Power Climber Wind supplies over 1,000 nacelle davits in North America

Thursday, 23 January 2014 12:27

In an effort to reduce potential technician fatigue and injury from manually carrying tools from the wind turbines' yaw deck to the nacelle, a customer reached out to Power Climber Wind in search of a solution.

The two engineering teams collaborated to design and build the nacelle davit. With a 250-lb capacity and optional chain or electric hoist, the nacelle davit improves technician safety and productivity. It complies with federal, local and state material.
