEO DEPOSITION

14 Q. Good morning, Mr. Chen. Could you please state and spell
15 your name in English, if possible, for the record?

16 A. Tso Ming Chen, T-S-O, M-I-N-G, C-H-E-N.

17 Q. And where are you right now, Mr. Chen?

18 A. In a conference room at the Sheraton Hotel in Taipei.

19 Q. And are you currently an employee of Panjit
20 International, Inc.?

21 A. Yes.

22 Q. What is your job title?

23 A. COO, chief operating officer.

24 Q. And are you aware that you are here today testifying
25 because there is a lawsuit between Force MOS and ASUSTeK?

1 A. Yes.

2 Q. And do you know what that lawsuit is about?

3 A. I generally know.

4 Q. Could you please explain to me what you understand the
5 litigation to involve?

6 A. What I know is the portion of this lawsuit that involves
7 Panjit, but I don't know the other portions.

8 Q. Are you aware that there is a patent infringement claim
9 against ASUSTeK made by Force MOS that involves certain Panjit
10 components?

11 A. Yes.

12 Q. And does Panjit sell MOSFETs or products that contain
13 MOSFETs to ASUSTeK directly?

14 A. Yes.

15 Q. All right. I've put a marked exhibit in the marked
16 exhibit folder for you, Mr. Chen. It should be marked as
17 Panjit 1 or Exhibit 1. And this is the indemnification
18 agreement between Panjit and ASUSTeK.

19 A. Sure.

20 Q. Have you pulled up that Exhibit 1? Can you see that in
21 front of you right now?

22 A. Yes.

23 Q. Okay. Now, at the bottom of page 1 in paragraph 25, the
24 last paragraph on the page, it notes that Panjit will be
25 responsible for paying the fees and costs incurred by the

1 defense counsel in this ASUS litigation.

2 Were you aware of this?

3 A. Yes.

4 Q. Do you understand that Panjit has financial
5 responsibility that is tied to the outcome of the litigation
6 between Force MOS and ASUSTeK?

7 A. I understand.

8 Q. Is this what you understand the record that's purported
9 to be Panjit_00000001 to be?

10 A. Yes, in my understanding, yes.

11 Q. And now that we see Exhibit 3, do you see this record in
12 Exhibit 2?

13 A. Yes.

14 Q. Do you recognize Exhibit 3?

15 A. Yes.

16 Q. Okay. Could you explain to me how this document was
17 created then?

18 A. This is an Excel file.

19 Q. So is it an Excel chart that you input in the
20 information--the MOSFET module name, the die name, and
21 quantity? Not you specifically, but when this document was
22 made, there was an Excel file, and then somebody input in
23 these various names and quantities. Is that correct?

24 A. Yes.

25 Q. So this particular chart, it's not something that you can

1 click on a Panjit database and the exact chart shown in
2 Exhibit 3 pops up. Is that correct?

3 A. That's correct.

4 Q. So in the business records affidavit, the affiant
5 attested that the record that they're talking about was the
6 exact document from the electronic database of Panjit
7 International, Inc., but you've testified that Exhibit 3 is
8 not an exact printout of Panjit's electronic database.
9 Correct?

10 A. I disagree.

11 Q. So Exhibit 3 is a record that is directly shown in
12 Panjit's electronic database?

13 A. We're talking about records from, but as to what is a
14 record -- actually, the record that's created based on the
15 system -- the record -- the data in the -- in the system is
16 called record. It's not -- it's not true that it has to be
17 something that is printed out entirely from the system.

18 Q. We can go back to Exhibit 3, the chart itself.

19 Was this compiled after the litigation between Force MOS
20 and ASUSTeK began?

21 A. Yes.

22 Q. And is Exhibit 3, the document there, is that what you
23 would consider to be a record, or is it a summary of this
24 information that is the records?

25 A. This is a summary of the information that is -- that we

1 provide according to the information that is required for this
2 case.

3 Q. And are these all of the MOSFETs that Panjit makes, or is
4 there a particular reason why these three MOSFETs were chosen?

5 A. These three are related to this litigation.

6 Q. So this summary was made to help identify the die name
7 and the quantities for this litigation. Is that correct?

8 A. Correct.

9 Q. And then these die names and quantities, are these kept
10 in Panjit's electronic databases?

11 A. Yes.

12 Q. Did Panjit produce this document that is Exhibit 3 to
13 ASUS or its counsel?

14 A. Yes.

15 Q. Did you produce any portions or printouts, any images of
16 what those databases looked like or contained?

17 A. We just provide -- we just provided a summary or a table.

18 Q. Why did Panjit provide that summary from Exhibit 3 to
19 ASUSTeK?

20 A. Because this could be helpful for clarifying facts.

21 Q. So this production was related to litigation? You can
22 answer just yes or no if it's privileged.

23 A. Yes.

24 Q. Okay. So this document was prepared for the litigation,
25 and again, without, you know, anything privileged, just yes or

1 no.

2 A. The summary document that was prepared based on the
3 database was created for this case.

4 Q. So this document marked Exhibit 4 or Panjit 4 is a copy
5 of the subpoena that Force MOS attempted to send to Panjit. I
6 was wondering if you had seen this document before.

7 A. First of all, I have not seen this. Secondly, I don't
8 think this was sent to Panjit -- oh, it was sent to Panjit. I
9 have not seen this before.

10 Q. Did Panjit voluntarily provide documents to ASUSTeK
11 during this litigation?

12 A. Yes.

13 THE COURT: Does that complete this witness by
14 deposition?

15 MR. THANE: It does, Your Honor.

16 THE COURT: All right. Plaintiff, call your next
17 rebuttal witness.

18 MR. HANBA: Your Honor, Plaintiff calls Dr. Dean
19 Neikirk.

20 THE COURT: All right. Dr. Neikirk, if you'll
21 return to the witness stand. You remain under oath, sir.

22 MR. HANBA: Your Honor, may we pass out binders?

23 THE COURT: You may.

24 And you may go to the podium to prepare when you're
25 ready, Mr. Hanba.

1 All right, counsel. You may proceed with direct
2 examination.

3 MR. HANBA: Thank you, Your Honor. May it please
4 the Court.

5 DEAN NEIKIRK, Ph.D,
6 having been previously duly sworn, testified further under
7 oath as follows:

8 DIRECT EXAMINATION

9 BY MR. HANBA:

10 Q. Welcome back and good morning, Dr. Neikirk.

11 A. Good morning.

12 Q. And why are you here today?

13 A. I'm here to provide my opinions about the validity of the
14 '409 Patent.

15 Q. And were you in the courtroom yesterday when
16 Dr. Shanfield provided his invalidity opinions?

17 A. I was.

18 Q. And have you analyzed that same prior art that
19 Dr. Shanfield analyzed?

20 A. I have.

21 Q. And what is your conclusion?

22 A. That prior art does not disclose the features required by
23 claim 1 of the '409 Patent, so the '409 Patent is valid.

24 Q. And sir, let's start with Dr. Shanfield's anticipation
25 theory, if you will.

1 Dr. Neikirk, can you remind the jury what anticipation
2 requires?

3 A. My understanding is that anticipation requires that a
4 single piece of prior art shows or teaches each and every
5 element of the claim. It has to be clearly taught, it can't
6 simply be something that you infer. It has to be there.

7 MR. HANBA: Mr. Doyle, would you please pull up JX
8 3.12 and zoom in on claim 1?

9 Q. (BY MR. HANBA) This is the '409 Patent, I believe.

10 And, Dr. Neikirk, do you agree with Dr. Shanfield's
11 conclusion that claim 1 of the '409 Patent is anticipated by
12 Kobayashi?

13 A. No, I do not.

14 Q. Dr. Neikirk, will you please identify which claim
15 limitation of claim 1 you opine that Kobayashi does not
16 disclose?

17 A. Well, I focused on the claim element that Dr. Shanfield
18 focused on, which is the closed cells constituting
19 substantially square-shaped cells with rounded corners.

20 Q. And just to clarify, what in claim 1 has to be rounded?

21 A. The square-shaped cells have to have rounded corners.

22 MR. HANBA: And so, Mr. Doyle, would you please put
23 up JX 24.7? And I believe that's figure 6 of Kobayashi. Or,
24 excuse me, figure 6C of Kobayashi. And if you would, would
25 you please put it next to JX 24.6, and then it's column 7,

1 line 57 to column 8, line 4, please.

2 Q. (BY MR. HANBA) And, Dr. Neikirk, do you remember
3 Dr. Shanfield discussing these parts of Kobayashi?

4 A. I do.

5 Q. In your opinion, what do they describe?

6 A. Well, both the figure and the text, the text refers to
7 the figure, are describing what the trenches look like in a
8 side view.

9 Q. And so -- but what does claim 1 require?

10 A. Claim 1 refers to the substantially square-shaped cell
11 and the requirement that it has rounded corners. That would
12 be something you would observe from a top view.

13 Q. And, Dr. Neikirk, what is your opinion regarding whether
14 these passages relied on by Dr. Shanfield satisfy that
15 substantially square-shaped cells with rounded corners
16 limitation?

17 A. They do not.

18 Q. Dr. Neikirk, do you have a demonstrative that you've
19 prepared to show the jury on this issue?

20 A. I have.

21 MR. HANBA: Mr. Doyle, could you please bring up PDX
22 5.1? Thank you.

23 Q. (BY MR. HANBA) Dr. Neikirk, what does this show?

24 A. Well, on the left is the Kobayashi figure, and on the
25 right the text from Kobayashi. The text does refer to

1 corners, but it's the corners of the trench. And as we can
2 see, it is referring to the corners as seen from the side.

3 So I believe there are circles here that would point out
4 two bottom corners and blue circles that would point to top
5 corners. That's on the left.

6 On the right is figure 3 from the '409 Patent. As an
7 illustration of one of the embodiments of the '409 that
8 reflects the substantially square-shaped cells with rounded
9 corners.

10 Q. Just to be clear, sir, you're not comparing the prior art
11 of Kobayashi to the figure in '409 -- in the '409 Patent.
12 Right?

13 A. No, I'm not. I'm comparing it to the claim language.

14 Q. And so what is the right side supposed to illustrate?

15 A. Well, one of ordinary skill has to understand what all
16 this means in terms of that claim language, and they would
17 look to the figures in trying to understand what the claim
18 language was trying to convey. So I've used the figure to
19 illustrate that, but I have to compare the prior art to the
20 claim language.

21 Q. And so turning to the image on the left, that figure 6C
22 of Kobayashi, what are the red and blue circles located in
23 context of -- excuse me. Where are the red and blue circles
24 located in context of Kobayashi's device?

25 A. Yes. The red and blue circles, the red circles, the

1 blue, those are what you can see when you look at this from
2 the side and look at the trench.

3 Q. And also to be clear, who added the red and blue circles
4 to figure 6 at those places?

5 A. Dr. Shanfield did.

6 Q. We didn't see this yesterday. What do you mean
7 Dr. Shanfield did?

8 A. Well, I believe this is copied directly from his report.
9 I don't think I -- I didn't see this with circles on it
10 yesterday.

11 Q. And what passage of Kobayashi was Dr. Shanfield using the
12 annotations to illustrate?

13 A. He referred to Kobayashi at column 7, lines 57 through
14 60, which is this section of text right here in the box.

15 Q. And so, sir, what is your opinion as to whether
16 Dr. Shanfield's annotated version of figure 6C of the
17 Kobayashi patent shows substantially square-shaped cells with
18 rounded corners as recited in claim 1 of the '409 Patent?

19 A. It does not. That figure in this text doesn't show
20 substantially square-shaped cells and it certainly doesn't
21 indicate that the corners of such a square-shaped cell has
22 rounded corners.

23 Q. And, sir, what is your opinion as to whether Kobayashi
24 anticipates claim 1 of the '409 Patent?

25 A. It does not.

1 Q. So let's turn to Dr. Shanfield's obviousness theory.

2 MR. HANBA: Mr. Doyle, if you would, could you
3 please pull up side by side JX 24.1, which is the
4 Kobayashi '196, and JX 25.1, which is the Hshieh '914
5 reference.

6 Q. (BY MR. HANBA) Dr. Neikirk, do you agree with
7 Dr. Shanfield's conclusion that claim 1 of the '409 Patent is
8 obvious over a combination of Kobayashi and Hshieh '914?

9 A. I do not.

10 Q. Dr. Neikirk, what is a motivation to combine?

11 A. Well, as I understand it, a motivation to combine is
12 something that would motivate one of ordinary skill to take
13 one piece of art and use it with another. There needs to be
14 something there that would motivate that person to do it. Not
15 just simply a random selection of components from each -- from
16 one and random selection from another.

