CERTIFICATION OF MICRO ENTITY STATUS (GROSS INCOME BASIS)			
Application Number or Control Number (if applicable):		Patent Number (if applicable):	
First Named Inventor: Jacky Benmoha		Title of Invention: Method and apparatus for displaying trading assets in a preferred currency	
The applicant hereby certifies the following—			
(1) SMALL ENTITY REQUIREMENT – The applicant qualifies as a small entity as defined in 37 CFR 1.27. (2) APPLICATION FILING LIMIT – Neither the applicant nor the inventor nor a joint inventor has been named as the inventor or a joint inventor on more than four previously filed U.S. patent applications, excluding provisional applications and international applications under the Patent Cooperation Treaty (PCT) for which the basic national fee under 37 CFR 1.492(a) was not paid, and also excluding patent applications for which the applicant has assigned all ownership rights, or is obligated to assign all ownership rights, as a result of the applicant's previous employment. (3) GROSS INCOME LIMIT ON APPLICANTS AND INVENTORS – Neither the applicant nor the inventor nor a joint inventor, in the calendar year preceding the calendar year in which the applicable fee is being paid, had a gross income, as defined in section 61(a) of the Internal Revenue Code of 1986 (26 U.S.C. 61(a)), exceeding the "Maximum Qualifying Gross Income" reported on the USPTO Web site at http://www.uspto.gov/patents/law/micro_entity.jsp which is equal to three times the median household income for that preceding calendar year, as most recently reported by the Bureau of the Census. (4) GROSS INCOME LIMIT ON PARTIES WITH AN "OWNERSHIP INTEREST" – Neither the applicant nor the inventor nor a joint inventor has assigned, granted, or conveyed, nor is under an obligation by contract or law to assign, grant, or convey, a license or other ownership interest in the application concerned to an entity that, in the calendar year preceding the calendar year in which the applicable fee is being paid, had a gross income, as defined in section 61(a) of the Internal Revenue Code of 1986, exceeding the "Maximum Qualifying Gross Income" reported on the USPTO Web site at http://www.uspto.gov/patents/law/micro_entity.jsp which is equal to three times the median household income for that preceding calendar year, as most recently reported by the Bureau of the Census.

Authorization to Permit Access:

Authorization to Permit Access to the Instant Application by the Participating Offices
If checked, the undersigned hereby grants the USPTO authority to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the World Intellectual Property Office (WIPO), and any other intellectual property offices in which a foreign application claiming priority to the instant patent application is filed access to the instant patent application. See 37 CFR 1.14(c) and (h). This box should not be checked if the applicant does not wish the EPO, JPO, KIPO, WIPO, or other intellectual property office in which a foreign application claiming priority to the instant patent application is filed to have access to the instant patent application. In accordance with 37 CFR 1.14(h)(3), access will be provided to a copy of the instant patent application with respect to: 1) the instant patent application-as-filed; 2) any foreign application to which the instant patent application claims priority under 35 U.S.C. 119(a)-(d) if a copy of the foreign application that satisfies the certified copy requirement of 37 CFR 1.55 has been filed in the instant patent application; and 3) any U.S. application-as-filed from which benefit is sought in the instant patent application. In accordance with 37 CFR 1.14(c), access may be provided to information concerning the date of filing this Authorization.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

DECLARATION (37 CFR 1.63) FOR UTILITY OR DESIGN APPLICATION USING AN APPLICATION DATA SHEET (37 CFR 1.76)

Title of Invention	Method and apparatus for displaying trading assets in a preferred currency
As the below named inventor, I hereby declare that: This declaration is directed to: ☒ The attached application, or ☐ United States application or PCT international application number _____ filed on _____. The above-identified application was made or authorized to be made by me. I believe that I am the original inventor or an original joint inventor of a claimed invention in the application. I hereby acknowledge that any willful false statement made in this declaration is punishable under 18 U.S.C. 1001 by fine or imprisonment of not more than five (5) years, or both. WARNING: Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available. LEGAL NAME OF INVENTOR Inventor: <u>Jacky Benmoha</u> Date (Optional): _____ Signature:  Note: An application data sheet (PTO/SB/14 or equivalent), including naming the entire inventive entity, must accompany this form or must have been previously filed. Use an additional PTO/AIA/01 form for each additional inventor.	

This collection of information is required by 35 U.S.C. 119 and 37 CFR 1.63. The information is required to obtain or retain a benefit by the public which is to be (and by the USPTO to process) an application. Platform for trading assets in different currencies

FIELD OF THE INVENTION

[0001] The present invention is generally related to the area of transactions in finance. More particularly, the present invention is related to systems and methods for providing a consolidated trading platform allowing traders to trade various assets in a preferred currency regardless where and in what currency the asset is typically traded.

BACKGROUND

[0002] One of the successful applications on the Internet is electronic commerce. Electronic commerce is an integrative concept designed whereby business commercial communications and management are conducted through electronic methods, such as electronic data interchange and automated data-collection systems, all via the Internet. Electronic commerce is seen and utilized in many industries and markets, and it has also penetrated into the financial markets, which for many years were traded manually or with a high degree of broker intervention. The vast accessibility of the Internet and of electronic networks in general makes it possible to connect buyers and sellers more quickly and objectively.

[0003] For example, one of the largest financial services providers, Charles Schwab & Co. has changed its core business from retail to online business. With the establishment of its website www.schwab.com, Charles Schwab allows qualified investors to trade US securities at any time from anywhere as long as Wall Street is in session. To attract investors residing in other countries, Charles Schwab has websites

in different foreign languages, such as Chinese. As a result, investors residing in China can trade the US securities from their accounts at Charles Schwab via the Internet.

