17. (Currently Amended) The method of claim 16 wherein the location of the communication connection is detected ~~includes~~ using one or more seat inputs.

18. (Currently Amended) The method of claim 17 wherein the one or more seat inputs ~~includes~~ include a wireless transceiver.

19. (Currently Amended) The method of claim 17 wherein the one or more seat inputs ~~includes~~ include at least one passenger detection sensor.

20. (Currently Amended) The method of claim 17 wherein the one or more
| seat inputs ~~includes~~ include a physical connection port address.

Remarks

Claims 1-20 are pending in this application, all of which now stand rejected. Claims 11, 12, and 15-20 have been amended to improve readability, not to change the scope of the claims. For at least the reasons presented herein, all claims are believed to be in condition for allowance. Favorable reconsideration and allowance are respectfully requested.

Claim Rejections – 35 USC § 103

Claims 1-20 were rejected under pre-AIA 35 U.S.C. §103(a) as being unpatentable over Chien (US 2013/0274997), in view of Bauer et al. (US 2008/0261643). Applicant respectfully disagrees and traverses the rejection.

Claim 1 recites, *inter alia*, “if it is determined that the at least one of a plurality of computing devices is a non-driver computing device, enable control to *adjust current infotainment settings* for the vehicle from the non-driver computing device; and if it is determined that the at least one of a plurality of computing devices is a driver computing device, enable a reduced amount of control as compared to the non-driver computing device to *adjust current infotainment settings* for the vehicle from the driver computing device.” The Examiner states that Chien discloses at least one of a plurality of computing devices is a non-driver computing device and enabling control to adjust current infotainment settings for the vehicle from the non-driver computing device. Chien does not disclose the claimed limitations for the following three reasons: 1) the in-vehicle electronic systems in Chien are dedicated systems, 2) Chien does not differentiate between a driver and non-driver computing device, and 3) the electronic devices in Chien do not control the in-vehicle electronic systems. Therefore, the Office Action lacks a clear articulation of the reasons why these features would allegedly have been obvious.

1) Chien discloses dedicated systems

For example, Chien discloses a proposed system of multiple in-vehicle electronic systems 201-204 inside a motor vehicle as stated in paragraph [0042]. The in-vehicle electronic

systems 201-204 are positioned throughout the vehicle cabin as shown in Figure 2:

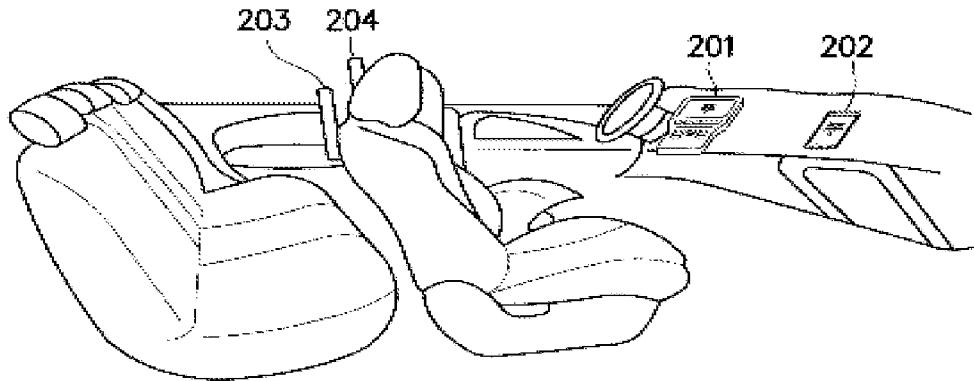

FIG. 2

Portable electronic devices can be plugged into each of the in-vehicle electronic systems 201-204. The in-vehicle electronic system is configured to restrict the control of the mobile electronic device if the role of the in-vehicle electronic system is positioned as the driver in-vehicle electronic system 201. The in-vehicle electronic system would not restrict the control of the mobile electronic device if the role of the in-vehicle electronic system is positioned as a passenger in-vehicle electronic system 202-204. That is, each of Chien's in-vehicle electronic systems 201-204 are programmed to restrict the control of the mobile device based upon its assigned role (and position) as stated in paragraph [0063]. The in-vehicle electronic systems in Chien are not a single infotainment system establishing communication with at least one of a plurality of computing devices. Chien is silent on the single infotainment system communicating with a driver and non-driver computing device.

2) Chien does not differentiate between a driver and non-driver computing device

As shown in Figure 2 above, Chien discloses in-vehicle electronic systems 201-204 that are programmed based on their assigned role in the vehicle. Chien does not disclose the in-vehicle electronic system determining whether or not the portable electronic device belongs to a driver or non-driver. Chien is silent on the single infotainment system determining if the at least one of a plurality of computing devices is a driver or non-driver computing device.