17 Q. So it has to be a reason for the combination. Is that
18 right?

19 A. That's my understanding, yes.

20 Q. Can you give an example kind of an everyday example to
21 the jury of this concept?

22 A. Well, I -- for instance, my wife's favorite old car was a
23 VW Beetle. If my truck needs a new engine, I wouldn't look to
24 take the engine out of her old VW Beetle. Just because
25 they're both automobiles is not motivation to try to use an

1 engine in my truck that wouldn't fit and probably wouldn't get
2 me up the hill.

3 Q. For a motivation -- for proper motivation to combine, is
4 it enough to just say THAT the references are in the same
5 field?

6 A. No, it's not.

7 Q. Can they just say that for a proper motivation it's
8 enough to say that the references address similar problems?

9 A. No, that's not sufficient, either.

10 Q. What's your opinion as to whether Dr. Shanfield
11 articulated yesterday a proper motivation to combine those two
12 references?

13 A. He did not.

14 Q. And why?

15 A. Well, as I recall, he simply said they're in the same
16 field. In my analogy, just because two things are cars
17 doesn't mean you take the engine out of one and put it in the
18 other.

19 Q. And what's your opinion regarding whether a person of
20 ordinary skill in the art at the time of the '409's filing
21 date would be motivated to combine Kobayashi and Hshieh in the
22 manner of claim 1?

23 A. They would not.

24 Q. If there's no motivation to combine, then what happens to
25 obviousness?

1 A. Then the obviousness argument fails.

2 MR. HANBA: Mr. Doyle, would you please put up JX
3 25.1 and zoom in on the abstract of Hshieh?

4 Q. (BY MR. HANBA) So, Dr. Neikirk, what is Hshieh focused
5 on?

6 A. Well, Hshieh is focused on power transistor cells, but in
7 particular, and, yes, the phrase does show I've highlighted in
8 yellow -- well, I think actually there's an even better
9 section right here. Hshieh is focused on the use of
10 non-orthogonal parallelograms. The portion that's highlighted
11 down there at the bottom is sort of explaining why Hshieh is
12 so interested in this kind of shape.

13 Q. And what does orthogonal mean?

14 A. Orthogonal means at a right angle, so if the angle
15 between two things is 90 degrees, those two things are
16 orthogonal.

17 Q. Is a square orthogonal?

18 A. A square has four sides of equal length and the angle
19 between two adjacent sides is 90 degrees, so, yes, it uses
20 orthogonal sides.

21 Q. What other kinds of shapes are orthogonal?

22 A. Rectangles are orthogonal. They have opposite sides of
23 equal length, but the angle between each pair of sides is
24 still 90 degrees.

25 MR. HANBA: Mr. Doyle, you can just keep that front

1 page, if you would. And maybe zoom in on the bottom -- excuse
2 me. There you go. The figure there.

3 Q. (BY MR. HANBA) Sir, can squares be non-orthogonal
4 parallelograms like you just circled?

5 A. No. A square is not a non-orthogonal parallelogram, it
6 is an orthogonal parallelogram. By putting the non in front,
7 you exclude squares.

8 Q. So a square can't be just a non-orthogonal parallelogram
9 and an orthogonal parallelogram. Right?

10 A. No.

11 Q. It's an either/or?

12 A. Yes.

13 MR. HANBA: And, Mr. Doyle, please pull up JX 11,
14 figure 8, of Hshieh there. And please put up next to it JX
15 25.17, column 5, lines 23 through 28 of Hshieh.

16 Q. (BY MR. HANBA) Sir, were you here when Dr. Shanfield
17 said that figure 8 of Hshieh on the left has
18 substantially -- is substantially square with rounded corners?

19 A. I was.

20 Q. What does Hshieh say is shown in figure 8A?

21 A. Well, as we can see from this extract from Hshieh, it
22 clearly states that figure 8A is about non-orthogonal
23 parallelogram cells, not squares.

24 Q. And, sir, do you agree with Dr. Shanfield that figure 8A
25 depicts substantially square-shaped cells with rounded

1 corners?

2 A. No, it does not.

3 Q. What part of this passage did Dr. Shanfield show the jury
4 yesterday?

5 A. I don't recall exactly where -- what he quoted from in
6 terms of the specification.

7 Q. Was it this passage?

8 A. It wouldn't surprise me. That looks familiar, but I
9 can't remember right off the top of my head whether this was
10 the exact citation.

11 Q. And are you familiar with the concept of teaching away?

12 A. I am.

13 Q. What does that mean?

14 A. Well, teaching away means if you looked at two
15 references, two pieces of prior art, and you looked to one to
16 tell you to pick some shape, it tells you to pick squares, and
17 you go to another piece of art looking for something else but
18 that piece of art says, oh, don't ever use squares, use
19 triangles, well, that second piece of art is teaching away
20 from the very squares that you selected, saying don't use
21 those. That's teaching away.

22 MR. HANBA: Mr. Doyle, would you please bring up JX
23 25, pages 15 to 16 with column 2, line 64 through column 3,
24 line 5.

25 Q. (BY MR. HANBA) Dr. Neikirk, how does this inform your

1 opinion regarding whether there is a motivation to combine?

2 A. Well, in this piece of art, it's specifically telling you
3 that you should use non-orthogonal parallelograms as opposed
4 to squares. All the squares it shows are listed as prior art.
5 It then goes on and says don't use those because if you use
6 non-orthogonal squares -- they're not squares, non-orthogonal
7 parallelograms, you can increase the packing density. And
8 Hshieh is primarily about showing away to increase packing
9 density so that's -- this teaches away from the use of
10 squares, which is what the other reference was about.

11 Q. So you say teaches away. Does it say, don't use squares?

12 A. It does.

13 Q. Did Dr. Shanfield show the jury this passage?

14 A. I don't think so.

15 Q. Dr. Neikirk, does the Hshieh say anything about why it is
16 rounding corners?

17 A. No, it doesn't. Oh, no, I'm sorry. It does. It does
18 have a description of why it would suggest rounding two of the
19 corners of the non-orthogonal parallelogram.

20 MR. HANBA: Mr. Doyle, would you please bring up JX
21 25.7, columns 5, lines 3 through 17, please.

22 Q. (BY MR. HANBA) Dr. Neikirk, how does this inform your
23 opinion as to whether one would be motivated to combine
24 Hshieh's rounded corners with Kobayashi?

25 A. So this text talks about a thing called -- he called

1 corner vulnerability, but specifically that at sharp corners
2 there can be what's called a three-dimensional diffusion
3 effect. And then he goes on to discuss figure 6A and 6B that
4 do have blunted or rounded corners, but it is to deal with
5 this three-dimensional diffusion effect. At least that's what
6 Hshieh explains.

7 Q. You say this three-dimensional diffusion effect. How
8 does that relate to, if it does, the paralytic drain or
9 avalanche that's described in the '409 Patent?

10 A. At best it would be very indirect. This is looking at a
11 problem where the dopants look -- are arranged differently in
12 the device near the corners is relative to other locations in
13 the device.

14 Q. Did Dr. Shanfield show this passage to the jury
15 yesterday?

16 A. No, I don't believe he did.

17 Q. Did Dr. Shanfield explain at all why Hshieh uses
18 rounding?

19 A. I don't recall that he did.

20 Q. And so let's go back to the beginning of your analysis.
21 When you're doing an analysis on invalidity -- strike
22 that. Excuse me.

23 What is your opinion as to whether the combination of
24 Hshieh and Kobayashi invalidate as obvious claim 1 of the '409
25 Patent?

1 A. That combination does not render claim 1 of the '409
2 invalid as obvious.

3 Q. Now let's go back to the beginning of your analysis.

4 When you start your analysis, when doing an invalidity
5 analysis, what are the presumptions that you must start with?

6 A. I always have to assume that the claim is valid.

7 Q. And why is that?

8 A. Because the USPTO has issued the claim and the assumption
9 is that they were correct in issuing that claim.

10 Q. What opinions did Dr. Shanfield present yesterday that
11 rebutted that presumption of validity?

12 A. I don't believe he presented any valid opinion that
13 rebutted that.

14 Q. And, sir, just to wrap this up, what is your opinion as
15 to whether Dr. Shanfield has shown that claim 1 of the '409
16 Patent is invalid?

17 A. It is not invalid. He has not shown that it is invalid.

18 Q. Thank you, Dr. Neikirk.

19 MR. HANBA: I pass the witness.

20 THE COURT: All right. Cross examination by the
21 Defendant.

22 You may proceed when you're ready, Mr. McMahon.

23 MR. McMAHON: Thank you, Your Honor. May it please
24 the Court.

25

CROSS EXAMINATION

BY MR. McMAHON:

Q. Dr. Neikirk, good morning.

A. Good morning, sir.

Q. You and I have not always agreed on everything in this case. Fair?

A. Fair.

Q. And I think it's also fair to say that you and Dr. Shanfield have not always seen eye-to-eye on every issue. Right?

A. Yes.

Q. Okay. I'd like to focus right now on the issues on which we do agree. Okay? Is that okay?

A. Yes, sir.

Q. Okay. We agree that the two prior art references that Dr. Shanfield talked about and that you just talked about, those are the Kobayashi patent and the earlier Hshieh patent. The Patent Office did not consider either of those prior art patents when examining the '409 Patent. Correct?

A. To the best of my knowledge, that is correct.

Q. And we know that from the face of the '409 Patent itself. Right?

A. Yes. That would certainly be part of it.

MR. McMAHON: Mr. Bupp, could you please bring up the '409 Patent cover? And on the left side, you see there's

1 a heading -- scroll down just a little bit -- a heading that
2 says reference cited -- references cited.

3 Q. (BY MR. McMAHON) Do you see that, Dr. Neikirk?

4 A. I do.

5 Q. And if we look, there are three of them listed there, and
6 that list continues on the top of the next column where there
7 are, if I count correctly, nine more references. Correct?

8 A. Yes.

9 Q. So that's 12 references that -- 12 prior art references
10 that the examiner considered when deciding whether to grant
11 the '409 Patent and its claims. Correct?

12 A. Yes. The star is I think to make it clear that those
13 were cited by the examiner, and all those have a star, so yes.

14 Q. That's right. And the star is there to distinguish
15 references that were cited by the applicant. Right?

16 A. Yes, sir.

17 Q. So if I am reading this correctly, all 12 have a star.
18 Correct?

19 A. Correct.

20 Q. Which means the examiner cited all 12 of these. Right?

21 A. Yes.

22 Q. The applicant did not cite any references. Correct?

23 A. That would appear to be -- yes, correct.

24 Q. And the applicant was the inventor Fwu Iuan Hshieh.
25 Right?

1 A. Yes.

2 Q. And that's the same inventor listed on the Hshieh '914
3 Patent. Right?

4 A. Oh, yes.

5 Q. Which was not cited to the Patent Office.

6 A. Yes.

7 MR. McMAHON: Mr. Bupp, you can take that down.
8 Thank you.

9 Your Honor, I'd like to return to the boards that we
10 looked at yesterday. May I have leave to bring the easel back
11 out?

12 THE COURT: You may.

13 MR. McMAHON: Thank you, sir.

14 Q. (BY MR. McMAHON) Dr. Neikirk, do you recall this claim
15 checklist that Dr. Shanfield testified about?

16 A. I do.

17 Q. And I understand, sir -- can you see the whole board?

18 A. Well, I can see the checkmarks and the figures written,
19 and I can see the rest of the claim on my monitor. So I can
20 see it.

21 Q. Okay. We'll keep the claim on the monitor so that you
22 can refer to it as needed.

23 A. Thank you.

24 Q. And I'd like to return to discussing the points on which
25 we agree.

1 So if we start at that first limitation 1.pre -- I'll
2 just read that -- "a trenched semiconductor power device
3 comprising a plurality of trenched gates surrounding a
4 plurality of transistor cells formed in a semiconductor
5 substrate, wherein." Did I read it correctly?

6 A. Yes, sir.

7 Q. You have not offered any opinion that Kobayashi does not
8 teach that feature. Right?

9 A. That's correct.

10 Q. Okay. We'll skip 1[a] for now. We'll come back to that,
11 but let's go to 1[b]. "Each of said closed cells further
12 includes a circular trench contact disposed substantially in a
13 central portion of said closed cells, penetrating through a
14 source region surrounding said trenched gates and extending
15 into a body region encompassing said source region."