[0004] However, all accounts at Charles Schwab must be in US dollars and all transactions must be conducted in US dollars. FIG. 1 illustrates a process how an investor in China would trade securities listed on a US exchange (e.g., NASDAQ). Because all securities listed on a US exchange are traded in US dollars the investor must first pre-allocate a bulk amount in his/her local currency (e.g., RMB ¥) and look for a source to convert the amount into US dollars that are then deposited into a brokerage (e.g., Charles Schwab) by wire or check. Through the brokerage, the investor may place multiple orders to buy stocks being traded on a US exchange. At a later time, when the investor wishes to realize the profit or loss on his US dollar-denominated stock he must sell his stock and then separately find a foreign exchange resource to convert the settlement of selling the stock back to his local currency. At the time of buying or selling the stocks, as well as during the whole period the investor held the stocks, the investor had no certain knowledge of what profit or loss he was going to get because the currency exchange rate must be obtained for a bulk amount at another time, which may fluctuate significantly enough to affect the ultimate profit or loss.

[0005] One of the problems in the current trading system is that the currency conversion is not at a transactional level. There is a great need for an improved system which performs currency conversion on a transactional level so that a trader or investor knows exactly what profit or loss may occur with a transaction. It is desirable for a trading system to be able to show prices as well as conduct all transactions in a currency preferred by an investor regardless of whatever currency being used in the primary market for the security/asset.

SUMMARY OF THE INVENTION

[0006] This section is for the purpose of summarizing some aspects of the present invention and to briefly introduce some preferred embodiments. Simplifications or omissions in this section as well as in the title and the abstract of this disclosure may be made to avoid obscuring the purpose of the section, the title and the abstract. Such simplifications or omissions are not intended to limit the scope of the present invention.

[0007] Broadly speaking, the invention relates to methods, processes and systems for conducting security transactions in a preferred currency regardless of what original or market currency the securities are being traded in and where the transaction may take place. Securities include but are not limited to a wide array of electronically traded financial assets such as stocks, bonds, options, commodities (e.g., oil, gold), futures/derivatives contracts, funds, index funds, mutual funds, exchange traded funds. According to one aspect of the present invention, a three-tier architecture is presented, which includes a brokerage, a market exchange where securities/assets are traded, and a currency exchange where amounts in one currency can be converted to corresponding amounts in another currency at prevailing rates. Through a consolidated trading platform, the brokerage presents all prices, market data, P&L estimates, and transaction results or settlements in a preferred currency, in conjunction with the market exchange and the currency exchange. As a result, a trader always knows exactly what he/she may end up with a transaction of an asset. Furthermore, according to another aspect of the present invention, when the transaction of the asset is actually performed, the consolidated trading platform can also perform a currency conversion automatically based on specified conditions. Herein the term “trader” represents any initiator of the securities transaction, which includes but is not limited to an individual investor, an institutional investor, an asset manager, a hedge fund, or an electronic order system which automates the work of a human trader or an electronic “black box” algorithmic trading system.

[0008] According to still another aspect of the present invention, orders with conditions (e.g., a limit order, or a stop order) are only executed when the conditions are

met with reference to the market price from the market exchange together with the currency exchange rate from the currency exchange.

[0009] As it is well known that when investing in another country or in another currency, cost and risk are incurred when a currency conversion is performed, traders trading in the same preferred or home currency would benefit if their transactions could be performed without any currency conversion. Therefore, according to still another aspect of the present invention, the consolidated trading platform analyzes transactions where two or more traders have placed orders in the same assets to determine whether or not the traders can be matched directly without currency conversion even when they share a preferred currency which may differ from the market currency for the asset.

[0010] The invention may be implemented in numerous ways, including a method, system, device, or a computer readable medium. Several embodiments of the invention are discussed below. In one embodiment, the invention is a method for providing a consolidated trading platform and the method comprises: providing access to a trading server that is coupled to a currency exchange server and a market exchange server; determining the preferred currency chosen by the trader, determining whether an asset is being chosen for trading; determining the market currency of the asset being traded at the market exchange; receiving a prevailing currency exchange rate from the currency exchange server if the preferred currency is not identical to the market currency; receiving a price of the asset being traded from the market exchange server, converting the price received by the trading server from the market exchange server to the preferred currency using rates supplied by the currency exchange server and, if the trader chooses to transact the asset, performing a transaction of the asset on the market exchange and a conversion of the proceeds of the transaction into the preferred currency on the currency exchange.

[0011] According to another embodiment, the present invention is a software product providing a consolidated trading platform. The software product may be loaded in a computing machine to provide the functions, benefits, objects and processes contemplated in the present invention. The computing machine may be a server or

servers provided by a financial institution. The software product comprises: programming code for providing access to a trading server that is coupled to a currency exchange server and a market exchange server; programming code for determining whether an asset is being chosen for trading; programming code for determining the preferred currency chosen by a trader; programming code for determining a market currency of the asset being traded; programming code for receiving a prevailing currency exchange rate from the currency exchange server if the preferred currency is not identical to the market currency; programming code for receiving a price of the asset being traded from the market exchange server, converting the price received by the trading server from the market exchange server to the preferred currency using rates supplied by the currency exchange; and programming code allowing the trader to transact the asset, performing a transaction of the asset on the market exchange and a conversion of the proceeds of the transaction into the preferred currency on the currency exchange.

[0012] Accordingly, one of the objects of the present inventions is to provide a consolidated platform for conducting security transactions in a preferred currency regardless what original or market currency the securities are being traded in and where the transaction may take place.

[0013] Other objects, features, and advantages of the present invention will become apparent upon examining the following detailed description of an embodiment thereof, taken in conjunction with the attached drawings.

BRIEF DESCRIPTION OF THE DRAWINGS

[0014] The invention will be readily understood by the following detailed description in conjunction with the accompanying drawings, wherein like reference numerals designate like structural elements, and in which:

[0015] FIG. 1 shows a process how an investor in China would trade a security item listed on a US exchange (e.g., NASDAQ);

[0016] FIG. 2A illustrates a system configuration in which the present invention may be practiced in accordance with one embodiment thereof;

[0017] FIG. 2B shows a three-tier architecture in which there are three elements together providing various transactions in a preferred currency;

[0018] FIG. 3 shows a flowchart or process of conducting a transaction by a trader in a chosen currency other than a market currency;

[0019] FIG. 4 shows a flowchart or process of executing a conditional order (e.g., limit order, or stop order) by a trader; and

[0020] FIG. 5 shows a flowchart or process of currency neutral trading.

