

that additional documents, facts, or contentions will be disclosed later. Without obligating itself to do so, Enviro Tech reserves the right to amend, modify, or supplement the objections and responses stated herein. Enviro Tech further reserves the right to rely on any facts, documents, or other evidence that are (i) subsequently discovered, (ii) subsequently determined to be relevant for any purpose, or (iii) subsequently determined to have been omitted from a response or production.

GENERAL OBJECTIONS

The following General Objections apply to each of the Requests. Because these General Objections apply to each Request, they are for convenience set forth immediately below and not repeated in response to each specific Request. The assertion of the same, similar, or additional objections in response to a specific Request does not waive any of these General Objections. Enviro Tech reserves the right to amend or supplement these objections as may be appropriate.

1. Enviro Tech objects to each and every Request, definition, and instruction to the extent that they purport to impose obligations that are greater or more burdensome than, or contradict those imposed by, the Federal Rules of Civil Procedure, the local rules of this Court, and any other governing authority.

2. Enviro Tech objects to each and every Request, definition, and instruction to the extent that they seek information protected by the attorney-client privilege, the work-product doctrine, and/or any other applicable privileges, protections, or immunities. By responding to the Requests, Enviro Tech does not waive, and intends to preserve, all applicable privileges, protections, and immunities.

3. Enviro Tech objects to each and every Request, definition, and instruction to the extent that they seek information that is not relevant to the claims or defenses of any party or are disproportional to the needs of the case.

4. Enviro Tech objects to each and every Request, definition, and instruction to the extent that they are vague and ambiguous.

5. Enviro Tech objects to each and every Request, definition, and instruction to the extent that they seek legal conclusions and/or strategies rather than factual information.

6. Enviro Tech objects to each and every Request, definition, and instruction to the extent that they seek information more properly obtained through other means of discovery or disclosure.

7. Enviro Tech objects to each and every Request, definition, and instruction to the extent that they call for information covering an unreasonable and/or unlimited period of time and/or do not contain reasonable or appropriate date restrictions.

8. Enviro Tech objects to each and every Request, definition, and instruction to the extent that they are overbroad and unduly burdensome, and to the extent that they seek “all” information relating to the specified subject matter. Enviro Tech will use reasonable diligence to locate responsive information based on inquiry of those persons or parts of its business it reasonably expects to possess responsive information.

9. Enviro Tech objects to each and every Request, definition, and instruction to the extent that they seek information that is not within Enviro Tech’s possession, custody, or control and/or are not obtainable by means of a reasonably diligent search, including, without limitation, documents that are not maintained by Enviro Tech in the normal course of business or that are no longer maintained by Enviro Tech.

10. Enviro Tech objects to each and every Request, definition, and instruction to the extent that they seek information that is in Clean Chemistry’s possession, custody, or control, are a matter of public record, and/or to which Clean Chemistry has equal access.

11. Each and every General Objection shall be deemed to be incorporated in full into each of the individual responses set forth below. Any specific objections made in response to a Request (the “Specific Objections”) are in addition to the General Objections, not a replacement for them.

RESPONSES TO REQUESTS FOR ADMISSIONS