16 You have not disputed Dr. Shanfield's opinion that
17 Kobayashi teaches that feature. Correct?

18 A. Correct.

19 Q. The next one is 1[c], "Said circular trench contact
20 comprises a hole opened from a top surface of said
21 semiconductor substrate and is filled with a contact metal
22 plug."

23 Dr. Neikirk, you have not disputed Dr. Shanfield's
24 opinion that Kobayashi teaches that feature. Right?

25 A. Correct.

1 Q. Next limitation, 1[d], "Wherein sidewalls of said hole
2 are surrounded by and in contact with said source and body
3 regions." You have not disputed Dr. Shanfield's opinion that
4 Kobayashi teaches that feature. Right?

5 A. Yes.

6 Q. Yes, you have not disputed him. Correct?

7 A. Yes, I have not disputed it.

8 Q. Thank you for clarifying.

9 1[e], "And said circular trench contact is separate from
10 said trenched gates with said source region and body region
11 disposed between a gate oxide lining of said trenched gates
12 and all circumferential points of the circular trench contact,
13 and".

14 Dr. Neikirk, you have not disputed Dr. Shanfield's
15 opinion that Kobayashi teaches that feature. Right?

16 A. Yes, that is correct. I have not disputed it. Excuse
17 me.

18 Q. No dispute.

19 A. No dispute.

20 Q. Thank you.

21 The last limitation here, 1[f], "Said contact metal plug
22 connected to a source metal disposed on top of said circular
23 trench contact."

24 You have no dispute with Dr. Shanfield's opinion that
25 Kobayashi teaches that feature. Right?

1 A. I do not have a dispute --

2 Q. Thank you.

3 A. -- with Dr. Shanfield.

4 Q. Thank you.

5 So your disputes, as you presented this morning, are
6 focused on limitation 1[a]. Right?

7 A. Yes.

8 Q. And particularly the language 'substantially
9 square-shaped cells with rounded corners.' Am I right?

10 A. Yes.

11 Q. Thank you.

12 The claim says substantially square-shaped. Right?

13 A. It does.

14 Q. So the claim doesn't require specifically a square.
15 Correct?

16 A. That's correct. It does not require an exact square,
17 yes.

18 Q. Thank you.

19 MR. McMAHON: Mr. Bupp, could we please go to figure
20 3 of the '409 Patent?

21 Q. (BY MR. McMAHON) Dr. Neikirk, you would agree this is
22 the example that the '409 Patent provides of that
23 shape--substantially square-shaped cell with rounded corners.
24 Correct?

25 A. I don't recall whether this is the only example, but it

1 is certainly an example it provides.

2 Q. An example. We agree on that?

3 A. Yes.

4 Q. Thank you.

5 And we see this from the top looking down. Correct?

6 A. Yes.

7 Q. This is a top-view image.

8 A. Yes.

9 Q. And from the top view, we see the opening of the trench.
10 Right?

11 A. Well, to be precise, no.

12 Q. In this -- this is a two-dimensional image so we don't
13 actually -- can't see any depth. There's no actual trench to
14 look down into in this image. Correct, sir?

15 A. Correct.

16 Q. But if we were looking at an actual device before the
17 trench had been filled from this perspective, we would be
18 looking down into the trench opening. Correct?

19 A. Yes.

20 MR. McMAHON: Mr. Bupp, let's go to JX 24, the
21 Kobayashi reference, please, column 7, line 59.

22 Q. (BY MR. McMAHON) Dr. Neikirk, I want to just be clear
23 that you and I agree on what the words are on this page.
24 Starting with the second sentence of this paragraph, it reads,
25 "In this event, corners of each trench 6 at an opening portion

1 may also be rounded." Agreed?

2 A. Agreed.

3 Q. Thank you.

4 Let's go on to the obviousness combination. This is the
5 one that Dr. Shanfield testified he believes claim 1 is obvious
6 in view of Kobayashi plus Hshieh. Right?

7 A. Yes.

8 MR. McMAHON: Your Honor, may I bring up the second
9 board?

10 THE COURT: You may.

11 Q. (BY MR. McMAHON) Dr. Neikirk, this is the board that
12 Dr. Shanfield testified about yesterday?

13 A. It looks like it, yes.

14 Q. And it includes the same checkmarks that he provided for
15 each of the features in the Kobayashi column?

16 A. It does.

17 Q. As well as two checkmarks that he provided for those
18 first two features in the Hshieh column. Right?

19 A. I did not provide those checkmarks.

20 Q. I'm sorry. If I said you did, I didn't mean to.
21 Dr. Shanfield provided those checkmarks.

22 A. That's -- well, yes, I understand he said, please put the
23 checkmarks there.

24 Q. Okay.

25 MR. McMAHON: Could we go, Mr. Bupp --

1 Q. (BY MR. McMAHON) Dr. Shanfield pointed to figure 8A.

2 Right, Dr. Neikirk?

3 A. From Hshieh, yes, he did.

4 MR. McMAHON: Mr. Bupp, let's go to figure 8A of the
5 Hshieh reference, JX 25.

6 Q. (BY MR. McMAHON) This is the figure that Dr. Shanfield
7 pointed at. Correct?

8 A. I believe it is, yes.

9 Q. Now, if I heard you correctly a few minutes ago, you said
10 that Hshieh taught rounding two corners. Right?

11 A. I believe I did.

12 Q. And when you said that, you were referring actually to a
13 different figure which is figure 6A. Right?

14 A. Yes, you are correct.

15 Q. We'll look at that in a moment, but would you agree that
16 figure 8A actually shows rounding all four corners?

17 A. Yes, I would.

18 Q. Okay.

19 MR. McMAHON: Let's go to figure 6A, please.

20 Q. (BY MR. McMAHON) This is what actually -- I'm sorry.
21 Not 6A. 6B. My mistake, Dr. Neikirk. This is the figure you
22 were referring to when you said rounding two corners.
23 Correct?

24 A. Yes, it is.

25 Q. Okay.

1 MR. McMAHON: Mr. Bupp, can we please go to column
2 4, lines 8 to 11?

3 Q. (BY MR. McMAHON) Dr. Neikirk, this is the part of the
4 patent text that describes figure 6A and 6B. Right?

5 A. It does.

6 Q. And it reads, "Figure 6A and 6B show the transistor cells
7 with poly silicon openings have the sharp corners blunted and
8 rounded, respectively, to remove punch-through vulnerable
9 points at the sharp corners of the parallelogram cells."

10 Did I read that correctly, sir?

11 A. Yes, sir.

12 Q. So the rounded corners are to remove punch-through
13 vulnerable points at the sharp corners of the parallelogram
14 cells.

15 A. Yes.

16 Q. Okay.

17 MR. McMAHON: Mr. Bupp, can we move down a little
18 bit to lines 18 to 22 in that same column?

19 Q. (BY MR. McMAHON) Dr. Neikirk, this is the portion of the
20 text in the Hshieh '914 prior art reference that describes
21 figures 8 and B. Correct?

22 A. Yes.

23 Q. And it reads, "Figures 8A and 8B show the transistor cell
24 arrangement, respectively, in parallelogram, centered at
25 lattice points of a hexagonal lattice and parallelogram

1 centered at lattice points of a parallelogram, lattice
2 configurations of the rounded sharp-corner parallelogram
3 cells." Did I read that correctly?

4 A. Yes, sir.

5 Q. Thank you.

6 MR. McMAHON: You can take that down, Mr. Bupp.
7 Thank you.

8 Q. (BY MR. McMAHON) Dr. Neikirk --

9 MR. McMAHON: Actually, Mr. Bupp, do you have
10 Dr. Neikirk's demonstrative? Could we bring that back up,
11 please?

12 Q. (BY MR. McMAHON) Dr. Neikirk, this is the demonstrative
13 you discussed earlier today. Right?

14 A. It is.

15 Q. And you've put a big not equal sign here to indicate your
16 opinion that the Kobayashi reference does not teach rounded
17 corners. Correct?

18 A. Yes.

19 Q. Okay. You did not provide any graphic like this for the
20 Hshieh reference. Correct?

21 A. I did not.

22 Q. Because we agree that Hshieh does teach rounded corners.
23 Right?

24 A. It does.

25 Q. Thank you, sir.

1 MR. McMAHON: Your Honor, pass the witness.

2 THE COURT: All right. Is there redirect from the
3 Plaintiff?

4 MR. HANBA: Briefly, Your Honor.

5 THE COURT: All right. Mr. McMahon, you'll need to
6 take your boards down and move the easel back.

7 Go ahead, Mr. Hanba.

8 MR. HANBA: If it please the Court.

9 REDIRECT EXAMINATION

10 BY MR. HANBA:

11 Q. Mr. McMahon showed you page 1 of the '409 Patent. Do you
12 recall?

13 A. Yes.

14 Q. And so I believe -- you went through the references that
15 were cited by the examiner. Right?

16 A. Yes.

17 Q. I think you-all agreed that the ones with the star, those
18 are patent examiner cited references?

19 A. Yes. Well, yes, cited by examiner.

20 Q. Yeah. And the patent examiner, I think you-all agreed
21 that the patent examiner searched a number of sources for
22 those references. Is that right?

23 A. I assume that's how they come up with the references.

24 Q. And probably including the Patent Office's own library of
25 patents?

1 A. I would certainly expect so.

2 Q. And, sir, what country issued Kobayashi and Hshieh -- the
3 Kobayashi and Hshieh patents?

4 A. They're U.S. patents.

5 Q. Just like the '409 Patent?

6 A. Yes.

7 MR. HANBA: Mr. Doyle, can we go to column 4:18
8 through 22? I think it's describing figure 8A.

9 Q. (BY MR. HANBA) And we just saw this passage, and I've
10 always found this passage a little bit misunderstanding.
11 Could you please maybe describe in layman's terms for the jury
12 just why the Kobayashi patent is problematic and just cannot
13 anticipate?

14 A. This is from Hshieh. I'm sorry, so --

15 Q. I'm sorry. Yes.

16 MR. HANBA: Can you drop that down? I'm sorry.
17 It's still -- I'll strike that because I was going to comment.

18 Q. (BY MR. HANBA) If you could, why is it that the
19 Kobayashi patent cannot anticipate claim 1 of the '409 Patent
20 in -- for the jury in layman's terms?

21 A. So Kobayashi makes reference to rounding of the trench
22 and specifically shows it in cross section. It does make
23 reference to rounding the bottom corners and the top corners,
24 but it never makes reference to the four corners of the
25 square. And, in fact, the description there does not

1 necessarily tell you that the corners of a square or rectangle
2 would be rounded.

3 Q. Is there an everyday example that you could provide the
4 jury?

5 A. I don't know. I think the simplest one is that tabletop
6 over there. I've been making furniture for 50--no, that's a
7 terrifying thought--45 years, and that tabletop, if you looked
8 at it from the side, you'd see that the tabletop has -- that's
9 a fancier edge shape than just a simple rounding, but it's
10 rounded.

11 And if you looked at the ends, so look at it this way,
12 you'd see the rounding. If you look that way, the ends, you'd
13 see it's rounded. But if you just look at the corner, it's
14 not rounded at all. In fact, if anything, it's sharper than
15 it probably was before that router bit was used to shape the
16 edges.

17 So just because you shape the edges doesn't mean that the
18 corner, of the rectangle in that case, but the corner of the
19 square would be rounded at all.

20 MR. HANBA: No further questions. Pass the witness.

21 THE COURT: All right. Any additional cross
22 examination?

23 MR. McMAHON: Nothing further, Your Honor. Thank
24 you.

25 THE COURT: You may step down, Dr. Neikirk.

1 THE WITNESS: Thank you, Your Honor.

2 THE COURT: You're welcome.

3 Plaintiff, call your next rebuttal witness.

4 MR. HANBA: Your Honor, Plaintiff has no further
5 witnesses and rests.

6 THE COURT: So subject to final instructions and
7 closing argument, Plaintiff rests and closes. Is that
8 correct?

9 MR. HANBA: That's correct, Your Honor.

10 THE COURT: Likewise, subject to final instructions
11 and closing argument, Defendant rests and closes?

12 MR. McMAHON: Yes, Your Honor.

13 THE COURT: Thank you, counsel.

14 Ladies and gentlemen of the jury, that means you have now
15 heard all the evidence in this case. There are certain things
16 I need to take up with counsel that doesn't require your
17 presence. I won't give you an explanation; just trust me,
18 there are certain things within the rules of civil procedure
19 that the Court has to take up with counsel that doesn't
20 directly involve the jury, and I intend to do that through the
21 remainder of the day. I expect it's going to take several
22 hours to cover those matters, but I'm confident I can cover
23 all of them during the remainder of today.

