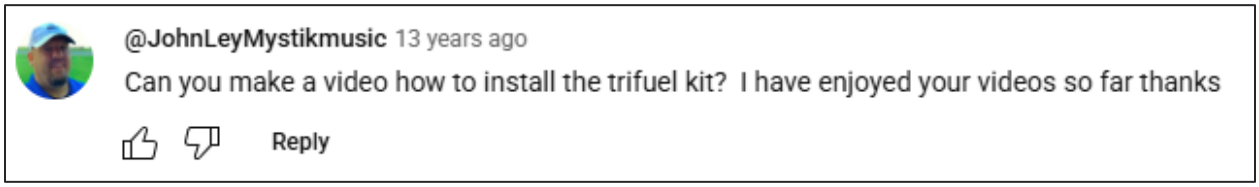
I, John Ley, declare and state as follows:

1. During the year 2012, I viewed a video on YouTube titled "Honda Generator Tri-Fuel, EU2000i Triple-Fuel," shown at this link: https://www.youtube.com/watch?v=DpknaAPTQ9U&t. The video taught how to modify portable generators that normally operate on gasoline so that the fuel can be switched from gasoline to LPG or natural gas to operate the generator. The modification taught by the video resulted in a generator that could be operated on any of these fuels, and switched between them.

2. The published date listed on the YouTube video is October 2, 2011:

3. I know I saw this same YouTube video in 2012 because I made a comment on the YouTube video 13 years ago, my comment shown in the screenshot below and attributed by my YouTube username "JohnLeyMysticmusic":



4. The date is consistent with my recollection of making the comment and viewing the video.

5. I made this comment because in 2012 I also owned the same Honda Generator featured in the video, and at the time, I was considering making a similar conversion to my generator as that depicted in the video.

6. My comment is still publicly available on the YouTube video in the comments section.

7. The video that is available today on YouTube at the link cited above is the same video I viewed and commented on in 2012.

8. I declare that all statements made herein of my own knowledge are true and that all statements made upon information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code.

9. I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed on 4.25.25

John Ley
