Dear David,

The market for indoor mapping and indoor navigation expected to be a boom Soon

We pioneer and explorer that need long time ago.. from 2005

We have 30 patents (21 award) covering almost all the aspects of indoor navigation and indoor mapping long time before Apple or Google enter to this field and long before the introduction of the smart phone ..

We was there first .. in fact we own the indoor mapping . Com domain and the prestigious indoor navigation trade mark As well as indoor view trade mark and domain (in a contra to street view..) Mall view trade mark and domain a d more

(emergency and emergency locating) and we start getting bidding for our trade marks/ domains related to the indoor which can make the winning company the advantage and a proud owner of a strategic unique product which will be also the brand (rem the Frigidaire .. a product that become a brand..)of a market predict to be a booming !

Your company can sure be leading the market should you own our valuable assets.

If it interest you we can open a conversation

Please let me know

Thank you

Ehud (Udi) Mendelson
