Match	Document	Document Title	Score
1	7920549	Method and system for providing secure media gateways to support interdomain traversal An approach provides interdomain traversal to support packetized voice transmissions. A signaling message is received for establishing a voice call from a first endpoint associated with a first...	1000
2	US20070019623	Method and system for providing secure media gateways to support interdomain traversal An approach provides interdomain traversal to support packetized voice transmissions. A signaling message is received for establishing a voice call from a first endpoint associated with a first...	962
3	8184641	Method and system for providing secure communications between proxy servers in support of interdomain traversal An approach provides interdomain traversal to support packetized voice transmissions. A request is received and specifies a directory number for establishing a communication session from a first...	885
4	US20070019622	Method and system for providing secure communications between proxy servers in support of interdomain traversal	849

An approach provides interdomain traversal to support packetized voice transmissions. A request is received and specifies a directory number for establishing a communication session from a first...

5	8018955	Providing dynamic changes to packet flows	788
6	8363664	Combined gateway for network communications	727
7	7706401	Method and system for providing interdomain traversal in support of packetized voice transmissions	725
8	US20040022237	Voice over data telecommunications network architecture	723
9	US20100039993	COMBINED GATEWAY FOR NETWORK COMMUNICATIONS	690

The functionalities of one or more of a mobility management entity (MME), serving gateway (SGW), and packet data network gateway (PGW) can be provided in a single device on the network. In the...

10	7564840	Voice over data telecommunications network architecture	690
----	---------	---	-----

The present invention describes a system and method for communicating voice and data over a packet-switched network that is adapted to coexist and communicate with a legacy PSTN. The system...

11	8411560	TCP selection acknowledgements for communicating delivered and missing data packets	678
----	---------	---	-----

One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...

12	US20060209794	Method and system for providing interdomain traversal in support of packetized voice transmissions	656
----	---------------	--	-----

An approach provides interdomain traversal to support packetized voice transmissions. A request for establishing a voice call is received from a source endpoint behind a first network address...

13	US20100220845	SYSTEMS AND METHODS FOR FACILITATING CONFERENCE CALLS USING SECURITY KEYS	653
----	---------------	---	-----

Systems and methods are described that facilitate a conference call between a plurality of communication devices. The method may comprise: providing a first primary communication device; providing...

14	8094647	System and method for providing requested quality of service in a hybrid network Telephone calls, data and other multimedia information is routed through a hybrid network which includes transfer of information across the internet. A media order entry captures complete user...	651
15	8290135	Systems and methods for facilitating conference calls using security keys Systems and methods are described that facilitate a conference call between a plurality of communication devices. The method may comprise: providing a first primary communication device; providing...	650
16	7630305	TCP selective acknowledgements for communicating delivered and missed data packets One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	649
17	US20100220634	SYSTEMS AND METHODS FOR FACILITATING CONFERENCE CALLS USING SECURITY TOKENS Systems and methods are described that for authenticating participants in a conference call. One method may include: providing a first primary communication device having a first security token...	644
18	US20100220635	SYSTEMS AND METHODS FOR FACILITATING CONFERENCE CALLS USING MULTIPLE MEDIA STREAMS Systems and methods are described that facilitate a conference call between a plurality of communication devices. The	643

method may comprise: providing a first primary communication device; providing...

19	8194646	System and method for providing requested quality of service in a hybrid network	632
Telephone calls, data and other multimedia information is routed through a hybrid network which includes transfer of information across the internet. A media order entry captures complete user...			
20	US20020064149	System and method for providing requested quality of service in a hybrid network	625
Telephone calls, data and other multimedia information is routed through a hybrid network which includes transfer of information across the internet. A media order entry captures complete user...			
21	8036214	Voice over data telecommunications network architecture	616
The present invention describes a system and method for communicating voice and data over a packet-switched network that is adapted to coexist and communicate with a legacy PSTN. The system...			
22	US20080095339	System and method for providing requested quality of service in a hybrid network	614
Telephone calls, data and other multimedia information is routed through a hybrid network which includes transfer of information across the internet. A media order entry captures complete user...			
23	US20090109959	System and method for providing requested quality of service in a hybrid network	614
Telephone calls, data and other multimedia information is routed through a hybrid network which includes transfer of			

information across the internet. A media order entry captures complete user...