DETAILED DESCRIPTION OF THE INVENTION

[0021] The detailed description of the invention is presented largely in terms of procedures, steps, logic blocks, processing, and other symbolic representations that directly or indirectly resemble the operations of data processing devices coupled to networks. These process descriptions and representations are typically used by those skilled in the art to most effectively convey the substance of their work to others skilled in the art. Numerous specific details are set forth in order to provide a thorough understanding of the present invention. However, it will become obvious to those skilled in the art that the present invention may be practiced without these specific details. In other instances, well known methods, procedures, components, and circuitry have not been described in detail to avoid unnecessarily obscuring aspects of the present invention.

[0022] Reference herein to “one embodiment” or “an embodiment” means that a particular feature, structure, or characteristic described in connection with the embodiment can be included in at least one embodiment of the invention. The appearances of the phrase “in one embodiment” in various places in the specification are not necessarily all referring to the same embodiment, nor are separate or alternative embodiments mutually exclusive of other embodiments. Further, the order of blocks in process flowcharts or diagrams representing one or more embodiments of the invention do not inherently indicate any particular order nor imply any limitations in the invention.

[0023] Referring now to the drawings, in which like numerals refer to like parts throughout the several views. FIG. 2A illustrates a system configuration **200** in which the present invention may be practiced in accordance with one embodiment thereof. The configuration **200** includes a network **202** that may be the Internet, the Intranet and a data network of other private or public networks, and in form of wireless or landlines. Coupled to the network **202** is a client machine **204** that represents one of many client machines that may be accessed by or associated with traders residing anywhere. As used herein the client machine may include, but is not limited to, any form of desktop or laptop or server computer, handheld wireless device, or mobile phone which allows an investor to communicate electronically for trading purposes. Further, a trader may include, but not be limited to, a user, an individual, an investor or an institution that transact (e.g., buy or sell) assets, wherein the assets may include, but not be limited to, various securities. Examples of securities and assets include, but are not limited to, stocks, options, bonds, futures contracts, commodities (oil/gold), derivatives contracts, mutual funds, exchange traded funds, or any other OTC (over the counter) or exchange listed instruments. Exemplary issuers of securities include commercial companies, government agencies, local authorities and international and supranational organizations (such as the World Bank).

[0024] Also coupled to the network **202** are three servers **206**, **208** and **210**. The server **206** represents a bank, an exchange agency, a multibank portal or matching service providing a currency exchange rate to buy or sell a type of currency for another. The server **208** represents a brokerage (e.g., Scottrade) to facilitate a transaction decided by a trader. The server **210** represents an asset or market exchange (e.g., NYSE) where an asset is caused to change hands. According to one aspect of the present invention, assuming a user has already established an account with the brokerage and authorized to access the account, what the user sees is everything in a preferred currency (e.g., euro, yen or RMB) including all transactions (e.g., to sell or buy an asset) and profit and loss. One of the features, benefits, and advantages of the present invention is to provide a mechanism that shows all transactions in a preferred currency regardless of whatever currency an asset is originally priced. The mechanism conducts a transactional level currency conversion. As a result, a trader knows exactly what profits and losses he/she is going to get in the transaction, without being subject to uncertainty in currency conversion of another time.

[0025] According to one embodiment, the present invention is based on a three-tier architecture as shown in FIG. 2B in which there are three elements together providing a consolidated trading platform. These three elements are communicating over a network, together providing all transactions in a local currency upon a real-time transactional level currency conversion. Depending on implementation, respective modules may be executed in each, some or all of the elements. It should be noted, however, the three elements may be implemented in a single computing machine which may be viewed as a single server or distributed over many servers owned by different organizations.

[0026] FIG. 3 shows a flowchart or process **300** of conducting a transaction by a trader. The process **300** may be implemented in software, hardware or a combination of

both. The process **300** starts at **302** where it determines what type of currency (e.g., Yen, RMB, EURO) that has been determined by the trader. For example, the trader resides in Japan and keeps his money in Japanese yen, thus the preferred currency is the Japanese yen. Once the currency is determined, all subsequent transactions, market data or quotes are presented in the chosen currency in conjunction with a prevailing currency exchange rate provided by an exchange agent. At **304**, the process **300** determines whether an item (e.g., a stock of XYZ company) has been chosen for transaction (e.g., buying or selling the stock). If a trader has not selected an item for trading, the process **300** goes back awaiting a selected item. Based on the preferred currency, a prevailing exchange rate is obtained at **306** from a currency exchange. In one embodiment, the prevailing exchange rate is provided by a participating financial agency that is willing to buy the Japanese yen and sell US dollars at the published exchange rate.

[0027] The item is assumed to be priced in US dollars. Given the prevailing exchange rate, the various costs of the item are displayed in the Japanese yen at **308**. The costs include, but may not be limited to, a current market cost of the item to own or to sell, a transaction cost, and a total cost including all the costs and fees. Thus the trader has certain knowledge of what to pay for the item, or profit or loss when selling the item.

[0028] The process **300** now goes to **310** where the trader decides whether the item shall be bought or sold. If for some reason that the trader decides not to continue the transaction (e.g., not to own or sell the asset), the process **300** goes back to **302** where the trader may choose another item for trading. Now it is assumed that the trader decides to proceed with the item (e.g., to own or sell the asset), the process **300** goes to **312** where the transaction is completed (i.e., settled) in the preferred currency.

[0029] In one embodiment, to complete the transaction in the preferred currency, the currency exchange converts all settlements to the preferred currency per the prevailing exchange rate, as if the item has changed hands in the preferred currency. In other words, as shown in FIG. 2A, the server **208** communicates with the server **210** to complete the currency conversion. Depending on implementation, the server **210** may be part of the brokerage or an independent agent, and the currency convention may actually happen (actually money exchanged) or credits may be used in the account.

