Match	Document	Document Title	Score
1	6671713	Execution of dynamically configured application service in access method-independent exchange The present invention provides a virtual network, sitting "above" the physical connectivity and thereby providing the administrative controls necessary to link various communication devices via an...	1000
2	6779000	Access method with process interactive service The present invention provides a virtual network, sitting "above" the physical connectivity and thereby providing the administrative controls necessary to link various communication devices via an...	956
3	6421705	Service provider application program communicating with service provider application process The present invention provides a virtual network, sitting "above" the physical connectivity and thereby providing the administrative controls necessary to link various communication devices via an...	890
4	7246370	PDstudio design system and method A policy developer studio comprising: a meta-policy core of network objects, a policy developer graphical user interface (GUI) tool for providing a front end to a policy language, an output in...	858
5	US20030110192	PDstudio design system and method A policy developer studio comprising: a meta-policy core of network objects, a policy developer graphical user interface (GUI) tool for providing a front end to a policy language, an output in...	856
6	7535927	Subscription-based services The present invention provides a virtual network, sitting "above" the physical connectivity and thereby providing the administrative controls necessary to link various communication devices via an...	846

7	6922705	Access-method-independent exchange with communication request The present invention provides a virtual network, sitting “above” the physical connectivity and thereby providing the administrative controls necessary to link various communication devices via an...	810
8	US20090300192	Subscription-Based Services The present invention provides a virtual network, sitting “above” the physical connectivity and thereby providing the administrative controls necessary to link various communication devices via an...	756
9	US20070094597	DYNAMIC GRAPHICAL USER INTERFACE FOR A DESKTOP ENVIRONMENT A method, system, and apparatus are directed to providing a graphical user interface over a network. A first selection of a button within a taskbar at a client is detected. A local menu of...	709
10	US20090002178	DYNAMIC MOOD SENSING A system that facilitates personalized sensing is provided. The system includes a sensing component that determines one or more user states based in part on a detected context and a mood component...	675
11	6434568	Information services patterns in a netcentric environment A system, method, and article of manufacture are provided for implementing information services patterns associated with a relational database management system in an object-oriented persistence...	664
12	6578068	Load balancer in environment services patterns A system and method are provided for distributing incoming requests from a user interface amongst a client and server components for optimizing usage of resources. Incoming requests are first...	658
13	6546413	Access-method-independent exchange using a communication primitive The present invention provides a virtual network, sitting “above” the physical connectivity and thereby providing the administrative controls necessary to link various communication devices via an...	650
14	6332163	Method for providing communication services over a computer network system A system, method and article of manufacture are provided for implementing communication services patterns. A fixed format stream-based communication system is provided and service is delivered via...	627

15	7289964	<u>System and method for transaction services patterns in a netcentric environment</u> The present disclosure provides for implementing transaction services patterns. Logical requests are batched for reducing network traffic. A batched request is allowed to indicate that it depends...	627
16	US20060039354	<u>Systems and methods for client-side application-aware prioritization of network communications</u> The present invention is generally directed towards a remote access architecture for providing peer-to-peer communications and remote access connectivity. In one embodiment, the remote access...	606
17	US20090323516	<u>DIAGNOSING NETWORK PROBLEMS</u> The method collects configuration data about the network, compares it to known good configurations to see if a corrective configuration is available. In addition, the method will review known bad...	600
18	6601234	<u>Attribute dictionary in a business logic services environment</u> A system and method are provided for controlling access to data of a business object via an attribute dictionary. The attribute dictionary, which stores attribute names and values, is dispatched...	573
19	US20040254998	<u>When-free messaging</u> The present invention relates to systems and methods that mitigate the intrusiveness of communications between message senders and receivers while facilitating more courteous, seamless, and timely...	572
20	US20040031052	<u>Information platform</u> An inventive client/server system provides a platform for cable system operators to deliver a full range of sophisticated new products to cable television subscribers. Preferably a middleware...	569
21	US20100088696	<u>MOBILE WIRELESS COMMUNICATIONS SYSTEM PROVIDING DOWNLOADING AND INSTALLATION OF MOBILE DEVICE APPLICATIONS UPON REGISTRATION AND RELATED METHODS</u> A mobile wireless communication system is disclosed herein which may include an application server configured to provide at least one mandatory mobile device application. The system may further...	553

22	6289382	System, method and article of manufacture for a globally addressable interface in a communication services patterns environment A system, method, and article of manufacture are provided for delivering service via a globally addressable interface. A plurality of interfaces are provided with access allowed to a plurality of...	543
23	6438594	Delivering service to a client via a locally addressable interface A system, method, and article of manufacture are provided for delivering service via a locally addressable interface. A plurality of globally addressable interfaces and a plurality of locally...	507
24	7693817	Sensing, storing, indexing, and retrieving data leveraging measures of user activity, attention, and interest Various components and processes are provided to enable data processing on multiple data types where aspects of the history of user activity, attention, interest, location, or other interaction...	507
25	6502213	System, method, and article of manufacture for a polymorphic exception handler in environment services patterns A system, method and article of manufacture are provided for minimizing the amount of changes that need to be made to exception handling logic when new exceptions are added. Exceptions are...	503
26	6571282	Block-based communication in a communication services patterns environment A system and method are provided for transmitting data from a server to a client via blocks. A user query for a solution set is transmitted to a server, which is then used to query a database for...	503
27	6640249	Presentation services patterns in a netcentric environment A system, method and article of manufacture are provided for implementing presentation services patterns. Non-presentation logic executed on a client is assigned to an activity for allowing reuse...	497
28	US20070150810	Virtual desktop Virtual Desktop—Meta-Organization & Control System wherein a real-time-accessible memory media having at least one dynamic substantially cyclic electronic-data structure is associated (by an...	484