24 It is my plan to excuse you in just a few minutes for the
25 remainder of today, but to very emphatically remind you I need

1 you back in the morning at 8:30. It is my hope and it's my
2 expectation that when you return at 8:30 tomorrow morning,
3 I'll be able to immediately begin giving you my final
4 instructions on the law that you are to apply in deciding this
5 case. Again, as I've told you, this is commonly referred to
6 sometimes as the Court's charge to the jury.

7 After, I will -- after I've given you that charge, then
8 counsel for the competing parties will present their closing
9 arguments. And after you've heard closing arguments from the
10 competing parties, that's when I will say, "Ladies and
11 gentlemen of the jury, you may now retire to the jury room to
12 deliberate on your verdict."

13 And as you'll recall from our earlier discussions, that's
14 when you will immediately transition from being prohibited
15 from discussing the evidence that you've heard during this
16 trial to being required to discuss among the eight of
17 yourselves the evidence presented during this trial as you
18 work together to arrive at unanimous answers to the questions
19 that will be set forth in the verdict form.

20 We are getting very close to the end of this trial.
21 Please let me remind you to be especially diligent and
22 vigilant about continuing to observe and comply with the
23 instructions I've given to you. It would be an absolute
24 travesty if all the effort, work, and expense that's been put
25 into this trial were jeopardized because somebody at the 11th

1 hour failed to follow those instructions.

2 So please do not discuss or communicate in any way with
3 anyone about this case. And until I give you those
4 instructions we just talked about tomorrow, do not discuss or
5 communicate about the case with each other in any way.

6 It is just about 10:00 a.m. I'm sorry, but lunch is not
7 going to be here until noon. I don't think any of you want to
8 wait around two hours to have lunch on the government, so I'm
9 going to ask Ms. Clendening to cancel lunch for today given
10 the time.

11 But if you will, take your notebooks with you when you
12 leave in a minute to the jury room. Leave them closed on the
13 table there so they'll be waiting for you tomorrow morning. I
14 hope maybe a free afternoon or a free morning and afternoon
15 will help make up for some of the late evenings we've been
16 working.

17 I appreciate your diligence, I appreciate your careful
18 consideration of everything that's transpired. Again, we're
19 getting close, and I hope to have this case in your hands by
20 or before lunchtime tomorrow.

21 So with that, ladies and gentlemen of the jury, you are
22 now excused until tomorrow morning.

23 (Whereupon, the jury left the courtroom.)

24 THE COURT: All right. Be seated, please.

25 Mr. Hanba, where is Mr. Shanfield--excuse me--Mr.

1 Lamotta?

2 MR. HANBA: Mr. Lamotta is not here. I believe he
3 went back to Houston.

4 THE COURT: And, Mr. McMahon, where is
5 Dr. Shanfield?

6 MR. McMAHON: He is not here. He is traveling back
7 to Boston.

8 THE COURT: And no party asked the Court to excuse
9 any of these witnesses. The last time I had a trial and
10 somebody just sent their witnesses on their merry way without
11 consulting the Court, I made an expert fly back from
12 California to ask to be excused.

13 I'm not going to do that in this case, but you-all need
14 to remember that these witnesses are here under the Court's
15 control and they're not to be released until you ask for and
16 obtain leave of the Court. There are circumstances where one
17 or other of them or some other witness might be necessary.

18 So I don't know how the expectations in other courts are
19 placed upon you, but in this court you don't send witnesses
20 home unless you get leave of the Court and the Court expressly
21 excuses them. I'm a little surprised that neither Mr. Thane
22 nor Mr. Underwood made that clear to you. They certainly
23 understand what the Court's expectations are in that regard.
24 But going forward, consider yourselves warned, and as the
25 golfers would say, this is your one mulligan. All right?

1 Now, I'm going to take a short recess and then I'm going
2 to return to the bench, and at that time I will take up
3 motions that either party wishes to offer pursuant to Rule
4 50(a).

5 As is the Court's usual practice in this regard, those
6 counsel that are going to be presenting closing arguments
7 tomorrow are not required to be here during either the motion
8 practice under Rule 50(a) or the informal and formal charge
9 conferences that will follow. We've got plenty of staffing
10 here, so I think it's certainly reasonable and fair that
11 counsel that are going to present closing arguments tomorrow
12 have the available time to work on that rather than be here
13 during those other matters.

14 Mr. Hanba, I'm guessing that you will present closing
15 argument for the Plaintiff, but tell me who you intend to
16 present closings tomorrow.

17 MR. HANBA: I will be presenting, Your Honor.

18 THE COURT: Okay. And, Mr. McMahon, who's going to
19 present closing from the Defendant's standpoint?

20 MR. MCMAHON: Your Honor, with the Court's leave,
21 Mr. Underwood and I intend to share that responsibility.

22 THE COURT: All right. And, Mr. Hanba, you
23 understand--I think we've already covered it--but you're
24 required to use at least 50 percent of your time in your first
25 closing.

1 MR. HANBA: Yes, Your Honor.

2 THE COURT: Okay. Well, those three gentlemen are
3 no longer required to be here this afternoon.

4 And let me just say this, being candid with everybody
5 here. I understand that there are often younger lawyers who
6 don't get to take witnesses, and it's typical that they get
7 saddled with the responsibility to argue 50(a) motions before
8 the Court.

9 I have had young lawyers go to the podium in that context
10 and look at me in a very earnest expression and say, "Your
11 Honor, this is a patent case." I know it's a patent case. So
12 whoever's going to present 50(a) motions, I'm happy for
13 younger members of either trial team to have an opportunity to
14 participate, I applaud that, but I don't want you to read me a
15 15-page brief that you've prepared. I want you to give me
16 your arguments in a concise form, understanding the Court has
17 heard, seen, and considered all the evidence presented during
18 the trial.

19 After I've heard and ruled on motions presented by either
20 party under Rule 50(a), then I'll conduct an informal charge
21 conference, in all likelihood in my chambers, where we'll take
22 up and review the most current submitted iteration of both the
23 final jury instructions and verdict form.

24 I've looked at your most recent submission there. I
25 don't think they are terribly far apart. I'm hopeful that

1 that process will go smoothly.

2 Once I've had the fulsome input from both sides as to
3 the charge and verdict form, I'll take your input, make any
4 changes I think are necessary and appropriate, and I'll
5 generate what I believe to be the proper final jury
6 instruction and verdict form for use in this trial.

7 I'll then furnish that to both sides with an opportunity
8 to review it. And after that, I will hold a formal charge
9 conference on the record where either party may offer such
10 objections to those documents as they feel both the law and
11 their client's best interest necessitate.

12 Once I've heard and ruled on any objections through the
13 formal charge conference, then I will generate eight printed
14 copies of the final jury instructions, as I intend to give
15 each member of the jury their own printed copy to review once
16 they retire to deliberate. I'll also print one clean copy of
17 the verdict form.

18 And I'll send all those documents back to the jury when
19 they leave the courtroom to retire and deliberate on your
20 verdict. And if all goes as planned and hoped, the jury
21 should have this case in their hands before lunch tomorrow.

22 Any questions from either side?

23 MR. HANBA: No, Your Honor.

24 MR. McMAHON: There is one matter that we wanted to
25 bring to the Court's attention, Your Honor.

1 THE COURT: Tell me what that is, Mr. McMahon.

2 MR. McMAHON: During the designations played this
3 morning, the first one, Ms. Pan, there was a reference to a
4 PTAB proceeding. The parties jointly prepared these
5 designations. It was a mistake, we missed it, but I wanted to
6 bring it to the Court's attention because of MIL 13. We have
7 considered it. I have not had a chance to confer with the
8 other side, but we wanted to bring it at the Court's
9 attention.

10 Our position is that any sort of curative instruction at
11 this point would just make matters worse, so we are not in
12 favor of that, but we wanted to clarify that that proceeding
13 will not be discussed in closing arguments.

14 THE COURT: You're aware of that, Mr. Hanba?

15 MR. HANBA: Yes, Your Honor, and we completely agree
16 with counsel.

17 THE COURT: Well, I'm glad you agree, because I
18 agree it would just make it worse to try and give the jury
19 some kind of a curative instruction. It was brief, it was
20 passing, it was not dwelled on, and I think it would be a
21 mistake to try and -- it would just draw more attention to it
22 than it would cure anything to bring it back up with the jury.
23 So that's how we'll handle that.

24 MR. McMAHON: Thank you, Your Honor.

25 THE COURT: All right. Unless there's something

1 else, let's take about a 10- or 12-minute recess, and then
2 I'll come back and hear motions under Rule 50(a).

3 Court stands in recess.

4 (Brief recess.)

5 THE COURT: Be seated, please.

6 All right, counsel. The Court will next turn and take up
7 motions from either party pursuant the Rule 50(a) of the
8 Federal Rules of Civil Procedure.

9 Let me explain how I'd like to pursue this, counsel.
10 Before I hear substantive argument, I'd like to get an
11 announcement from each side as to substantively topically
12 which matters you want to seek relief on under Rule 50(a).
13 And once I've identified those matters from both parties, that
14 will better position the Court to direct argument, because it
15 is very likely there will be diametrically-opposed motions
16 that can be argued concurrently.

17 So with that, let me ask Plaintiff to go to the podium
18 and identify for me what matters, if any, Plaintiff seeks
19 relief on pursuant to Rule 50(a).

20 MR. CHEN: Your Honor, if I may?

21 THE COURT: What's that, Mr. Chen?

22 MR. CHEN: Defendant asks that Dr. Ugone be
23 released.

24 THE COURT: Dr. Ugone is released.

25 MR. CHEN: Thank you, Your Honor.

1 THE COURT: All right. Let me hear from Plaintiff.

2 MS. GARSSON: Good morning, Your Honor. May it
3 please the Court. Jordan Garsson representing the Plaintiff
4 Force MOS.

5 Plaintiff respectfully moves for Rule 50(a) -- for
6 judgment as a matter of law on the following four issues:

7 First, Plaintiff moves for judgment as to ownership of
8 the '409 Patent; second, Plaintiff moves for validity of
9 claims 1 through 3 of the '634 Patent, that it's not invalid
10 under §102 and §103; third, Plaintiff moves for validity of
11 claim 1 of the '409 Patent, that it is not invalid as obvious
12 under §103; fourth and separately, Plaintiff moves for
13 validity of claim 1 of the '409 Patent that it is not invalid
14 as anticipated under §102.

15 THE COURT: All right. Let me ask Defendant to give
16 me a similar offering as to those substantive matters
17 regarding which it seeks relief under Rule 50(a).

18 MS. LYNCH: Good morning, Your Honor. Kathleen
19 Lynch on behalf of Defendant.

20 We have six separate 50(a) motions. The first is for no
21 standing of the '409 Patent; the second is for invalidity as
22 to claim 1 of the '409 Patent; third, for direct
23 infringement--I'm sorry; excuse me--for no direct infringement
24 of the '634 and '409 Patents; fourth, for no indirect
25 infringement; fifth, for no willfulness --

1 THE COURT: Just a moment, Ms. Lynch. You can speak
2 quicker than I can write.

3 All right. After no willfulness, what?

4 MS. LYNCH: Finally is on the issue of damages.
5 And, Your Honor, we'll have two different attorneys arguing,
6 if it would be helpful to know.

7 THE COURT: I am happy to have anybody argue on
8 either -- or any of these issues, as long as you first filed
9 an appearance in the case and, second, you announce who you
10 are for the record when you get to the podium.

11 MS. LYNCH: Understood.

12 THE COURT: All right. Well, it looks like there
13 are diametrically-opposed motions with regard to validity of
14 the '409 Patent or invalidity of the '409 Patent, so we'll
15 take that up first as far as argument is concerned.

16 Since that's a matter on which Defendant has the burden,
17 let me hear from Defendant first and then I'll hear from
18 Plaintiff.

19 MS. LYNCH: Good morning, Your Honor. Still
20 Kathleen Lynch on behalf of Defendant. May it please the
21 Court.

22 THE COURT: Go ahead, Ms. Lynch.

23 MS. LYNCH: There is no dispute that the '409 Patent
24 requires substantially square-shaped cells with rounded
25 corners. Dr. Shanfield presented evidence that Kobayashi '196

1 anticipates every element of the '409 Patent, including these
2 rounded corners. Dr. Neikirk agreed, or at least offered no
3 opinion, as to 1[b] through 1[g]. 1[a] is the rounded
4 corners.