[0030] According to another embodiment, an investor is planning to invest in the commodity of light sweet crude oil, contracts of which are priced in US dollars on the NYMEX. As the price of the contract is priced in USD while the investor has selected a home currency of EURO, one or more modules in the embodiment of the present invention monitors the prevailing interbank market price of the ratio of EUR/USD as well as the price of oil and updates the price displayed to the investor accordingly. At any point in time the price of the contract displayed to the investor follows the relationship:

$$\text{Price of Asset in Home Currency} = (\text{Price of Asset in USD}) / (\text{Rate of EUR/USD})$$

[0031] If the price of oil is \$50/barrel and the rate of EUR/USD is 1.30 (i.e. 1 EURO = 1.3000 US dollars), the effective price of the asset in home currency is 38.46 Euros, and this is the price that can be displayed to the investor. It may be noted that the exchange rate used may be based on the settlement date of the asset class, for instance, a 30-day oil contract may use the EUR/USD 30-day forward rate, whereas a US equity would use a EUR/USD spot next rate.

[0032] The investor is able to view and make purchase or sale decisions based on the combined price, which contains both the asset price and the currency price.

[0033] FIG. 4 shows a flowchart or process **400** of executing a limited order by a trader. The process **400** may be implemented in software, hardware or a combination of both. The process **400** starts at **402** where a preferred currency is determined by the trader. Based on the preferred currency, a prevailing exchange rate is obtained at **404** from a currency exchange. It is assumed that the item being exchanged is in a different currency (i.e., a market currency). At **406**, the process **400** determines whether a limit order of an item has been placed. If no order is placed, the process **400** goes back to **402**.

[0034] It is now assumed that a limit order is placed at **410**, for example, to buy 100 common shares of Microsoft Corporation at RMB ¥ 220/share, good until cancelled. At the time the order is placed, the prevailing exchange rate from RMB to USD is 0.125 and the stock is traded at USD 28/share or RMB ¥ 224/share. Accordingly, the condition of the limit order is not met at **412** and the order will not be executed. The limit order is essentially an open order. As the time goes, either or both of the stock price and the exchange rate change. The process **400** goes back to **404** to obtain an updated exchange rate and unify all parameters into one currency (e.g., either in RMB or USD) at **408** so that the condition of the limit order can be verified at **410** again.

[0035] It is assumed that either the stock price has dropped a little, the exchange rate increases, or both of the stock price or the exchange rate change in favor to the condition of the limit order, the condition of buying 100 common shares of Microsoft Corporation at RMB ¥ 220/share is subsequently met at **410**, the order is executed at **412**.

[0036] To complete the transaction in the preferred currency, the currency exchange converts the settlement to RMB per the prevailing exchange rate at **414**, as if

the stock has changed hands in RMB. In other words, as shown in FIG. 2A, the server **208** communicates with the server **210** to complete the currency convention.

[0037] FIG. 5 shows a flowchart or process **500** of currency neutral trading. The process **500** may be implemented in software, hardware or a combination of both. As it is well known that, when investing in another country or in any currency, the cost and risk are incurred when a currency conversion is performed. Investors trading in the same home currency would benefit if their transactions could be performed without any currency conversion. In one aspect of the present invention, one embodiment implementing the process **500** is configured to analyze orders and purchases/sales and determine whether or not investors can be matched without currency conversion.

[0038] The process **500** starts at **502** where it determines what type of currency is preferred by a trader. At **504**, the process **500** determines whether an item (e.g., a stock of XYZ company) has been chosen for transaction (e.g., buying or selling the stock). If a trader has not selected an item for trading, the process **500** goes back awaiting a selected item. At **506**, the process **500** checks with an exchange to determine what currency the item is being traded. Regardless whatever the currency the item is being traded, the order is always in the preferred currency selected by the trader at **508**.

[0039] At **510**, the process **500** determines whether the currency being traded is identical to the preferred currency. If the two currencies are different, the process goes to **514** after obtaining a prevailing currency exchange rate at **512**, where the trader has the option to complete the transaction or choose a different item for trading at **514**. If the two currencies are identical, which means there is no need to conduct a currency convention, the process goes to **514** directly. One of the advantages, benefits and

objects of the process **500** is the inherent ability to analyze orders and purchases/sales and determine whether or not investors can be matched without currency conversion.

[0040] For example, two investors sharing Euro as a home currency, both elect to send orders at 40 euro/barrel. When a match occurs (e.g., on an over-the-counter market), one embodiment of the present invention notes that these two investors traded in the same home currency, as they both take Euro as their home currency. Instead of performing currency conversion trades, the system contemplated in accordance with the present invention simply sends appropriate settlement instructions to each so that the oil contracts can be exchanged directly.

[0041] For example, the trader resides in Europe and keeps his money in Euro, thus the preferred currency is EURO. Based on the preferred currency, a prevailing exchange rate is obtained at **406** from a currency exchange. In one embodiment, the prevailing exchange rate is provided by a participating financial agency that is willing to buy the Japanese yen and sell US dollars at the published exchange rate.

[0042] It is assumed that there are two investors sharing Euro as a home currency, both elect to send orders at 40 euro/barrel. When a match occurs, the system notes that these two investors traded in home currency. Instead of performing currency conversion, the system simply sends appropriate settlement instructions to each so that the oil contracts can be exchanged directly. It should be noted, however, the ability to exchange the contracts varies based on whether the market for the asset is an OTC (over the counter) or exchange-based central counterparty and the specific settlement characteristics of the asset being traded. In the case where the market permits a direct settlement (such as an OTC market), the contracts/shares/instruments can be exchanged directly without currency conversion if both participants share the same

home currency. The system will perform according to the characteristics of the market for the asset.

[0043] In any case, the settlement is displayed at **516** in the preferred currency so that the trader knows exactly how much this transaction costs, or how much profit or loss this transaction is going to realize.