24	US20100050040	TCP SELECTION ACKNOWLEDGEMENTS FOR COMMUNICATING DELIVERED AND MISSING DATA PACKETS	609
One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...			
25	US20020176404	Distributed edge switching system for voice-over-packet multiservice network	606
A network device including a plurality of communication interfaces, including a telephone line interface, a computer data interface, and a broadband network interface; a processor; a...			
26	8089958	Voice over data telecommunications network architecture	604
The present invention describes a system and method for communicating voice and data over a packet-switched network that is adapted to coexist and communicate with a legacy PSTN. The system...			
27	8085761	Voice over data telecommunications network architecture	603
The present invention describes a system and method for communicating voice and data over a packet-switched network that is adapted to coexist and communicate with a legacy PSTN. The system...			
28	6681232	Operations and provisioning systems for service level management in an extended-area data communications network	592
An automated service level manager (SLM)			

provides operations support for wide-area data communication services offered via regional IP-Over Ethernet on fiber networks. The SLM comprises a suite of...

29	6671364	System and method of triggering services for call control	589
		A system and method of facilitating server-based call processing services and call control may employ service triggers transported via a standard protocol. A service trigger may enable a service...	

30	US20080025294	VOICE OVER DATA TELECOMMUNICATIONS NETWORK ARCHITECTURE	586
		The present invention describes a system and method for communicating voice and data over a packet-switched network that is adapted to coexist and communicate with a legacy PSTN. The system...	

31	8417229	Systems and methods for facilitating transferring of conference calls using mobile communication devices	582
		Systems and methods for facilitating transferring of a conference call. In some embodiments, users of a secure mobile device may be provided with the ability to transfer a media session for use in...	

32	US20090129319	INTEGRATED WEB CACHE	577
		A gateway for mobile communications comprises a cache for storing network data recently downloaded from a network, a foreign agent, and a packet filter that directs requests for the network data...	

33	US20080025295	VOICE OVER DATA TELECOMMUNICATIONS NETWORK ARCHITECTURE	572
		The present invention describes a system	

and method for communicating voice and data over a packet-switched network that is adapted to coexist and communicate with a legacy PSTN. The system...

34	8238241	Automatic detection and window virtualization for flow control	568
One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...			
35	US20080013531	VOICE OVER DATA TELECOMMUNICATIONS NETWORK ARCHITECTURE	567
The present invention describes a system and method for communicating voice and data over a packet-switched network that is adapted to coexist and communicate with a legacy PSTN. The system...			
36	US20050063303	TCP selective acknowledgements for communicating delivered and missed data packets	562
One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...			
37	US20030185370	System and method of triggering services for call control	560
A system and method of facilitating server-based call processing services and call control may employ service triggers transported via a standard protocol. A service trigger may enable a service...			
38	US20040066925	System and method of triggering services for call control	559

A system and method of facilitating server-based call processing services and call control may employ service triggers transported via a standard protocol. A service trigger may enable a service...

39	US20040087304	Integrated web cache	558
A gateway for mobile communications comprises a cache for storing network data recently downloaded from a network, a foreign agent, and a packet filter that directs requests for the network data...			
40	7499401	Integrated web cache	556
A gateway for mobile communications comprises a cache for storing network data recently downloaded from a network, a foreign agent, and a packet filter that directs requests for the network data...			
41	7254224	System and method of triggering services for call control	554
A system and method of facilitating server-based call processing services and call control may employ service triggers transported via a standard protocol. A service trigger may enable a service...			
42	8537854	Method and system for providing interdomain traversal in support of packetized voice transmissions	552
An approach provides interdomain traversal to support packetized voice transmissions. A request for establishing a voice call is received from a source endpoint behind a first network address...			
43	7283519	Distributed edge switching system for voice-over-packet multiservice network	552
A network device including a plurality of			

communication interfaces, including a telephone line interface, a computer data interface, and a broadband network interface; a processor; a...

