Match	Document	Document Title	Score
1	7062274	Increasing the level of automation when establishing and managing network connections Increasing the level of automation when establishing and managing network connections. A connection manager operates between system level APIs and application programs, providing a level of...	1000
2	US20060072735	Increasing the level of automation when establishing and managing network connections Increasing the level of automation when establishing and managing network connections. A connection manager operates between system level APIs and application programs, providing a level of...	945
3	US20040224668	Increasing the level of automation when establishing and managing network connections Increasing the level of automation when establishing and managing network connections. A connection manager operates between system level APIs and application programs, providing a level of...	911
4	7136645	Method and apparatus for providing mobile and other intermittent connectivity in a computing environment A seamless solution transparently addresses the characteristics of nomadic systems, and enables existing network applications to run reliably in mobile environments. A Mobility Management Server...	597
5	US20080133518	SYSTEMS AND METHODS FOR PROCESSING DATA FLOWS A flow processing facility, which uses a set of artificial neurons for pattern recognition, such as a self-organizing map, in order to provide security and protection to a computer or computer...	562
6	US20080133517	SYSTEMS AND METHODS FOR PROCESSING DATA FLOWS A flow processing facility, which uses a set of artificial neurons for pattern recognition, such as a self-organizing map, in order to provide security and protection to a computer or computer...	562
7	US20080262990	SYSTEMS AND METHODS FOR PROCESSING DATA FLOWS A flow processing facility, which uses a set of artificial neurons for pattern recognition, such as a self-organizing map, in order to provide security and protection to a computer or computer...	562
8	US20080229415	SYSTEMS AND METHODS FOR PROCESSING DATA FLOWS A flow processing facility, which uses a set of artificial neurons for pattern recognition, such as a self-organizing map, in order to provide security and protection to a computer or computer...	562

9	US20080262991	SYSTEMS AND METHODS FOR PROCESSING DATA FLOWS A flow processing facility, which uses a set of artificial neurons for pattern recognition, such as a self-organizing map, in order to provide security and protection to a computer or computer...	562
10	US20080162390	SYSTEMS AND METHODS FOR PROCESSING DATA FLOWS A flow processing facility, which uses a set of artificial neurons for pattern recognition, such as a self-organizing map, in order to provide security and protection to a computer or computer...	562
11	8402540	Systems and methods for processing data flows A flow processing facility, which uses a set of artificial neurons for pattern recognition, such as a self-organizing map, in order to provide security and protection to a computer or computer...	562
12	US20080134330	SYSTEMS AND METHODS FOR PROCESSING DATA FLOWS A flow processing facility, which uses a set of artificial neurons for pattern recognition, such as a self-organizing map, in order to provide security and protection to a computer or computer...	562
13	US20070192863	SYSTEMS AND METHODS FOR PROCESSING DATA FLOWS A flow processing facility, which uses a set of artificial neurons for pattern recognition, such as a self-organizing map, in order to provide security and protection to a computer or computer...	562
14	7979368	Systems and methods for processing data flows A flow processing facility, which uses a set of artificial neurons for pattern recognition, such as a self-organizing map, in order to provide security and protection to a computer or computer...	562
15	8244745	Analyzing usage information of an information management system In an information management system, activity data is collected and analyzed for patterns. The information management system may be policy based. Activity data may be organized as entries...	370
16	7574208	Method and apparatus for providing mobile and other intermittent connectivity in a computing environment A seamless solution transparently addresses the characteristics of nomadic systems, and enables existing network applications to run reliably in mobile environments. A Mobility Management Server...	314
17	US20010047393	System and method for efficient remote operation of real-time graphical applications Systems and methods are provided through which an application is executed on a server, and operated from a client operably coupled to the server. State information of the application is maintained...	308
18	7778260	Method and apparatus for providing mobile and other intermittent connectivity in a computing environment A seamless solution transparently addresses the characteristics of nomadic systems, and enables existing network applications to run reliably in mobile environments. A Mobility Management Server...	308
19	8010469	Systems and methods for processing data flows Methods and systems for flow processing and switching, security, and other network applications, including a facility that processes a data flow to address patterns relevant to a variety of...	294
20	US20060248208	Method and apparatus for universal data exchange gateway A universal gateway that allows data to be transferred between one or more network protocols and one or more control protocols is described. The various protocols can coexist on the same physical...	281
21	7401120	Method and apparatus for universal data exchange gateway A universal gateway that allows data to be transferred between one or more network protocols and one or more control protocols is described. The various protocols can coexist on the same physical...	273
22	US20020059401	Assembly of a graphical program for accessing data from a data source/target A Data Socket client and associated applications and/or tools which provide programs with access to data from various sources and having various types or formats, wherein the access is provided...	255
23	US20070143851	Method and systems for controlling access to computing resources based on known security vulnerabilities Methods and systems are provided for fine tuning access control by remote, endpoint systems to host systems. Multiple conditions/states of one or both of the endpoint and host systems are...	212
24	US20070143827	Methods and systems for intelligently controlling access to computing resources Methods and systems are provided for fine tuning access control by remote, endpoint systems to host systems. Multiple conditions/states of one or both of the endpoint and host systems are...	212
25	US20020002599	Real-time global positioning system application in two-way mobile wireless networks Systems and methods are provided which includes a client receiving a global positioning system (GPS) signal, communicating the GPS signal to a universal client program, encoding the GPS signal by...	182

