0:44

what's up everybody

0:48

my name is Kenny tonight and this

0:50

tonight

0:57

[Laughter]

0:58

what's going on everybody my name is

1:01

Kenny tonight and this is the night

1:02

dimension and today I want to talk to

1:04

you guys about DMT pens and this may not

1:10

be something that's been super popular

1:11

in the culture or in the psychedelic

1:14

society so you know so far to this point

1:18

but I think that as time goes on people

1:20

are talking about these things more to

1:22

the point where I one of my friends

1:24

actually asked me what I thought about

1:27

DMT pens and the pros and cons of them

1:31

so I wanted to just talk about that with

1:33

you guys now right off the bat you would

1:35

think DMT pen that's got to be a

1:37

terrible idea because it's just gonna be

1:40

abused by people and what a great way

1:42

and what a great way to spread the love

1:44

of these things by having people use

1:46

them just like marijuana you know or a

1:49

vape because that's what you would first

1:51

think when you think Oh a DMT vape pen

1:54

you know it's so what are the pros and

1:57

cons and I think that right off the bat

1:59

the con is right there

2:01

abuse you could abuse the substance and

2:04

we could pass a message of the substance

2:06

that really isn't what we're trying to

2:10

do with these things and you know

2:15

honestly I think that's probably like

2:17

the only con I mean that I can think of

2:19

because that's what I was thinking about

2:21

more and more as I really opened up to

2:23

this topic because at first you that's

2:25

what you think is a sort of negative

2:27

perspective of it but as I'm thinking

2:30

more and more you know what would be

2:32

better having people be able to use a

2:35

vape pen you know for people be able to

2:39

use of a pen to smoked DMT rather than

2:42

like a crack pipe or a bomb you know

2:44

because this is an experience where you

2:46

are going to be quickly taken

2:48

you're yourself you know and your normal

2:51

ability to have proper motor control and

2:55

so it would be safer to have you to just

2:58

be able to take a hit out of a pen

3:00

put it down real quick and then you know

3:02

go into the experience but then

3:05

obviously it's so easy to just take

3:07

another hit but then with DMT it only

3:10

takes that third hit or up to that point

3:13

where you just you know you can't stop

3:16

it and you have to come down which is

3:18

another thing that I wanted to talk

3:19

about is that a lot of what's happening

3:21

when you're heating up the glass or

3:23

you're using whatever method to smoked

3:25

DMT the temperature is super important

3:28

so that's when I was thinking if we had

3:30

a vape pen where we could correctly cook

3:33

the DMT at a proper temperature at a

3:37

proper rate you would be able to have

3:39

the best experience because you'd be

3:42

getting the most amount of

3:43

dimethyltryptamine versus any other

3:47

household version or anything like that

3:49

so that was one of my final thoughts on

3:52

the DMT vape pens would be is that it

3:55

could be a definite thing that we could

3:58

use in the future but it would be highly

4:00

recommended that they be designed in

4:03

some way to where you could only take a

4:06

couple hits you know it's not going to

4:08

be you know for those of you who can

4:10

tell this is a marijuana vape pen so it

4:13

has just you know it has the whole

4:15

entire thing is the whole entire

4:17

cartridge is filled with this liquid I

4:19

could hit this thing all day you know

4:20

but to be able to just maybe buy

4:22

cartridges where you have a couple hits

4:25

you know and then in order to be able to

4:27

do another thing you have to put another

4:29

one on or you know able to open it up

4:31

and put a piece in there go at it you

4:34

know put it down and that way it's more

4:37

respectful and more ritualistic rather

4:39

than just being able to use it whenever

4:41

we want to so that's just my thoughts on

4:44

the topic I hope you guys enjoyed the

4:47

video if you guys want to help support

4:48

the videos help me out in any way I have

4:50

a one-time donation on PayPal if not you

4:53

too speedy stuff like comment subscribe

4:54

dev on the mother effin haters and I

4:57

appreciate you guys I'll see you guys

4:59

next time and enjoy the end screen

5:01

for any you guys who are still here

5:02

peace