5 Dr. Neikirk testified that the trenched image in
6 Kobayashi was a side view. That's figure 6C. But he also
7 agreed that if you were to look from the top down at the same
8 device, we would see the shape of a cell. He also agreed that
9 the text of Kobayashi states at the top of the trench, which
10 is the cell, may be rounded.

11 Dr. Neikirk also agreed that 1[a] of the '409 Patent
12 requires only substantially square-shapes, but, quote, it does
13 not require an exact square. That is to anticipation.

14 As to obviousness, Dr. Shanfield also presented evidence
15 that Kobayashi '196, in view of Hshieh '914, invalidates claim
16 1 of the '409 Patent. Doctors Neikirk and Shanfield agree
17 that Hsheigh '914 shows rounding on all four corners of the
18 cell. Doctors Neikirk and Shanfield also agree that Hshieh
19 teaches rounding the corners to avoid punch-through at the
20 sharp edge--that is, they seek to solve the same problem.

21 Thank you, Your Honor.

22 THE COURT: All right. What's the response? And
23 you can affirmatively argue your motion as a part of
24 responding.

25 MS. GARSSON: Thank you, Your Honor. Again, Jordan

1 Garsson on behalf of Plaintiff Force MOS.

2 With regards to anticipation, Defendant did not
3 demonstrate that the '409 Patent was anticipated by the prior
4 art with clear and convincing evidence. For example,
5 Defendant failed to identify any evidence that Kobayashi
6 discloses each and every limitation of the '409 Patent because
7 they do not disclose substantially square-shaped cells with
8 rounded corners.

9 Dr. Shanfield admitted that the figures of Kobayashi do
10 not show rounded corners on the square-shaped cells. And when
11 discussing the specification, Dr. Shanfield only pointed to a
12 description of a figure that he admitted did not show this
13 feature and then read the specification sentence that said,
14 "In this event, corners of each trench 6 at the opening
15 portion may also be rounded."

16 Importantly, Your Honor, the claims of the '409 Patent
17 require both circular trenches, which is that inner circle
18 from the top view, and substantially square-shaped cells with
19 rounded corners. That's the rounded-square shape on the
20 outside of that circle.

21 Dr. Shanfield did not point to any evidence or any
22 feature in Kobayashi that would teach the rounding of the
23 corners on the square-shaped cells; he merely points to the
24 trenches and conflates those with the cells.

25 Dr. Neikirk agreed to the rounded trenches being a

1 possibility based on the teachings of Kobayashi, but did not
2 agree to anything pointing to rounded cells, which are not
3 taught in Kobayashi.

4 This theory should not be permitted to go to the jury
5 since Defendant bears the burden to provide clear and
6 convincing evidence as to why each and every limitation of
7 claim 1 of the '409 Patent is taught exclusively by Kobayashi,
8 and Defendant has failed to provide any evidence as to one of
9 those claimed features.

10 Then on the issue of validity with respect to
11 obviousness, Defendant has not provided evidence of a
12 motivation to combine these references. And in
13 Dr. Shanfield's testimony there is one single question
14 regarding how a person of ordinary skill in the art would
15 combine these references. And this is on page 814.

16 The question of how one of ordinary skill in the art may
17 combine these references, Dr. Shanfield only opines that these
18 are both trying to solve the same problem. So it's the same
19 subject matter, it's the same kind of device, and it would be
20 very reasonable that someone of skill in the art would combine
21 these.

22 These blanket statements that merely state that the two
23 prior art references are in the same field and involve the
24 same problem are insufficient. The Federal Circuit has held
25 as a matter of law that expert testimony concerning mere

1 knowledge of a problem or the mere motivation to generally try
2 and solve that problem is insufficient to establish
3 obviousness because it is entirely different from a motivation
4 to combine two particular references.

5 This theory should not be permitted to go to the jury
6 since, again, Defendant bears this burden by clear and
7 convincing evidence as to why making this combination in the
8 manner that's claimed would be obvious for the '409 Patent.

9 Thank you.

10 THE COURT: Thank you, counsel.

11 Let's transition next to the Defendant's motions for
12 judgment as a matter of law of no direct infringement and no
13 indirect infringement as to the patents-in-suit.

14 And let me hear from Defendant on that motion first.

15 Go ahead, Ms. Lynch.

16 MS. LYNCH: Thank you, Your Honor.

17 Starting with no direct infringement of the '634 Patent,
18 the parties agree that under the Court's claim construction,
19 the '634 Patent requires specific relative doping
20 concentrations. This is the P, P*, and P+. Plaintiff's
21 witnesses Mr. Diep and Dr. Neikirk, as well as Defendant's
22 expert Dr. Shanfield, all agree that SEM images cannot show
23 doping concentration.

24 In fact, none of the image types in evidence, which is
25 SEM primarily, as well as EDS and TEM images, provide any

1 information about the concentration of dopants. Dr. Neikirk
2 testified that even in combination, these SEM and EDS images
3 cannot show doping concentration.

4 There is no dispute that the evidence of record cannot
5 establish doping concentrations of any of the accused
6 components. Dr. Neikirk admitted that he did not present any
7 measurement of doping concentrations to the jury.

8 Since there is no evidence upon which a reasonable jury
9 could rely, ASUSTeK moves for no infringement of the '634
10 Patent.

11 As to the '409 Patent, Plaintiff submitted no credible
12 evidence to show that any of the ASUSTeK accused components
13 infringe the '409 Patent. Claim 1[a] describes a particular
14 shape of cells surrounded by trenched gates. Again, this is
15 the substantially square with rounded corners.

16 Dr. Neikirk testified that the gate surrounds the
17 square-shaped cells, but Dr. Neikirk also testified that in
18 the SEM images that Plaintiff presented, they show thick black
19 lines surrounding the cells where these gates used to be.
20 Dr. Neikirk, Dr. Shanfield, and Mr. Diep agree that hot acid,
21 or possibly a base, removed the material that was once the
22 trenched gates; thus, there is no image in evidence of the
23 gates themselves.

24 Plaintiffs point to absence of the gates as evidence of
25 the shape of the gates, of the cells, despite Dr. Neikirk

1 admitting that the process of preparing these samples for
2 imaging damages them. Dr. Neikirk also testified that the
3 process of tearing a device apart to be able to get to it for
4 imaging damages the device.

5 Dr. Shanfield testified that the etchant used to remove
6 the trenched gates remove not only these gates, but likely eat
7 into the cells themselves in the process. Dr. Neikirk agreed
8 with this.

9 Thus, there are no images in evidence that show the
10 unaltered shape of the cell. Plaintiff has not presented one
11 image of an unaltered device. Plaintiff has not -- presented
12 not one image of an intact cell. No reasonable jury could
13 find that there was sufficient evidence to show the shape of
14 the cell necessary to infringe at least claim 1[a] of the '409
15 Patent.

16 Thank you.

17 THE COURT: All right. Let me hear from Plaintiff
18 on this.

19 MS. GARSSON: Again, Jordan Garsson for Plaintiff,
20 Your Honor.

21 THE COURT: Go ahead, Ms. Garsson.

22 MS. GARSSON: Thank you.

23 With respect to the '634 Patent, Dr. Neikirk testified
24 that the SEM images that were provided showed tapered sources.
25 He provided testimony as to how each of the SEMs for each of

1 the accused components showed the features in respect to each
2 limitation of the '634 Patent.

3 After discussing how the tapered sources were shown, he
4 also mentioned that he based his decision on the P* doping,
5 not only on the SEM images but on a variety of factors. One
6 of those factors included the admissions from the component
7 suppliers that were cited in Dr. Shanfield's own report.

8 Dr. Shanfield then testified and confirmed that the --
9 that each of the accused component suppliers performed ion
10 injection. Dr. Neikirk gave an opinion that the ion injection
11 plus the tapered sources that were shown in the SEMs evidenced
12 the P* doping that was required of these claims.

13 In respect to the '409 Patent, Dr. Neikirk opined that
14 there were rounded corners shown through the SEM images of the
15 cells. He also mentioned that the thick black lining was the
16 oxide, not the gates. He provided both top-view images and
17 side-view images of the SEMs in which he highlighted each of
18 these components, including the gates, that would be evidenced
19 based on what was in the--sorry--based on what was in the SEM
20 images, what he knew must be present because these components
21 were trenched MOSFETs, and based on both the presence of
22 structures and the absence of structures that were shown in
23 the SEM images.

24 The jury can infer from the evidence, including the
25 pictures of these cells, the shape of the cell, and how it

1 matches to what was claimed in terms of these rounded corners
2 of the cell and the gates that were present.

3 Unless Your Honor has any questions --

4 THE COURT: Thank you.

5 Let's go on to the issue of no willfulness, as raised by
6 Defendant.

7 Let me hear from the Defendant on this first.

8 MR. DaMARIO: Good morning, Your Honor. Tom DaMario
9 on behalf of Defendant.

10 THE COURT: Please proceed.

11 MR. DaMARIO: One point of clarification, Your
12 Honor. Ms. Lynch spoke to direct infringement. I'm also
13 happy to speak to indirect infringement, and I think this may
14 be a good opportunity to do so as well, because the factors
15 relating to indirect infringement also relate to willfulness.
16 So with your permission?

17 THE COURT: That's fine. That's perfectly fine,
18 counsel.

19 MR. DaMARIO: Thank you, Your Honor.

20 With respect to indirect infringement, Defendants
21 respectfully move under Rule 50(a) for judgment as a matter of
22 law that ASUSTeK does not infringe -- induced infringement of
23 the asserted patents. Proof of induced infringement requires
24 proof that Defendant knew the induced acts were infringing.
25 The record shows that ASUSTeK did not think that it was

1 infringing and still does not think that it is infringing the
2 asserted patents.

3 Upon receiving the notice letter from Force MOS, ASUSTeK
4 obtained six different opinions showing -- stating that
5 ASUSTeK did not infringe the asserted patents. ASUSTeK also
6 received a copy of the letter that was sent back to Force
7 MOS's attorneys from its supplier that--excuse me--stating
8 that the products do not infringe. And finally, ASUSTeK
9 received a warranty from its supplier that the accused
10 components do not infringe.

11 ASUSTeK did not think it infringed, ASUSTeK still
12 believes that it does not infringe the asserted patents, and
13 for that reason we believe there is no induced infringement,
14 Your Honor.

15 With respect to willfulness, the same factors apply here.
16 Upon receiving Defendant's May '22 -- excuse me. Upon
17 receiving Force MOS's May 2022 notice letter, ASUSTeK reached
18 out to Force MOS. It acted reasonably. The May 2022 notice
19 letter did not identify a product that ASUSTeK manufactures.
20 They had the wrong product number in it. ASUSTeK reached out
21 to Force MOS and said, What's going on here; what product are
22 you actually accusing of infringement. Once we figured that
23 out, ASUSTeK reached out to its suppliers to see what was
24 going on with the suppliers and the actual accused components.
25 The suppliers responded by providing those six opinions of

1 non-infringement, Your Honor.

2 As I mentioned earlier, ASUSTeK did not think it
3 infringed and it still does not think it infringes the
4 patents. As such, we respectfully request that Your Honor
5 grant our judgment as a matter of law with respect to indirect
6 infringement and willfulness.

7 THE COURT: All right. Let me hear from the
8 Plaintiff in response.

9 MS. GARSSON: Thank you, Your Honor.

10 THE COURT: Go ahead, Ms. Garsson.

11 MS. GARSSON: With respect to the indirect
12 infringement issue, Plaintiff put forth evidence from a
13 presentation of Dr. Neikirk that Defendant was indirectly
14 infringing based on acts of its importers, its resellers,
15 and its users, and we presented that--I'm sorry--Plaintiff
16 presented evidence that Defendant did have knowledge of this
17 patent.

18 Mr. Chung testified in detail about the notice letters
19 that were sent to Defendant regarding the asserted patents,
20 and he also testified how the business relationship between
21 the parties would have alerted Defendant to the existence of
22 the asserted patent, such as on pages 181 and 182 when he
23 showed how they point of pride in their patents; they show
24 their business relationships through proudly displaying their
25 patents on their office wall.

1 And additionally, with respect to the issue of willful
2 blindness, there was evidence presented from Defendant's
3 employee Mr. Jim Tso that Defendant actively stopped an
4 attempt to determine the MOSFETs inside its products as soon
5 as Plaintiff became aware of such an investigation.

6 For the non-infringement opinions that Defendant has put
7 forward in terms of these components, they all come from a
8 single supplier Inergy. Defendant has not put forth any
9 non-infringement letters from any of the other suppliers of
10 these accused components.

