World's Best Scientists 2025 revealed! VIEW LIST

Best Computer Science Scientists

Data Sources for the 11th Edition of the Research.com Best Computer Science Scientists Ranking

The 11th edition of the Research.com Best Computer Science Scientists Ranking relies primarily on two leading bibliometric data sources: **OpenAlex** and **CrossRef**. In addition, a comprehensive array of supplementary data sources was incorporated to ensure the robustness and accuracy of the evaluation process. The bibliometric data used to devise citation-based metrics were collected on **2024-11-27**. Central to the ranking methodology is the **D-index (Discipline H-index)**, which exclusively considers a researcher's publications and citation metrics specific to the field of Computer Science. This discipline-focused approach enables a precise and equitable comparison among scholars within the domain.