29	US20010034771	Network portal system and methods A network portal system includes a web-top manager and a universal content broker system. The web-top manager is configured to receive a content request from a user device, where the content...	482
30	7269664	Network portal system and methods A network portal system includes a web-top manager and a universal content broker system. The web-top manager is configured to receive a content request from a user device, where the content...	479
31	6477665	System, method, and article of manufacture for environment services patterns in a netcentric environment A system, method and article of manufacture are provided for implementing environment services patterns. First, a successfulness of an operation is tested, wherein the operation has pre-conditions...	478
32	6640244	Request batcher in a transaction services patterns environment A system and method are provided for batching logical requests for reducing network traffic. A group of business objects necessary for a transaction are provided and managed in a logical unit of...	475
33	6904460	Reverse content harvester The invention relates to gathering information for a networked directory. In one embodiment, a method for gathering information for a directory on a packet switched network is disclosed. In one...	454
34	6842906	System and method for a refreshable proxy pool in a communication services patterns environment A system and method are provided for interfacing a naming service and a client with the naming service allowing access to a plurality of different sets of services from a plurality of globally...	446
35	US20080198159	METHOD AND APPARATUS FOR EFFICIENT AND FLEXIBLE SURVEILLANCE VISUALIZATION WITH CONTEXT SENSITIVE PRIVACY PRESERVING AND POWER LENS DATA MINING The surveillance visualization system extracts information from plural cameras to generate a graphical representation of a scene, with stationary entities such as buildings and trees represented...	444

36	US20080160956	<u>METHOD AND SYSTEM FOR DELIVERING AND/OR DISPLAYING TARGETED CONTENT TO A MOBILE HANDHELD DEVICE</u> A method and system for delivering and displaying content on a mobile handheld device with voice telephony capability. Content is received from or on behalf of a content provider. For each...	440
37	6742015	<u>Base services patterns in a netcentric environment</u> A system and method are provided for providing base service patterns for use in a component-based architecture. A batch job pattern is provided for structuring batch components such that common...	439
38	6615253	<u>Efficient server side data retrieval for execution of client side applications</u> A system, method, and article of manufacture are provided for efficiently retrieving data. A total amount of data required for an application executed by a client is determined. In a single call,...	437
39	6636242	<u>View configurer in a presentation services patterns environment</u> A system, method and article of manufacture are provided for assigning a view to an activity. Notification is received that a startup event of an activity has occurred. A reference to a first...	432
40	US20060253548	<u>Method and system for hosting and executing a component application</u> A component application runtime environment is provided for executing component applications on a device comprising a native runtime environment for executing native applications. The component...	426
41	6640238	<u>Activity component in a presentation services patterns environment</u> A system, method, and article of manufacture provide for an activity module. A server and a presentation interface of a client are interfaced to permit the receipt of requests for service from the...	422
42	US20070016553	<u>Sensing, storing, indexing, and retrieving data leveraging measures of user activity, attention, and interest</u> Various components and processes are provided to enable data processing on multiple data types where aspects of the history of user activity, attention, interest, location, or other interaction...	422

43	7685224	Method for providing an attribute bounded network of computers An attribute bounded network of computers is created. Computers in the distributed computer network are identified by specific attributes (e.g., a geographically bounded region) and a server is...	419
44	6539396	Multi-object identifier system and method for information service pattern environment A system and method for implementing an association of business objects without retrieving said objects from a database on which they are stored. A business object in the business cache is...	407
45	7546602	Application program interface for network software platform An application program interface (API) provides a set of functions for application developers who build Web applications on Microsoft Corporation's .NET™ platform.	404
46	6094654	Data management system for file and database management A design control system suitable for use in connection with the design of integrated circuits and other elements of manufacture having many parts which need to be developed in a concurrent...	394
47	7522609	Propagation of minimum guaranteed scheduling rates among scheduling layers in a hierarchical schedule Methods, apparatus, data structures, computer-readable media, and mechanisms may include or be used with a hierarchy of schedules with propagation of minimum guaranteed scheduling rates among...	378
48	US20030058277	A VIEW CONFIGURER IN A PRESENTATION SERVICES PATTERNS ENVIROMENT A system, method and article of manufacture are provided for assigning a view to an activity. Notification is received that a startup event of an activity has occurred. A reference to a first...	375
49	6434628	Common interface for handling exception interface name with additional prefix and suffix for handling exceptions in environment services patterns A system, method and article of manufacture are provided for creating a common interface for exception handling. Naming conventions of exceptions are determined. A prefix and/or a suffix is added...	369

50	6088693	Data management system for file and database management	366
		A design control system suitable for use in connection with the design of integrated circuits and other elements of manufacture having many parts which need to be developed in a concurrent...
