Why Thousands Are Switching From Nerve Meds to This Balm

Match	Document	Document Title	Score
1	US20070265005	Network selection for prioritized access via wireless access networks The present invention relates to a method, terminal device, network element, and computer program product for selecting a network in order to provide access to a prioritized service via a wireless...	1000
2	US20060172737	Methods and apparatus for selecting a communication network Methods and apparatus for selecting a cellular network to provide one or more communication services for a mobile communication device are disclosed. A scanning operation is performed by the...	752
3	7389109	Methods and apparatus for selecting a communication network Methods and apparatus for selecting a cellular network to provide one or more communication services for a mobile communication device are disclosed. A scanning operation is performed by the...	640
4	7551926	Terminal-assisted selection of intermediary network for a roaming mobile terminal Terminal-assisted selection of intermediary network for a roaming mobile terminal is disclosed. The mobile terminal determines if a local access network is associated with the mobile's home...	304
5	US20060077924	Terminal-assisted selection of intermediary network for a roaming mobile terminal Terminal-assisted selection of intermediary network for a roaming mobile terminal is disclosed. The mobile terminal determines if a local access network is associated with the mobile's home...	304
6	US20070091861	TECHNIQUE FOR MANAGING WIRELESS NETWORKS Network connectivity may be managed on a computing device. An identifier of each wireless access point or network that is available at a given location is determined. The identifier determined...	250
7	7920531	Technique for managing wireless networks Network connectivity may be managed on a computing device. An identifier of each wireless	250

		access point or network that is available at a given location is determined. The identifier determined...	
8	8391857	Method for interactive mobile network selection A method allows the selection of a user-preferred visited mobile network for a roaming mobile terminal of a subscriber of a home network. The method includes, at the home network, the steps of...	236
9	US20080201188	Niche-oriented advertising networks platform and methods of operating same System and methods of constructing and operating a network of advertising networks in support of the real-time selection and distribution of creatives to network connected client computer systems...	180
10	US20040058679	Method for the improved cell selection for multi-mode radio stations in the idle state Network information is provided for a station that is adapted to exchange data via at least one interface for each of different communication networks. The station selects an interface or a...	162
11	US20050107082	Network selection methods and apparatus with home network prioritization in country border regions Network selection methods and apparatus with home network prioritization in country border regions are disclosed. In one illustrative example, a mobile station (200) is associated with a home...	142
12	7366510	Network selection methods and apparatus with home network prioritization in country border regions Network selection methods and apparatus with home network prioritization in country border regions are disclosed. In one illustrative example, a mobile station (200) is associated with a home...	142
13	5999811	Mobile telephone for roaming using dual mode/band equipment including SIM cards According to exemplary embodiments of the present invention, mobile stations are provided with a preferred roaming selection list at a predetermined memory location in a subscriber identity module...	111
14	5903832	Mobile terminal having enhanced system selection capability A mobile station (10) maintains a single, prioritized list of all available networks (i.e., all public, residential, and private networks). Access to the various networks is then based on the...	105
15	6119003	Methods and apparatus for performing automatic mode selection in a multimode mobile terminal A wireless user terminal (10), such as a multimode cellular telephone, includes at least three master control systems, specifically a primary system controller, a secondary system controller, and...	93
16	US20090024550	Systems and Methods for Wireless Network Selection Systems and methods for selecting a wireless network are disclosed. In some embodiments, a method comprises receiving a first network device identifier for a first network device and a second...	71
17	8554830	Systems and methods for wireless network selection Systems and methods for selecting a wireless network are disclosed. In some embodiments, a method comprises receiving a first network device identifier for a first network device and a second...	71
18	8095664	Method, apparatus, and computer program for processing information A switcher, residing in a memory, detects a connectable network when a terminal is powered on. When a network is detected, a communication unit issues a message to a processor. The processor...	66
19	US20040133687	Method, apparatus, and computer program for processing information A switcher, residing in a memory, detects a connectable network when a terminal is powered on. When a network is detected, a communication unit issues a message to a processor. The processor...	66
20	8194589	Systems and methods for wireless network selection based on attributes stored in a network database Systems and methods for wireless network selection based on attributes stored in a network database are disclosed. In some embodiments, a method comprises receiving a network identifier associated...	64
21	US20090028082	Systems and Methods for Wireless Network Selection Based on Attributes Stored in a Network Database	64

Systems and methods for wireless network selection based on attributes stored in a network database are disclosed. In some embodiments, a method comprises receiving a network identifier associated...

This New TV Subscription Loophole Saves \$100s Monthly
