Matches 1 - 25 out of 25

Match	Document	Document Title	Score
1	US20020176404	Distributed edge switching system for voice-over-packet multiservice network A network device including a plurality of communication interfaces, including a telephone line interface, a computer data interface, and a broadband network interface; a processor; a...	1000
2	7283519	Distributed edge switching system for voice-over-packet multiservice network A network device including a plurality of communication interfaces, including a telephone line interface, a computer data interface, and a broadband network interface; a processor; a...	952
3	US20050273508	Method and apparatus for universally accessible command and control information in a network A method and system for performing a service on a home network, by: connecting a first and a second home device to the home network; providing a database including a plurality of application...	853
4	US20060146792	Voice over IP (VOIP) network infrastructure components and method A voice over Internet protocol communication system and method provides infrastructure components as intermediaries between networks, the components include multi-protocol session controllers and...	706
5	US20070110043	Distributed edge switching system for voice-over-packet multiservice network A network device including a plurality of communication interfaces, including a telephone line interface, a computer data interface, and a broadband network interface; a processor; a...	690

6	US20050063411	Method and apparatus for providing network VPN services on demand A S-VPN gateway provides a signaling gateway to integrate SIP signaling and UNI/NNI signaling, and manage the mapping between SIP sessions and VPN connections. The mapping relationship reflects...	673
7	8194640	Voice over IP (VoIP) network infrastructure components and method A voice over Internet protocol communication system and method provides infrastructure components as intermediaries between networks, the components include multi-protocol session controllers and...	673
8	7561586	Method and apparatus for providing network VPN services on demand A S-VPN gateway provides a signaling gateway to integrate SIP signaling and UNI/NNI signaling, and manage the mapping between SIP sessions and VPN connections. The mapping relationship reflects...	669
9	US20080098212	Downloadable security and protection methods and apparatus Methods and apparatus for control of data and content protection mechanisms across a network using a download delivery paradigm. In one embodiment, conditional access (CA), digital rights...	649
10	8473617	Media client architecture for networked communication devices A media client for a networked communication device includes a user agent to communicate with a multimedia application in the networked communication device. The user agent provides a high-level...	632
11	7724753	Digital home networks having a control point located on a wide area network A method of controlling and delivering media content from a media server (MS) to a media renderer (MR) utilizing a wide area IMS network for control. The method involves: provisioning a serving...	605
12	US20060155814	Media client architecture for networked communication devices A media client for a networked communication device includes a user agent to communicate with a multimedia application in the networked communication device. The user agent provides a high-level...	590

13	8520850	Downloadable security and protection methods and apparatus Methods and apparatus for control of data and content protection mechanisms across a network using a download delivery paradigm. In one embodiment, conditional access (CA), digital rights...	538
14	US20060149811	Method for remotely controlling media devices via a communication network A media client for a networked communication device includes a user agent to communicate with a multimedia application in the networked communication device. The user agent provides a high-level...	523
15	US20110107379	METHODS AND APPARATUS FOR PACKETIZED CONTENT DELIVERY OVER A CONTENT DELIVERY NETWORK Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	492
16	US20060291412	Associated device discovery in IMS networks A method of associating multiple user endpoints (UEs) with a single IMS session in an IMS network having a serving node for controlling at least one IMS session for a user and at least a first...	490
17	US20060294244	Digital home networks having a control point located on a wide area network A method of controlling and delivering media content from a media server (MS) to a media renderer (MR) utilizing a wide area IMS network for control. The method involves: provisioning a serving...	474
18	10264029	Methods and apparatus for packetized content delivery over a content delivery network Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	468
19	8516529	Methods and apparatus for packetized content delivery over a content delivery network Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	449

20	7467198	Architectures for netcentric computing systems An execution architecture, a development architecture and an operations architecture for a netcentric computing system. The execution architecture contains common, run-time services required when...	433
21	7020697	Architectures for netcentric computing systems An execution architecture, a development architecture and an operations architecture for a netcentric computing system. The execution architecture contains common, run-time services required when...	402
22	9531760	Methods and apparatus for packetized content delivery over a content delivery network Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	396
23	US20110107364	METHODS AND APPARATUS FOR PACKETIZED CONTENT DELIVERY OVER A CONTENT DELIVERY NETWORK Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	382
24	US20110103374	METHODS AND APPARATUS FOR PACKETIZED CONTENT DELIVERY OVER A CONTENT DELIVERY NETWORK Methods and apparatus for delivery of packetized content (e.g., video, audio, data, etc.) over a content delivery network. In one embodiment, the content is packetized using an Internet Protocol...	347
25	US20060059253	Architectures for netcentric computing systems An execution architecture, a development architecture and an operations architecture for a netcentric computing system. The execution architecture contains common, run-time services required when...	294