[0044] One skilled in the art will recognize that elements of the system in the present invention may be implemented in software, but can be implemented in hardware or a combination of hardware and software. The invention can also be embodied as computer-readable code on a computer-readable medium. The computer-readable medium can be any data-storage device that can store data which can be thereafter be read by a computer system. Examples of the computer-readable medium may include, but not be limited to, read-only memory, random-access memory, CD-ROMs, DVDs, magnetic tape, hard disks, optical data-storage devices, or carrier wave. The computer-readable media can also be distributed over network-coupled computer systems so that the computer-readable code is stored and executed in a distributed fashion.

[0045] There are numerous advantages, benefits and features in the present invention. One of these advantages, benefits and features is that the platform contemplated in the present invention facilitates managements of all types of security or asset exchanges in a preferred currency.

[0046] The present invention has been described in sufficient detail with a certain degree of particularity. It is understood to those skilled in the art that the present disclosure of embodiments has been made by way of examples only and that numerous changes in the arrangement and combination of parts as well as steps may be resorted without departing from the spirit and scope of the invention as claimed. Accordingly, the

scope of the present invention is defined by the appended claims rather than the forgoing description of embodiments.

Platform for trading assets in different currencies

Abstract

Techniques to trading assets in at least two preferred currencies are described. According to one aspect of the present invention, a three-tier architecture is presented and includes a brokerage, a market exchange and a currency exchange. Through a consolidated trading platform, the brokerage presents all price, quotas, transactions or settlements in a preferred currency, in conjunction with the market exchange and the currency exchange. As a result, a trader always knows exactly what he/she may end up with a transaction of an asset, where a prevailing exchange rate is obtained prior to a transaction to prevent uncertainty in currency exchanges in another time.

CLAIMS

I claim:

1. A platform for trading an asset, the platform comprising:
a trading server, coupled to a terminal associated with a user, receiving an indicator of first currency from the terminal, wherein the trading server is coupled to at least one currency exchange server and at least one market exchange server, the server is configured to calculate costs and fees in the first currency to own or sell the asset being traded in second currency, the costs and fees are displayed on a display device, the costs and fees being display are dynamically changed in accordance with a first prevailing exchange rate between the first currency and the second currency, and even when the market value of the asset remains unchanged, wherein the first prevailing exchange rate is determined by the trading server in reference to the at least one currency exchange server, there server conducting in the trading server a transaction of the asset by transporting a transaction request from the trading server to the market exchange server upon receiving an order from the trader; and reaching a settlement in the trading server as soon as the transaction of the asset is performed by the market exchange server in accordance with conditions set by the trader, wherein a second prevailing exchange rate is calculated from the currency exchange server right before the transaction takes place, and executes the transaction with the calculated second prevailing exchange rate, wherein costs and fees in the settlement per the second prevailing exchange rate are not identical to the displayed costs and fees with the first prevailing exchange before the transaction of the asset took place.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Preliminary Amendment

Dear Sir:

The Applicant respectfully requests the Examiner to enter the following amendments before considering the pending application:

AMENDMENTS TO THE CLAIMS are reflected in the listing of claims which begins on page 2 of this Response.

REMARKS/ARGUMENTS begin on page 6 of this Response.

AMENDMENTS TO THE CLAIMS

Please amend Claim 1 and add Claims 2-15 as follows:

1. (*Currently amended*) A platform for trading an asset, the platform comprising:
a trading server, coupled to a ~~terminal-client machine~~ associated with a user,
receiving an indicator of first currency from the ~~client machine~~ terminal, wherein
the trading server is coupled to at least one currency exchange server and at
least one market exchange server, the trading server is configured to calculate
costs and fees in the first currency to own or sell the asset being traded in
second currency, the costs and fees are caused to be displayed on a display
device of the client machine, the costs and fees being displayed are dynamically
changed in accordance with a first prevailing exchange rate between the first
currency and the second currency, and even when the market value of the asset
remains unchanged, and
wherein ~~the trading server the first prevailing exchange rate is determined by the~~
~~trading server in reference to the at least one currency exchange server, there~~
~~server conducting in the trading server a transaction of the asset by~~
transporting a transaction request ~~from the trading server to the market~~
exchange server upon receiving an order from the trader; and ~~reaching a~~
settlement based on a second prevailing exchange rate in the trading server as
soon as the transaction of the asset is performed ~~by the market exchange~~
~~server in accordance with conditions set by the trader, and wherein a the~~
second prevailing exchange rate is calculated from the currency exchange
server right before the transaction takes place, ~~and executes the transaction~~
~~with the calculated second prevailing exchange rate, wherein costs and fees in~~
the settlement per the second prevailing exchange rate are not identical to the
displayed costs and fees with the first prevailing exchange before the
transaction of the asset took place.

2. *(Newly added)* The platform as recited in claim 1, wherein the trading server is configured to
- monitor the conditions in conjunction with the currency exchange server and the market exchange server; and
 - perform the transaction of the asset only when the conditions are met, wherein the conditions are periodically checked with respect to an updated market value of the asset and an updated prevailing currency exchange rate from the currency exchange server at a predefined cost to the trader right before the transaction takes place.
3. *(Newly added)* The platform as recited in claim 1, wherein the first prevailing exchange rate and the second prevailing exchange rate are different.
4. *(Newly added)* The platform as recited in claim 3, wherein the first prevailing exchange rate and the second prevailing exchange rate are automatically obtained in different times by the trading server from a network including the at least one currency exchange server.
5. *(Newly added)* The platform as recited in claim 1, wherein the trading server is configured to:
- receive periodically an updated market value of the asset being traded from the market exchange server;
 - receive periodically an updated prevailing currency exchange rate from the exchange server; and
 - determine whether the conditions have been met together with the updated market value of the asset and the updated prevailing currency exchange rate.
6. *(Newly added)* The platform as recited in claim 1, wherein the trading server is coupled to the client machine, the at least one currency exchange server and the at least one market exchange server via a network, the trading server is configured to:

monitor automatically the second prevailing exchange rate from the network to ensure that the transaction only happens when the conditions are met with the second prevailing exchange rate.