11 Plaintiff has also presented evidence that after having
12 this knowledge and after this willful blindness, Defendant
13 still has its subsidiary company ACI import, offer for sale,
14 and sell on behalf of Defendant its products into the United
15 States. Mr. Fu testified -- Mr. Fu, ASUS' corporate
16 representative, testified that the whole purpose of
17 Defendant's website was to generate sales of these accused
18 products in the United States.

19 And to the extent that Defendant says that the testimony
20 from these corporate representatives rebuts Defendant's
21 knowledge or intent, that is an issue of credibility for the
22 jury. There were numerous items on which both Mr. Fu and
23 Mr. Hung were cross examined, to which their credibility was
24 called into question.

25 And so, therefore, for indirect infringement, this is a

1 question that should go to the jury.

2 Similarly for willfulness, Your Honor, Plaintiff provided
3 evidence of the notice letters outlining the particular acts
4 of infringement, and then additionally provided evidence that,
5 after receiving notice, Defendant continued to practice
6 Plaintiff's patents.

7 After this complaint, Defendant did not make any attempt
8 to redesign, cease sales, or in any way alter their activity
9 with respect to the accused components.

10 Plaintiff has set forth evidence from nearly every single
11 one of Defendant's witnesses, from its corporate
12 representatives to its experts, showing a pattern that it
13 would refuse to stop its sale of accused products containing
14 accused components, and that it would not change its practices
15 despite the infringement notice from Plaintiff.

16 Plaintiff has also set forth evidence through the
17 examination of Mr. Fu and Mr. Hung that Defendant did not
18 conduct any independent investigation into its infringement,
19 and did not try to cease or in any way decrease any potential
20 infringement of Plaintiff's patents.

21 Further, as confirmed by Mr. Fu, Defendant continued to
22 sell these products containing the accused MOSFETs that had no
23 corresponding non-infringement letters from the suppliers.

24 So for these reasons, Your Honor, we believe this motion
25 should be denied.

Shawn M. McRoberts, RMR, CRR
Federal Official Court Reporter

1 THE COURT: All right. Thank you.

2 Let's turn next to the Plaintiff's motion for judgment as
3 a matter of law regarding ownership of the '409 Patent as well
4 as Defendant's motion for judgment as a matter of law of no
5 standing regarding the '409 Patent.

6 The Court is persuaded that these are part and parcel the
7 same issue, and I'd like to hear competing argument from the
8 parties in succession with regard to these.

9 Let's start with the Plaintiff, and then I'll hear from
10 the Defendant next.

11 MS. GARSSON: Jordan Garsson on behalf of the
12 Plaintiff Force MOS.

13 Plaintiff moves for judgment as a matter of law that no
14 reasonable jury could find that Plaintiff is not the owner of
15 the '409 Patent, and, thus, Plaintiff has standing to assert
16 the '409 Patent against Defendant.

17 Defendant failed to present any evidence at trial showing
18 that Dr. Hsieh did not intend to assign the application -- the
19 '366 application that later issued as the '409 Patent to Force
20 MOS Technology, Co., Ltd. Cayman Islands under the 2006
21 agreement.

22 And, further, all evidence presented during trial
23 demonstrates that Dr. Hsieh intended for the 2006 agreement to
24 assign this application to Force MOS Technology, Co., Ltd.
25 Cayman Islands.

1 Force MOS's corporate representative, Mr. Chung,
2 testified that Force MOS was initially founded and registered
3 in the Cayman Islands in 2006 by the inventor himself,
4 Dr. Hsieh, as well as Dr. Chung in an enterprise they formed.

5 Mr. Chung further testified that the registered name of
6 Cayman Islands entity is Force MOS Technology Company, Ltd.,
7 but that it is also repeatedly referred to as Force
8 MOS-Cayman, Force-MOS Technology Corporations, Force-MOS
9 Technology Corps., and Force-MOS Technology, Co., Ltd.

10 Mr. Chung explained that the reason for these differences
11 and different references to the name is because the words
12 'company' and 'corporation' are the same word in Chinese.
13 In fact, during this trial, we saw from Defendant's own
14 witness and translator that the corporate ending of business
15 names can easily be mistranslated.

16 Just as no reasonable juror would have thought that
17 Mr. Hung intended to testify that he was working for a
18 non-existent entity when he was up on the stand, no reasonable
19 juror would think that Dr. Hsieh meant to assign his patent or
20 his patent application to a non-existent entity instead of the
21 Force MOS that he worked for and was founding -- and was
22 founded for the purpose of having this patent assigned to it.

23 Further, the testimony from Mr. Chung, accompanied by the
24 filed assignment, which is Exhibit JX 6, showed that Dr. Hsieh
25 assigned the '366 application on the same day that the

1 application was filed. Mr. Chung testified that Dr. Hsieh was
2 an employee of Force MOS-Cayman, and his employment agreement
3 required him to assign his inventions to the company. And
4 Force MOS-Cayman was the only Force MOS entity that existed at
5 the time of the 2006 assignment.

6 Defendant presented no evidence of any intent of
7 Dr. Hsieh not to assign the '409 Patent to the very company
8 that Force MOS's representative, Mr. Chung, noted was founded
9 to hold this very intellectual property as the Taiwanese
10 entity was in the process of being established.

11 Further, Defendant presented no evidence that the 2006
12 agreement was not effective, as the only Cayman Islands entity
13 in existence was the Force MOS Technology Co., Ltd. Cayman
14 Islands company.

15 As such, the Court as a matter of law should find that
16 the 2006 agreement assigned the '366 application to Force MOS
17 Technology Co., Ltd. Cayman Islands and, consequently, the
18 Court as a matter of law should find that Plaintiff is the
19 owner of and has standing to assert the '409 Patent.

20 Thank you.

21 THE COURT: Thank you.

22 Let me hear from Defendant on this.

23 Go ahead, Ms. Lynch.

24 MS. LYNCH: Thank you, Your Honor.

25 Plaintiff has offered no evidence from which a reasonable

1 jury could find that Plaintiff has standing to assert the '409
2 Patent. No reasonable jury could find that Force MOS
3 Technology Corp., (KY), which is Cayman Islands, was a proper
4 assignee. The evidence shows that this is an entity that did
5 not and does not exist. This assignment is, therefore, void
6 as a matter of law.

7 This means that the patent rights would revert to the
8 sole named inventor, Dr. Hsieh, not Plaintiff. There is no
9 other assignment of record in evidence.

10 As Plaintiff's counsel just noted, Mr. Chung attempts to
11 fix this assignment error after the fact, but this is not
12 supported by any record evidence.

13 Mr. Chung tried to explain that the assignment was due to
14 a translation error, but there is no dispute that Force MOS
15 Technology Corp. Cayman Islands is registered in an
16 English-speaking country under an English-speaking name and
17 the patent assignment at issue is in English. There is no
18 evidence in the record to indicate that there is a
19 translation.

20 Mr. Chung confirmed that this non-existent company Force
21 MOS Technology Corp. Cayman Islands was submitted to the PTO
22 twice on the first -- on the face of the assignment and also
23 on the cover page for the submission. This name was listed in
24 multiple places.

25 Mr. Chung suggested without any record evidence that

1 Dr. Hsieh was obligated to assign his rights to Force MOS-
2 Cayman, not Force MOS Technology Corp. Cayman Islands, but no
3 reasonable jury could find this to be credible as Force MOS
4 has failed to produce any employment agreement or other
5 obligation to substantiate this claim.

6 Plaintiff has presented no credible evidence to establish
7 that Plaintiff Force MOS Technology, Co., Ltd., owns the '409
8 Patent.

9 Defendant respectfully moves for judgment as a matter of
10 law as to Plaintiff's lack of standing on the '409 Patent.

11 THE COURT: All right. Thank you, counsel.

12 Let's turn next to the Defendant's request for judgment
13 as a matter of law regarding the issue of damages.

14 Let me hear from Defendant on that.

15 MR. DaMARIO: Thank you, Your Honor. Tom DaMario on
16 behalf of Defendant.

17 THE COURT: Please proceed.

18 MR. DaMARIO: ASUSTeK respectfully moves under 50(a)
19 that Force MOS failed to prove damages on three independent
20 bases: First, Mr. Lamotta's alternative approach, which he
21 calls his unreliable records theory, is legally flawed;
22 second, Mr. Lamotta's alternative approach is unsupported by
23 the record; and third, Mr. Lamotta's accused component count
24 is unsupported by the record.

25 Mr. Lamotta testified to a single damages theory in which

1 he apportioned a hundred percent of the value of the MOSFETs
2 to arrive at his damages calculation. This is what he calls
3 his unreliable records theory. This theory is legally flawed
4 for violating the entire market value approach. The legal
5 bases purportedly supporting Mr. Lamotta's hundred percent
6 apportionment merely state that damages cannot be speculative.

7 We heard testimony throughout the trial that ASUSTeK
8 provided documents showing the maximum possible number of
9 MOSFETs in the accused products.

10 Force MOS also engaged an independent testing facility,
11 Microtech, to count each and every MOSFET in the various
12 accused products. There is sufficient evidence in the record
13 such that the maximum number of MOSFETs in the accused
14 products is not speculative. Damages is not speculative, and
15 Mr. Lamotta's alternative approach is not justified.

16 With respect to Mr. Lamotta's alternative approach, it's
17 also factually unsupported by the record we just heard this
18 week. Dr. Neikirk testified that the purported technical
19 advances of the '409 and '634 Patents were not responsible for
20 100 percent of the value of the accused MOSFETs. Mr. Lamotta
21 confirmed this on the stand. He admitted that the apportioned
22 technological contribution to the overall MOSFET was 40
23 percent for the '409 Patent and 13.3 percent for the '634
24 Patent. Nevertheless, Mr. Lamotta testified that a hundred
25 percent apportionment is appropriate.

Shawn M. McRoberts, RMR, CRR
Federal Official Court Reporter

1 To my third point, Mr. Lamotta's accused component count
2 is unsupported by the record. Mr. Lamotta testified that his
3 low-end estimate is tied to Dr. Neikirk's conservative
4 estimate. Dr. Neikirk failed to tie his conservative estimate
5 to any particular evidence that we saw in the record. We
6 heard testimony that for every product category, Dr. Neikirk's
7 estimated MOSFET numbers were higher than the actual counts
8 that Mr. Diep from Microtech conducted in his report. This
9 inflation is not supported by any evidence in the record.

10 Accordingly, on these three bases, we move for judgment
11 as a matter of law that Force MOS failed to prove its damages
12 theory.

13 THE COURT: All right. Thank you, counsel.

14 Let me hear the other side's response, please.

15 MS. GARSSON: Your Honor, Jordan Garsson on behalf
16 of Plaintiff.

17 THE COURT: Go ahead, counsel.

18 MS. GARSSON: Thank you.

19 Throughout trial, it was clear there was a disagreement
20 between the experts regarding the reliability of the evidence
21 and the damages calculations that followed as a result of
22 these reliability questions.

23 §284 requires an award of damages adequate to compensate
24 for infringement, but no less than a reasonable royalty.
25 Plaintiff's damages expert Mr. Lamotta did present his opinion

1 as to a reasonable royalty based on an apportionment. He
2 notes the smallest saleable unit, he comes to a royalty base,
3 he comes to a rate, and from these determinations he gives a
4 damages amount. The evidence was sufficient to support the
5 component count that Mr. Lamotta used.

6 Dr. Neikirk gave an opinion and testified regarding the
7 estimated counts, and the evidence showed that Defendant's
8 records were inadequate and that Microtech's counts did not
9 always match Defendant's records.

10 Further, Mr. Lamotta testified to different methodologies
11 of apportionment for different approaches, but ultimately
12 Mr. Lamotta testified that he calculated a reasonable royalty
13 based on the apportioned value of the patented technology that
14 he based on all of the evidence that he had.

15 And based on the evidence that was shown at trial, Mr.
16 Lamotta testified that the reasonable royalty rate would be a
17 lump sum amount, especially in light of the incompleteness of
18 the data that was received from Defendant.

19 Mr. Lamotta's testimony was based on technical benefits
20 of the patents, as established by the testimony of Plaintiff's
21 technical expert, Dr. Neikirk, and who opined that the claims
22 provided technical benefits to the packaged MOSFETs. And then
23 Mr. Lamotta noted that from these component count information
24 from Dr. Neikirk, from the technical benefits that he heard
25 from Dr. Neikirk, he was able to take that information and

1 perform his royalty calculation to come to the damages
2 position that he testified to.

3 Further, there's evidence for a jury to determine
4 reasonable royalty, as both parties put forward their damages
5 positions based on the competing reasonable royalties and
6 based on the questions for reliability of the evidence.

