Communist Chinese Military Companies Listed Under E.O. 13959 Have More Than 1,100 Subsidiaries

FACT SHEET

UNDER SECRETARY FOR ECONOMIC GROWTH, ENERGY, AND THE ENVIRONMENT

JANUARY 14, 2021

Share 

Executive Order 13959—Addressing the Threat from Securities Investments that Finance Communist Chinese Military Companies—released on November 12, 2020 and as **amended** on January 13, 2021, prohibits investment by U.S. persons in “ostensibly private and civilian” companies that “directly support the PRC’s [People’s Republic of China] military, intelligence, and

security apparatuses.” This Executive Order prohibits purchases by U.S. persons in publicly traded securities, or any securities that are derivative thereof, of companies listed by the Departments of Defense or Treasury, regardless of the percentage ownership. **Treasury’s guidance states** that divestment **must be completed** “365 days after the date of such determination” by Defense or Treasury. For the initial tranches, that date is November 11, 2021.

Ample warning has been given to public and private equity compliance officers and risk managers to understand and disclose to their constituents the material risk associated with investments identified in the Executive Order. CEOs and their boards now have a legal duty to implement and be in **full compliance** with the Executive Order. They also may have a fiduciary duty to take decisive action to minimize any negative effect on their clients’ holdings due to the imminent divestment of CCMCs. Best practices in material risk mitigation, disclosure, and transparency are essential to proper corporate governance.

As of January 13, 2021, the **Defense Department had publicly-listed** 35 parent-level corporations as CCMCs, including **China Mobile, China Telecom, and China Unicom**. On January 14, the Department of Defense publicly listed **an additional nine** CCMCs. CCMCs conduct business through a network of subsidiaries sometimes running into the dozens designed to conceal money flows to the PRC military, intelligence, and security services. As the Executive Order notes, CCMCs “directly threaten the United States homeland and United States forces overseas, including by developing and deploying weapons of mass destruction, advanced conventional weapons, and malicious cyber-enabled actions against the United States and its people.”

U.S. investors—including banks, pension funds, foundations, insurance companies, and university endowments—have for years unknowingly funded these 44 CCMCs as a result of their opaque network of at least 1,108 subsidiaries, many dozens of which are tracked by MSCI, FTSE, and other indexes in thousands of financial firms’ products.

The Treasury Department has **noted** that the Executive Order applies to the ownership of any CCMC shares, as well as any of their 50 percent or greater majority-owned subsidiaries, or any other controlled entity, that are publicly listed by the **Treasury** or **Defense** Departments.

The Executive Order **prohibits** Exchange Traded Funds, mutual funds, and index funds like those managed by **BlackRock**, Vanguard, and others from investing in CCMCs.

This State Department **Fact Sheet** shows hundreds of CCMC and subsidiary stocks, which may be eligible for listing under E.O. 13959 and that continue to be listed on some major index funds. More detailed information is available in the accompanying attachment.

	MSCI China A Index	MSCI EM Index	MSCI ACWI Index	FTSE Emerging Index	FTSE All World Index

Deletions Announced to Date	6	10	10	10	10
Percentage Announced to Date	17%	17%	16%	14%	13%

Additional Information

PRC stocks directly affect the pension assets of American workers and retirees.

- ◆ There are **more than 5,000** public pension systems in the United States, according to the United States Census Bureau.
- ◆ \$10.7 trillion invested in the private pension plans is covered by the Employee Retirement Income Security Act (ERISA).

The Thrift Savings Plan's governing board study revealed that a majority of pension funds use the MSCI emerging market index as their investment guide, including:

- ◆ The 401k's of all 10 largest publicly traded U.S. companies;
- ◆ All 10 of the top federal contractors;
- ◆ All 20 of the largest state pension plans;
- ◆ All six of the largest target-date mutual-fund providers with holdings of \$1.9 trillion as of June 2019;
- ◆ The Pension Benefit Guaranty Corporation (PBGC), with \$131 billion in pension insurance reserves;
- ◆ Numerous Insurance Funds;

- ◆ Numerous University and College Endowment Funds.

Institutional investors and endowment managers can and should pay attention to these risks:

“Under Secretary Krach sent a **letter** to the governing boards of American universities, alerting them to the threats the Chinese Communist Party poses to academic freedom, to human rights, and to university endowments. These threats can come in the form of illicit funding for research, intellectual property theft, intimidation of foreign students, and opaque talent recruitment efforts. University governing boards can help ensure their institutions have clean investments and clean endowment funds by taking a few key steps:

- ◆ Disclose all PRC companies invested in endowment funds, especially those in emerging-market index funds.
- ◆ Divest from Chinese companies on the Commerce Department Entity List that are contributing to human rights violations, military coercion, and other abuses.
- ◆ And simply understand the recommendations issued by the President’s Working Group on Financial Markets, which examined the risk to investors of Chinese companies that are listed on U.S. stock exchanges.”
