Subject: A.P. Hill Going with FiberSynSys
Date: Wed, Sep 5, 2012 12:55 am

Gents,

I received a call from my buddy out west stating that it sounds like Brian Fortunate is moving forward with FiberSenSys. We need to circle the wagons tomorrow with Bill Mizell and squash this. I've got our buddy out west providing accurate technical feedbackŠwhich isn't good for FiberSenSys. Our buddy has requested any competitive data Network Integrity may have gathered about FiberSenSys. He needs it ASAP. Aren't they violating your patents? Anything we can do to accurately discredit their technology would be great.

Jeff,
Do you have the ball with Bill?

David or Joe?
Do you have competitive info on FiberSensys?

Kevin,
Get the baseball bat readyŠ.
