Match	Document	Document Title	Score
1	8935742	Authentication in a globally distributed infrastructure for secure content management Secure content management is enabled as a cloud-based service through which security protection and policy enforcement may be implemented for both on-premise network users and roaming users. The...	1000
2	7499458	Network access system including a programmable access device having distributed service control A distributed network access system in accordance with the present invention includes at least an external processor and a programmable access device. The programmable access device has a message...	942
3	8296178	Services using globally distributed infrastructure for secure content management Secure content management is enabled as a cloud-based service through which security protection and policy enforcement may be implemented for both on-premise network users and roaming users. The...	758
4	US20090178109	Authentication in a globally distributed infrastructure for secure content management Secure content management is enabled as a cloud-based service through which security protection and policy enforcement may be implemented for both on-premise network users and roaming users. The...	741
5	US20090177514	SERVICES USING GLOBALLY DISTRIBUTED INFRASTRUCTURE FOR SECURE CONTENT MANAGEMENT Secure content management is enabled as a cloud-based service through which security protection and policy enforcement may be implemented for both on-premise network users and roaming users. The...	722
6	US20050117576	Network access system including a programmable access device having distributed service control A distributed network access system in accordance with the present invention includes at least	697

		an external processor and a programmable access device. The programmable access device has a message...	
7	US20090119773	APPARATUS AND METHODS OF CONFIGURABLE SYSTEM EVENT AND RESOURCE ARBITRATION MANAGEMENT Methods, apparatus, and computer-readable media for management and arbitration of dedicated mobile communication resources for mobile applications are provided. Mobile applications can be given a...	432
8	8683073	Participating with and accessing a connectivity exchange Methods for integrating with and participating in a connectivity exchange are described herein. Service providers and users access the Internet via the exchange using one or more devices. These...	427
9	8238911	Apparatus and methods of configurable system event and resource arbitration management Methods, apparatus, and computer-readable media for management and arbitration of dedicated mobile communication resources for mobile applications are provided. Mobile applications can be given a...	404
10	US20100217837	MULTI-SERVICES APPLICATION GATEWAY AND SYSTEM EMPLOYING THE SAME An intelligent gateway device provided at a premises (home or business) for providing and managing application services associated with use and support of a plurality of digital endpoint devices...	380
11	8543665	Multi-services application gateway and system employing the same An intelligent gateway device provided at a premises (home or business) for providing and managing application services associated with use and support of a plurality of digital endpoint devices...	380
12	US20090017789	Point of presence on a mobile network A wireless device with a capacity for high bandwidth connectivity adapted to provide access to the Internet or other WAN for a single user or multiple concurrent users. The wireless access device...	181
13	7853647	Network agnostic media server control enabler Embodiments of the invention provide systems and methods for interacting with a media server on a network and/or protocol agnostic basis. According to one embodiment, a method for controlling a...	172
14	8081968	System for creating an air-to-ground IP tunnel in an airborne wireless cellular network to differentiate individual passengers The Aircraft Air-To-Ground IP Tunnel System provides wireless communication services to passengers located onboard an aircraft by storing data indicative of the individually identified passenger...	145
15	US20090010200	SYSTEM FOR CREATING AN AIR-TO-GROUND IP TUNNEL IN AN AIRBORNE WIRELESS CELLULAR NETWORK TO DIFFERENTIATE INDIVIDUAL PASSENGERS The Aircraft Air-To-Ground IP Tunnel System provides wireless communication services to passengers located onboard an aircraft by storing data indicative of the individually identified passenger...	145
16	8442060	Method and apparatus for providing signaling access Signaling-only access may be established with an access node under certain circumstances such as, for example, upon determining that a node is not authorized for data access at the access node. A...	126
17	US20090197570	PAGING AND ACCESS VIA DIFFERENT NODES Signaling-only access may be established with an access node under certain circumstances such as, for example, upon determining that a node is not authorized for data access at the access node. A...	126
18	8849316	Paging and access via different nodes Signaling-only access may be established with an access node under certain circumstances such as, for example, upon determining that a node is not authorized for data access at the access node. A...	126
19	US20090196221	METHOD AND APPARATUS FOR PROVIDING SIGNALING ACCESS Signaling-only access may be established with an access node under certain circumstances such as, for example, upon determining that a node is not authorized for data access at the access node. A...	126

20	US20080235354	NETWORK AGNOSTIC MEDIA SERVER CONTROL ENABLER Embodiments of the invention provide systems and methods for interacting with a media server on a network and/or protocol agnostic basis. According to one embodiment, a method for controlling a...	124
21	US20090186700	System and method for providing interactive content for multiple networked users in a shared venue using short messaging service communication Computer-implemented systems and methods supporting multiple networked users in a shared venue using short messaging service communication is described. In a particular embodiment, the system...	103
22	9067150	System and method for providing interactive content for multiple networked users in a shared venue using short messaging service communication Computer-implemented systems and methods supporting multiple networked users in a shared venue using short messaging service communication is described. In a particular embodiment, the system...	103
23	US20100099396	REMOTE CONTROL OF DEVICES UTILIZING A MOBILE NETWORK Providing for remote control of electronic devices at least in part utilizing a mobile radio access network (RAN) is disclosed herein. A control server is provided that can initiate an OTA message...	96
24	8909211	Remote control of devices utilizing a mobile network Providing for remote control of electronic devices at least in part utilizing a mobile radio access network (RAN) is disclosed herein. A control server is provided that can initiate an OTA message...	96
25	US20050101329	Apparatus and method for extending the coverage area of a licensed wireless communication system using an unlicensed wireless communication system Extending the coverage area of a licensed wireless communication system using an unlicensed communication system is described. In one embodiment, the system comprises a mobile station operable to...	76
26	7634269	Apparatus and method for extending the coverage area of a licensed wireless communication system using an unlicensed wireless communication system Extending the coverage area of a licensed wireless communication system using an unlicensed communication system is described. In one embodiment, the system comprises a mobile station operable to...	76