26	9407662	Analyzing activity data of an information management system In an information management system, activity data is collected and analyzed for patterns. The information management system may be policy based. Activity data may be organized as entries...	174
27	8321437	Detecting behavioral patterns and anomalies using activity profiles Activity data is analyzed or evaluated to detect behavioral patterns and anomalies. When a particular pattern or anomaly is detected, a system may send a notification or perform a particular task....	174
28	8862551	Detecting behavioral patterns and anomalies using activity data Activity data is analyzed or evaluated to detect behavioral patterns and anomalies. When a particular pattern or anomaly is detected, a system may send a notification or perform a particular task....	174
29	US20040198386	Applications for a wireless location gateway A location system is disclosed for commercial wireless telecommunication infrastructures. The system is an end-to-end solution having one or more location centers for outputting requested...	147
30	8135413	Platform and applications for wireless location and other complex services A network services architecture is disclosed that allows complex services, such as wireless location services, to be more easily integrated into a telecommunications network. In particular,...	137
31	US20070287473	PLATFORM AND APPLICATIONS FOR WIRELESS LOCATION AND OTHER COMPLEX SERVICES A network services architecture is disclosed that allows complex services, such as wireless location services, to be more easily integrated into a telecommunications network. In particular,...	137
32	US20070157288	Deploying Policies and Allowing Off-Line Policy Evaluations In an information management system, policies are deployed to targets and targets can evaluate the policies whether they are connected or disconnected to the system. The policies may be...	131
33	8875218	Deploying policies and allowing off-line policy evaluations In an information management system, policies are deployed to targets and targets can evaluate the policies whether they are connected or disconnected to the system. The policies may be...	129
34	US20050193269	System, method, and article of manufacture for synchronization in an automated scripting framework A system, method and article of manufacture are provided for affording synchronization in an automated scripting framework. First, script data is received utilizing a language-driven interface....	122
35	7437614	Synchronization in an automated scripting framework The present disclosure provides for affording synchronization in an automated scripting framework. First, script data is received utilizing a language-driven interface. Then, reports having user...	122
36	US20080066150	Techniques of Transforming Policies to Enforce Control in an Information Management System In an information management system, policies are deployed to targets and targets can evaluate the policies whether they are connected or disconnected to the system. The policies may be...	120
37	8544058	Techniques of transforming policies to enforce control in an information management system In an information management system, policies are deployed to targets and targets can evaluate the policies whether they are connected or disconnected to the system. The policies may be...	118
38	US20080066149	Analyzing Activity Data of an Information Management System In an information management system, activity data is collected and analyzed for patterns. The information management system may be policy based. Activity data may be organized as entries...	118
39	US20070179987	Analyzing Activity Data of an Information Management System In an information management system, activity data is collected and analyzed for patterns. The information management system may be policy based. Activity data may be organized as entries...	118
40	US20080065700	Analyzing Usage Information of an Information Management System In an information management system, activity data is collected and analyzed for patterns. The information management system may be policy based. Activity data may be organized as entries...	118
41	8849858	Analyzing activity data of an information management system In an information management system, activity data is collected and analyzed for patterns. The information management system may be policy based. Activity data may be organized as entries...	118
42	7774363	Detecting behavioral patterns and anomalies using information usage data Activity data is analyzed or evaluated to detect behavioral patterns and anomalies. When a particular pattern or anomaly is detected, a system may send a notification or perform a particular task....	117
43	7877409	Preventing conflicts of interests between two or more groups using applications To prevent conflicts of interest, an information management system is used to make sure two or more groups are kept apart so that information does not circulate freely between these groups. The...	117

44	US20080071728	Detecting Behavioral Patterns and Anomalies Using Information Usage Data Activity data is analyzed or evaluated to detect behavioral patterns and anomalies. When a particular pattern or anomaly is detected, a system may send a notification or perform a particular task....	117
45	US20080091682	Preventing Conflicts of Interests Between Two or More Groups Using Applications To prevent conflicts of interest, an information management system is used to make sure two or more groups are kept apart so that information does not circulate freely between these groups. The...	117
46	US20080059474	Detecting Behavioral Patterns and Anomalies Using Activity Profiles Activity data is analyzed or evaluated to detect behavioral patterns and anomalies. When a particular pattern or anomaly is detected, a system may send a notification or perform a particular task....	117
47	US20070156696	Detecting Behavioral Patterns and Anomalies Using Activity Data Activity data is analyzed or evaluated to detect behavioral patterns and anomalies. When a particular pattern or anomaly is detected, a system may send a notification or perform a particular task....	117
48	US20070156694	TECHNIQUES AND SYSTEM TO MANAGE ACCESS OF INFORMATION USING POLICIES An information management system approves or denies user requests to access information of the system. The information includes all types of information including documents and e-mail. The...	116
49	US20070169168	MULTILAYER POLICY LANGUAGE STRUCTURE A policy language for an information management system has a three-layer structure that allows specifying one or more policies using policy abstractions. The policies and policy abstractions are...	116
50	US20070156727	Associating Code To a Target Through Code Inspection Code is associated to a target based on an inspection of the code. A target may be a device or a user. A number of code components may be inspected at one time and then transferred or otherwise...	116