7 So the defense that the Defendant is questioning the
8 credibility of Dr. Neikirk's estimates for component count, it
9 doesn't change the fact that the issue of damages should also
10 go to the jury.

11 Thank you, Your Honor.

12 THE COURT: Thank you, counsel.

13 All right. Let's move to the last issue for argument
14 regarding relief under Rule 50(a), and that is the Plaintiff's
15 motion that judgment as a matter of law is appropriate that
16 the '634 Patent is valid.

17 Let me hear from Plaintiff first.

18 MS. GARSSON: Thank you, Your Honor.

19 THE COURT: I assume this is in response to
20 Defendant's counterclaim --

21 MS. GARSSON: Yes.

22 THE COURT: -- of invalidity.

23 MS. GARSSON: Yes, Your Honor.

24 THE COURT: Okay. Go ahead.

25 MS. GARSSON: On the issue of validity as to claims

1 1 through 3 of the '634 Patent, Plaintiff respectfully moves
2 for judgment as a matter of law that no reasonable jury could
3 find the asserted claims of the '634 Patent invalid.
4 Defendant simply presented no evidence on this issue and, in
5 particular, Dr. Shanfield, their technical expert, presented
6 no evidence on these issues.

7 In fact, on page 852 of the trial transcript, when asked
8 if Dr. Shanfield was here to opine that claims 1 through 3 are
9 invalid in reference to the '634 Patent, Dr. Shanfield
10 affirmatively stated that he was not providing that opinion.
11 There was no evidence that came forward in the trial that was
12 targeted by Defendant directly to a validity challenge of the
13 '634 Patent.

14 And with that, Your Honor, I'll yield the podium to
15 Defendant, unless you have any questions.

16 THE COURT: No.

17 I'd like to hear Defendant's argument in response next.

18 MR. McMAHON: Your Honor, in accordance with the
19 Court's schedule for disclosing narrowing of claims,
20 Defendants withdrew their invalidity argument as to the '634
21 Patent and proceeded to trial only with respect to claim 1 of
22 the '409 Patent.

23 THE COURT: So, in essence, you're telling me,
24 Mr. McMahon, that this is not a live issue; therefore, it's
25 not subject to relief under Rule 50(a)?

1 MR. McMAHON: Correct, Your Honor.

2 THE COURT: Was there some lack of understanding on
3 this regard? Because I don't know why Plaintiff would move
4 for relief under Rule 50(a) as to an issue that's no longer
5 live in the case.

6 Was your withdrawal or abandonment of the invalidity
7 counterclaim as to the '634 Patent clearly communicated to and
8 understood by Plaintiff?

9 MR. McMAHON: It was -- clearly communicated to,
10 yes. Understood, I can't speak to.

11 THE COURT: Ms. Garsson, do you have an explanation
12 as to why I just heard argument on an issue that the opposing
13 party says is no longer live in the case?

14 MS. GARSSON: Yes, Your Honor. It is purely,
15 because Defendant did not formally withdraw the counterclaims,
16 we wanted to make sure the belt-and-suspenders that this was
17 taken care of.

18 THE COURT: All right. Given this and to ensure
19 that there is an abundance of clarity in the record, the
20 Court's inclination is simply to dismiss the counterclaim of
21 invalidity as to claims 1 through 3 of the '634 Patent, which
22 would moot the 50(a) motion.

23 Does either party object to that?

24 MR. McMAHON: No objection, Your Honor.

25 MS. GARSSON: No objection, Your Honor.

1 THE COURT: All right. Consequently, the Court will
2 dismiss without prejudice the counterclaim raised previously
3 by Defendant regarding the asserted invalidity of claims 1
4 through 3 of the '634 Patent, and the Court will consequently
5 find that Plaintiff's motion for judgment as a matter of law
6 on that issue is moot.

7 All right. Then with respect to the other matters that
8 the competing parties have sought relief from the Court in
9 regard to -- pursuant to Rule 50(a), on the issue of validity
10 or invalidity of the '409 Patent, claim 1 under both a theory
11 of anticipation and obviousness, that motion for judgment as a
12 matter of law is denied.

13 As to the issues of direct infringement of the asserted
14 claims from the asserted patents and with regard to the issue
15 of indirect infringement of the asserted claims from the
16 patents-in-suit, those motions are denied.

17 With regard to the motion for a finding of no willfulness
18 as a matter of law, that motion is denied.

19 With regard to the issue of ownership of the '409 Patent
20 and Defendant's assertion of a lack of standing, based on that
21 ownership issue, those competing motions for judgment as a
22 matter of law are denied.

23 And with regard to the Defendant's motion for judgment as
24 a matter of law regarding damages, that motion is denied.

25 As earlier stated, the motion for judgment as a matter of

Shawn M. McRoberts, RMR, CRR
Federal Official Court Reporter

1 law regarding validity of the '634 Patent is deemed moot based
2 on the Court's agreed dismissal of that counterclaim as set
3 forth in the record and as raised by the parties.

4 All right. That will complete the 50(a) practice,
5 counsel.

6 It's right -- a couple of minutes after 11:00 a.m. Why
7 don't you meet me in chambers, those of you that are going to
8 participate in the informal charge conference, and we'll go
9 into that immediately. And those of you that are present, all
10 of you are welcome.

11 If you're not participating and care to be other places,
12 you are free to leave as long as I have somebody that can
13 address the charge and the verdict form fully in regard to the
14 two competing parties. But you're all welcome to be there if
15 you choose to be there.

16 Court stands in recess. I'll see you in chambers.

17 (Recess.)

18 THE COURT: Be seated, please.

19 Previously the Court -- after the close of the evidence
20 and dismissing the jury for the day, the Court took up and
21 heard motions from both parties with regard to relief pursuant
22 to Rule 50(a) of the Federal Rules of Civil Procedure.

23 After having heard the motions and supporting argument
24 from the parties on those various matters and having issued
25 rulings on those motions, the Court then broke and met with

1 counsel in chambers and held an extensive informal charge
2 conference in which the most current proposed jury
3 instructions and verdict form from the competing parties were
4 discussed in detail. Areas of overt disagreement were
5 discussed, areas either party wished to raise were discussed,
6 areas where the Court had questions that neither party had
7 raised were discussed. It was a fulsome and free-flowing
8 discussion.

9 After the Court received, considered, and took into
10 account the input from that informal charge conference, the
11 Court generated and now has before it what it believes to be
12 the appropriate and proper final jury instructions and verdict
13 form for use in this case. Having produced those documents,
14 the Court has delivered them to the respective parties in
15 multiple copies with an opportunity to review and consider the
16 same.

17 That period of review having been completed, the Court is
18 now prepared to undertake a formal charge conference in which
19 either party may raise any objections to either the final jury
20 instructions or verdict form that they believe is supported by
21 the law and is in the best interests of their respective
22 clients.

23 Counsel, what I would propose to do and as is this
24 Court's general practice in this regard, I'd like to have a
25 single spokesman for Plaintiff and a single spokesperson for

1 Defendant go to the podium. We will then begin with the final
2 jury instructions, and I will walk through that document
3 page-by-page one at a time, and as we address each page of the
4 document, I'll ask if there are objections from either party,
5 at which time either party will then be free to raise such
6 objections as to anything include or omitted from that
7 particular page, and I'll then rule on those objections and
8 we'll go onto the next page. And by taking up and considering
9 the final jury instructions on a single page-by-page basis,
10 the Court believes it is the least likely that anything will
11 be unintentionally overlooked or not considered.

12 Then once we've taken that approach with and completed
13 the formal charge conference with regard to the final jury
14 instructions, we'll then transition to the verdict form, and
15 we'll follow the same approach with it on a page-by-page
16 basis.

17 So with that, whoever's going to speak for Plaintiff,
18 please go to the podium; whoever is going to speak for
19 Defendant, please go to the podium; and then we'll begin the
20 formal charge conference.

21 And for the record, it appears we have Ms. Pellegrino for
22 the Plaintiff and Ms. Lynch for the Defendant.

23 So if that, ladies, if you'll turn to the final jury
24 instructions, copies of which have been provided to you, I'll
25 ask if either party has any objections to anything with regard

1 to page 1 or the cover page of the final jury instructions.

2 Any objections here from either party?

3 MS. PELLEGRINO: No, Your Honor.

4 MS. LYNCH: None from the Defendant, Your Honor.

5 THE COURT: All right. Turning then, to page 2, are
6 there objections here from either party?

7 MS. PELLEGRINO: No, Your Honor.

8 MS. LYNCH: No, Your Honor.

9 THE COURT: Turning next to Page 3, are there any
10 objections here from either party?

11 MS. PELLEGRINO: No, Your Honor.

12 MS. LYNCH: No, Your Honor.

13 THE COURT: Next is page 4 of the final jury
14 instructions. Does either party have any objections here?

15 MS. PELLEGRINO: No, Your Honor.

16 MS. LYNCH: No, Your Honor.

17 THE COURT: Next is page 5. Are there any
18 objections here?

19 MS. PELLEGRINO: No, Your Honor.

20 MS. LYNCH: No, Your Honor.

21 THE COURT: Next is page 6. Are there any
22 objections here?

23 MS. PELLEGRINO: No, Your Honor.

24 MS. LYNCH: No, Your Honor.

25 THE COURT: Turning, then, to page 7, are there any

1 objections here?

2 MS. PELLEGRINO: No, Your Honor.

3 MS. LYNCH: No, Your Honor.

4 THE COURT: Next is page 8. Are there any
5 objections here?

6 MS. PELLEGRINO: No, Your Honor.

7 MS. LYNCH: No, Your Honor.

8 THE COURT: Next is page 9. Are there any
9 objections here?

10 MS. PELLEGRINO: No, Your Honor.

11 MS. LYNCH: No, Your Honor.

12 THE COURT: Next is page 10. Are there any
13 objections here?

14 MS. PELLEGRINO: No, Your Honor.

15 MS. LYNCH: No, Your Honor.

16 THE COURT: Next is page 11. Are there any
17 objections here?

18 MS. PELLEGRINO: No, Your Honor.

19 MS. LYNCH: No, Your Honor.

20 THE COURT: Turning next to page 12, are there any
21 objections here?

22 MS. PELLEGRINO: No, Your Honor.

23 MS. LYNCH: No, Your Honor.

24 THE COURT: Next is page 13 of the final jury
25 instructions. Does either party have any objection here?

1 MS. PELLEGRINO: No, Your Honor.

2 MS. LYNCH: No, Your Honor.

3 THE COURT: Next, then, is page 14. Any objections
4 here?

5 MS. PELLEGRINO: No, Your Honor.

6 MS. LYNCH: No, Your Honor.

7 THE COURT: Next is page 15. Are there any
8 objections here?

9 MS. PELLEGRINO: No, Your Honor.

10 MS. LYNCH: No, Your Honor.

11 THE COURT: Next is page 16. Are there any
12 objections here?

13 MS. PELLEGRINO: No, Your Honor.

14 MS. LYNCH: No, Your Honor.

15 THE COURT: Turning, then, to page 17. Are there
16 any objections here?

17 MS. PELLEGRINO: No, Your Honor.

18 MS. LYNCH: No, Your Honor.

19 THE COURT: Next is page 18. Are there any
20 objections here?

21 MS. PELLEGRINO: No, Your Honor.

22 MS. LYNCH: No, Your Honor.

23 THE COURT: Next, then, is page 19. Are there any
24 objections here?

25 MS. PELLEGRINO: No, Your Honor.

1 MS. LYNCH: No, Your Honor.

2 THE COURT: Next is page 20. Are there any
3 objections here?

4 MS. PELLEGRINO: No, Your Honor.

5 MS. LYNCH: No, Your Honor.

6 THE COURT: Turning next to page 21, are there any
7 objections here?

8 MS. PELLEGRINO: No, Your Honor.

9 MS. LYNCH: No, Your Honor.

10 THE COURT: Next is page 22. Are there any
11 objections here?

12 MS. PELLEGRINO: No, Your Honor.

13 MS. LYNCH: No, Your Honor.

14 THE COURT: Turning, then, to page 23, are there any
15 objections here?

16 MS. PELLEGRINO: No, Your Honor.

17 MS. LYNCH: No, Your Honor.

18 THE COURT: Next is page 24. Are there any
19 objections here?

20 MS. PELLEGRINO: No, Your Honor.

21 MS. LYNCH: No, Your Honor.

22 THE COURT: Next is page 25. Are there any
23 objections here?

24 MS. PELLEGRINO: Force MOS has an objection here,
25 Your Honor.

1 THE COURT: State your objection, please.

2 MS. PELLEGRINO: In the proposed jury instruction
3 submitted by Force MOS, Force MOS had included a jury
4 instruction titled "Doubts Resolved Against Defendant with
5 Respect to Damages." It is Force MOS's position that this is
6 a critical issue in the case. The reliability and
7 completeness of ASUS's data has been raised by both parties
8 repeatedly and throughout argument and evidence, and Force MOS
9 believes that the jury would benefit from some additional
10 guidance on these issues, and so we proposed either the AIPLA
11 standard instruction on this issue, which is based on Supreme
12 Court and Federal Circuit law, or, in the alternative, an
13 instruction previously provided by this Court in *Luv'N Stuff*
14 [sic] which was based on Fifth Circuit law.