3) Chien does not disclose computing devices controlling the in-vehicle electronic systems

Additionally, Chien states that when a portable electronic device 301 is connected to an in-vehicle electronic system 302 (also referenced as 201-204 in Figure 2), the in-vehicle electronic system 302 would be switched to a remote viewing mode and would interact with the mobile electronic device 301 as stated in paragraph [0043] and shown in Figure 3A:

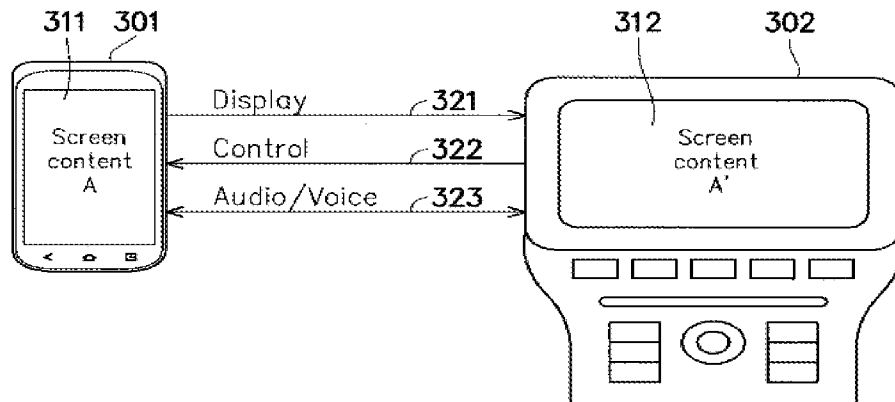

FIG. 3A

The interaction with the mobile electronic device 301 and the in-vehicle electronic system 302 includes a display interface 321, a control interface 322, and an audio/voice interface 323. Through the display interface 321, the mobile electronic device 301 transfers displayed content of its touch screen 311 to the touch screen 312 of the in-vehicle electronic system 302 such that the screen content of the in-vehicle electronic system 302 could be a mirror image of the screen content of the mobile electronic device 301 as stated in paragraph [0044]. As illustrated in Figure 3A, the in-vehicle electronic system 302 controls 322 the mobile electronic device 301. The in-vehicle electronic system display 312 mirroring the mobile electronic device screen 311 is not a single infotainment system receiving adjusted current infotainment settings from a computing device. Chien does not disclose at least one of a plurality of computing devices adjusting current infotainment settings for the vehicle.

In contrast, the Applicant claims a non-driver and driver computing device to adjust current infotainment settings for the vehicle as shown in Figure 4 below:

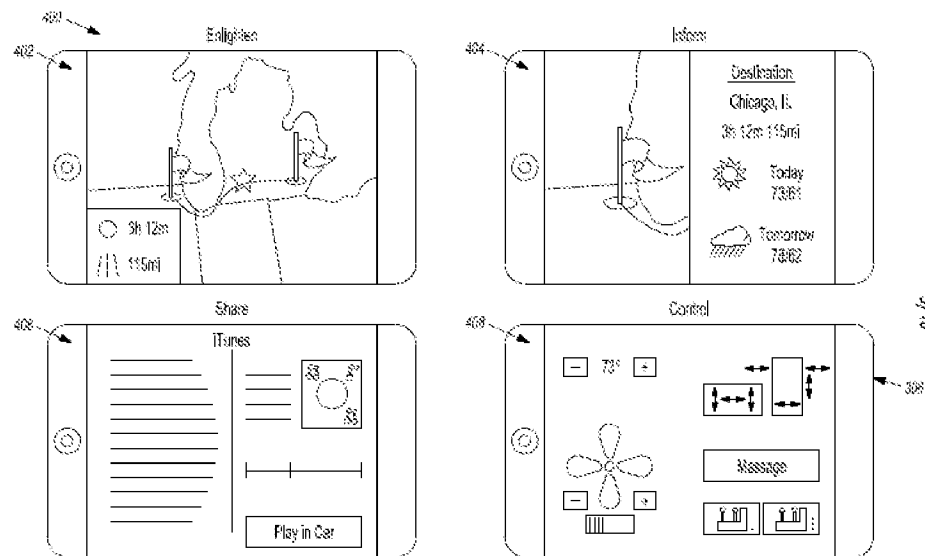

Fig-4

The driver and non-driver computing device 400 may include control of infotainment features including navigation directions 402, destination information 404, music selection 406, and vehicle climate controls 408. Chien does not disclose a driver and non-driver computing device controlling infotainment features. Additionally, Bauer does not cure the noted deficiencies of Chien. Put a different way, the §103 rejection cannot be supported per the requirements set forth by the MPEP. Further, because the Office Action failed to establish a *prima facie* case of obviousness, any rejection in a subsequent Office Action providing adequate reasoning(s) would be presented for the first time on the record, and, as such, a subsequent Office Action cannot be made final.

Claims 9 and 16 recite the limitations of claim 1, therefore, should be allowed based on the analysis above.

Claims 2-8, 10-15 and 17-20 are allowable based at least on dependency from allowable claims 1, 9 and 16, respectively.

Conclusion

Applicant has made a genuine effort to respond to each of the Examiner's objections and rejections in advancing the prosecution of this case. Applicant believes that all formal and substantive requirements for patentability have been met and that this case is in condition for allowance, which action is respectfully requested. If any additional issues need to be resolved, the Examiner is invited to contact the undersigned at his/her earliest convenience.

Please charge any fees or credit any overpayments as a result of the filing of this paper to our Deposit Account No. 06-1510.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.
