Easy installable packages?

Most **Unix** and **Linux** distributions are shipping easy installable packages of each release. There are installable packages for **Microsoft Windows** systems at: <http://gimp-win.sourceforge.net/stable.html>. If your platform or distribution provides no packages at all, pick the newest release below. Note though, that the package maintainers need time to provide easy installable package after a new version is released.

Source Releases for Potential Contributors

You can grab one of our recent releases from the Gimp FTP server at:
<ftp://ftp.gimp.org/pub/gimp/help/>

- 0.12 (2007-04-11, 58 MB)
- 0.11 (2006-12-04, 50 MB)
- 0.10 (2006-04-11, 40 MB)

PDF Snapshots

Note

The PDF versions listed below are only development snapshots. They're not intended for productive use, may include empty or broken page layouts and differ from our releases.