44	8289886	Systems and methods for facilitating transferring of conference calls using mobile communication devices	540
45	US20110217966	SYSTEMS AND METHODS FOR FACILITATING TRANSFERRING OF CONFERENCE CALLS USING MOBILE COMMUNICATION DEVICES	539
46	8174982	Integrated web cache	534
47	8310928	Flow control system architecture	529
48	7961712	System and method for supporting multiple voice channels	527

A communications system is configured with a plurality of media terminal adapters, a telephone line, and a gateway configured to exchange voice and data packets between a network and each of the...

49	8867719	Systems and methods for generating a calling list for a conference call	526
----	---------	---	-----

Systems and methods are described that facilitate the generation of calling lists for use in planning or setting up conference calls. The system may include a communications module and a contact...

50	US20100111279	Systems and Methods for Generating a Calling List For a Conference Call	524
----	---------------	---	-----

Systems and methods are described that facilitate the generation of calling lists for use in planning or setting up conference calls. The system may include a communications module and a contact...

51	7698453	Early generation of acknowledgements for flow control One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	512
52	US20110216674	SYSTEMS AND METHODS FOR FACILITATING TRANSFERRING OF CONFERENCE CALLS USING MOBILE COMMUNICATION DEVICES Systems and methods for facilitating transferring of a conference call. In some embodiments, users of a secure mobile device may be provided with the ability to transfer a media session for use in...	495
53	7656799	Flow control system architecture One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	493
54	8462630	Early generation of acknowledgements for flow control One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	491
55	7533174	Media gateway connection information recovery In a packet-based telephony network, a media gateway provides information on active media path connections to an active call server. For instance, this data may be provided to a backup call server...	491
56	8259729	Wavefront detection and disambiguation of acknowledgements One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	485

57	US20060146792	Voice over IP (VOIP) network infrastructure components and method A voice over Internet protocol communication system and method provides infrastructure components as intermediaries between networks, the components include multi-protocol session controllers and...	484
58	7983254	Method and system for securing real-time media streams in support of interdomain traversal An approach provides interdomain traversal packetized voice transmissions. A request is received from a first endpoint of a first domain for establishing a communication session with a second...	481
59	US20070217436	Methods and apparatus for centralized content and data delivery Methods and apparatus for centralized content, media and data delivery and access within a premises such as, e.g., a residence. In one embodiment, the apparatus comprises a remotely manageable...	469
60	US20070022289	Method and system for providing secure credential storage to support interdomain traversal An approach provides interdomain traversal to support packetized voice transmissions. A request is received from a first endpoint of a first domain for establishing a communication session with a...	468
61	7616638	Wavefront detection and disambiguation of acknowledgments One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	466
62	US20100189099	METHOD AND SYSTEM FOR PROVIDING INTERDOMAIN TRAVERSAL IN SUPPORT OF PACKETIZED VOICE TRANSMISSIONS An approach provides interdomain traversal to support packetized voice transmissions. A request for establishing a voice call is received from a source endpoint behind a first network address...	462
63	US20020006137	System and method for supporting multiple voice channels A communications system is configured with a plurality of media terminal adapters, a telephone line, and a gateway configured to exchange voice and data packets between a network and each of the...	456

64	US20100103819	FLOW CONTROL SYSTEM ARCHITECTURE One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	455
65	7778260	Method and apparatus for providing mobile and other intermittent connectivity in a computing environment A seamless solution transparently addresses the characteristics of nomadic systems, and enables existing network applications to run reliably in mobile environments. A Mobility Management Server...	451
66	7869425	System and method for providing requested quality of service in a hybrid network Telephone calls, data and other multimedia information is routed through a hybrid network which includes transfer of information across the internet. A media order entry captures complete user...	448
67	8194640	Voice over IP (VoIP) network infrastructure components and method A voice over Internet protocol communication system and method provides infrastructure components as intermediaries between networks, the components include multi-protocol session controllers and...	447
68	US20070019545	Method and system for securing real-time media streams in support of interdomain traversal An approach provides interdomain traversal packetized voice transmissions. A request is received from a first endpoint of a first domain for establishing a communication session with a second...	441
69	8233392	Transaction boundary detection for reduction in timeout penalties One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	432
70	US20020069037	System and method for measuring wireless device and network usage and performance metrics Systems and methods for measuring wireless device and wireless network usage and performance metrics are set forth. The system includes at least one wireless device, and data gathering software...	430

