Can I use this vaporizer to smoke 5meo-dmt? Sorry for the dumb question but I'm a complete newbie when it comes to vaping.

Not sure, but I strongly advise you smoke with an experienced trip sitter present

Does it have coils or ceramic plate inside? (Basically can you smoke cannabis concentrate from it?)

I use one similar to this to vape dmt mixed 1:4 with e-liquid (VG/PG mix). Like that I can take two hits and have a deep experience or keep going till I can't anymore and go for breakthrough.

But you really wouldn't want to do this with 5-meo which can stop your heart and breathing at higher doses. Get a milligram scale and use a standard vaporiser (like a VaporGenie). Somewhere around 15mg is probably what you're looking at but always best to start smaller and work up.

You can probably pick up a yocan vape for concentrates for \$40, or they also sell an atomizer for a box mod as well for a little less. In Canada, so if you're American drop the price by half. Lol