15 THE COURT: All right. This is a matter that
16 garnered much discussion in the informal charge conference.
17 The Court's considered it, the Court believes that this
18 proposed instruction is not appropriate, that it indicates the
19 weight of the court behind such terms as wrongdoer and must
20 find in favor of the Plaintiff as described in that
21 instruction.

22 The Court did accept one of the small number of sentences
23 in this instruction and included it in this final jury
24 instruction beginning as the last sentence on the bottom of
25 page 25 and going on to the top of page 26, but except for

1 that sentence which reads, "You must not award Force MOS more
2 damages than are adequate to compensate it for the
3 infringement," the Court found that the remainder of that
4 submission -- I'm sorry. I've recited the wrong sentence.
5 It's the sentence at the bottom of the paragraph preceding
6 that which states, "You must use your common" -- excuse me.
7 "You must use your sound discretion in fixing an award of
8 damages, drawing reasonable inferences where you find them
9 appropriate from the facts and circumstances in
10 evidence." That sentence was a part of the Plaintiff's
11 submission and the Court has accepted and implemented that
12 sentence. The Court found the balance, however, to be
13 unacceptable and likely to convey a preferential view of the
14 facts from the Court to the jury, which would be improper.

15 And while the Court made it clear to counsel in the
16 informal charge conference that there would be absolutely
17 nothing wrong with arguing the reliability of the evidence in
18 this particular instance as a part of closing arguments, the
19 Court did not believe it would be appropriate to use the
20 instruction requested by Plaintiff.

21 Consequently, Ms. Pellegrino, with that explanation, your
22 objection is denied.

23 MS. PELLEGRINO: Thank you, Your Honor.

24 THE COURT: Anything else, counsel, with regard to
25 page 25 of the final jury instructions?

1 MS. PELLEGRINO: No, Your Honor.

2 MS. LYNCH: None from Defendant, Your Honor.

3 THE COURT: Okay. Then I'll turn to page 26 and ask
4 you to do the same, and I'll ask if there are any objections
5 from either party here.

6 MS. PELLEGRINO: Subject to the objection I've
7 already raised and understanding the Court's ruling, no
8 further objections.

9 THE COURT: Anything from Defendant?

10 MS. LYNCH: No objections, Your Honor.

11 THE COURT: All right. Then let's turn to page 27
12 of the final jury instructions. Any objections here?

13 MS. PELLEGRINO: No, Your Honor.

14 MS. LYNCH: No, Your Honor.

15 THE COURT: I'll note, counsel, that at the bottom
16 of page 27 and covering all of page 28 and the very top of
17 page 29 are the 15 *Georgia-Pacific* factors. It's my
18 understanding from having discussed this in chambers that
19 neither party objects to the Court charging this jury with all
20 15 factors. Is that correct?

21 MS. PELLEGRINO: That's correct, Your Honor.

22 MS. LYNCH: Yes, Your Honor.

23 THE COURT: All right. Then just for completeness,
24 I'll ask if there's any objection to anything on page 27, 28,
25 or the top of 29 covering the 15 *Georgia-Pacific* factors as

1 recited there.

2 MS. PELLEGRINO: No objection, Your Honor.

3 MS. LYNCH: No, Your Honor.

4 THE COURT: All right. Page 29 also includes
5 additional text, and I'll ask if there's any objection to
6 anything remaining on page 29 of the final jury instructions
7 from either party.

8 MS. PELLEGRINO: No, Your Honor.

9 MS. LYNCH: No objection, Your Honor.

10 THE COURT: All right. At the end of page 29 the
11 Court calls for closing arguments to be presented, and then
12 resumes with its instructions on the top of page 30.

13 I'll ask you to turn to page 30 and I'll inquire as to
14 whether either party has the objections here with regard to
15 the final jury instruction.

16 MS. PELLEGRINO: No, Your Honor.

17 MS. LYNCH: No, Your Honor.

18 THE COURT: Turning, then, to Page 31, are there any
19 objections here from either party?

20 MS. PELLEGRINO: No, Your Honor.

21 MS. LYNCH: No, Your Honor.

22 THE COURT: Turning to page 32, which is the final
23 page of the final jury instructions, are there objections here
24 from either the Plaintiff or the Defendant?

25 MS. PELLEGRINO: No, Your Honor.

1 MS. LYNCH: No, Your Honor.

2 THE COURT: All right. One other thing, counsel, I
3 want to cover on the record before we transition to a review
4 of the verdict form.

5 In our informal charge conference, it was discussed and
6 my understanding was it was agreed by both sides that if the
7 jury awards a reasonable royalty in this case, that that
8 reasonable royalty will be properly considered to be in the
9 form of a running royalty, and neither party takes the
10 position that a reasonable royalty awarded here should be
11 considered to be in the form of a lump sum.

12 Is that correct for the Plaintiff?

13 MS. PELLEGRINO: That's correct, Your Honor.

14 THE COURT: Is that correct for the Defendant?

15 MS. LYNCH: That's correct, Your Honor.

16 THE COURT: All right. Thank you for confirming
17 that.

18 Let's then move to the verdict form, which has also been
19 provided to you with an opportunity to review it, pursuant to
20 the same process as I've already described.

21 Let's begin with the front page or the first page of the
22 verdict form, are there objections here from either Plaintiff
23 or Defendant?

24 MR. THANE: Not from the Plaintiff, Your Honor.

25 MS. LYNCH: Nor from the Defendant, Your Honor.

1 THE COURT: All right. And I'll note for the record
2 Mr. Josh Thane is apparently now speaking for the Plaintiff in
3 place of Ms. Pellegrino.

4 All right. Let's turn to page 2 of the verdict form
5 where definitions are included. Are there any objections here
6 from either party?

7 MR. THANE: Not for the Plaintiff, Your Honor.

8 MS. LYNCH: Your Honor, Defendant would request that
9 in the definition of ASUSTeK, the second time it says ASUSTeK
10 the K is capitalized -- or that the K be capitalized.

11 THE COURT: All right. You're talking about the
12 second bullet point where ASUSTeK is in bold and then it says
13 -- refers to Defendant ASUSTeK Computer, Inc.?

14 MS. LYNCH: That's correct.

15 THE COURT: And you're suggesting that the K in
16 ASUSTeK as a part of the title ASUSTeK Computer, Inc., should
17 be capitalized?

18 MS. LYNCH: That's correct.

19 THE COURT: I'll certainly do that for purposes of
20 consistency.

21 MS. LYNCH: Thank you, Your Honor.

22 THE COURT: Is there anything else from either party
23 on page 2 of the verdict form?

24 MS. LYNCH: Not from Defendant, Your Honor.

25 MR. THANE: No, Your Honor.

1 THE COURT: All right. Then let's turn to Page 3 of
2 the verdict form where there are specific instructions
3 included. Are there any objections here?

4 MR. THANE: No, Your Honor.

5 MS. LYNCH: None from Defendant, Your Honor.

6 THE COURT: Next is page 4 where Question 1 together
7 with the following instructions -- or together with
8 instructions which follow Question 1 are included, are there
9 any objections here from either party?

10 MR. THANE: No, Your Honor.

11 MS. LYNCH: No, Your Honor.

12 THE COURT: Turning, then, to page 5 where Question
13 2A and 2B are found, are there any objections here from either
14 party?

15 MR. THANE: No, Your Honor.

16 MS. LYNCH: Yes, Your Honor.

17 THE COURT: State your objection.

18 MS. LYNCH: Defendants object to the omission of an
19 indirect infringement instruction because the infringement
20 standards are different, the types of evidence are different,
21 and the damages are different. So to omit the indirect
22 infringement instruction is potentially confusing to the jury.

23 THE COURT: All right. Well, first of all, the
24 Court provides an indirect infringement instruction in the
25 final jury instructions and, having done that, I do not find

1 it necessary or appropriate to present the infringement
2 question to the jury in a separate question as to direct
3 infringement and a separate question as to induced
4 infringement given the completeness and thoroughness of the
5 instructions with regard to both of those types of
6 infringement that's included in the final jury instructions.
7 So with that, the Defendant's objection is denied.

8 MS. LYNCH: Understood, Your Honor.

9 THE COURT: All right. Having heard that, let's
10 turn to page 6 of the verdict form where Question 3 is found.
11 Is there objection here from either party?

12 MR. THANE: No, Your Honor.

13 MS. LYNCH: No, Your Honor.

14 THE COURT: Turning, then, to page 7 where various
15 instructions are presented to the jury. Are there any
16 objections here from either party?

17 MR. THANE: Your Honor, Plaintiff would request that
18 the last entry on page 7 be moved up to be either the second
19 entry or the third entry. Both the current second entry and
20 the last entry both push the jurors forward without having to
21 jump through a couple of different hoops like you do in the
22 third and fourth, and we believe it would be less confusing.

23 THE COURT: Well, these are not numbered, Mr. Thane,
24 so you're use of 'second', 'third', and 'fourth' is a little
25 confusing to me. Could you enunciate your objection with a

1 little more particularity?

2 MR. THANE: I will, Your Honor.

3 The Plaintiff believes that the entry that states
4 "Finally, in your answer 'yes' to Question No. 2A, then
5 regardless of how you answer Question No. 2B and 3 you must
6 answer Question No. 4 and 5," should be moved up
7 underneath--"Only answer Question No. 4 and 5 if you found
8 that at least one of the asserted patents is infringed and not
9 invalid."

10 THE COURT: And your basis for that is what?

11 MR. THANE: Your Honor, it seems less confusing for
12 the jury to get to two bullet points that would push them
13 forward all the way to Questions 4 and 5. The middle two
14 currently have a couple of different yes and no questions that
15 they have to consider before moving forward.

16 THE COURT: All right. Well, I have carefully
17 considered and crafted these instructions, and I am satisfied
18 that the order of them is appropriate, so that objection is
19 going to be denied and the instructions here on page 7 will
20 remain in the order in which they currently stand.

21 MR. THANE: Thank you, Your Honor.

22 THE COURT: Any other objections to anything on page
23 7?

24 MR. THANE: Not for the Plaintiff, Your Honor.

25 MS. LYNCH: And none from Defendant, Your Honor.

1 THE COURT: All right. Let's next turn to page 8 of
2 the verdict form where Question 4 is found. Are there
3 objections here from either party?

4 MR. THANE: Not for the Plaintiff.

5 MS. LYNCH: None from Defendant, Your Honor.

6 THE COURT: Turning, then, to page 9 where Question
7 5 is found, are there objections here from either party?

8 MR. THANE: Not for the Plaintiff.

9 MS. LYNCH: None from Defendant, Your Honor.

10 THE COURT: And turning, then, to page 10, which is
11 the final page of the verdict form, does either party have any
12 objections here?

13 MR. THANE: Not for the Plaintiff, Your Honor.

14 MS. LYNCH: None from Defendant, Your Honor.

15 THE COURT: All right. Then that will complete the
16 formal charge conference.

17 I think the only thing I need to do is capitalize a K and
18 these documents will be ready. I'm going to make that one
19 change, I'm going to generate eight printed copies of the
20 final jury instructions and one clean copy of the verdict form
21 to be delivered as a group to the jury once they've heard my
22 instructions and counsel's closing arguments and I instruct
23 them to retire to the jury room and deliberate on their
24 verdict.

25 I expect to have that done well before tomorrow morning

1 so that at 8:30 when the jury appears we can first read into
2 the record any exhibits used during today's portion of the
3 trial and then I'll proceed to orally give my final jury
4 instructions to the jury.

5 Counsel, are you aware of anything else that the Court
6 needs to take up or consider in this regard.

7 MR. THANE: No, Your Honor.

8 MS. LYNCH: No, Your Honor.

9 THE COURT: All right. That completes the formal
10 charge conference. I will see you in the morning, counsel.
11 You're excused until then.

12 And the Court stands in recess.

13 (The proceedings were concluded at 3:08 p.m.)