71	US20100046372	Wavefront Detection and Disambiguation of Acknowledgements One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	427
72	US20050063302	Automatic detection and window virtualization for flow control One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	425
73	US20100232294	EARLY GENERATION OF ACKNOWLEDGEMENTS FOR FLOW CONTROL One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	422
74	8347341	Methods and apparatus for centralized content and data delivery Methods and apparatus for centralized content, media and data delivery and access within a premises such as, e.g., a residence. In one embodiment, the apparatus comprises a remotely manageable...	417
75	US20090170557	SYSTEMS AND METHODS FOR ENABLING COMMUNICATION FEATURES UTILIZING VARIOUS BEARER MEDIA A client device capable of utilizing a plurality of media for facilitating communication. The plurality of media may include a first medium implemented based on a first set of communication...	407
76	US20100131659	Systems and Methods For Load Balancing Real Time Streaming The present application relates to systems and methods for managing of Real Time Stream Protocol (RTSP) sessions by an intermediary located between a client and a server. An intermediary located...	401
77	7724753	Digital home networks having a control point located on a wide area network A method of controlling and delivering media content from a media server (MS) to a media renderer (MR) utilizing a wide area IMS network for control. The method involves: provisioning a serving...	400

78	6754470	System and method for measuring wireless device and network usage and performance metrics Systems and methods for measuring wireless device and wireless network usage and performance metrics are set forth. The system includes at least one wireless device, and data gathering software...	396
79	US20050063307	Flow control system architecture One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	393
80	US20070110043	Distributed edge switching system for voice-over-packet multiservice network A network device including a plurality of communication interfaces, including a telephone line interface, a computer data interface, and a broadband network interface; a processor; a...	387
81	US20080098212	Downloadable security and protection methods and apparatus Methods and apparatus for control of data and content protection mechanisms across a network using a download delivery paradigm. In one embodiment, conditional access (CA), digital rights...	387
82	8520850	Downloadable security and protection methods and apparatus Methods and apparatus for control of data and content protection mechanisms across a network using a download delivery paradigm. In one embodiment, conditional access (CA), digital rights...	385
83	US20060123079	Mobile networking system and method A seamless solution transparently addresses the characteristics of nomadic systems, and enables existing network applications to run reliably in mobile environments. A Mobility Management Server...	370
84	7933295	Cable modem with voice processing capability A network gateway is configured to facilitate on line and off line bi-directional communication between a number of near end data and telephony devices with far end data termination devices via a...	369
85	US20020120760	Communications protocol A transactional protocol enabling messaging, call functions, personalized communication policies, presence, and address book capabilities. The protocol is used between subscriber clients (windows...	363

86	US20050060426	Early generation of acknowledgements for flow control One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	362
87	US20050074007	Transaction boundary detection for reduction in timeout penalties One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	360
88	US20050058131	Wavefront detection and disambiguation of acknowledgments One or more flow control modules, implemented on various types of network topologies, provide a number of functionalities for controlling the flow of IP packets (such as TCP/IP packets) over a...	360
89	8473617	Media client architecture for networked communication devices A media client for a networked communication device includes a user agent to communicate with a multimedia application in the networked communication device. The user agent provides a high-level...	360
90	7929464	Method and apparatus for anticipating and planning communication-center resources based on evaluation of events waiting in a communication center master queue A software application for recommending workforce resource allocation in a communication center based on requirements of events represented in a communication-center queue has a first interface...	357
91	7644171	Mobile networking system and method using IPv4 and IPv6 A method for communicating Internet Protocol data over a network, comprises providing an IPv4 data stream and providing an IPv6 data stream. An encrypted Internet Protocol communications tunnel is...	355
92	US20050041580	Method and apparatus for anticipating and planning communicaiton-center resources based on evaluation of events waiting in a communicaiton center master queue A software application for recommending workforce resource allocation in a communication center based on requirements of events represented in a communication-center queue has a first interface...	353

