Subject: RE: base 3 solids
Attachments: drawings4.zip

Dear Eric,

Enclosed is the solid of the base . There are other drawings in the file since sometimes by removing one file I might invalidate the others. To have ease of insertion boxes are being made more bullet shaped so it is easier to get in. this might be a good idea for the spiked variation. You can do a google image search on "PLIF cage , bullet" PLIF is what the procedure is called.

I didn't mail the initial payment I will do it Monday.

Thanks,

Andy