7. *(Newly added)* The platform as recited in claim 1, wherein the client machine is a desktop, a laptop, a server computer, a handheld wireless device, or a mobile phone.
8. *(Newly added)* A platform for trading an asset, the platform comprising:
a client machine associated with a user, coupled to a trading server via the Internet, executing a software product to send an indicator of first currency a trading server, wherein the trading server is coupled to at least one currency exchange server and at least one market exchange server and configured to calculate costs and fees in the first currency to own or sell the asset being traded in second currency, the client machine is caused to display the costs and fees on a display device thereof, the costs and fees being displayed are dynamically changed in accordance with a first prevailing exchange rate between the first currency and the second currency, and even when the market value of the asset remains unchanged, and
wherein a transaction of the asset is conducted in the trading server in response to the market exchange server upon receiving an order from the client machine; the client machine receives a settlement based on a second prevailing exchange rate, wherein the second prevailing exchange rate is calculated by the trading server from the currency exchange server right before the transaction takes place, costs and fees in the settlement per the second prevailing exchange rate are not identical to the displayed costs and fees with the first prevailing exchange before the transaction of the asset took place.
9. *(Newly added)* The platform as recited in claim 8, wherein the client machine is caused to keep displaying the costs and fees being dynamically changed in accordance with the first prevailing exchange rate being updated constantly, even when the market value of the asset remains unchanged.

10. *(Newly added)* The platform as recited in claim 8, wherein the client machine shows a settlement soon after the trading server performs the transaction of the asset only when the conditions are met, wherein the conditions are periodically checked with respect to an updated market value of the asset and an updated prevailing currency exchange rate from the currency exchange server at a predefined cost to the trader right before the transaction takes place.

11. *(Newly added)* The platform as recited in claim 8, wherein the first prevailing exchange rate and the second prevailing exchange rate are different.

12. *(Newly added)* The platform as recited in claim 11, wherein the first prevailing exchange rate and the second prevailing exchange rate are automatically obtained in different times by the trading server from a network including the at least one currency exchange server.

13. *(Newly added)* The platform as recited in claim 8, wherein the client machine is configured to receive periodically an updated market value of the asset being traded from the market exchange server as a result of an updated prevailing currency exchange rate.

14. *(Newly added)* The platform as recited in claim 8, wherein the client machine is coupled to the trading server, the at least one currency exchange server and the at least one market exchange server via a network, the trading server is configured to:
monitor automatically the second prevailing exchange rate from the network to
ensure that the transaction only happens when the conditions are met with the
second prevailing exchange rate.

15. *(Newly added)* The platform as recited in claim 8, wherein the client machine is a desktop, a laptop, a server computer, a handheld wireless device, or a mobile phone.

REMARKS

Claim 1 was submitted at the time of filing this instant application. In the foregoing amendments, Claim 1 has been amended while Claims 2-15 are newly added. No new matters are introduced. The Examiner is respectfully asked to enter the foregoing amendments before considering this instant application.

If there are any issues remaining which the Examiner believes could be resolved through either a Supplementary Response or an Examiner's Amendment, the Examiner is respectfully requested to contact the undersigned at (408)891-9381.

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTHS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Notice of Pre-AIA or AIA Status

The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

DETAILED ACTION

This communication is in response to the application filed 09 September 2022. Claims 1-15 are currently pending. The rejections are as stated below.

Claim Rejections - 35 USC § 112

The following is a quotation of 35 U.S.C. 112(b):

(b) CONCLUSION.—The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the inventor or a joint inventor regards as the invention.

The following is a quotation of 35 U.S.C. 112 (pre-AIA), second paragraph:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-15 are rejected under 35 U.S.C. 112(b) or 35 U.S.C. 112 (pre-AIA), second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the inventor or a joint inventor, or for pre-AIA the applicant regards as the invention.

Specifically, claim 8, line 2 recites “a trading server ...”, lines 3-4 recites “a trading server ...”, respectively, this language is vague, it is not clear whether trading servers are the same or different. Applicant is respectfully advised to amend the claim, lines 3-4 to recites “the trading server. Claims 9-15 are rejected based on their dependency. Appropriate correction is required.

Double Patenting

The non-statutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A non-statutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15 are rejected on the ground of non-statutory obviousness-type double patenting as being unpatentable over claims 1-15 of US Patent No. 11,449,930 B1, claims 1-12

of US Patent No. 10,776,863 and claim1-36 of US Patent No. 10,062,107. Although the conflicting claims are not identical, they are not patentably distinct from each other because all sets of claims are directed to method and system for providing a consolidated trading platform for trading an asset in a preferred currency and have overlapping limitations. All limitations of the instant claims are substantially covered in claims 1-15 of US Patent No. 11,449,930 B1, claims 1-12 of US Patent No. 10,776,863 and claim1-36 of US Patent No. 10,062,107. However, certain language has been removed from the above issued Patents. Therefore, the omission of an element with a corresponding loss of function is an obvious expedient. See *In re Karlson*, 136 USPQ 184 and *Ex parte Rainu*, 168 USPQ 375.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Rude (US 2006/0095361 A1) a method includes placing a securities trading order on a securities exchange and determining a net settlement amount for the securities trading order in the local currency of the securities exchange. In response to the determined net settlement amount, a foreign exchange trading order is automatically placed to convert the determined net settlement amount from the local currency to the operating currency of the party for whom the securities trading order was placed.

Johnson (US 2006/0173771 A1) discloses foreign currency exchange markets and the linkage of foreign currency markets to other traditional markets.

Response to First Office Action

Dear Sir:

In response to the Office Action mailed on 11/09/2022, please amend the above-identified application before reconsidering the pending claims.

AMENDMENTS TO THE CLAIMS are reflected in the listing of claims which begins on page 2 of this Response.

REMARKS/ARGUMENTS begin on page 7 of this Response.