93	8135850	Systems and methods for load balancing real time streaming The present application relates to systems and methods for managing of Real Time Stream Protocol (RTSP) sessions by an intermediary located between a client and a server. An intermediary located...	351
94	US20030037113	Method and apparatus for anticipating and planning communication-center resources based on evaluation of events waiting in a communication center master queue A software application for recommending workforce resource allocation in a communication center based on requirements of events represented in a communication-center queue has a first interface...	351
95	6822945	Method and apparatus for anticipating and planning communication-center resources based on evaluation of events waiting in a communication center master queue A software application for recommending workforce resource allocation in a communication center based on requirements of events represented in a communication-center queue has a first interface...	351
96	US20020061012	Cable modem with voice processing capability A network gateway is configured to facilitate on line and off line bi-directional communication between a number of near end data and telephony devices with far end data termination devices via a...	350
97	US20090147772	SYSTEMS AND METHODS FOR PROVIDING PRESENCE INFORMATION IN COMMUNICATION A method for facilitating communication between at least a first user who uses a first device and a second user who uses a second device. The method may include associating possible device states...	348
98	US20060155814	Media client architecture for networked communication devices A media client for a networked communication device includes a user agent to communicate with a multimedia application in the networked communication device. The user agent provides a high-level...	348
99	US20060165060	Method and apparatus for managing credentials through a wireless network A novel system and methodology for conducting financial and other transactions using a wireless device. Credentials may be selectively issued by issuers such as credit card companies, banks, and...	328

100	US20060294244	Digital home networks having a control point located on a wide area network	322
		A method of controlling and delivering media content from a media server (MS) to a media renderer (MR) utilizing a wide area IMS network for control. The method involves: provisioning a serving...

106	US20110022812	SYSTEMS AND METHODS FOR ESTABLISHING A CLOUD BRIDGE BETWEEN VIRTUAL STORAGE RESOURCES Methods and systems for establishing a cloud bridge between two virtual storage resources and for transmitting data from one first virtual storage resource to the other virtual storage resource....	309
107	9209995	Presence status notification from digital endpoint devices through a multi-services gateway device at the user premises A gateway device for operation at a user premises to provide and manage application services provided for endpoint devices associated with the gateway device. The gateway device includes a...	303
108	US20060291412	Associated device discovery in IMS networks A method of associating multiple user endpoints (UEs) with a single IMS session in an IMS network having a serving node for controlling at least one IMS session for a user and at least a first...	302
109	US20110107379	METHODS AND APPARATUS FOR PACKETIZED CONTENT DELIVERY OVER A CONTENT DELIVERY NETWORK Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	300
110	7433954	Providing telephony services in a communications network A communications network includes packet-based networks that are coupled to various network elements. A method and apparatus is provided to implement telephony services in the communications...	297
111	US20090222907	DATA AND A COMPUTER SYSTEM PROTECTING METHOD AND DEVICE The process for protecting data and computer systems includes: a step of installing at least one software agent on at least one user workstation, a step of capturing, by the agent, information...	294
112	US20060009213	Method and apparatus for providing mobile and other intermittent connectivity in a computing environment A seamless solution transparently addresses the characteristics of nomadic systems, and enables existing network applications to run reliably in mobile environments. A Mobility Management Server...	289

