

Company Profile

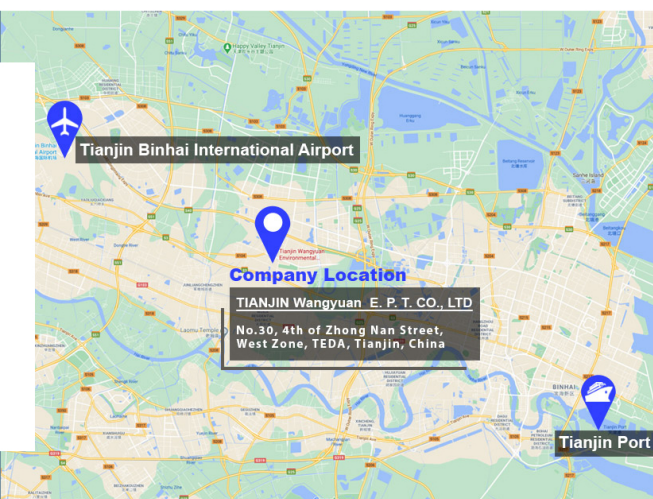

WYBOTICS CO., LTD
Winnie Cleaner

- Established in 2005 with registered capital of USD 10 million, our company occupies an area of 18 thousand m², including 2 thousand m² of 1 R & D Center and more than 10 thousand m² of 1 production base. Currently we have 6 production and assembly lines for **pool robots**, 1 injection workshop and 1 mould processing workshop with 1million of annual production capability. We have 300 employees including our own technical and development personnels.
- Our company is **China's first enterprise integrating R&D, production and sales of swimming pool cleaning robots**. It is also the only national high-tech enterprise in China that has a full range of cleaning robot products for above-ground and underground swimming pools, private and public swimming pools.
- Our company has a group of outstanding Chinese and French professional technical engineers and experienced technical personnel, as well as an elite management team led by a general manager who has been in France for many years. "**Forge ahead and continue to innovate**" is the company's development direction. Tianjin Wangyuan Environmental Protection Technology Co., Ltd. will continue to develop newer and more intelligent products to meet market needs.