AMENDMENTS TO THE CLAIMS

Please amend Claims 1, 2, 4, 6, 8-10, 12 and 14, add Claims 16 as follows:

1. (*Currently amended*) A platform for trading an asset, the platform comprising:
a trading server, coupled to a client machine associated with a user, receiving an indicator of a first currency from the client machine, wherein the trading server is configured to coupled to at least one currency exchange server and at least one market exchange server, the trading server is further configured to calculate costs and fees in the first currency to own or sell the asset being traded in a second currency, the costs and fees are caused to be displayed on a display device of the client machine; ~~the costs and fees being displayed and~~ are dynamically changed in accordance with a first prevailing exchange rate between the first currency and the second currency, and even when ~~the a~~ market value of the asset remains unchanged, and
wherein the trading server is configured to conducts a transaction of the asset by transporting a transaction request to the market exchange server upon receiving an order from the trader; ~~and reaches~~ a settlement based on a second prevailing exchange rate as soon as the transaction of the asset is performed in accordance with conditions set by the trader, and wherein the second prevailing exchange rate is calculated from the at least one currency exchange server right before the transaction takes place, executed costs and fees in the settlement per the second prevailing exchange rate are not identical to the displayed costs and fees with the first prevailing exchange before the transaction of the asset took place.
2. (*Currently amended*) The platform as recited in claim 1, wherein the trading server is configured to:
monitor the conditions in conjunction with a prevailing exchange rate calculated from the at least one currency exchange server and the market exchange server; and

perform the transaction of the asset only when the conditions are met, wherein the conditions are periodically checked with respect to an updated market value of the asset and an updated prevailing currency exchange rate calculated from the at least one currency exchange server ~~at a predefined cost to the trader~~ right before the transaction takes place.

3. (*Previously amended*) The platform as recited in claim 1, wherein the first prevailing exchange rate and the second prevailing exchange rate are different.

4. (*Currently amended*) The platform as recited in claim 3, wherein the first prevailing exchange rate and the second prevailing exchange rate are automatically ~~obtained~~ calculated in different times by the trading server from a network including the at least one currency exchange server.

5. (*Previously amended*) The platform as recited in claim 1, wherein the trading server is configured to:

receive periodically an updated market value of the asset being traded from the market exchange server;

receive periodically an updated prevailing currency exchange rate from the exchange server; and

determine whether the conditions have been met together with the updated market value of the asset and the updated prevailing currency exchange rate.

6. (*Currently amended*) The platform as recited in claim 1, wherein the trading server is caused to be coupled to the client machine, and configured to couple to the at least one currency exchange server and the at least one market exchange server via a network, the trading server is configured to further:

~~monitor~~ calculate automatically the second prevailing exchange rate from the network to ensure that the transaction only happens when the conditions are met with the second prevailing exchange rate.

7. (*Previously amended*) The platform as recited in claim 1, wherein the client machine is a desktop, a laptop, a server computer, a handheld wireless device, or a mobile phone.

8. (*Currently amended*) A platform for trading an asset, the platform comprising:
a client machine associated with a user, coupled to a trading server via the Internet, executing a software product to send an indicator of a first currency to ~~the~~ trading server, wherein the trading server is configured to coupled to at least one currency exchange server and at least one market exchange server and configured to calculate costs and fees in the first currency to own or sell the asset being traded in second currency, the client machine is caused to display the costs and fees on a display device thereof, the costs and fees being displayed are dynamically changed in accordance with a first prevailing exchange rate between the first currency and the second currency, and even when the market value of the asset remains unchanged, and
wherein a transaction of the asset is conducted in the trading server in response to the market exchange server upon receiving an order from the client machine; the client machine receives a settlement based on a second prevailing exchange rate, wherein the second prevailing exchange rate is calculated by the trading server from the at least one currency exchange server right before the transaction takes place, executed costs and fees in the settlement per the second prevailing exchange rate are not identical to the displayed costs and fees with the first prevailing exchange before the transaction of the asset took place.

9. (*Currently amended*) The platform as recited in claim 8, wherein the client machine is caused to keep displaying the costs and fees being dynamically ~~changed~~ updated in accordance with the first prevailing exchange rate ~~being updated~~ constantly, even when the market value of the asset remains unchanged.

10. *(Currently amended)* The platform as recited in claim 8, wherein the client machine shows a settlement soon after the trading server is configured to perform the transaction of the asset only when the conditions are met, wherein the conditions are periodically checked in the trading server with respect to an updated market value of the asset and an updated prevailing currency exchange rate calculated from the at least one currency exchange server ~~at a predefined cost to the trader right~~ before the transaction takes place.

11. *(Previously amended)* The platform as recited in claim 8, wherein the first prevailing exchange rate and the second prevailing exchange rate are different.

12. *(Currently amended)* The platform as recited in claim 11, wherein the first prevailing exchange rate and the second prevailing exchange rate are automatically ~~obtained~~ calculated in the trading server in different times by the trading server from a network including the at least one currency exchange server.

13. *(Previously added)* The platform as recited in claim 8, wherein the client machine is configured to receive periodically an updated market value of the asset being traded from the market exchange server as a result of an updated prevailing currency exchange rate.

14. *(Currently amended)* The platform as recited in claim 8, wherein the client machine is coupled to the trading server, the at least one currency exchange server and the at least one market exchange server via a network, and causes the trading server ~~is configured to:~~

~~monitor~~ calculate automatically the second prevailing exchange rate from the network to ensure that the transaction only happens when the conditions are met with the second prevailing exchange rate.

15. *(Previously amended)* The platform as recited in claim 8, wherein the client machine is a desktop, a laptop, a server computer, a handheld wireless device, or a mobile phone.

16. *(Newly added)* The platform as recited in claim 4, wherein the costs and fees displayed on the display device of the client machine are dynamically updated in time per the first prevailing exchange rate or the second prevailing exchange rate.

REMARKS

Claims 1-15 were examined. In this Office Action, Claims 1-15 are rejected on the ground of non-statutory obviousness-type double patenting as being unpatentable over claims 1-15 of US Patent No. 11,449,930B1, claims 1-12 of US Patent No. 10,776,863 and claims 1-36 of US Patent No. 10,062,107.