113	US20050080905	Providing telephony services in a communications network	286
		A communications network includes packet-based networks that are coupled to various network elements. A method and apparatus is provided to implement telephony services in the communications...	
114	8516529	Methods and apparatus for packetized content delivery over a content delivery network	282
		Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	
115	7984073	System and method for providing service management in a distributed database system	280
		Embodiments of the present invention provide a system and method for service management in a distributed database environment. In general, embodiments of the present invention provide a service...	
116	7561586	Method and apparatus for providing network VPN services on demand	266
		A S-VPN gateway provides a signaling gateway to integrate SIP signaling and UNI/NNI signaling, and manage the mapping between SIP sessions and VPN connections. The mapping relationship reflects...	
117	US20050063411	Method and apparatus for providing network VPN services on demand	266
		A S-VPN gateway provides a signaling gateway to integrate SIP signaling and UNI/NNI signaling, and manage the mapping between SIP sessions and VPN connections. The mapping relationship reflects...	
118	US20110107364	METHODS AND APPARATUS FOR PACKETIZED CONTENT DELIVERY OVER A CONTENT DELIVERY NETWORK	262
		Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	
119	US20110179111	MIGRATING A WEB HOSTING SERVICE BETWEEN A ONE BOX PER CLIENT ARCHITECTURE AND A CLOUD COMPUTING ARCHITECTURE	262
		An automated tool for migrating a website hosting service from a first website hosting architecture to a second website hosting architecture, the first architecture comprising a server...	

120	9071552	Migrating a web hosting service between a one box per client architecture and a cloud computing architecture An automated tool for migrating a website hosting service from a first website hosting architecture to a second website hosting architecture, the first architecture comprising a server...	260
121	US20110179176	MIGRATING A WEB HOSTING SERVICE BETWEEN A ONE BOX PER CLIENT ARCHITECTURE AND A MULTIPLE BOX PER CLIENT ARCHITECTURE An automated tool for migrating a website hosting service from a first website hosting architecture to a second website hosting architecture, the first architecture comprising a server...	257
122	7068680	Communication service architectures for netcentric computing systems A communication services architecture for a netcentric computing system is disclosed by the present invention. The communication services architecture includes a communication services layer that...	257
123	8700729	Method and apparatus for managing credentials through a wireless network A novel system and methodology for conducting financial and other transactions using a wireless device. Credentials may be selectively issued by issuers such as credit card companies, banks, and...	254
124	US20110179175	MIGRATING A WEB HOSTING SERVICE FROM ONE ARCHITECTURE TO ANOTHER, WHERE AT LEAST ONE IS A COMMON SERVICE ARCHITECTURE An automated tool for migrating a website hosting service from a first website hosting architecture to a second website hosting architecture, one architecture comprising a server architecture that...	251
125	9531760	Methods and apparatus for packetized content delivery over a content delivery network Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	251
126	8078688	File sharing through multi-services gateway device at user premises A system for providing and managing file sharing services of one or more endpoint devices comprise a first interface for enabling bi-directional communications with one or more of the endpoint...	249

127	US20110034176	Methods and Systems for Content Processing Many of the detailed technologies are useful in enabling a smart phone to respond to a user's environment, e.g., so it can serve as an intuitive hearing and seeing device. A few of the detailed...	247
128	7058014	Method and apparatus for generating a large payload file Large payload files are selectively partitioned in blocks and the blocks distributed to a plurality of distribution stations at the edge of the network qualified to have the data. Each qualified...	245
129	US20110179102	COMMON SERVICE WEB HOSTING ARCHITECTURE WITH TICKETING WORKFLOW CRM A CRM system enables access to data for client and agent interactions with any component of an unaffiliated web domain hosting common service pool platform where the client and agent interactions...	242
130	US20020049841	Systems and methods for providing differentiated service in information management environments Methods and systems for providing differentiated service that may be employed, for example, to deliver content or services in a network environment. Differentiated services that may be so...	238
131	US20070153770	System and method for feature-based services control using SIP A system and method for feature-based service control using Session Initiation Protocol (SIP) in an Internet Protocol Automatic Branch Exchanges (IPABX) system is described. The system and method...	236
132	7978686	System and method for feature-based services control using SIP A system and method for feature-based service control using Session Initiation Protocol (SIP) in an Internet Protocol Automatic Branch Exchanges (IPABX) system is described. The system and method...	236
133	9098335	Systems and methods for managing spillover limits in a multi-core system The present disclosure is directed to a system for managing spillover via a plurality of cores of a multi-core device intermediary to a plurality of clients and one or more services. The system...	236