In the foregoing amendments, Claims 1, 2, 4, 6, 8-10, 12 and 14 are amended, Claims 16 is newly added. No new matters are introduced. As a result of the amendments, Claims 1-16 are now pending. The Applicant respectfully requests the Examiner to enter the above amendments before reconsidering the patent application.

Claim Rejections – 35 USC §112

On Page 2 of this Office Action, Claims 8-15 are rejected under 35 U.S.C. 112(b) or 35 U.S.C. 112 (pre-AIA), second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the inventor or a joint inventor, or for pre-AIA the applicant regards as the invention.

Claim 8 has been amended per the suggestion by the Examiner. It is believed that Claim Rejections under 35 USC 112 shall have been withdrawn.

Double Patenting

On Page 3 of this Office Action, Claims 1-15 are rejected on the ground of non-statutory obviousness-type double patenting as being unpatentable over claims 1-15 of US Patent No. 11,449,930B1, claims 1-12 of US Patent No. 10,776,863 and claims 1-36 of US Patent No. 10,062,107. The Applicant has filed herewith a terminal disclaimer to alleviate the double patenting rejection.

In view of the above amendments and remarks, it is now believed that the pending claims 1 - 16 shall be in condition for allowance over the cited references. Therefore, it is believed that the entire application is now in condition for allowance, early and favorable action is being respectfully solicited.

If there are any issues remaining which the Examiner believes could be resolved through either a Supplementary Response or an Examiner's Amendment, the Examiner is respectfully requested to contact the undersigned at (408)891-9381.

I hereby certify that this correspondence is being deposited with the USPTO EFS and addressed to "Mail Stop: No-Fee Amendment, Commissioner for Patents P.O. Box 1450, Alexandria, VA 22313-1450", on January 4, 2023.

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

For purposes of this notice, small entity fees are 40% the amount of undiscounted fees, and micro entity fees are 20% the amount of undiscounted fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Maintenance fees are due in utility patents issuing on applications filed on or after Dec. 12, 1980. It is patentee's responsibility to ensure timely payment of maintenance fees when due. More information is available at www.uspto.gov/PatentMaintenanceFees.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), by mail or fax, or via EFS-Web.

By mail, send to: Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b) (2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Notice of Pre-AIA or AIA Status

The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

DETAILED ACTION

This communication is in response to applicant's amendment filed on January 04, 2023.

Claims 1-16 are pending. Claims 1-16 are allowed.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record (Rude et al. US Pat. Pub. No. 2006/0095361 A1) teaches a method and corresponding apparatus for automatic settlement of foreign securities trades in trader's operating currency includes placing a securities trading order on a securities exchange and determining a net settlement amount for the securities trading order in the local currency of the securities exchange. In response to the determined net settlement amount, a foreign exchange trading order is automatically placed to convert the determined net settlement amount from the local currency to the operating currency of the party for whom the securities trading order was placed.

Even though, the prior art of record teaches a method and corresponding apparatus for automatic settlement of foreign securities trades in trader's operating currency performing the above-mentioned steps, the prior art of record fails to teach a platform for trading an asset, the platform comprising: a trading server, coupled to a client machine associated with a user, the trading server is configured to calculate costs and fees in the first currency to own or sell the

asset being traded in a second currency, the costs and fees are caused to be displayed on a display device of the client machine and are dynamically changed in accordance with a first prevailing exchange rate between the first currency and the second currency, and even when a market value of the asset remains unchanged, and wherein the trading server is further configured to conduct a transaction of the asset by transporting a transaction request to the market exchange server upon receiving an order from the trader, and reach a settlement based on a second prevailing exchange rate as soon as the transaction of the asset is performed in accordance with conditions set by the trader, and wherein the second prevailing exchange rate is calculated from the at least one currency exchange server right before the transaction takes place, executed costs and fees in the settlement per the second prevailing exchange rate are not identical to the displayed costs and fees with the first prevailing exchange before the transaction of the asset took place. For these reasons claims 1 and 8 are deemed to be allowable over the prior art of record, and claims 2-7 and 9-16 are allowed by dependency.

Furthermore, the above additional elements in the claim provide meaningful limitations that transforms an abstract idea into patent eligible. The claim as a whole amounts to significantly more than the abstract idea itself. This is because the claim as a whole effect an improvement to another technology or technical field. These limitations in combination provide meaningful limitations beyond generally linking the use of the abstract idea to a particular technological environment. These limitations, when taken as an ordered combination, provide unconventional steps that confines the abstract idea to a particular application. Therefore, the claim recites patent eligible subject matter. For these reasons claims 1-16 are deemed to be statutory.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for allowance".

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hani Kazimi whose telephone number is (571) 272-6745. The examiner can normally be reached Monday-Friday from 8:30 AM to 5:00 PM.

Patent Owner.

IPR2025-01045
Patent 11,620,701 B1

Before NEIL T. POWELL, FRANCES L. IPPOLITO,
SEAN P. O'HANLON, *Administrative Patent Judges*.

IPPOLITO, *Administrative Patent Judge*.

DECISION
Settlement Prior to Institution of Trial
37 C.F.R. § 42.74

On June 16, 2025, Petitioner filed an Unopposed Motion to Withdraw Petition for *Inter Partes* Review. Paper 4 (“Motion”).

Petitioner represents that Petitioner and Patent Owner have reached a settlement agreement as evidenced by a written agreement (Ex. 1021 (“Agreement”)), filing a true copy of the same. Motion 1. Petitioner further represents that there are “no other agreements, oral or written, between the parties made in connection with, or in contemplation of, the termination of this proceeding.” *Id.* Petitioner further represents that “the parties have reached an agreement that resolves all disputes between the parties involving U.S. Patent No. 11,620,701.” *Id.* at 2.

This proceeding is at an early stage, and we have not yet decided whether to institute a trial in the proceeding. In view of the early stage of the proceeding and the settlement between the parties, we determine that it is appropriate to dismiss the proceeding.

This Order does not constitute a final written decision pursuant to 35 U.S.C. § 318(a).