134	US20110179103	COMMON SERVICE WEB HOSTING ARCHITECTURE WITH CRM PLUS REPORTING A CRM system enables access to data for client and agent interactions with any component of an unaffiliated web domain hosting common service pool platform, wherein the CRM system includes a...	236
135	US20030231647	Method and apparatus for optimizing response time to events in queue A system for optimizing response time to events or representations thereof waiting in a queue has a first server having access to the queue; a software application running on the first server; and...	236
136	9288276	Application services infrastructure for next generation networks including a notification capability and related methods and computer program products A system for supporting a notification capability for a plurality of applications utilizing a next generation network having a network layer includes an application services middleware between the...	234
137	US20110179101	COMMON SERVICE WEB HOSTING ARCHITECTURE WITH UNIVERSAL COMPONENT ACCESS CRM A CRM system enables access to data for client and agent interactions with any component of an unaffiliated web domain hosting common service platform.	233
138	8935314	Common service web hosting architecture with CRM plus reporting A CRM system enables access to data for client and agent interactions with any component of an unaffiliated web domain hosting common service pool platform, wherein the CRM system includes a...	230
139	7181523	Method and apparatus for managing a plurality of servers in a content delivery network Large payload files are selectively partitioned in blocks and the blocks distributed to a plurality of distribution stations at the edge of the network qualified to have the data. Each qualified...	229
140	6970939	Method and apparatus for large payload distribution in a network Large payload files are selectively partitioned in blocks and the blocks distributed to a plurality of distribution stations at the edge of the network qualified to have the data. Each qualified...	229

141	7165095	Method and apparatus for distributing large payload file to a plurality of storage devices in a network Large payload files are selectively partitioned in blocks and the blocks distributed to a plurality of distribution stations at the edge of the network qualified to have the data. Each qualified...	229
142	8886206	Methods and systems for content processing Many of the detailed technologies are useful in enabling a smart phone to respond to a user's environment, e.g., so it can serve as an intuitive hearing and seeing device. A few of the detailed...	227
143	10264029	Methods and apparatus for packetized content delivery over a content delivery network Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	226
144	10104432	Methods and apparatus for software provisioning of a network device Methods and apparatus for provisioning or updating software over a network. In one embodiment, the network comprises a cable network, and each particular client device (e.g., set-top box) on the...	226
145	7929562	Method and apparatus for optimizing response time to events in queue A system for optimizing response time to events or representations thereof waiting in a queue has a first server having access to the queue; a software application running on the first server; and...	225
146	US20100071053	Presence Status Notification From Digital Endpoint Devices Through A Multi-Services Gateway Device At The User Premises A gateway device for operation at a user premises to provide and manage application services provided for endpoint devices associated with the gateway device. The gateway device includes a...	223
147	US20080134165	Methods and apparatus for software provisioning of a network device Methods and apparatus for provisioning or updating software over a network. In one embodiment, the network comprises a cable network, and each particular client device (e.g., set-top box) on the...	223

148	US20080056165	Method And Apparatus For Anticipating And Planning Communication-Center Resources Based On Evaluation Of Events Waiting In A Communication Center Master Queue A software application for recommending workforce resource allocation in a communication center based on requirements of events represented in a communication-center queue has a first interface...	222
149	7602782	Apparatus and method for intelligent routing of data between a remote device and a host system An apparatus and method is provided for transparent communication between a remote or mobile device and a fixed communication host network. The apparatus and method may include a remote network...	222
150	US20070100981	Application services infrastructure for next generation networks including one or more IP multimedia subsystem elements and methods of providing the same A system for supporting a plurality of different applications utilizing a next generation network having a network layer includes an application services middleware between the applications and...	220
